As described in its March 1, 2002 Notice of Regional Teleconferences and Due Dates for Comments and Reply Comments, the Commission's staff and ICF Consulting will conduct regional teleconferences with members of Industry and the Public on March 18 and 19, 2002. The purpose of the teleconferences is to discuss the results of the RTO Cost Benefit Report and assist interested persons in preparing comment on the report which are due on April 9, 2002. Reply comments are due April 23, 2002.

To participate in the teleconferences, all interested persons must call 1–888–593–9820, within 15 minutes of the scheduled time of the each teleconference. Please provide the operator with your name, the code word for the specific teleconference, and the contact name as listed below. In order to facilitate discussion, it will be more efficient if persons from one organization or group call in on one telephone line. The teleconferences will be transcribed and transcripts will be placed in the appropriate dockets.

Industry and Public Teleconferences

1. Monday, March 18—10 a.m. to 12 p.m. EST. Code Word: MIDWEST. Contact: Ed Meyers.
2. Monday, March 18—2 p.m. to 4 p.m. EST. Code Word: SOUTHEAST. Contact: Ed Meyers.
3. Tuesday, March 19—10 a.m. to 12 p.m. EST. Code Word: NORTHEAST. Contact: Ed Meyers.
4. Tuesday, March 19—2 p.m. to 4 p.m. EST. Code Word: WESTERN. Contact: Ed Meyers.

If you have questions about the teleconferences, please contact one of the persons below.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Regulations Governing Off-the-Record Communications; Public Notice

March 8, 2002.

This constitutes notice, in accordance with 18 CFR 385.2201(h), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or a prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such requests only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication should serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of exempt and prohibited off-the-record communications received in the Office of the Secretary within the preceding 14 days. Copies of this filing are on file with the Commission and are available for public inspection. The documents may be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

Docket No.	Date filed	Presenter or requester
1. CP01–176–000	03–05–02	Richard Gilda.
2. CP01–176–000	03–05–02	Barbara E. Brenner.
3. CP01–176–000	03–05–02	Michael Kaufman.
4. Project No. 2342	03–06–02	James H. Hulbert.
5. CP01–361–000	03–08–02	Yvonne Dettlaff, *et al.*
6. CP01–439–000	03–08–02	Annette Paynter.

Magalie R. Salas,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FR–FRL–6627–5]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202 564–7167. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated May 18, 2001, (66 FR 27647).

Draft EISs

ERP No. D–BLM–L65391–OR Rating EC2, Lakeview Resource Management Plan, Unified Land Use Plan to Replace All or Portions of Three nearly Twenty Year Old Existing Land Use Plans, Implementation, Lake and Bend Counties, OR.

Summary: EPA expressed environmental concerns about lack of information on the management of noxious weeds, impacts to water and air quality and roads, and protection of tribal interests. EPA requested that these issues be fully addressed in the final EIS.

Final EISs

ERP No. F–AFS–G65076–OK, Quachita National Forest, An Amendment to the Land and Resource Management Plan, Implementation, Glover River, McCurtain County, OK.

Summary: EPA has no objection to the selection of the preferred alternative, Alternative C.

ERP No. F–AFS–J65349–UT, Griffin Springs Resource Management Project, Implementation, Commercial Timber Ha:vesting, Aspen Regeneration, Management Ignited Prescribed Fire and Road Work, Dixie National Forest, Escalante Ranger District, Garfield County, UT.

Summary: EPA continues to express environmental concerns that there was no scientific evidence presented for the use of thinning to prevent a spruce beetle epidemic and regarding the attempt to segregate travel management analysis and decisions from site-specific project decisions.

ERP No. F–NRC–J00031–UT, Skull Valley Band of Goshute Indians Reservation Project, Construction and Operation of Independent Spent Fuel Storage Installation and Related Transportation Facilities, Permits and Approvals, Tooele County, UT.

Summary: EPA continues to have environmental concerns with the emergency response procedures and the characterization of Clean Water Act Requirements. EPA requested that these concerns be addressed in the Record of Decision.

ERP No. F–USN–K11033–CA, El Toro Marine Corps Air Station Disposal and Reuse, Recommendation and Approval of an Airport Layout Plan for Civilian Airport, Funding, NPDES Permit, Orange County, CA.

Summary: No formal comment letter was sent to the preparing agency.

ERP No. F–USN–K11105–CA, Point Molate Property Naval Fuel Depot (NFD) for the Disposal and Reuse, Implementation, Fleet and Industrial Supply Center, City of Richmond, Contra Costa County, CA.

Summary: No formal comment letter was sent to the preparing agency.

ERP No. FC–NRC–A00164–00, Generic—License Renewal of Nuclear Power Plants, Supplement 5, Turkey Point Units 3 and 4 (NUREG–1437), Operating License Renewal, Biscayne Bay, Miami-Dade County, FL.

Summary: EPA continues to have environmental concerns about the project, Specifically noise impacts to nearby Biscayne National Park merit further discussion as the project progresses.

Dated: March 12, 2002.

Joseph C. Montgomery,

Director, NEPA Compliance Division, Office of Federal Activities.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7159–4]

Office of Emergency and Remedial Response Availability of Superfund Annual Report to Congress; Progress Toward Implementing Superfund Fiscal Year 1998

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This document announces the availability of the Agency's Progress Toward Implementing Superfund: Fiscal Year 1998, which is required by section 301(h) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986. The Report to Congress contains information on overall progress, and includes the following categories of information specifically required by section 301(h) of CERCLA: Feasibility studies, remedial and enforcement actions; an evaluation of newly developed and feasible permanent treatment technologies; progress in reducing the number of facilities subject to review under section 121(c) of CERCLA; and an estimate of resources needed by the Federal Government to complete CERCLA's implementation. The Report also includes information required by section 105(f) of CERCLA about the participation of minority firms in Superfund contracting; and the EPA Inspector General audit report required by section 301(h)(3) of CERCLA.

ADDRESSES: Published copies of the Report may be purchased by the public from the National Technical Information Service (NTIS) at 5285 Port Royal Road, Springfield, VA, 22161 (call 703–487–4650). Electronic copies of the Report may be downloaded from EPA's Web site, *http://www.epa.gov/superfnd/oerr/accomp/index.htm#reptocong.*

FOR FURTHER INFORMATION CONTACT: David Reynolds, Office of Emergency and Remedial Response (5204G), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 or 703–603–9026 or *reynolds.david@epa.gov.*

Dated: March 7, 2002.

Michael H. Shapiro,

Deputy Assistant Administrator, Office of Solid Waste and Emergency Response.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

March 4, 2002.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a current valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before March 14, 2002. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Les Smith, Federal Communications Commission, Room 1–A804, 445 12th Street, SW., Washington, DC 20554, or via the Internet to *lesmith@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s) contact Les Smith at 202–418–0217 or via the Internet at *lesmith@fcc.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0068.

Title: Application for Consent to Assign an Experimental Authorization.

Form Number: FCC 702.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents: 10.

Estimated Time per Response: 0.6 hr. (36 mins.).

Frequency of Response: On occasion reporting requirements.

Total Annual Burden: 6 hrs.

Total Annual Costs: $500.

Needs and Uses: In November 2001, the FCC revised and reinstated FCC Form 702. The Communications Act of 1934, as amended, and 47 CFR 5.59 of FCC Rules require applications for Experimental Radio Services to submit FCC Form 702 when the legal right to control the use and operation of a station is to be transferred as a result of a voluntary act (contract or other agreement) or an involuntary act (death or legal disability) of the grantee of a station authorization or by involuntary assignment of the physical property constituting the station under a court decree in bankruptcy proceedings, or other court order, or by operation of law in any other manner. Form 702's revisions were the following: (1) The expiration date was deleted; (2) Section 1 (Fee Portion) was deleted; (3) questions 2, 4, 7b, 7c, 9, 10, 13–19, and 12c–26 were removed; (4) the **FOR FCC USE ONLY** fields were removed; (5) assignor's and assignee's e-mail address fields were added; (6) a field for "FCC Registration Number (FRN)" was added; (7) the instructions pertaining Section I (Fee Portion) were removed; (8) the "No. of Stations" and "Service" columns were deleted (9) the item numbers were changed; (10) instructions referring to FCC Forms 159 and 160 were added; (11) an Internet URL for the FCC Registration Number (FRN) was added; (12) the Experimental Radio Service address was added; (13) the courier address changed.

OMB Control Number: 3060–0072.

Title: Airborne Mobile Radio Telephone License Application.

Form Number: FCC 409.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 260.

Estimated Time per Response: 5 mins. (0.083 hrs.).

Total Annual Burden: 22 hours.

Total Annual Cost: $13,000.

Needs and Uses: Individuals who intend to become subscribers to a common carrier service use FCC Form 409 to apply for, to modify, and/or to renew their license(s) giving them authority to operate an airborne mobile radio telephone. In recent years, the number of respondents has declined dramatically.

OMB Control Number: 3060–0139.

Title: Application for Antenna Structure Registration.

Form Number: FCC 854 and FCC 854R.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households; Business or other for-profit; Non-Profit Institutions; and state, local, or tribal government.

Number of Respondents: 9,000.

Estimated Time per Response: 30 Minutes.

Total Annual Burden: 6,750 hours.

Total Annual Costs: $182,000.

Needs and Uses: Owners of wire or radio communications towers with antenna structures use FCC Form 854 to register their structures within the United States, to notify the Commission when a structure has been built, to make changes to an existing registered structure, or to notify the Commission when a structure is dismantled. 47 CFR part 17 and sections 303(q) and 503(b)(5) of the Communications Act, as amended, authorize the FCC to require the painting and/or illumination of radio towers where there is a reasonable possibility that an antenna structure may cause a hazard to air navigation. The FCC uses FCC Form 854R to notify an owner that the Commission has registered the tower structure, its modification, or the change of ownership.

OMB Control Number: 3060–0707.

Title: Over-the-Air Reception Devices.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: State, local, or tribal government; Individuals or households.

Number of Respondents: 320.

Estimated Time per Response: 2 to 6 hours.

Frequency of Response: On occasion reporting requirements.

Total Annual Burden: 1,240 hours.

Total Annual Costs: $144,280.

Needs and Uses: The FCC uses petitions for waivers of Section 207 rules to determine whether the state, local, or non-governmental regulation or restriction is unique in a way that justifies waiver of our rules prohibiting restrictions of the use of over-the-air reception devices.

OMB Control Number: 3060–0669.

Title: Section 76.946, Advertising of Rates.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents: 10,400.

Estimated Time per Response: 30 mins. (0.5 hrs.).

Frequency of Response: Recordkeeping; On occasion reporting requirements; Third party disclosure.

Total Annual Burden: 5,200 hours.

Total Annual Costs: None.

Needs and Uses: Under 47 CFR 76.946 of FCC Rules, cable operators that advertise for basic service and cable programming service tiers are required to advertise rates that include all costs and fees. Cable systems that cover multiple franchise areas, having differing franchise fees or other franchise costs, different channel line-ups, or different rate structures, may advertise a complete range of fees without specific identification of the rate for each individual area. In such circumstances, the operator may advertise a "fee plus" rate that indicates the core rate plus the range of possible additions, depending upon the particular location of the subscriber. This requirement is to make consumers aware of all fees associated with basic service and cable programming service tier rates.

OMB Control Number: 3060–0795.

Title: Associate WTB Call Signs and Antenna Registration Numbers with Licensee's FRN.

Form Number: FCC 606.

Type of Review: Revision to a currently approved collection.

Respondents: Business or other for-profit entities; Individuals or households; Not-for-profit institutions; State, local, or tribal government.

Number of Respondents: 429,000.

Estimated Time per Response: 1 hour.

Total Annual Burden: 429,000 hours.

Total Annual Costs: None.

Needs and Uses: Licensees use FCC Form 606 to associate their FCC Registration Number (FRN) with their Wireless Telecommunications Bureau call signs and antenna structure registration numbers. In addition, those antenna structure tenant licensees subject to the Anti-Drug Abuse Act of 1998 must use Form 606 to register their antenna structures. The form must be submitted before filing any subsequent applications associated with the existing license or antenna structure registration and prior to applying for an initial Wireless Telecommunications license or antenna structure registration. The Commission is revising FCC Form 606 and its instructions to remove information about the TIN registration requirements (including the title of the form) due to the implementation of the Commission Registration System (CORES) and to facilitate compliance with the Debt Collection Improvement Act of 1996 (DCIA).

OMB Control Number: 3060–0862.

Title: Handling Confidential Information, GC Docket No. 96–55.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit; Not-for-profit institutions; Federal Government; State, Local or Tribal Government.

Number of Respondents: 600.

Estimated Time per Response: 1 to 3 hours.

Total Annual Burden: 800 hours.

Total Annual Costs: $23,000.

Needs and Uses: On August 4, 1998, the FCC released *a Report and Order, Examination of Current Policy Concerning the Treatment of Confidential Information Submitted to the Commission (R&O)* in GC Docket No. 96–55. The R&O included a Model Protective Order (MPO) that is used, when appropriate, to grant limited access to information that the Commission determines should not be routinely available for public inspection. The party granted access to the confidential information materials must keep a written record of all copies made and provide this record to the submitter of the confidential materials on request. The approach was adopted to facilitate the use of confidential materials under an MPO, instead of restricting access to materials. In addition, the FCC amended 47 CFR 0.459(b) to set forth the type of information that should be included when a party submits information to the Commission for which it seeks confidential treatment. This listing of the types of information to be submitted was adopted to provide guidance to the public for confidentiality requests.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

March 7, 2002.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments May 14, 2002. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Judy Boley Herman, Federal Communications Commission, 445 12th Street, SW., Room 1–C804, Washington, DC 20554 or via the Internet to *jbherman@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Judy Boley Herman at 202–418–0214 or via the Internet at *jbherman@fcc.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0243.

Title: Section 74.551, Equipment Changes.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit.

Number of Respondents: 1.

Estimated Time Per Response: 1 hour.

Total Annual Burden: 1 hour.

Annual Reporting and Recordkeeping Cost Burden: $0.

Frequency of Response: On occasion reporting requirement.

Needs and Uses: Section 74.551(b) requires licensees of aural broadcast studio transmitter links (STL) or intercity relay stations to notify the Commission in writing of minor changes that can be made without prior Commission authorization upon completion of such changes. The data is used by FCC staff to assure that the changes made comply with FCC rules and regulations.

OMB Control No.: 3060–0245.

Title: Section 74.537, Temporary Authorizations.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit.

Number of Respondents: 12.

Estimated Time Per Response: 2 hours.

Total Annual Burden: 21 hours.

Annual Reporting and Recordkeeping Cost Burden: $0.

Frequency of Response: On occasion reporting requirement.

Needs and Uses: Section 74.537 requires licensees of an aural broadcast studio transmitter link (STL) or intercity relay station to file an informal request for special temporary authorization for operations of a temporary nature. The data is used by FCC staff to insure that the temporary operation of a STL or intercity relay station will not cause interference to existing stations.

OMB Control No.: 3060–0290.

Title: Section 90.517, Report of Operation.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit, state, local or tribal government.

Number of Respondents: 100.

Estimated Time Per Response: 2 hours.

Total Annual Burden: 200 hours.

Annual Reporting and Recordkeeping Cost Burden: $0.

Frequency of Response: On occasion reporting requirement.

Needs and Uses: Section 90.517 provides developmental authorizations that are usually employed licensees who wish to test and develop new use of radiocommunications facilities. Each such developmental licensee must report upon termination of development, or application for license renewal, specific information evaluating the usefulness of previous or desired continued operation of such a system. Commission personnel use the data to evaluate the need for renewal of the applicant's authorization. This information is also used by policy-making personnel to decide the desirability of instituting rulemaking proceedings involving new technologies or new uses of the radio spectrum.

OMB Control No.: 3060–0434.

Title: Section 90.207(e)(6), Stolen Vehicle Recovery System Requirements.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit.

Number of Respondents: 20.

Estimated Time Per Response: 4 hours.

Total Annual Burden: 80 hours.

Annual Reporting and Recordkeeping Cost Burden: $0.

Frequency of Response: On occasion reporting requirement.

Needs and Uses: Applications for base stations operating on a particular frequency shall require coordination with the Federal Government. Applicants shall perform an analysis for each base station located with 169 km (105 miles) of a TV channel 7 transmitter of potential interference to TV channel 7 viewers. Applicants will have to certify to certain requirements set out in rule section 90.20(e)(6).

OMB Control No.: 3060–0537.

Title: Section 13.217, Records.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit.

Number of Respondents: 15.

Estimated Time Per Response: 1 hour.

Total Annual Burden: 15 hours.

Annual Reporting and Recordkeeping Cost Burden: $0.

Frequency of Response: Recordkeeping requirement.

Needs and Uses: Each COLEM recovering fees from examinees must maintain records of expenses and revenues, frequency of examinations administered, and examination pass rates. Records must cover the period from January 1 to December 31 of the preceding year and must be submitted as directed by the Commission. Each COLEM must retain records for 1 year and the records must be made available to the FCC upon request.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

[Docket No. 98–14]

Shipping Restrictions, Requirements and Practices of the People's Republic of China

AGENCY: Federal Maritime Commission.

ACTION: Notice of inquiry.

SUMMARY: The Federal Maritime Commission is seeking comments from the shipping public on current laws, rules, and policies of the Government of the People's Republic of China that appear to have an adverse impact on U.S. shipping, and which may merit Commission attention under section 19 of the Merchant Marine Act, 1920 or the Foreign Shipping Practices Act of 1988. The Commission is seeking information on the impact of new Chinese legislation on U.S. oceanborne trade, as well as the effects of that legislation on a number of existing Chinese practices and restrictions. Interested parties, including shippers, transportation intermediaries, vessel operators and others in the shipping industry, are invited to comment.

DATES: Comments due on or before June 13, 2002.

ADDRESSES: Send comments (original and 20 copies) to: Bryant L. VanBrakle, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001. (202) 523–5725.

FOR FURTHER INFORMATION, CONTACT: David R. Miles, Acting General Counsel, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001. (202) 523–5740.

SUPPLEMENTARY INFORMATION:

Background

This proceeding was initiated on August 12, 1998, to gather information regarding certain apparently restrictive laws, rules and regulations of the People's Republic of China ("PRC" or "China") in order to determine if further Commission action under section 19 of the Merchant Marine Act, 1920 or the Foreign Shipping Practices Act of 1988 was warranted.[1] In its effort to continue to monitor the issues identified in this proceeding, the Commission, by this Notice of Inquiry is inviting affected parties to comment on the effects of recent changes in Chinese law.

The Commission has learned that the PRC recently issued a new law, "Regulations of the PRC on the International Maritime Transportation," which became effective January 1, 2002,[2] and is expected very soon to promulgate implementing regulations addressing requirements for operators in international shipping generally. It appears that this new law and regulations may significantly affect the Commission's review of the potentially restrictive practices that existed prior to January 1, 2002. Therefore, through this Notice of Inquiry, and Information Demand Orders to be formulated as appropriate, the Commission seeks to ensure that it has the most accurate information with regard to these issues, so that it may in turn determine whether any current Chinese laws, rules, regulations or practices merit the initiation of a proceeding under section 19 of the Merchant Marine Act, 1920 ("Section 19"), or the Foreign Shipping Practices Act of 1988 ("FSPA").

The Commission has received expressions of concern regarding the new Chinese legislation from several sources. These include the U.S. Government Executive Branch agencies with responsibilities affecting transportation policy and the conduct of negotiations with foreign governments as well as organizations representing shippers and ocean transportation intermediaries ("OTIs") operating or seeking to provide shipping and shipping-related services in the U.S. trade with China.

A. Comments From Intermediaries

Concerns about the new Chinese shipping legislation were raised in a March 4, 2002 letter to Brucė J. Carlton, Acting Deputy Maritime Administrator, (with copies to the Commission) from the National Customs Brokers and Forwarders Association of America ("NCBFAA"), a trade association of ocean freight forwarders and non-vessel-operating common carriers ("NVOCCs"): NCBFAA states that "U.S. intermediary and shipper interests will be directly and discriminatorily affected in an adverse manner."

NCBFAA expresses specific concerns regarding the effects of Chinese law on the ability of its members to do business in China, including possibly conflicting and confusing requirements for direct ownership and control of NVOCC businesses and separate Chinese incorporation of foreign NVOCCs; the required maintenance of substantial funds in Chinese banks (rather than bonding or insurance); provisions governing the filing of rates, waiting periods for rate changes and the confidentiality of service contract rates (which may subject NVOCCs to requirements inconsistent with recently

[1] Section 19 of the Merchant Marine Act, 1920, 46 U.S.C. app. § 876, authorizes and directs the Commission, inter alia, to "make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade * * * which arise out of or result from foreign laws, rules, or regulations or from competitive methods or practices employed by owners, operators, agents, or masters of vessels of a foreign country. * * *."

The Foreign Shipping Practices Act of 1988, 46 U.S.C. app. § 1710a, authorizes the Commission to investigate whether any laws, rules, regulations, policies, or practices of foreign governments, or any practices of foreign carriers or other persons providing maritime or maritime related services in a foreign country result in the existence of conditions that (1) adversely affect the operations of United States carriers in the United States oceanborne trade; and (2) do not exist for foreign carriers of that country in the United States under the laws of the United States or as a result of acts of United States carriers or other persons providing maritime or maritime-related services in the United States. If the Commission determines that such adverse conditions exist, it may take actions including limitations on sailings, suspension of tariffs, suspension of agreements, or fees not to exceed $1,000,000 per voyage.

[2] The law is in the form of a Decree promulgated by the State Council of the PRC on December 5, 2001, signed by Prime Minister Zhu Rong Ji, which was published on December 21, 2001 and became effective on January 1, 2002.

amended U.S. laws); and the required use of vouchers prepared by Chinese tax authorities to invoice customers in China. NCBFAA identifies other matters as to which the new Chinese law is ambiguous, including whether the PRC intends to regulate rate levels and which entities will be subject to such rate regulation, and the mandatory or other status of rate-fixing conferences, discussion agreements, and capacity fixing agreements.

B. The Executive Agencies

On March 1, 2002, Maritime Administrator William G. Schubert wrote Chairman Harold J. Creel, Jr., expressing concern that the new law may restrict the operations not only of shipping companies, but also of shippers and OTIs. The Administrator further indicates that he has made these concerns known to the Chinese government, and that he has sought clarification on the law and the suspension of the effectiveness of any implementing regulations pending an opportunity to discuss the impact they may have with the Government of the PRC. The Maritime Administration has now announced that a U.S. government delegation will meet with PRC authorities in Beijing March 19–22, 2002 to obtain clarification about the meaning and impact of the Decree and any related implementing regulations.

Discussion and Request for Comments

It appears that U.S. OTIs, carriers and other providers of transportation services may face serious restrictions in obtaining the necessary licenses and permissions to do business in China. Indeed, it appears that wholly foreign-owned NVOCCs continue to be completely barred from engaging in a number of commercial activities, such as offering through transportation as an NVOCC. Other types of services may be permitted, but only if a foreign firm enters a joint venture with a Chinese entity.

The Commission is seeking to establish a clear record of what types of services U.S. NVOCCs or ocean freight forwarders, as those terms are defined by the Shipping Act of 1984, are now permitted to perform in China, what activities are prohibited, what requirements or prerequisites are imposed and what, if any, detrimental effects these requirements and prohibitions have on U.S. companies seeking to do business in China. It would be most useful for the Commission to receive comments describing, in detail, what types of ocean transportation intermediary activities are permitted under Chinese law in effect since January 1, 2002; what are prohibited; and in what situations joint ventures or similar arrangements are required.

The Commission, in order to determine how the new Chinese laws, rules, regulations, policies and/or practices will affect its consideration of whether further Commission action under section 19 or the Foreign Shipping Practices Act may be merited, is now collecting information on the following specific areas.

1. General

Individual companies' accounts of their efforts, successful or otherwise, to establish operations in China, and their dealings with Chinese authorities, would be especially useful. Any supporting documentation would be welcomed. The Commission also seeks to determine the effects on shippers of any such restrictions; that is, will the Chinese law in effect since January 1, 2002 as it is applicable to non-Chinese ocean transportation intermediaries and vessel operators, have any effects on shippers' ability to secure efficient and economical intermodal transportation services in U.S. oceanborne commerce? The Commission would welcome comments from any carrier, shipper, or other party on the details or effects of these issues.

2. Licensing Requirements

The Commission has concerns about apparent new Chinese requirements for the licensing of vessel operators, non-vessel operators, international ocean freight forwarders, shipping agency operators and ship management operators. It is not clear whether there continue to be nationality-or investment-based limitations on a company's ability to obtain certain types of transportation business licenses in China or what the criteria are by which licenses can be withheld or denied, and what, if any, appeal rights applicants enjoy. The Commission would welcome comments from any carrier, shipper, or other party that could shed light on these practices and their effects on U.S.-China oceanborne trade.

3. Branch Offices and Multimodal Transport Operations

It appears that after January 1, 2002, non-Chinese vessel operators continue to face a number of restrictions on operating and increasing the number of the branch offices they may operate in China. For the branch offices that do exist, it appears that there may continue to be serious restrictions on their operations, both in terms of the geographic area they may serve and the scope of services they may offer. A number of these may be the same as, or similar to, the restrictions faced by NVOCCs and freight forwarders in China. Apparently, there are certain narrowly prescribed business areas in which non-Chinese vessel operators are now allowed to operate; however, it remains unclear just what those are as a result of the new Chinese law that went into effect on January 1, 2002.

We are particularly concerned that there may continue to be restrictions that seriously limit vessel operators' and ocean transportation intermediaries' ability to offer multimodal transportation services in China. The Commission requires more information on such restrictions on vessel operators' and ocean transportation intermediaries' branch office or multimodal operations.

4. Rate Filing Requirements

It appears that the new Chinese legislation may require vessel operators and NVOCCs to file the rates they charge customers for carriage to and from China. Please describe the Chinese ministry or regulatory body with whom you must file these matters, how they are filed, and what types of review or analysis of the rates are made by the relevant authority. Describe whether there are any mechanisms to protect the confidentiality of service contract rates. Please also describe what action may be taken by the relevant authority upon a finding that the rate in question does not meet regulatory criteria.

5. Ocean Transportation Intermediaries

What conditions, requirements or restrictions are placed on OTI activities? [3] What types of licenses are required, and what restrictions are placed on their issuance? Who issues the necessary licenses and permissions, and what are the legal standards and procedures for granting them? What are the capital investment or deposit requirements to obtain such a license? Also, what commercial partners are available in China for joint ventures, and under what commercial conditions? If your company had already been doing OTI operations in China prior to January 1, 2002, please describe how your ability to do business in China has been affected, if at all, by the new Chinese law effective that day. Are there nationality or investment-based differences? If your company has sought a license to do these types of activities since January 1, 2002, please describe that process, including the criteria, requirements and procedure for obtaining a license, whether there are any limitations on the type of license your company may obtain, and the Chinese government authority(ies) to whom applications must be submitted or from which approvals must be sought.

[3] *E.g.*, arranging inland or ocean transportation, preparing documentation and issuing bills of lading, consolidation, warehousing, cargo agency, and logistics services.

Now Therefore, It is ordered, that this Notice of Inquiry be published in the **Federal Register.**

By the Commission.*

Bryant L. VanBrakle,

Secretary.

BILLING CODE 6730–01–P

FEDERAL MARITIME COMMISSION

[Docket No. 02–04]

Anchor Shipping Co. v. Alianca Navegacao e Logistica LTDA.; Notice of Filing of Complaint and Assignment

Notice is given that a complaint has been filed with the Federal Maritime Commission ("Commission") by Anchor Shipping Co. ("Complainant") against Alianca Navegacao E Logistica Ltda. ("Alianca").

Complainant contends that Alianca engaged in a number of activities in connection with a service contract which violated sections 10(a)(2), 10(a)(3), 10(b)(3) and 10(c)(1) of the Shipping Act of 1984 ("Shipping Act") and injured the Complainant.

Complainant asks that Alianca be compelled to answer its charges and that the Commission issue an order commanding Alianca to cease and desist from these violations; to establish and put in force such practices the Commission determines to be lawful and reasonable; to pay Complainant $1,000,000 in reparations, with interest and attorney's fees, or such other sum as the Commission may determine to be proper as an award of reparation; and such other further order as the Commission determines proper. Complainant requests that hearing be held in Miami, FL.

This proceeding has been assigned to the office of Administrative Law Judges. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61, and only after consideration has been given by the parties and the presiding officer to the use of alternative forms of dispute resolution. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the presiding officer in this proceeding shall be issued by March 13, 2003, and the final decision of the Commission shall be issued by July 11, 2003.

Bryant L. VanBrakle,

Secretary.

BILLING CODE 6730–01–P

*Commissioner John A. Moran is not participating.

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: Notice is hereby given of the final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.16 (OMB Regulations on Controlling Paperwork Burdens on the Public). Board –approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the OMB83–Is and supporting statements and approved collection of information instrument(s) are placed into OMB's public docket files. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer–Mary M. West–Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3829). OMB Desk Officer–Alexander T. Hunt–Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202–395–7860)

SUPPLEMENTARY INFORMATION:

Final approval under OMB delegated authority of the implementation of the following report:

1. Report title: Intermittent Survey of Businesses
Agency form number: FR 1374
OMB control number: 7100–0302
Frequency: Biweekly and semiannually
Reporters: Purchasing managers, economists, or other knowledgeable individuals at business firms
Annual reporting hours: 125 hours
Estimated average hours per response: 15 minutes
Number of respondents: biweekly, 10; semiannually, 120
Small businesses are affected.
General description of report: This information collection is voluntary (12 U.S.C. §§ 225a, 263, and 15 U.S.C. §1691b) and is given confidential treatment (5 U.S.C. 552(b)(6)).
Abstract: The proposed survey would be used by the Federal Reserve to gather information that would be specifically tailored to the Federal Reserve's policy and operational responsibilities. It is necessary to conduct the survey biweekly to keep up with the rapidly changing developments in the economy and to provide timely information to staff and Board members. Usually, the surveys would be conducted by staff economists telephoning purchasing managers, economists, or other knowledgeable individuals at selected, relevant businesses. The content of the questions and the businesses contacted would vary depending on changing developments in the economy.

Final approval under OMB delegated authority of the extension for three years, with revision, of the following reports:

1. Report title: Notification of Foreign Branch Status
Agency form number: FR 2058
OMB control number: 7100–0069
Frequency: on occasion
Reporters: member banks, bank holding companies, Edge and agreement corporations
Annual reporting hours: 38 hours
Estimated average hours per response: 15 minutes
Number of respondents: 150
Small businesses are not affected.
General description of report: This information collection is mandatory (12 U.S.C. 321, 601, 602, 615, and 1844(c)) and is not given confidential treatment.
Abstract: Member banks, bank holding companies, and Edge and agreement corporations are required to notify the Federal Reserve System of the opening, closing, or relocation of an foreign branch. The notice requires information

on the location and extent of service provided by the branch and is filed within thirty days of the change in status. The Federal Reserve System needs the information to fulfill supervisory responsibilities specified in Regulation K, including the supervision of foreign branches of U.S. banking organizations. The information is needed in order to evaluate the organization's international exposure and to update the Federal Reserve's structure files on U.S. banking organizations.

Regulation K, "International Banking Operations," sets forth the conditions under which a foreign branch may be established. According to the final rule on Regulation K, published in the **Federal Register** on October 26, 2001 (66 FR 54345), organizations must give thirty days prior notice to the Board before the establishment of branches in the first two foreign countries. For subsequent branch establishments into additional foreign countries, organizations must give the Federal Reserve System twelve days prior written notice. The FR K–1, "International Application and Prior Notifications Under Subparts A and C of Regulation K" (OMB No. 7100–0107) will be used for these notices. Organizations use the FR 2058 notification to notify the Federal Reserve when any of these branches has been opened, closed, or relocated.

Current Actions: The revisions include adding the location of the reporting institution and the subsidiary and a few minor technical clarifications.

2. Report title: International Applications and Prior Notifications under Subparts A and C of Regulation K

Agency form number: FR K–1
OMB control number: 7100–0107
Frequency: on occasion
Reporters: state member banks, national banks, bank holding companies, Edge and agreement corporations, and certain foreign banking organizations
Annual reporting hours: 695 hours
Estimated average hours per response: Attachments A and B, 11.5 hours; Attachments C through G, 10 hours; Attachments H and I, 15.5 hours; Attachment J, 10 hours; Attachment K, 20 hours
Number of respondents: 39
Small businesses are not affected.
General description of report: This information collection is mandatory (12 U.S.C. 601–604(a), 611–631, 1843(c)(13), 1843(c)(14), and 1844(c)) and is not given confidential treatment. The applying organization has the opportunity to request confidentiality for information that it believes will qualify for a Freedom of Information Act exemption.

Abstract: The FR K–1 comprises a set of applications and notifications that govern the formation of Edge or agreement corporations and the international and foreign activities of U.S. banking organizations. The applications and notifications collect information on projected financial data, purpose, location, activities, and management. The Federal Reserve requires these applications for regulatory and supervisory purposes and to allow the Federal Reserve to fulfill its statutory obligations under the Federal Reserve Act and the Bank Holding Company Act of 1956.

Current Actions: The changes incorporate revisions to Regulation K, published in the **Federal Register** on October 26, 2001, which became effective November 26, 2001 (66 FR 54345). Technical changes to each of the existing attachments conform with the new regulatory language. One new attachment was included for applications by U.S. banking organizations to invest in excess of 10 percent of capital and surplus in Edge corporations. This change is necessary as a result of The Economic Growth and Regulatory Paperwork Reduction Act of 1996. In addition, the Federal Reserve added certain new items, which are often requested after the application has been filed. Finally, several items that are no longer relevant have been deleted from the attachments.

3. Report title: Consolidated Financial Statements for Bank Holding Companies
Agency form number: FR Y–9C
OMB control number: 7100–0128
Effective Date: March 31, 2002
Frequency: Quarterly
Reporters: Bank holding companies
Annual reporting hours: 252,675 hours
Estimated average hours per response: 33.98 hours
Number of respondents: 1,859
Small businesses are affected.
General description of report: This information collection is mandatory (12 U.S.C. 1844(b) and (c)). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form.

Abstract: The FR Y–9C consists of standardized consolidated financial statements similar to the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports of Condition and Income (Call Reports) (FFIEC 031 & 041; OMB No.7100–0036). The FR Y–9C is filed quarterly by top–tier bank holding companies that have total assets of $150 million or more and by lower–tier bank holding companies that have total consolidated assets of $1 billion or more. In addition, multibank holding companies with total consolidated assets of less than $150 million with debt outstanding to the general public or engaged in certain nonbank activities must file the FR Y–9C.

Current Actions: On December 21, 2001, the Board published proposed changes to this reporting form and the comment period ended on February 19, 2002 (66 FR 65964). There were no public comments received. The Board has approved the proposed changes effective with the March 31, 2002, reporting date with the following changes:

- modify certain aspects of the proposal relating to the reporting of federal funds transactions and securities resale/repurchase agreements; and
- modify Schedule HC–R, Regulatory Capital, so that the capital calculations in this schedule are consistent with amended regulatory capital standards. These changes parallel the modified revisions to the March 31, 2002, Call Reports, recently adopted by the FFIEC and are discussed in further detail below.

Federal Funds Transactions and Securities Resale/Repurchase Agreements

As indicated above, the Federal Reserve originally proposed to separate the existing balance sheet (Schedule HC) items for "Federal funds sold and securities purchased under agreements to resell" and for "Federal funds purchased and securities sold under agreements to repurchase" into two asset and two liability items. This proposed change was parallel to a proposed change for the commercial bank Call Report for March 31, 2002. As proposed, the reporting of amounts as "Federal funds sold" (the asset item) and "Federal funds purchased" (the liability item) would have been based on the longstanding definition of "federal funds transactions," i.e., the lending and borrowing of immediately available funds for one business day or under a continuing contract, regardless of the nature of the contract or of the collateral, if any. Under this definition, securities resale/repurchase agreements involving the receipt of immediately available funds that mature in one business day or roll over under a continuing contract are considered federal funds transactions.

As a result of comments received on the proposal for the commercial bank Call Report revisions, the FFIEC and the agencies decided to modify the original proposal. The agencies decided to revise the definition of "federal funds transactions." As revised, federal funds sold and purchased would be limited to transactions in domestic offices only and would not include:

- any securities resale/repurchase agreements,
- overnight Federal Home Loan Bank advances, or
- lending and borrowing transactions in foreign offices involving immediately available funds with an original maturity of one business day or under a continuing contract.

Lending and borrowing transactions in foreign offices involving immediately available funds with an original maturity of one business day or under a continuing contract that are not securities resale/repurchase agreements will begin to be reported in "Loans and leases, net of unearned income" and "Other borrowed money," respectively. The Federal Reserve decided to adopt the same modifications for the FR Y–9C.

Regulatory Capital

On November 29, 2001, the agencies published a final rule revising the regulatory capital treatment of recourse arrangements and direct credit substitutes, including residual interests and credit–enhancing interest–only strips, as well as asset–backed and mortgage–backed securities (66 FR 59613). This final rule took effect on January 1, 2002. Any transactions settled on or after that date are subject to the rule. However, for transactions settled before January 1, 2002, that result in increased capital requirements under the final rule, banks may delay the application of the final rule to those transactions until December 31, 2002. In response to this final rule and comparable changes on the commercial bank Call Reports, the Federal Reserve is revising the instructions for reporting these types of exposures in Schedule HC–R, Regulatory Capital, so that the capital calculations in this schedule are consistent with the amended regulatory capital standards.

4. Report title: Parent Company Only Financial Statements for Large Bank Holding Companies
Agency form number: FR Y–9LP
OMB control number: 7100–0128
Effective Date: March 31, 2002
Frequency: Quarterly
Reporters: Bank holding companies
Annual reporting hours: 40,495 hours
Estimated average hours per response: 4.55 hours
Number of respondents: 2,225
Small businesses are affected.
General description of report: This information collection is mandatory (12 U.S.C. 1844(b) and (c)). Confidential treatment is not routinely given to the data in this report. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form.

Abstract: The FR Y–9LP includes standardized financial statements filed quarterly on a parent company only basis from each bank holding company that files the FR Y–9C. In addition, for tiered bank holding companies, a separate FR Y–9LP must be filed for each lower tier bank holding company.

Current actions: On December 21, 2001, the Board published proposed changes to this reporting form and the comment period ended on February 19, 2002 (66 FR 65964). There were no public comments received. The Board has approved the proposed changes to the FR Y–9LP, as originally described, effective with the March 31, 2002, reporting date.

5. Report title: Parent Company Only Financial Statements for Small Bank Holding Companies
Agency form number: FR Y–9SP
OMB Control number: 7100–0128
Effective Date: June 30, 2002
Frequency: Semiannual
Reporters: Bank holding companies
Annual reporting hours: 28,273 hours
Estimated average hours per response: 3.89 hours
Number of respondents: 3,634
Small businesses are affected.
General description of report: This information collection is mandatory (12 U.S.C. 1844(b) and (c)). Confidential treatment is not routinely given to the data in this report. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form.

Abstract: The FR Y–9SP is a parent company only financial statement filed on a semiannual basis by one–bank holding companies with total consolidated assets of less than $150 million, and multibank holding companies with total consolidated assets of less than $150 million that meet certain other criteria. This report, an abbreviated version of the more extensive FR Y–9LP, is designed to obtain basic balance sheet and income statement information for the parent company, information on intangible assets, and information on intercompany transactions.

Current actions: On December 21, 2001, the Board published proposed changes to this reporting form and the comment period ended on February 19, 2002 (66 FR 65964). There were no public comments received. The Board has approved the proposed changes to the FR Y–9SP, as originally described, effective with the June 30, 2002, reporting date.

6. Report title: Supplement to the Consolidated Financial Statements for Bank Holding Companies
Agency form number: FR Y–9CS
OMB control number: 7100–0128
Effective Date: March 31, 2002
Frequency: on occasion
Reporters: Bank holding companies
Annual reporting hours: 1,200 hours
Estimated average hours per response: 0.50 hour
Number of respondents: 600
Small businesses are affected.
General description of report: This information collection is mandatory (12 U.S.C. 1844(b) and (c)). The Federal Reserve considers the information on the current version of the report form confidential pursuant to the Freedom of Information Act (5 U.S.C. 554(b)(4)), except for item 4.

Abstract: The FR Y–9CS is a free form supplement that may be utilized to collect any additional information deemed to be critical and needed in an expedited manner. It is intended to supplement the FR Y-9C and FR Y–9SP reports. Due to the enactment of the GLB Act in 1999, the current version of this supplement was implemented in 2000 to collect basic information about the new activities of FHCs.

Current actions: On December 21, 2001, the Board published proposed changes to this reporting form and the comment period ended on February 19, 2002 (66 FR 65964). There were no public comments received. The Board has approved the proposed changes to the FR Y–9CS, as originally described, effective with the March 31, 2002, reporting date.

Board of Governors of the Federal Reserve System, March 12, 2002.

Jennifer J. Johnson

Secretary of the Board.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal

Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 1, 2002.

A. Federal Reserve Bank of Kansas City (Susan Zubradt, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. R.H. Krumme Testamentary Trust, Tulsa, Oklahoma; Diane Krumme Cox, Sands Springs, Oklahoma, both individually and as co-trustee of the R.H. Krumme Testamentary Trust; and Jill Krumme Burns, Tulsa, Oklahoma, both individually and as co-trustee of the R.H. Krumme Testamentary Trust, to retain voting shares of Falcon Bancorp, Inc., Anadarko, Oklahoma, and thereby retain voting shares of Anadarko Bank & Trust Company, Anadarko, Oklahoma.

Board of Governors of the Federal Reserve System, March 12, 2002.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750–01–M

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0252]

Proposed Collection Preparation, Submission, and Negotiation of Subcontracting Plans

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Notice for public comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the General Services Administration, Office of Acquisition Policy will submit to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement concerning the Preparation, Submission, and Negotiation of Subcontracting Plans. This information collection will ensure that small and small disadvantaged business concerns are afforded the maximum practicable opportunity to participate as subcontractors in construction, repair, and alteration or lease contracts. Preparation, Submission, and Negotiation of Subcontracting Plans requires all negotiated solicitations having an anticipated award value over $500,000 ($1,000,000 for construction), submission of a subcontracting plan with other than small business concerns when a negotiated acquisition meets all four of the following conditions:

(1) When the contracting officer anticipates receiving individual subcontracting plans (not commercial plans),

(2) When the award is based on trade-offs among cost or price and technical and/or management factors under FAR 15.101–1,

(3) The acquisition is not a commercial item acquisition, and

(4) The acquisition offers more than minimal subcontracting opportunities.

Public comments are particularly invited on: Whether the information collection generated by the GSAR Clause, Preparation, Submission, and Negotiation of Subcontracting Plans is necessary for small business/subcontracting plans; whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

DATES: *Comment Due Date:* May 14, 2002.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to Stephanie Morris, General Services Administration, Acquisition Policy Division, 1800 F Street, NW., Room 4035, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Rhonda Cundiff, Office of Acquisition Policy (202) 501–0044.

SUPPLEMENTARY INFORMATION:

A. Purpose

The General Services Administration will be requesting that the Office of Management and Budget (OMB) review and approve information collection, 3090–0252, concerning the Preparation, Subcommission, and Negotiation of Subcontracting Plans. This provision requires a contractor (except other than small business concerns) to submit a subcontracting plan when a negotiated acquisition including construction, repair, and alterations and lease contracts (except those solicitations using simplified procedures) meets all four of the following conditions:

When the contracting officer anticipates receiving individual subcontracting plans (not commercial plans), when award is based on trade-offs among cost or price and technical and/or management factors under FAR 15.101–1, the acquisition is not a commercial item acquisition, and the acquisition offers more than minimal subcontracting opportunities.

B. Annual Reporting Burden

Respondents: 1,020.

Annual responses: 1.

Average hours per response: 12.

Burden hours: 12,240.

Obtaining copies of proposals: Requester may obtain a copy of the proposal from the General Services Administration, Regulatory Secretariat (MVP), 1800 F Street, NW., Room 4035, Washington, DC 20405, telephone (202) 501–4744. Please cite OMB Control No. 3090–0252, Preparation, Submission, and Negotiation of Subcontracting Plans.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Information Collection Activities: Submission for OMB Review; Comment Request

The Department of Health and Human Services, Office of the Secretary publishes a list of information collections it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) and 5 CFR 1320.5. The following are those information collections recently submitted to OMB.

1. State Studies on TANF Caseload—NEW—The Assistant Secretary for Planning and Evaluation has developed a common TANF beneficiary survey instrument to be administered by five states and the District of Columbia through cooperative agreements. This data collection will provide information on the characteristics, barriers to employment and service needs of the TANF caseload. *Respondents:* Individuals; *Number of Respondents:* 6,640; *Average Burden per Response:* .66 hours; *Total Burden:* 4,378 hours.

OMB Desk Officer: Allison Herron Eydt.

Copies of the information collection packages listed above can be obtained by calling the OS Reports Clearance Officer on (202) 690–6207. Written comments and recommendations for the proposed information collection should be sent directly to the OMB desk officer designated above at the following address: Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street, NW., Washington, DC 20503.

Comments may also be sent to Cynthia Agens Bauer, OS Reports Clearance Officer, Room 503H, Humphrey Building, 200 Independence Avenue, SW., Washington, DC. 20201. Written comments should be received within 30 days of this notice.

Dated: February 28, 2002.

Kerry Weems,

Acting Deputy Assistant Secretary, Budget.

BILLING CODE 4154–05–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Privacy Act of 1974: Revision to Existing System of Records

AGENCY: Child Care Subsidy Program, Office of the Assistant Secretary for Administration and Management, Office of the Secretary, HHS.

ACTION: Notice of revision to an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Department of Health and Human Services (HHS) is publishing a notice of the revision of an existing system of records, 09–09–2000, child Care Subsidy Program. The revised system will collect family income data from employees in the Centers for Disease Control and Agency for Toxic Substances and Disease Registry (CDC/ATSDR), as well as the Health Resources and Services Administration, the Food and Drug Administration (FDA), the Program Support Center (PSC), the Office of the Secretary (OS), the Administration on Aging (AoA), and the Substance Abuse and Mental Health Services Administration (SAMHSA) who are already covered by this system, for the purpose of determining their eligibility for child care subsidies, and the amounts of the subsidies. It also will collect information from the employees' child care provider(s) for verification purposes, e.g., that the provider is licensed. Collection of data will be by subsidy application forms submitted by employees.

DATES: This revision does not revise the routine uses for this system. This amendment will be effective without further notice on the day of its publication unless comments are received which would result in a contrary determination.

FOR FURTHER INFORMATION CONTACT: Child Care Subsidy Program Administrator, Office of Human Resources, Office of the Assistant Secretary for Administration and Management, U.S. Department of Health and Human Services, Room 536–E, 200 Independence Ave., SW., Washington, DC 20201. The telephone number is 202–690–6191.

SUPPLEMENTARY INFORMATION: The current Notice of System of Records covered only employees of OS, AoA, HRSA, SAMHSA, FDA and the PSC. Since that time, CDC/ATSDR has established a child care subsidy program for its employees. This amendment expands coverage of the Child Care Subsidy Program Records to include employees in CDC/ATSDR who are eligible for this program. The notice is published below in its entirety, as amended.

Dated: March 6, 2002.

Roy L. Tucker,

Acting Deputy Assistant Secretary for Human Resources.

09–90–0200

SYSTEM NAME:

Child Care Subsidy Program Records (HHS).

SYSTEM CLASSIFICATION:

None.

SYSTEM LOCATION:

Records are located throughout HHS in offices of agency child care program administrators and in offices of contract employees engaged to administer the subsidy programs. Since there are several sites around the country, contact the appropriate System Manager listed in Appendix A for more details about specific locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The individuals in the system are employees of the Administration on Aging (AoA), Office of the Secretary (OS), Substance Abuse and Mental Health Services Administration (SAMHSA), Food and Drug Administration (FDA), Program Support Center (PSC), Health Resources and Services Administration (HRSA) and the Centers for Disease Control and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) in the Department of Health and Human Services (HHS), who voluntarily apply for child care subsidies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Application forms for a child care subsidy contain personal information, including employee's (parent) name, Social Security Number, grade, home phone number, home address, total income, number of dependent children, and number children on whose behalf the parent is applying for a subsidy, information on any tuition assistance received from State/County/local child care subsidy, and information on child care providers used, including their name, address, provider license number, and State where license issues, tuition cost, provider tax identification number, and copies of Internal Revenue Form 1040 for verification purposes.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 630 of Pub. L. 107–67 (November 12, 2001) and Executive Order 9397 (November 22, 1943).

PURPOSE(S):

To establish and verify HHS employees' eligibility for child care subsidies in order for HHS to provide monetary assistance to its employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USE:

1. Disclosure may be made to a Member of Congress or to a congressional staff member in response to a request for assistance from the Member by the individual of record.

2. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation, and HHS determines that the use of such records by the Department of Justice, court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case HHS determines that such disclosure is compatible with the purpose for which the records where collected.

3. HHS intends to disclose information from this system to an expert, consultant, or contractor (including employees of the contractor) of HHS if necessary to further the implementation and operation of this program.

4. Disclosure may be made to a Federal, State, or local agency responsible for investigating prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the Department of Health and Human Services is made aware of a violation or potential violation of civil or criminal law or regulation.

5. Disclosure may be made to the Office of Personnel Management or the General Accounting Office when the information is required for evaluation of the subsidy program.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information may be collected on paper or electronically and may be stored as paper forms or on computers.

RETRIEVABILITY:

The records are retrieved by name and may also be cross-referenced to Social Security Number.

SAFEGUARDS:

—Authorized Users: Only HHS personnel working on this project and personnel employed by HHS contractors to work on this project are authorized users as designated by the system manager.
—Physical Safeguards: Records are stored in lockable metal file cabinets or security rooms.
—Procedural Safeguards: Contractors who maintain records in this system are instructed to make no further disclosure of the records, except as authorized by the system manager and permitted by the Privacy Act. Privacy Act requirements are specifically included in contracts.
—Technical Safeguards: Electronic records are protected by use of passwords.
—Implementations Guidelines: HHS Chapter 45–13 of the General Administration Manual, "Safeguarding Records Contained in Systems of Records and the HHS Automated Information System Security Program Handbook, Information Resources Management Manual."

RETENTION AND DISPOSAL:

Disposition of records is according to the National Archives and Records Administration (NARA) guidelines.

SYSTEM MANAGER(S) AND ADDRESSES:

The records of individuals applying for and receiving child care subsidies are managed by System Managers at the various HHS sites listed in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may submit a request with a notarized signature on whether the system contains records about them to the local System Manager.

RECORD ACCESS PROCEDURES:

Request from individuals for access to their records should be addressed to the local System Manager. Requesters should also reasonably specify the record contents being sought. Individuals may also request an accounting of disclosures of their records, if any.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, and state the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Information is provided by HHS employees who apply for child care subsidies. Furnishing of the information is voluntary.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT

None.

RIN 0910–AA01

Anticaries Drug Products for Over-the-Counter Human Use; Use of Intraoral Appliance Models for Compliance With Biological Testing Requirements; Request for Information and Comments; Reopening of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; reopening of comment period.

SUMMARY: The Food and Drug Administration (FDA) is reopening until July 12, 2002, the comment period on the notice requesting information and comments on the use of intraoral appliance (IOA) models as a substitute for the animal caries reduction biological test required by the monograph for over-the-counter (OTC) anticaries drug products to demonstrate the availability of fluoride in OTC dentifrice formulations. The notice was published in the **Federal Register** of October 15, 2001 (66 FR 52418). FDA is taking this action in response to a request for extension of the comment period to allow interested persons additional time to submit comments and information on the use of IOA models. The comment period for this information closed on January 14, 2002.

DATES: Submit written or electronic comments by July 12, 2002.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments.

FOR FURTHER INFORMATION CONTACT: Robert L. Sherman, Center for Drug Evaluation and Research (HFD–560), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–2222.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of October 15, 2001 (66 FR 52418), FDA published a notice requesting information and comments regarding use of the IOA test in lieu of animal caries studies to demonstrate the effectiveness of new fluoride formulations. FDA issued this notice to gather information concerning IOA models and whether and how they can be used in lieu of the animal caries models in meeting the biological testing requirements for OTC anticaries drug products. The agency has determined that it is appropriate to address these issues in a public forum where experts can debate the usefulness and acceptability of alternate biological testing methods such as the IOA model. The agency anticipates that this information-gathering process will be followed by an advisory committee meeting at which the various models and the appropriate statistical analyses will be discussed.

On November 14, 2001, the Joint Anticaries Task Group (the Task Group) of the Consumer Healthcare Products Association, a trade association of manufacturers of nonprescription drugs and dietary supplements, and the Cosmetic, Toiletry, and Fragrance Association, a trade association of manufacturers of personal care products, requested a 180-day extension in which to file comments and new information (Ref. 1). The request stated that the closing date for the original comment period would not allow the Task Group to utilize the results of its ongoing research in its response to FDA, resulting in important information being omitted from the agency's consideration. In addition, the Task Group noted that the agency's request raises complicated questions concerning statistical approaches that could potentially impact statistical methodology utilized for current biological testing requirements for fluoride dentifrices. The Task Group also stated that manufacturers need sufficient time to assess the potential impact that the agency's statistical questions may have on manufacturing practices, as well as research and product development.

FDA has carefully considered the request and acknowledges the complicated issues concerning statistical approaches used to evaluate IOA testing and their potential affect on current biological testing requirements of the anticaries monograph. Manufacturers and the Task Group may require additional time to obtain and review information to fully respond to the agency's request. FDA considers an extension of time for comments in this case to be in the public interest. Accordingly, the comment period is reopened to July 12, 2002.

II. Request for Comments

Interested persons may submit to the Dockets Management Branch (address above) written or electronic comments regarding this notice by July 12, 2002. Three copies of all written comments are to be submitted. Individuals submitting written comments or anyone submitting electronic comments may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document and may be accompanied by a supporting memorandum or brief. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

III. Reference

The following reference has been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

1. Comment No. EXT11, Docket No. 80N–0042.

Dated: March 1, 2002.

Margaret M. Dotzel,

Associate Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Council on Graduate Medical Education; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of April:

Name: Council on Graduate Medical Education (COGME).

Date and Time: April 10, 2002, 8:30 a.m.–5 p.m., April 11, 2002, 8 a.m.–12 p.m.

Place: Holiday Inn Select, Versailles 1, 8120 Wisconsin Avenue, Bethesda, MD 20814.

The meeting is open to the public.

Agenda: The agenda for April 10 will include: Welcome and opening comments from the Chair and Acting Executive Secretary of COGME. There will be a panel of speakers on the topic of "Views on the Adequacy of the Physician Supply" and a presentation on "Physician Workforce Models of the Bureau of Health Professions." The afternoon agenda includes a panel on "Physician Preparedness to Meet Emerging Public Health Needs."

The Council's three workgroups will convene. They are: Workgroup on Diversity, Workgroup on Graduate Medical Education Financing, and Workgroup on Workforce.

The agenda for April 11 will include reports from the three workgroup chairs. There will be a discussion of COGME's 2002 Summary Report, plans for future work, and new business.

Anyone requiring information regarding the meeting should contact Stanford M. Bastacky, D.M.D., M.H.S.A., Acting Executive Secretary, Council on Graduate Medical Education, Division of Medicine and Dentistry, Bureau of Health Professions, Room 9A–27, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–6326.

Agenda items are subject to change as priorities dictate.

Dated: March 8, 2002.

Jane M. Harrison,

Director, Division of Policy Review and Coordination.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443–7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Projects for Assistance in Transition From Homelessness (PATH) Annual Report—(0930–0205, extension)

The Center for Mental Health Services awards grants each fiscal year to each of the States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands from allotments authorized under the PATH program established by Public Law 101–645, 42 U.S.C. 290cc–21 *et seq.*, the Stewart B. McKinney Homeless Assistance Amendments Act of 1990 (section 521 *et seq.* of the Public Health Service (PHS) Act). Section 522 of the PHS Act requires that the grantee States and Territories must expend their payments under the Act solely for making grants to political subdivisions of the State, and to non-profit private entities (including community-based veterans organizations and other community organizations) for the purpose of providing services specified in the Act. Available funding is allotted in accordance with the formula provision of section 524 of the PHS Act.

This submission is for extension of the current approval of the annual grantee reporting requirements. Section 528 of the PHS Act specifies that not later than January 31 of each fiscal year, a funded entity will prepare and submit a report in such form and containing such information as is determined necessary for securing a record and description of the purposes for which amounts received under section 521 were expended during the preceding fiscal year and of the recipients of such amounts and determining whether such amounts were expended in accordance with statutory provisions. The estimated annual burden for these reporting requirements is summarized in the table that follows.

Respondent	Number of respondents	Number of responses/respondent	Average burden/response	Total burden hours
States—automated	55	1	26	1,430
States—hard copy	1	1	28	28
Local provider agencies—automated	398	1	31	12,338
Local provider agencies—hard copy	1	1	24	24
Total	455			13,820

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4730–N–11]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Mark Johnston, Department of Housing and Urban Development, Room 7262, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–1234; TTY number for the hearing- and speech-impaired (202) 708–2565, (these telephone numbers are not toll-free), or call the toll-free title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: March 8, 2002.

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Land Acquisitions; United Auburn Indian Community of California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of final agency determination to take land into trust under 25 CFR Part 151.

SUMMARY: The Assistant Secretary—Indian Affairs made a final agency determination to acquire approximately 49.21 acres, more or less, of land into trust for the United Auburn Indian Community of California on February 5, 2002. This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1.

FOR FURTHER INFORMATION CONTACT: Nancy J. Pierskalla, Office of Indian Gaming Management, Bureau of Indian Affairs, MS–2070 MIB, 1849 C Street NW., Washington, DC 20240; Telephone (202) 219–4066.

SUPPLEMENTARY INFORMATION: This notice is published to comply with the requirement of 25 CFR 151.12(b) that notice be given to the public of the Secretary's decision to acquire land in trust at least 30 days prior to signatory acceptance of the land into trust. The purpose of the 30-day waiting period in 25 CFR 151.12(b) is to afford interested parties the opportunity to seek judicial review of final administrative decisions to take land in trust for Indian tribes and individual Indians before transfer of title to the property occurs. On February 5, 2002, the Assistant Secretary—Indian Affairs decided to accept approximately 49.21 acres, more or less, of land into trust for the United Auburn Indian Community of California pursuant to Section 1300I of the Auburn Indian Restoration Act of October 31, 1994, 25 U.S.C. 1300I (1994). The Secretary shall acquire title in the name of the United States in trust for the United Auburn Indian Community of California for the following parcel of land described below no sooner than 30 days after the date of this notice.

That portion of Parcel "B" described in the Resolution to Approve a Minor Boundary Line Adjustment recorded June 27, 1997, as Instrument No. 97–0037123, Official Records of Placer County, located in Section 33, Township 12 North, Range 6 East, Mount Diablo Meridian, Placer County, California, as shown on the Record of Survey filed in Book 9 of Surveys, Page 19, Placer County Records, described as follows:

Beginning at the southeasterly corner of said Parcel "B," thence along the boundary of said Parcel "B" the following three courses and distances: (1) North 00°31′40″ East 616.00 feet; (2) South 89°53′59″ West 285.00 feet; and (3) North 00°13′49″ East 186.41 feet; thence, leaving said boundary, South 89°53′59″ West 150.00 feet; thence South 00°06′01″ East 100.00 feet; thence South 89°53′59″ West 300.00 feet; thence North 00°06′01″ West 100.00 feet; thence South 89°53′59″ West 2018.08 feet; thence South 00°13′49″ West 812.49 feet to a point on the southerly boundary of said Parcel "B", thence along the southerly boundary of said parcel "B" the following two courses and distances: (1) North 89°48′20″ East 1652.05 feet; and (2) North 89°30′51″ East 1097.92 feet to the point of beginning, containing 49.21 acres, more or less. APN 021–280–063.

Dated: March 6, 2002.

Neal A. McCaleb,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO–930–1430–ET; COC–1269]

Public Land Order No. 7516; Revocation of Oil Shale Withdrawals; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes an Executive Order and a Public Land Order insofar as they affect the lands in the State of Colorado withdrawn for protection of oil shale values. This action will open approximately 900,000 acres of public lands to surface entry and mining. The lands have been and will remain open to mineral leasing.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215–7093, 303–239–3706.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1994), it is ordered as follows:

1. Executive Order No. 5327, as amended, and Public Land Order No. 4522, as amended, which withdrew oil shale deposits and the public lands containing such deposits for the protection of oil shale and associated values are hereby revoked insofar as they affect all of the lands in the State of Colorado within the following Townships:

Sixth Principal Meridian

T. 3 N., R. 98 W., Tps. 2 N., Rs. 98, 99, and 100 W.; Tps. 1 N., Rs. 95, 96, 97, 98, 99, and 100 W.; Tps. 1 S., Rs. 94, 95, 96, 97, 98, 99, and 100 W.; Tps. 2 S., Rs. 94, 95, 96, 97, 98, 99, and 100 W.; Tps. 3 S., Rs. 94, 95, 96, 97, 98, 99, and 100 W.; Tps. 4 S., Rs. 94, 95, 96, 97, 98, 99, 100, and 101 W.; Tps. 5 S., Rs. 93, 94, 95, 96, 97, 98, 99, 100, and 101 W.; Tps. 6 S., Rs. 94, 95, 96, 97, 98, 99, 100, and 101 W.; Tps. 7 S., Rs. 95, 96, 97, 98, 99, 100, and 101 W.; Tps. 8 S., Rs. 99 and 100 W.

The areas described aggregate approximately 900,000 acres in Moffat, Rio Blanco, Garfield, and Mesa Counties.

2. At 9 a.m. on April 15, 2002, the lands identified in Paragraph 1 will be opened to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. All valid applications received at or prior to 9 a.m. on April 15, 2002, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 9 a. m. on April 15, 2002, the lands identified in Paragraph 1 will be opened to location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of any of the lands identified in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38 (1994), shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: February 27, 2002.

J. Steven Griles,

Deputy Secretary.

Public Land Order No. 7517; Extension of Public Land Order No. 6182; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order extends Public Land Order No. 6182 for an additional 20-year period. This extension is necessary to continue the protection of the land for use as training site by the New Mexico Army National Guard.

EFFECTIVE DATE: March 8, 2002.

FOR FURTHER INFORMATION CONTACT: Clarence F. Hougland, BLM New Mexico State Office, P.O. Box 27115, Santa Fe, New Mexico, 505–438–7593.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1994), it is ordered as follows:

1. Public Land Order No. 6182 (47 FR 9842, March 8, 1982), which withdrew land for use as a training site by the New Mexico Army National Guard, is hereby extended for an additional 20-year period.

2. Public Land Order No. 6182 will expire March 7, 2022, unless, as a result of a review conducted before the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f) (1994), the Secretary determines that the withdrawal shall be extended.

Dated: February 28, 2002.

Bureau of Reclamation

[Nevada, INT–DES 01–43]

Implementation Agreement, Inadvertent Overrun and Payback Policy and Related Federal Actions, Colorado River in the Lower Basin

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of public comment period extension.

SUMMARY: The Bureau of Reclamation (Reclamation) published a notice of availability of and public hearing for a draft environmental impact statement (EIS) on the Implementation Agreement, Inadvertent Overrun and Payback Policy and Related Federal Actions in the **Federal Register**, (67 FR 1988), on January 15, 2002, requesting comments on the adequacy of the draft EIS. This notice extends the original comment period, as identified below in the **DATES** section.

DATES: The comment period for receiving comments on the draft EIS has been extended from March 12, 2002, to March 26, 2002.

ADDRESSES: Send written comments to Mr. Bruce Ellis, Chief, Environmental Resources Management Division, Bureau of Reclamation, Phoenix Area Office (PXAO–1500), PO Box 81169, Phoenix, AZ 85069–1169; fax number (602) 216–4006.

A copy of the draft EIS is available upon request from Ms. Janice Kjesbo, Bureau of Reclamation, Phoenix Area Office (PXAO–1500), PO Box 81169, Phoenix, AZ 85069–1169, telephone (602) 216–3864, faxogram (602) 216–4006. A copy of the draft EIS is also available for public inspection and review at the libraries listed under **SUPPLEMENTARY INFORMATION** below.

SUPPLEMENTARY INFORMATION: Reclamation has issued a draft EIS on the proposed execution of an Implementation Agreement (IA) that would commit the Secretary of the Interior (Secretary) to make Colorado River water deliveries in accordance with the terms and conditions of the IA to enable certain southern California water agencies to implement a proposed Quantification Settlement Agreement (QSA). (The QSA is an agreement in principle among several southern California water agencies. It establishes a framework of conservation measures and water transfers within southern California for up to 75 years. The QSA provides a substantial mechanism for California to reduce its diversions of Colorado River water in normal years to its 4.4 million acre-feet per year apportionment.) The proposed Federal action includes the following components: Execution of an IA, wherein the Secretary agrees to changes in the amount and/or location of deliveries of Colorado River water that are necessary to implement the QSA; adoption of an Inadvertent Overrun and Payback Policy (IOP), which establishes requirements for payback of inadvertent overuse of Colorado River water by Colorado River water users in Arizona, California, and Nevada; and implementation of biological conservation measures to offset potential impacts from the proposed action that could occur to federally listed fish and wildlife species.

Copies of the draft EIS are available for public inspection and review at the following locations:

- Department of the Interior, Natural Resources Library, 1849 C St., NW, Washington, DC 20240.
- Bureau of Reclamation, Denver Office Library, Building 67, Room 167, Denver Federal Center, 6th and Kipling, Denver, CO 80225.
- Bureau of Reclamation, Lower Colorado Regional Office, Nevada Highway and Park St., Boulder City, NV 89006.

- San Diego Central Library, 820 E St., San Diego, CA 92101.
- Henderson District Public Library, 280 South Water St., Henderson, NV 89015.
- Salt Lake City Public Library, 209 E 500 S, Salt Lake City, UT 84111.

Written comments received by Reclamation become part of the public record associated with this action. Accordingly, Reclamation makes these comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Dated: March 11, 2002.

BILLING CODE 4310–MN–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–446]

Certain Ink Jet Print Cartridges and Components Thereof; Notice of Commission Decision to Review-in-Part an Initial Determination That Finds a Violation of Section 337 of the Tariff Act of 1930

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review in part a final initial determination (ID) of the presiding administrative law judge (ALJ) that finds a violation of section 337 of the Tariff Act of 1930, as amended, in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Peter L. Sultan, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–3094. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (http://www.ustic.gov).

Copies of the public version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202–205–2000.

SUPPLEMENTARY INFORMATION: On January 19, 2001, the Commission instituted this investigation based on a complaint filed by Hewlett-Packard Company ("HP"), alleging a violation of section 337 of the Tariff Act of 1930 in the importation and sale of certain inkjet print cartridges and components thereof by reason of infringement of U.S. Letters Patent 4,827,294; 4,635,073; 4,680,859; 4,872,027; 4,992,802; and 5,409,134; 66 FR 7783 (January 25, 2001). The following five firms were named as respondents: Microjet Technology Co., Ltd. of Taipei, Taiwan; Printer Essentials of Reno, Nevada; Price-Less Inkjet Cartridge Company of Port Charlotte, Florida; Cartridge Hut and Paperwork Plus of Sun City, California; and ABCCo.net, Inc. of Port Charlotte, Florida.

Based on joint stipulations and proposed consent orders, the ALJ issued IDs terminating the investigation as to Printer Essentials (Order No. 7, dated May 11, 2001) and as to Cartridge Hut (Order No. 15, dated October 12, 2001). These IDs became Commission final determinations, pursuant to 19 CFR 210.42(h)(3).

On August 21, 2001, the ALJ issued an ID (Order No. 12) granting HP's motion for summary determination on the economic prong of the domestic industry requirement for all patents at issue. This ID became a Commission final determination, pursuant to 19 CFR 210.42(h)(3).

On October 24, 2001, HP filed a motion to terminate the investigation as to its infringement allegations based on claim 5 of U.S. Letters Patent 4,635,073, claim 2 of U.S. Letters Patent 4,827,294 and claims 12–14 of U.S. Letters Patent 5,409,134. On November 15, 2001, the ALJ issued an ID (Order No. 17) terminating the investigation as to the patent claims that were the subject of HP's motion. These IDs were not reviewed by the Commission, and thus became the determinations of the Commission, pursuant to 19 CFR 210.42(h)(3).

The ALJ issued his final ID, along with a recommended determination on remedy and bonding, on January 25, 2002, concluding that there was a violation of section 337, based on his findings that (a) the accused devices infringe claims of five of the six patents at issue, U.S. Letters Patent 4,827,294, 4,680,859, 4,872,027, 4,992,802 and 5,409,134; and (b) that a domestic industry exists with respect to each of these patents. The ALJ found no infringement of U.S. Letter Patent 4,635,073, and he found that HP had not satisfied the technical prong of the domestic industry requirement with respect to this patent.

On February 14, 2002, complainant HP and the Commission investigative attorney ("IA") petitioned for review of parts of the ID concerning the '073 patent. No responses to these petitions for review were filed.

Having examined the record in this investigation, including the ID, and the petitions for review, the Commission has determined to review:

(1) The ID's construction of the asserted claim of the '073 patent;

(2) The ID's finding of no infringement with respect to the '073 patent; and

(3) The ID's findings with respect to the technical prong of the domestic industry requirement with respect to the '073 patent.

The Commission has determined not to review the remainder of the ID. The Commission does not request further briefing on the issues that it has determined to review.

In connection with the final disposition of this investigation, the Commission may issue (1) an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) cease and desist orders that could result in respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry that either are adversely affecting it or are likely to do so. For background information, see the Commission Opinion, In the Matter of Certain Devices for Connecting Computers via Telephone Lines, Inv. No. 337–TA–360.

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond, in an amount to be determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed.

Written Submissions: The parties to this investigation, interested government agencies, and any other interested persons are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should address the ALJ's recommended determination on remedy and bonding. Complainant and the Commission investigative attorney are also requested to submit proposed remedial orders for the Commission's consideration. The written submissions and proposed remedial orders must be filed no later than 14 days from the date of issuance of this notice. Response submissions must be filed no later than seven days after the deadline for filing the main submissions. No further submissions will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file with the Office of the Secretary the original and 14 true copies thereof on or before the deadlines stated above. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the proceedings. All such requests should be directed to the Secretary of the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment is granted by the Commission will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in §§ 210.42–45 of the Commission's rules of practice and procedure (19 CFR 210.42–45).

Issued: March 12, 2002.

By order of the Commission.

Marilyn R. Abbott,

Secretary.

BILLING CODE 7020–02–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–991 (Preliminary)]

Silicon Metal From Russia

AGENCY: International Trade Commission.

VOL
67
ISS
51
MR
15
2002
UMI

ACTION: Institution of antidumping investigation and scheduling of a preliminary phase investigation.

SUMMARY: The Commission hereby gives notice of the institution of an investigation and commencement of preliminary phase antidumping investigation No. 731–TA–991 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) (the Act) to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Russia of silicon metal, provided for in subheadings 2804.69.10 and 2804.69.50 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value. Unless the Department of Commerce extends the time for initiation pursuant to section 732(c)(1)(B) of the Act (19 U.S.C. 1673a(c)(1)(B)), the Commission must reach a preliminary determination in antidumping investigations in 45 days, or in this case by April 22, 2002. The Commission's views are due at Commerce within five business days thereafter, or by April 29, 2002.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

EFFECTIVE DATE: March 7, 2002.

FOR FURTHER INFORMATION CONTACT: Fred Fischer (202–205–3179/ *ffischer@usitc.gov*), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public*.

SUPPLEMENTARY INFORMATION:

Background.—This investigation is being instituted in response to a petition filed on March 7, 2002, by Globe Metallurgical Inc., Cleveland, OH; SIMCALA, Inc., Mt. Meigs, AL; the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers (I.U.E.–C.W.A, AFL–CIO, C.L.C., Local 693), Selma, AL; the Paper, Allied-Industrial Chemical and Energy Workers International Union (Local 5–89), Boomer, WV; and the United Steel Workers of America (AFL–CIO, Local 9436), Niagara Falls, NY.

Participation in the investigation and public service list.—Persons (other than petitioners) wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in sections 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this investigation available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigation under the APO issued in the investigation, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Commission's Director of Operations has scheduled a conference in connection with this investigation for 9:30 a.m. on March 26, 2002, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Fred Fischer (202–205–3179 / *ffischer@usitc.gov*) not later than March 22, 2002, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written submissions.—As provided in sections 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before April 2, 2002, a written brief containing information and arguments pertinent to the subject matter of the investigation. Parties may file written testimony in connection with their presentation at the conference no later than three days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules do not authorize filing of submissions with the Secretary by facsimile or electronic means.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.12 of the Commission's rules.

Issued: March 11, 2002.

By order of the Commission.

Marilyn R. Abbott,

Acting Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[AAG/A Order No. 258–2002]

Privacy Act of 1974; System of Records

Pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Federal Bureau of Prisons (Bureau) proposes to modify its system of records entitled "Inmate Commissary Accounts Record System, JUSTICE/BOP–006", last published on September 30, 1977 (42 FR 53288, 53294). JUSTICE/BOP–006 has been retitled the "Inmate Trust Fund Accounts and Commissary Record System" and will become effective 60 days from the date of publication.

The new title reflects the addition of information on vendors who provide supplies to institution commissaries.

In addition to edits which have been made to better describe the system and/or improve its clarity, the Bureau proposes to modify the system as follows:

(1) By further expanding the categories of individuals covered by the system to include all individuals placed directly under the custody of the Director of the Bureau and persons who send and/or receive funds to/from inmates.

(2) By providing additional authorities for the maintenance of the expanded categories of records.

(3) By expanding the categories of records in the system to include system-generated reports.

(4) By adding a statement on the purpose of this system.

(5) By reorganizing the routine use section to group similar routine uses together, to re-designate certain routine uses, to better describe, clarify or expand certain routine uses, and to add new routine uses.

(6) By expanding the policies and practices for storage, retrieval, access, retention and disposal of records in the system to reflect technological advances and new agency practices.

(7) By redesignating the system manager from the Chief of Management and Information Systems to the Chief of the Trust Fund Branch in the Administration Division.

(8) By adding exemptions from (e)(1) and (e)(5) of the Privacy Act for law enforcement purposes.

Title 5 U.S.C. 552a (e)(4) and (11) provide that the public be provided a 30 day period in which to comment. The Office of Management and Budget (OMB), which has oversight responsibilities under the Privacy Act, requires that it be given a 40-day period in which to review the system. Therefore, please submit any comments by April 15, 2002. The public, OMB, and the Congress are invited to send written comments to Mary Cahill, Management and Planning Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (1400 National Place Building).

In accordance with 5 U.S.C. 552a(r), the Department has provided a report to OMB and the Congress on the proposed modification. A description of the modified system is provided below.

Dated: February 28, 2002.

Robert F. Diegelman,

Acting Assistant Attorney General for Administration.

Justice/BOP–006

SYSTEM NAME:

Inmate Trust Fund Accounts and Commissary Record System.

SYSTEM LOCATION:

Records may be retained at the Central Office, Regional Offices, or at any of the Federal Bureau of Prisons (Bureau) facilities, or at any location operated by a contractor authorized to provide computer, financial and/or correctional services to the Bureau. A list of Bureau facilities may be found at 28 CFR part 503 and on the Internet at *http://www.bop.gov*.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals currently or formerly under the custody of the Attorney General and/or the Director of the Bureau of Prisons, vendors who supply products to institution commissaries, and persons who send or receive funds to/from inmates.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in this system include: (1) Financial data on individuals currently or formerly under custody; (2) personal identification data for individuals covered by this system; (3) vendor lists and linked product information; and (4) system generated reports, such as Inmate Balance Reports, Transaction Input Listings, Inmate Sales Receipts, and Stock Status Reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system is established and maintained under authority of 18 U.S.C. 3621, 4042, and 5003, and 31 U.S.C. 1321.

PURPOSE(S):

The purpose of this system is to track trust fund accounts of current and former inmates, including all payments in and out of these accounts, to provide accounting of inmate trust fund balances for purposes of verifying pauper status under 28 U.S.C. 1915, and to maintain information on all vendors who supply products to institution commissaries to facilitate ordering of commissary products.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Relevant data from this system will be disclosed as follows:

(a) To officers and employees of the Department of Justice who have a need for the information in the performance of their official duties;

(b) To federal, state, local, tribal, foreign and international law enforcement agencies and officials for law enforcement purposes such as investigations, possible criminal prosecutions, civil court actions, or regulatory proceedings;

(c) To a court or adjudicative body before which the Department of Justice or the Bureau is authorized to appear for purposes of verifying pauper status under 28 U.S.C. 1915, or when any of the following is a party to litigation or has an interest in litigation and such records are determined by the Bureau to be arguably relevant to the litigation: (1) The Bureau, or any subdivision thereof, or (2) any Department or Bureau employee in his or her official capacity, or (3) any Department or Bureau employee in his or her individual capacity where the Department has agreed to provide representation for the employee, or (4) the United States, where the Bureau determines that the litigation is likely to affect it or any of its subdivisions;

(d) In an appropriate proceeding before a court or administrative or regulatory body when records are determined by the Department of Justice to be arguably relevant to the proceeding, including federal, state, and local licensing agencies or associations

VOL
67
ISS
51
MR
15
2002
UMI

which require information concerning the suitability or eligibility of an individual for a license or permit;

(e) To the news media and the public pursuant to 28 CFR 50.2 unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy;

(f) To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record;

(g) To the National Archives and Records Administration and General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906;

(h) To any person or entity to the extent necessary to prevent immediate loss of life or serious bodily injury;

(i) To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the federal government, when necessary to accomplish an agency function related to this system of records; and

(j) Pursuant to subsection (b)(3) of the Privacy Act, the Department of Justice may disclose relevant and necessary information to a former employee of the Department for purposes of: responding to an official inquiry by a federal, state, or local government entity or professional licensing authority, in accordance with applicable Department regulations; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes where the Department requires information and/or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information maintained in the system is stored in electronic media, including the Federal Prison Point of Sale (FPPOS) System, in Bureau and contractor facilities via a configuration of personal computer, client/server, and mainframe systems architecture. Computerized records are maintained on hard disk, floppy diskettes, Compact Discs (CDs), magnetic tapes and/or optical disks. Documentary records are maintained in manual file folders and/or index card files.

RETRIEVABILITY:

Records are retrievable by identifying data of the persons covered by the system, including name and address, inmate register number, and/or system-generated vendor number.

SAFEGUARDS:

Information is safeguarded in accordance with Bureau rules and policy governing automated information systems security and access. These safeguards include the maintenance of records and technical equipment in restricted areas, and the required use of proper passwords and user identification codes to access the system. Only those Bureau and contractor personnel who require access to perform their official duties may access the system equipment and the information in the system.

RETENTION AND DISPOSAL:

Inmate financial data in the system of records is retained for six years from the date of transaction, and system-generated reports are retained for as long as they are needed. Computerized records are destroyed by degaussing; documentary records are destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Trust Fund Branch, Administration Division, Federal Bureau of Prisons, 320 First Street NW., Room 5005, Washington, DC 20534.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the System Manager listed above.

RECORD ACCESS PROCEDURES:

All requests for records may be made in writing to the Director, Federal Bureau of Prisons, 320 First Street NW., Washington, DC 20534, and should be clearly marked "Privacy Act Request." This system is exempt, under 5 U.S.C. 552a (j) from some access. To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Records are generated by individuals currently or formerly under custody, persons sending or receiving funds to/from inmates, vendors supplying products to institution commissaries, Department of Justice and contractor employees.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(1), (e)(2), (e)(3), (e)(4)(H), (e)(5), (e)(8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e).

[FR Doc. 02–6203 Filed 3–14–02; 8:45 am]

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

[AAG/A Order No. 256–2002]

Privacy Act of 1974; System of Records

Pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Federal Bureau of Prisons (Bureau) proposes to modify its system of records entitled "Inmate Physical and Mental Health Record System, JUSTICE/BOP–007". This system, which was last published on September 28, 1978, (43 FR 44676, 44735), is now being modified and will become effective May 14, 2002.

As previously published, the system included only those persons who were committed to the custody of the Attorney General and thereby to the Bureau of Prisons under 18 U.S.C. 4003, 4042 and 4082. The Bureau is modifying the system to include all additional individuals who are committed directly to the custody of the Bureau of Prisons, pursuant to the additional authority of 18 U.S.C. 3621, 5003 (state inmates) and inmates from the District of Columbia, pursuant to Section 11201 of Chapter 1 of Subtitle C of Title XI of the National Capital Revitalization and Self-Government Improvement Act of 1997 (Public Law 105–33; 111 Stat. 740). The authority of 18 U.S.C. 4014 is also added to authorize the maintenance and disclosure of records relating to HIV testing. The Bureau has also added a statement on the purpose of this system.

The list of records in this system has been expanded to include drug testing and DNA samples and analysis.

The section on routine uses has been reorganized and expanded. New routine uses have been added to permit release of information to former employees, a court or administrative body, the General Services Administration for record management inspections and to prevent immediate loss of life or serious bodily injury in emergency situations, such as an inmate escape. Another new routine use assists the Bureau in complying with recent laws requiring limited, specific disclosures of information concerning infectious diseases.

Appropriate sections have been revised to reflect technological advances and new agency practices regarding the storage, retrieval, access, retention and disposal of records in the system. The Bureau has re-designated the system manager from the Chief of Management and Information Systems to the Assistant Director, Health Services Division. The Bureau has also clarified record access procedures.

The authorities for exemptions from certain Privacy Act provisions have been specified. Exemptions from subsections (e)(1) and (e)(5) have been added for law enforcement purposes.

Title 5 U.S.C. 552a (e)(4) and (11) provide that the public be given a 30-day period in which to comment.

The Office of Management and Budget (OMB), which has oversight responsibilities under the Privacy Act, requires that it be given a 40-day period in which to review the system. Therefore, please submit any comments by April 15, 2002. The public, OMB, and the Congress are invited to send written comments to Mary Cahill, Management and Planning Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (1400 National Place Building).

A description of the modified system is provided below.

In accordance with 5 U.S.C. 552a(r), the Department has provided a report to OMB and the Congress on the proposed modification.

Dated: February 22, 2002.

Robert F. Diegelman,

Acting Assistant Attorney General for Administration.

JUSTICE/BOP–007

SYSTEM NAME:

Inmate Physical and Mental Health Record System.

SYSTEM LOCATION:

Records may be retained at the Central Office, Regional Offices, or at any of the Federal Bureau of Prisons (Bureau) or at any location operated by a contractor authorized to provide correctional, medical, and/or computer service to the Bureau. A list of Bureau system locations may be found at 28 CFR part 503 and on the Internet at *http://www.bop.gov.*

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals currently or formerly under the custody of the Attorney General and/or the Director of the Bureau of Prisons.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in this system include: (1) Identification data, including name, inmate register number, date of birth, Social Security number, FBI number, drug testing and DNA samples and analysis; (2) medical and dental history and examinations (past and present), including diagnosis and treatment notes, records, and pharmaceutical information; (3) medical information concerning deaths of inmates; (4) offense information, including Pre-sentence Reports; (5) designations of inmates from parent facilities to medical facilities, including date and type of referral; (6) pre-certifications authorizing inmates to receive care at local medical facilities, including authorized and actual length of stay, and all associated cost information; (7) mental health and drug abuse information, including interview, testing data, and progress or observation notes, generated and maintained by Bureau staff; (8) mental health and drug abuse information generated outside the Bureau by other corrections agencies and health care providers such as surgical clinics, mental hospitals, private therapists, etc.; (9) urine surveillance reports of drug program participants; (10) automated data, including Electronic Signatures, Sensitive Medical Data (SMD), Medical Duty Status (MDS), and Diagnosis Group (DGN); and (11) information concerning infectious diseases, including HIV and Tuberculosis (TB) testing and treatment records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system is established and maintained under the authority of 18 U.S.C. 3621, 4014, 4042, 4082, 4241 et seq., 5003, and section 11201 of Chapter 1 of Subtitle C of Title XI of the National Capital Revitalization and Self-Government Improvement Act of 1997.

PURPOSE(S):

This system assists the Bureau in providing appropriate health care to persons in the custody of the Bureau. It provides for the maintenance and release of records concerning the medical, mental and dental health of persons in the Bureau's custody.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Relevant data from this system will be disclosed as follows:

(a) To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an agency function related to this system of records;

(b) To community health care professionals, including physicians, psychiatrists, psychologists, state and federal medical facility personnel, who are providing treatment for a pre-existing condition to former federal inmates;

(c) To federal, state, local, foreign and international law enforcement agencies and officials for law enforcement purposes such as investigations, possible criminal prosecutions, civil court actions, or regulatory proceedings;

(d) To a court or adjudicative body before which the Department of Justice or the Bureau is authorized to appear when any of the following is a party to litigation or has an interest in litigation and such records are determined by the Bureau to be arguably relevant to the litigation: (1) The Bureau, or any subdivision thereof, or (2) any Department or Bureau employee in his or her official capacity, or (3) any Department or Bureau employee in his or her individual capacity where the Department has agreed to provide representation for the employee, or (4) the United States, where the Bureau determines that the litigation is likely to affect it or any of its subdivisions;

(e) In an appropriate proceeding before a court or administrative or regulatory body when records are determined by the Department of Justice to be arguably relevant to the proceeding, including federal, state, and local licensing agencies or associations which require information concerning the suitability or eligibility of an individual for a license or permit;

(f) To the news media and the public pursuant to 28 CFR 50.2 unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy;

(g) To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record;

(h) To the National Archives and Records Administration and General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906;

(i) To any person or entity to the extent necessary to prevent immediate loss of life or serious bodily injury; and

(j) For information relating to infectious diseases, as follows:

VOL
67
ISS
51
MR
15
2002
UMI

(1) To state health departments and/or the Center for Disease Control, pursuant to state and/or federal laws requiring notice of cases of reportable infectious diseases;

(2) To the United States Probation Office in the district where an inmate is being released from Bureau custody on parole, placement in a community-based program, furlough, or full-term release, when the inmate is known to be HIV positive or under treatment for exposure to or active Tuberculosis (TB);

(3) To the Director of a Community Corrections Center (halfway house) receiving an inmate from Bureau custody when the inmate is known to be HIV positive or under treatment for exposure to or active TB;

(4) To the physician/provider of a Bureau or non-Bureau staff, or other person exposed to a blood-born pathogen while lawfully present in a Bureau facility, for the purpose of providing prophylaxis or other treatment and counseling; and

(k) Pursuant to subsection (b)(3) of the Privacy Act, the Department of Justice may disclose relevant and necessary information to a former employee of the Department for purposes of: Responding to an official inquiry by a federal, state, or local government entity or professional licensing authority, in accordance with applicable Department regulations; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes where the Department requires information and/or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information maintained in the system is stored in electronic media in Bureau facilities via a configuration of personal computer, client/server, and mainframe systems architecture. Computerized records are maintained on hard disk, Compact Discs (CDs), floppy diskettes, magnetic tapes and/or optical disks. Documentary records are maintained in manual file folders, microfilm and/or index card files.

RETRIEVABILITY:

Records are retrievable by identifying data, including last name and inmate register number, and/or the inmate's social security number and/or FBI number.

SAFEGUARDS:

Information is safeguarded in accordance with Bureau rules and policy governing automated information systems security and access. These safeguards include the maintenance of records and technical equipment in restricted areas, and the required use of proper passwords and user identification codes to access the system. Only those Bureau personnel who require access to perform their official duties may access the system equipment and the information in the system.

RETENTION AND DISPOSAL:

Records in this system are retained for a period of thirty (30) years after expiration of the sentence. Documentary records are destroyed by shredding; computer records are destroyed by degaussing and/or shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director, Health Services Division, Federal Bureau of Prisons; 320 First Street NW., Washington, DC 20534.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the System Manager listed above.

RECORD ACCESS PROCEDURES:

All requests for records may be made in writing to the Director, Federal Bureau of Prisons, 320 First Street NW., Washington, DC 20534, and should be clearly marked "Privacy Act request." This system is exempt, under 5 U.S.C. 552a(j), from some access. To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as the above.

RECORD SOURCE CATEGORIES:

Records are generated by: (1) Individuals currently or formerly under Bureau custody; (2) Bureau of Prisons staff; (3) community health care providers, including individuals, hospitals and/or other professionals involved in the medical, mental, and dental care of inmates and/or former inmates; and (4) other federal and/or state, local or tribal agencies, including those preparing or providing information on pre-sentence reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(1), (e)(2), (e)(3), (e)(4)(H), (e)(5), (e)(8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e).

Agency Information Collection Activities: Comment Request

ACTION: 60-day notice of information collection under review; Application for Naturalization; Form N–400.

The Department of Justice, Immigration and Naturalization Service has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for sixty days until May 14, 2002.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection: Extension of currently approved collection.*

(2) *Title of the Form/Collection:* Application for Naturalization.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form N–400. Business Process and Reengineering Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: individuals or households. The information collected is used by the INS to determine eligibility for naturalization.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to response:* 700,000 responses at 6 hours and 8 minutes (6.13) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 4,291,000 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan, 202–514–3291, Director, Regulations and Forms Services Division, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Patrick Henry Building, 601 D Street, NW., Suite 1600, Washington, DC 20530.

Dated: March 11, 2002.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3014, Washington, DC 20210.

New General Wage Determination Decisions

The number of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and related Acts" are listed by Volume and States:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

General wage determinations issued under the Davis-Bacon and related Acts are available electronically at no cost on the Government Printing Office site at *www.access.gpo.gov/davisbacon.*

They are also available electronically by subscription to the Davis-Bacon Online Service (*http://davisbacon.fedworld.gov*) of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1-800-363-2068. This subscription offers value-added features such as electronic delivery of modified wage decisions directly to the user's desktop, the ability to access prior wage decisions issued during this year, extensive Help desk Support, etc.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate Volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 7th day of March 2002.

Carl J. Poleskey,

Chief, Branch of Construction Wage Determinations.

BILLING CODE 4510–27–M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c) (2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of the "Current Population Survey (CPS)." A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section below on or before May 14, 2002.

ADDRESSES: Send comments to Amy A. Hobby, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue, NE., Washington, DC 20212, telephone number 202–691–7628 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

The CPS has been the principal source of the official Government statistics on employment and unemployment for nearly 60 years. The labor force information gathered through the survey is of paramount importance in keeping track of the economic health of the Nation. The survey is the only source of data on total employment and unemployment, with the monthly unemployment rate obtained through this survey being regarded as one of the most important economic indicators. Moreover, the survey also yields data on the basic status and characteristics of persons not in the labor force. The CPS data are used monthly, in conjunction with data from other sources, to analyze the extent to which the various components of the American population are participating in the economic life of the Nation and with what success.

The labor force data gathered through the CPS are provided to users in the greatest detail possible, consistent with the demographic information obtained in the survey. In brief, the labor force data can be broken down by sex, age, race and ethnic origin, marital status, family composition, educational level, and other characteristics. Through such breakdowns, one can focus on the employment situation of specific population groups as well as on the general trends in employment and unemployment. Information of this type can be obtained only through

demographically oriented surveys such as the CPS.

The basic CPS data also are used as an important platform to base the data derived from the various supplemental questions that are administered in conjunction with the survey. By coupling the basic data from the monthly survey with the special data from the supplements, one can get valuable insights on the behavior of American workers and on the social and economic health of their families.

There is wide interest in the monthly CPS data among Government policymakers, legislators, economists, the media, and the general public. While the data from the CPS are used in conjunction with data from other surveys in assessing the economic health of the Nation, they are unique in various ways. They provide a measurement of total employment, including farm work, self-employment and unpaid family work, while the other surveys are generally restricted to the nonagricultural wage and salary sector. The CPS provides data on all jobseekers, and on all persons outside the labor force, while payroll-based surveys cannot, by definition, cover these sectors of the population. Finally, the CPS data on employment, unemployment, and on persons not in the labor force can be linked to the demographic characteristics of the many groups that make up the Nation's population, while the data from other surveys are usually devoid of demographic information.

II. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Action

Office of Management and Budget clearance is being sought for the Current Population Survey (CPS).

Type of Review: Extension of a currently approved collection.

Agency: Bureau of Labor Statistics.

Title: Current Population Survey (CPS).

OMB Number: 1220–0100.

Affected Public: Households.

Total Respondents: 57,000 per month.

Frequency: Monthly.

Total Responses: 684,000.

Average Time Per Response: 7 minutes.

Estimated Total Burden Hours: 79,800 hours.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 5th day of March, 2002.

Jesús Salinas,

Acting Chief, Division of Management Systems, Bureau of Labor Statistics.

[FR Doc. 02–6235 Filed 3–14–02; 8:45 am]

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. D & F Deep Mine Buck Drift

[Docket No. M–2002–001–C]

D & F Deep Mine Buck Drift, RD #1, Box 33A, Klingerstown, Pennsylvania 17941 has filed a petition to modify the application of 30 CFR 75.1002–1 (Location of other electric equipment; requirements for permissibility) to its Buck Drift Mine (I.D. No. 36–07456) located in Schuylkill County, Pennsylvania. The petitioner requests a modification of the existing standard to permit the use of non-permissible electric equipment within 150 feet of the pillar line. The petitioner states that the non-permissible equipment would include drags and battery locomotives due in part to the method of mining used in pitching anthracite mines and the alternative evaluation of the mine air quality for methane on an hourly basis during operation. The petitioner further states that one gas test result would be recorded in the on-shift examination record and equipment operation will be suspended when methane concentration at the equipment reaches 0.5 percent CH_4, either during operation or when found during a pre-shift examination. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

2. Canyon Fuel Company, LLC

[Docket No. M–2002–002–C]

Canyon Fuel Company, LLC, P.O. Box 1029, Wellington, Utah 84542 has filed a petition to modify the application of 30 CFR 75.1002 (Location of trolley wires, trolley feeder wires, high-voltage cables and transformers) to its Dugout Canyon Mine (I.D. No. 42–01890) located in Carbon County, Utah. The petitioner requests a modification of the existing standard to permit the use of a nominal voltage of longwall power circuits not to exceed 4,160 volts to supply power to permissible longwall mining equipment. The petitioner has listed specific terms and conditions in this petition that would be followed when implementing the proposed alternative method. The petitioner states that its present longwall voltage is 2,400-volts, but due to increased horsepower necessary to operate the longwall, the operating voltage must be increased. The petitioner asserts that a diminished safety factor exists as the short circuit interrupting rating limits of the available 2,400-volt breaker are approached and that the proposed alternative method would provide at least the same measure of protection as the existing standard.

3. Knott County Mining Company

[Docket No. M–2002–003–C]

Knott County Mining Company, P.O. Box 2805, Pikeville, Kentucky 41502 has filed a petition to modify the application of 30 CFR 75.900 (Low- and medium-voltage circuits serving three-phase alternating current equipment; circuit breakers) to its Mallet Branch Mine (I.D. No. 15–18393) located in Knott County, Kentucky. The petitioner proposes to use contactors to obtain undervoltage protection instead of using circuit breakers. The petitioner states that all qualified persons who perform work on the equipment and circuits will receive training in safe maintenance procedures as well as the terms and conditions of the proposed decision and order. The training will occur before

VOL
67
ISS
51
MR
15
2002
UMI

implementing the proposed alternative method. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

4. Perry County Coal Company

[Docket No. M–2002–004–C]

Perry County Coal Company, 1845 South Hwy, 15, P.O. Box 5001, Hazard, Kentucky 41702 has filed a petition to modify the application of 30 CFR 75.364(b)(2) (Weekly examination) to its HZ4–1 Mine (I.D. No. 15–02085) located in Perry County, Kentucky. The petitioner proposes to establish evaluation check points to measure the quality and quantity of air in certain areas of the return air course. This is necessary due to hazardous roof and rib conditions impeding passage. The petitioner states that the check points will be established at locations that will allow effective evaluation of ventilation in the affected areas and will be examined by a certified person. These measuring stations will be maintained in safe conditions at all times. Further, conditions at the stations will be recorded in a book or on a date board located at each measuring station with the date, time and results of the measurements. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

5. Cannelton Industries, Inc.

[Docket No. M–2002–005–C]

Cannelton Industries, Inc., P.O. Box 88, Mammoth, West Virginia 25132 has filed a petition to modify the application of 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (Plug and receptacle-type connectors) to its Shadrick Mine (I.D. No. 46–08159) and its Mine #130 (I.D. No. 46–06051) both located in Kanawha County, West Virginia. The petitioner proposes to use a spring-loaded device on battery plug connectors on mobile battery-powered machines in lieu of a padlock to prevent the plug connector from accidentally disengaging while under load. The petitioner states that a warning tag that states "Do Not Disengage Under Load", will be installed on all battery plug connectors and that instructions on the safe practices and provisions for complying with its proposed alternative method will be provided to all persons who operate or maintain the battery-powered machines. The petitioner asserts that the existing standard would result in a diminution of safety to the miners.

6. Point Mining, Inc.

[Docket No. M–2002–006–C]

Point Mining, Inc., 197 Branch Road, Belle, West Virginia 25015 has filed a petition to modify the application of 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (Plug and receptacle-type connectors) to its Point Mining Number 4 Mine (I.D. No. 46–08437) located in Kanawha County, West Virginia. The petitioner proposes to use a threaded ring and a spring-loaded device on battery plug connectors on mobile battery-powered machines instead of a padlock to prevent the plug connector from accidentally disengaging while under load, and provide instructions to all persons who operate or maintain the battery-powered machines on the safe practices and provisions for complying with its proposed alternative method. The petitioner asserts that the existing standard would result in a diminution of safety to the miners.

7. OCI Wyoming, L.P.

[Docket No. M–2002–001–M]

OCI Wyoming, L.P., P.O. Box 513, Green River, Wyoming 82935 has filed a petition to modify the application of 30 CFR 57.22305 (Approved equipment (III mines)) to its Big Island Mine and Refinery (I.D. No. 48–00154) located in Sweetwater County, Wyoming. The petitioner proposes to use a 12 to 18 volt battery powered cordless drill manufactured by Black & Decker, DeWalt, Makita, Milwaukee or Hilti, or use similar battery powered drills for an indefinite period of time, in or beyond the last open crosscut. The drills would be used to drill spad holes for surveying and to install rock mechanics stations. The petitioner asserts that the alternative method of using a cordless drill would not result in a diminution of safety to the miners and that the proposed alternative method would provide at least the same measure of protection as the existing standard.

8. OCI Wyoming, L.P.

[Docket No. M–2002–002–M]

OCI Wyoming, L.P., P.O. Box 513, Green River, Wyoming 82935 has filed a petition to modify the application of 30 CFR 57.22305 (Approved equipment (III mines)) to its Big Island Mine and Refinery (I.D. No. 48–00154) located in Sweetwater County, Wyoming. The petitioner proposes to use a Topcon GTS Series Electronic Total Station surveying instrument or similar surveying instrument in or beyond the last open crosscut to traverse for mine expansion and obtain elevations in support of on-going geologic and rock mechanics modeling. The petitioner states that the Topcon GTS is mounted with an intrinsically sealed 9.6 volt battery and that the use of the Topcon GTS would eliminate labor intensive ventilation modifications and allow for more accurate surveying of abandoned panels. The petitioner asserts that the alternative method of using the Topcon would not result in a diminution of safety to the miners and that the proposed alternative method would provide at least the same measure of protection as the existing standard.

Request for Comments

Persons interested in these petitions are encouraged to submit comments via e-mail to "comments@msha.gov," or on a computer disk along with an original hard copy to the Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 627, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 15, 2002. Copies of these petitions are available for inspection at that address.

Dated at Arlington, Virginia this 12th day of March 2002.

Marvin W. Nichols, Jr.,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. ICR–1218–0228(2002)]

Forging Machines Standard; Extension of the Office of Management and Budget's Approval of Information-Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for comment.

SUMMARY: OSHA requests comment concerning its proposed extension of the information-collection requirements specified by its Forging Machines Standard (29 CFR 1910.218). The paperwork provisions of the Standard specify requirements for developing and maintaining inspection records. The purpose of these requirements is to reduce employees' risk of death or serious injury by ensuring that forging machines used by them are in safe operating condition.

DATES: Submit written comments on or before May 14, 2002.

ADDRESSES: Submit written comments to the Docket Office, Docket No. ICR–1218–0228(2002), OSHA, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2350. Commenters may transmit written comments of 10 pages or less by facsimile to (202) 693–1648.

FOR FURTHER INFORMATION CONTACT: Theda Kenney, Directorate of Safety Standards Programs, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2222. A copy of the Agency's Information-Collection Request (ICR) supporting the need for the information collections specified by the Forging Machines Standard is available for inspection and copying in the Docket Office, or by requesting a copy from Theda Kenney at (202) 693–2222, or Todd Owen at (202) 693–2444. For electronic copies of the ICR, contact OSHA on the Internet at *http://www.osha.gov* and select *"Information Collection Requests."*

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct.

The Forging Machines Standard (*i.e.*, "the Standard") specifies two paperwork requirements. The following section describes who use the information collected under each requirement, as well as how they use it.

Information of Forging Machines, Guards, and Point-of-Operation Protection Devices (paragraphs (a)(2)(i) and (a)(2)(ii)). Paragraph (a)(2)(i) requires employers to establish periodic and regular maintenance safety checks, and to develop and keep a certification record of each inspection. The certification record must include the date of inspection, the signature of the person who performed the inspection, and the serial number (or other identifier) of the forging machine inspected. Under paragraph (a)(2)(ii), employers are to schedule regular and frequent inspections of guards and point-of-operation protection devices, and prepare a certification record of each inspection that contains the date the inspection, the signature of the person who performed the inspection, and the serial number (or other identifier) of the equipment inspected. These inspection certification records provide assurance to employers, employees, and OSHA compliance officers that forging machines, guards, and point-of-operation protection devices have been inspected, thereby assuring that they will operate properly and safely, and prevent impact injury and death to employees during forging operations. These records also provide the most efficient means for the compliance officers to determine that an employer is complying with the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and -transmission techniques.

III. Proposed Actions

OSHA proposes to extend the Office of Management and Budget's (OMB) approval of the collection-of-information requirements specified by the Forging Machines Standard (29 CFR 1910.218). The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of these information-collection requirements.

Type of Review: Extension of a currently approved information-collection requirement.

Title: Forging Machine Standard (29 CFR 1910.218).

OMB Number: 1218–0228..

Affected Public: Business or other for-profit; not-for-profit institutions: Federal government; State, local, or tribal governments.

Number of Respondents: 27,700.

Frequency of Recordkeeping: Biweekly.

Average Time per Response: Twenty minutes (.33 hour) to inspect a forging machine and its guard or point-of-operation protection, and to prepare, maintain, and disclose the inspection certification record.

Total Annual Hours Requested: 244,868.

Total Annual Costs (O&M): $0.

IV. Authority and Signature

John L. Henshaw, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506), and Secretary of Labor's Order No. 3–2000 (65 FR 50017).

Signed at Washington, DC on March 8, 2002.

John L. Henshaw,

Assistant Secretary of Labor.

BILLING CODE 4510–26–M

NATIONAL FOUNDATION FOR THE ARTS AND HUMANITIES

Proposed Collection, Comment Request, Learning Opportunities Grant Application Form

AGENCY: Institute of Museum and Library Services, NFAH.

ACTION: Notice.

SUMMARY: The Institute of Museum and Library Services as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collectinos of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3508(2)(A)] This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently the Institute of Museum and Library Services is soliciting comments concerning the proposed study of the needs assessment of end-users in library and museum digitization projects funded through the Institute of Museum and Library Services.

A copy of the proposed inforamtion collection request can be obtained by contacting the individual listed below in the addressee section of this notice.

VOL 67 ISS 51 MR 15 2002 UMI

DATES: Written comments must be submitted to the office listed in the addressee section below on or before May 14, 2002.

IMLS is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

ADDRESSES: Send comments to Mary Estelle Kennelly, Director Office of Museum Programs, Institute of Museum and Library Services, 1100 Pennsylvania Ave., NW., Room 610, Washington, DC 20506. Fax: 202–606–0010 or by e-mail *mkennely@imls.gov* Fax or e-mail preferred.

SUPPLEMENTARY INFORMATION:

I. Background

The Institute of Museum and Library Services is an independent Federal grant-making agency authorized by the Museum and Library Services Act, Pub. L. 104–208. The IMLS provides a variety of grant programs to assist the nation's museums and libraries in improving their operations and enhancing their services to the public. Museums and libraries of all sizes and types may receive support from IMLS programs. Learning Opportunities Grants will be a one year transitional program as IMLS refines and refocuses its current General Operating Support grant program to better meet the changing needs of the public.

Agency: Institute of Museum and Library Services.

Title: Learning Opportunities Grant Application

OMB Number: n/a.

Agency Number: 3137.

Frequency: One time.

Affected Public: Museums.

Number of Respondents: 500.

Estimated Time Per Respondent: 9 hours.

Total Burden Hours: 4500 hours.

Total Annualized capital/startup costs: 0.

Total Annual costs: 0.

FOR FURTHER INFORMATION CONTACT: Mamie Bittner, Director Office of Public and Legislative Affairs, Institute of Museum and Library Services, 1100 Pennsylvania Avenue, NW., Washington, DC 20506. E-mail *mbittner@imls.gov* fax (202) 606–8591. E-mail of fax preferred.

Dated: March 12, 2002.

Mamie Bittner,

Director of Public and Legislative Affairs.

BILLING CODE 4910–13–M

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. This is the second notice; the first notice was published at 66 FR 64889 and no comments were received. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725–17th Street, NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send email to splimpto@nsf.gov. comments regarding these information collections are best assured to having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: The Evaluation of NSF's Louis Stokes Alliance for Minority Participation (LSAMP) Program.

OMB Control No.: 3145–NEW.

Expiration Date of Approval: Not applicable.

1. Abstract

This document has been prepared to support the clearance of data collection instruments to be used in the evaluation of the Louis Stokes Alliance for Minority participation (LSAMP) Program. The goal of this program is to increase the number of interested, academically qualified minority students receiving baccalaureate degrees in science, technology, engineering and math (STEM), continuing to graduate school to attain a STEM graduate degree, and entering the STEM workforce. The program makes awards to alliances, which are composed of institutional partnerships (e.g., with two- and four-year higher education institutions, business, research labs, and local, state, and federal agencies). LSAMP projects fund students, offer a range of student support services, and undertake systemic reform of undergraduate education in STEM (particularly curricular improvement and faculty professional development). This mixed-methods study will gather data through telephone interviews with project staff, a survey questionnaire of program graduates, and in person interviews with faculty, staff, and students at three selected case study sites. The process evaluation component of this study will identify strategies that accelerate or inhibit the attainment of project goals, strategies employed to promote linkages among Alliance partners, and the manner in which the LSAMP model has evolved since its inception. The impact evaluation component of this study will examine program impact on institutions of higher education in promoting diversity in STEM, and participant career outcomes.

2. Expected Respondents

The expected respondents are project directors and/or managers of all 27 projects; LSAMP graduates who received program funding and who earned STEM baccalaureate degrees between 1992 and 1997; and, faculty, staff, and student participants at the three selected case study sites.

3. Burden on the Public

The total elements for this collection are 308 burden hours for a maximum of 795 participants annually, assuming a 90-100% response rate. The average annual reporting burden is under 1 hour per respondent. The burden on the public is negligible because the study is limited to project participants that have received funding from the LSAMP Program.

Dated: March 11, 2002.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

[FR Doc. 02–6283 Filed 3–14–02; 8:45 am]

BILLING CODE 7555–01–M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Environmental Research and Education; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Public Law 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Advisory Committee for Environmental Research and Education (9487).

Dates: April 3, 2002, 9 a.m.–5:30 p.m. and April 4, 9 a.m.–2:30 p.m.

Place: Stafford II Annex, Room 555, National Science Foundation, 4201 Wilson Blvd, Arlington, VA.

Type of Meeting: Open.

Contact Person: Dr. Margaret Cavanaugh, Office of the Director, National Science Foundation, Suite 1205, 4201 Wilson Blvd, Arlington, Virginia 22230. Phone 703–292–8002.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice, recommendations, and oversight concerning support for environmental research and education.

Agenda

April 3

AM
- Panel Discussion: Building a Diverse Workforce in Environmental Science, Engineering, Education, and Technology
- Update on NSF Activities

PM
- General Discussion of Outline/Draft Decadal Plan
- Modifications of Outline/Draft Decadal Plan: Small Group Meetings

April 4

AM
- Meeting with Director: (Tentative)
- Approval of Specific Modifications to Outline/Draft Decadal Plan

PM
- Trends and Opportunities in Research & Education: Tom Graedel
- Plans for Vetting and Publication of Decadal Plan and Wrap-up

Dated: March 12, 2002.

Susanne Bolton,

Committee Management Officer.

[FR Doc. 02–6282 Filed 3–14–02; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–260 and 50–296]

Tennessee Valley Authority; Browns Ferry Plant, Units 2 and 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix G, for Facility Operating License Nos. DPR–52 and DPR–68, issued to Tennessee Valley Authority (TVA, the licensee), for operation of the Browns Ferry Plant, located in Limestone county Alabama. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would allow TVA to apply the methodologies of the American Society of Mechanical Engineers (ASME) Code Case N–640, "Alternative Requirement Fracture Toughness for Development of P–T [Pressure-Temperature] Limit Curves for ASME B&PV [Boiler and Pressure Vessel] Code, Section XI, Division 1," for the Browns Ferry Plant reactor vessel circumferential welds.

The proposed action is in accordance with the licensee's application dated August 17, 2001, as supplemented by letters dated December 14, 2001, and February 6, 2002.

The Need for the Proposed Action

Appendix G of 10 CFR part 50, requires that P–T limits be established for reactor pressure vessels during normal operating and hydrostatic pressure or leak-testing conditions. Specifically, 10 CFR part 50, Appendix G, states that "The appropriate requirements on both the pressure-temperature limits and the minimum permissible temperature must be met for all conditions." Appendix G further specifies that the requirements for these limits are the ASME Code, Section XI, Appendix G, limits.

To address the provisions of amendments to the Technical Specifications P–T limits, the licensee requested in its submittals that the staff exempt Browns Ferry Units 2 and 3 from the application of the specific requirements of 10 CFR part 50, Appendix G, and permit the use of ASME Code Case N–640. Code Case N–640 permits the use of an alternate reference fracture toughness for reactor vessel materials in determining P–T limits.

Application of the methodology specified in Appendix G to Section XI of the ASME Code for the development of facility P–T limits may not be necessary to meet the underlying purpose of the regulations, which is to protect the reactor coolant pressure boundary from brittle fracture. To satisfy this purpose, the staff had previously required the use of the conservative assumptions in Appendix G to 10 CFR part 50, because the conservatism was initially necessary due to the limited knowledge of the fracture toughness of reactor pressure vessel (RPV) materials at that time. Since 1974, additional knowledge has been gained about RPV materials which demonstrates that the lower bound on fracture toughness resulting from the application of this ASME Code Case would greatly exceed the margin of safety required to protect the public and safety from potential RPV failures. Exemptions to employ an alternative to the methodology specified in Appendix G to Section XI of the ASME Code which result in the development of less conservative P–T limits may be granted by the NRC staff. The use of ASME Code Case N–640 represents one of these alternatives.

Licensees may request the use of alternative methodologies which continue to meet the underlying intent of the regulations for many reasons. Regarding Browns Ferry Plant, application of the specific requirements of Appendix G to Section XI of the ASME Code would result in the need for the licensee to maintain an unnecessarily high vessel temperature during pressure testing which would have an adverse impact on personnel safety because of the corresponding higher temperatures which would exist inside containment as leakage

VOL
67
ISS
51
MR
15
2002
UMI

walkdown inspections are conducted. Further, less restrictive P–T limit curves based on the application of ASME Code Case N–640 will enhance overall plant safety by minimizing challenges to operators during pressure testing, heatup, cooldown, and normal power operation. Thus, pursuant to 10 CFR 50.12(a)(2)(ii), the underlying purpose of the regulations will continue to be served.

Environmental Impacts of the Proposed Action

The NRC staff has completed its evaluation of the proposed action and concludes, as set forth below, that there are no significant environmental impacts associated with the use of the alternative analysis methods to support the revision of the RPV P–T limits for the Browns Ferry Plant, Units 2 and 3.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resource than those previously considered in the Final Environmental Statement for the Browns Ferry Plant, Units 2 and 3, dated April 1975.

Agencies and Persons Consulted

On February 28, 2002, the staff consulted with the Alabama State official, Kirk Whatley, of the Office of Radiation Control, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated August 17, 2001, as supplemented by letters dated December 14, 2001, and February 6, 2002. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, *http://www.nrc.gov/reading-rm/adams/html*. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1–800–397–4209 or 301–415–4737, or by e-mail to *pdr@nrc.gov*.

Dated at Rockville, Maryland, this 11th day of March 2002.

For the Nuclear Regulatory Commission.

Richard P. Correia,

Chief, Section 2, Project Directorate II, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 02–6229 Filed 3–14–02; 8:45 am]

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Required Interest Rate Assumption for Determining Variable-Rate Premium; Interest Assumptions for Multiemployer Plan Valuations Following Mass Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of interest rates and assumptions.

SUMMARY: This notice informs the public of the interest assumptions for multiemployer plan valuations following mass withdrawal under the Pension Benefit Guaranty Corporation's regulation on Duties of Plan Sponsor Following Mass Withdrawal (part 4281). These assumptions are published elsewhere but are referenced in this notice for the convenience of the public. This notice also informs the public that announcement of the required interest rate for determining the variable-rate premium under the PBGC's regulation on Premium Rates is being deferred. The PBGC plans to announce the required interest rate well before the variable-rate premium is due. Interest rates are published on the PBGC's Web site (*http://www.pbgc.gov*).

DATES: The interest assumptions for performing multiemployer plan valuations following mass withdrawal under part 4281 apply to valuation dates occurring in April 2002.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005, 202–326–4024. (TTY/TDD users may call the Federal relay service toll-free at 1–800–877–8339 and ask to be connected to 202–326–4024.)

SUPPLEMENTARY INFORMATION:

Variable-Rate Premiums

Section 4006(a)(3)(E)(iii)(II) of the Employee Retirement Income Security Act of 1974 (ERISA) and § 4006.4(b)(1) of the PBGC's regulation on Premium Rates (29 CFR part 4006) prescribe use of an assumed interest rate (the "required interest rate") in determining a single-employer plan's variable-rate premium. The required interest rate is the "applicable percentage" (currently 85 percent) of the annual yield on 30-year Treasury securities for the month preceding the beginning of the plan year for which premiums are being paid (the "premium payment year"). Until recently, that yield figure was reported in Federal Reserve Statistical Release H.15.

The Treasury Department has suspended issuance of 30-year Treasury securities and, effective February 18, 2002, ceased supplying the Federal Reserve board with an estimate of the annual yield on 30-year Treasury securities for publication in Statistical Release H.15. As a result of these changes, the PBGC is consulting with the Treasury Department on how best to determine the required interest rate. As soon as the PBGC determines the required interest rate to be used in determining variable-rate premiums for premium payment years beginning in March 2002, it will inform the public of the rate. This will be well before the variable-rate premium for premium payment years beginning in March 2002 is due.

Multiemployer Plan Valuations Following Mass Withdrawal

The PBGC's regulation on Duties of Plan Sponsor Following Mass Withdrawal (29 CFR part 4281) prescribes the use of interest assumptions under the PBGC's regulation on Allocation of Assets in Single-Employer Plans (29 CFR part 4044). The interest assumptions applicable to valuation dates in April 2002 under part 4044 are contained in an amendment to part 4044 published elsewhere in today's **Federal Register**. Tables showing the assumptions applicable to prior periods are codified in appendix B to 29 CFR part 4044.

Issued in Washington, DC, on this 12th day of March 2002.

Steven A. Kandarian,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 02–6428 Filed 3–14–02; 8:45 am]

BILLING CODE 7708–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for OMB Review; Comment Request for Reinstatement of a Revised Information Collection: Nonforeign Area Cost-of-Living Allowance; Price and Background Surveys

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for reinstatement of two previously-approved information collections for which approval has expired. OPM uses the two information collections—a price survey and a background survey—to gather data to be used in determining cost-of-living allowances (COLAs) for certain Federal employees in Alaska, Hawaii, Guam and the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. The price surveys will be conducted in each COLA area on a rotating basis once every 3 years and annually in the Washington, DC, area. The background surveys will be conducted in these same areas and according to the same schedule, but on a more limited basis.

The price survey is necessary for collecting living-cost data used to determine cost-of-living allowances (COLAs) paid to General Schedule, U.S. Postal Service, and certain other Federal employees in the allowance areas. COLAs are based on differences in living costs in the allowance areas compared with living costs in the Washington, DC, area. The background survey is used to improve the COLA methodology and to plan the price surveys and determine such things as the appropriateness of items, services, and businesses selected for survey.

OPM will survey selected retail, service, realty, and other businesses and local governments in the allowance areas and in the Washington, DC, area. Approximately 2,200 establishments will be contacted in the price survey, and approximately 30 establishments will be contacted in the background survey. Participation in the surveys is voluntary.

OPM estimates that the average price survey interview will take approximately 7 minutes, for a total burden of 257 hours. The average background survey interview will take approximately 10 minutes, for a total burden of 5 hours.

For copies of this proposal, please contact Mary Beth Smith-Toomey at (202) 606–8358; fax: (202) 418–3251; or e-mail: *mbtoomey@opm.gov*. Please include a mailing address with your request.

DATES: Submit comments on or before April 15, 2002.

ADDRESSES: Send or deliver comments to:

Donald J. Winstead, Assistant Director for Compensation Administration, Workforce Compensation and Performance Service, Office of Personnel Management, Room 7H31, 1900 E Street NW., Washington, DC 20415–8200, fax: (202) 606–4264, or e-mail: *cola@opm.gov*.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building NW., Room 10235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kurt M. Springmann, (202) 606–2838.

SUPPLEMENTARY INFORMATION: OPM published notice of its intention to request a reinstatement of the price and background surveys in the **Federal Register** on October 17, 2001 (66 FR 52813). OPM received one comment in response to the notice. The commenter noted that a sentence in the Summary section of the notice could be interpreted to mean that OPM will conduct surveys annually in selected COLA areas. We agree that the sentence could be misinterpreted, and wish to clarify that OPM will not conduct price surveys annually in any COLA area. As stated in the Supplementary Information section of the notice, OPM will conduct the price surveys in each COLA area on a rotating basis once every 3 years and annually in the Washington, DC, area.

U.S. Office of Personnel Management.

Kay Coles James,

Director.

BILLING CODE 6325–39–P

OFFICE OF PERSONNEL MANAGEMENT

Notice of Federal Long Term Care Insurance Program Early Enrollment

AGENCY: Office of Personnel Management.

ACTION: Notice of Federal Long Term Care Insurance Early Enrollment.

SUMMARY: The Office of Personnel Management, in conjunction with LTC Partners, is announcing an early enrollment for eligible persons to submit applications for enrollment in the Federal Long Term Care Insurance Program. LTC Partners is an organization formed by the John Hancock and Metropolitan Life Insurance Companies to provide long term care insurance to eligible persons under this Program.

DATES: Early enrollment will run from March 25 through May 15, 2002.

FOR FURTHER INFORMATION CONTACT: You may call 1–800–LTC–FEDS (1–800–582–3337) or visit *www.ltcfeds.com* for information on applying during early enrollment.

SUPPLEMENTARY INFORMATION: The Federal Long Term Care Insurance Program early enrollment is an opportunity for eligible persons to submit applications for enrollment before the open season begins on July 1, 2002. Early enrollment is designed for persons who are already knowledgeable about long term care insurance and do not need the extensive educational campaign that LTC Partners will undertake before and during the open season.

In our contacts with potential applicants ever since the Program was announced, we realized that there were

a significant number of persons who were very familiar with the various aspects of long term care insurance, and wanted to purchase the insurance as soon as possible. We decided to provide an early enrollment opportunity for this group of applicants, so they would not have to wait until the open season to apply for coverage.

The specific provisions of early enrollment are as follows:

Eligible persons: Persons eligible for early enrollment are those specified in the Federal Long Term Care Insurance law (5 U.S.C. 9002) as eligible for coverage. The eligible groups are Federal civilian employees and annuitants; members of the uniformed services; retired members of the uniformed services; their spouses and adult children; and the parents, stepparents, and parents-in-law of employees and members of the uniformed services. There will be no difference in eligibility requirements between the early enrollment period and the open season.

Underwriting requirements: Federal civilian employees, members of the uniformed services, and their spouses will be required to submit applications with short form underwriting. The short form contains several questions regarding health status.

All other eligible persons will be required to submit applications with long form, or full, underwriting. If you are subject to full underwriting, you must answer more questions about your health status. It may also include a review of medical records and/or a personal interview.

Benefits available: Under early enrollment, a limited number of benefit options will be available. Benefit levels will be described in printed material provided by LTC Partners and on their Web site at *www.ltcfeds.com.* More options will be made available during the open season that begins in July. You will be able to change to a different benefit level during that open season if you wish, and still retain your "billing age" from early enrollment.

Billing age: Premiums are based on your age at the time LTC Partners receives your application for coverage (your "billing age"). Billing age rules will be different for the open season.

Premiums: Premiums vary depending on your age and the level of coverage you choose. Premiums will be provided by LTC Partners in print material and on their Web site at *www.ltcfeds.com.*

During early enrollment, premiums may be paid in one of two ways. You may request direct billing for premiums, or you may have premiums automatically deducted from a bank account. Payroll deductions will not be available until the open season. You may switch to payroll deductions at any time after they become available.

Effective date: The effective date of an enrollee's coverage under early enrollment is the later of May 1, 2002, or the first day of the month that is on or after the date LTC Partners approves your application for coverage.

Authority: 5 U.S.C. 9008.

Kay Coles James,

Director.

[FR Doc. 02–6198 Filed 3–14–02; 8:45 am]

BILLING CODE 6325–50–P

OFFICE OF PERSONNEL MANAGEMENT

SES Performance Review Board

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: Notice is hereby given of the appointment of members of the OPM Performance Review Board.

FOR FURTHER INFORMATION CONTACT: Teresa Floyd, Office of Human Resources and EEO, Office of Personnel Management, 1900 E Street NW., Washington, DC 20415, (202) 606–2309.

SUPPLEMENTARY INFORMATION: Section 4314(c)(1) through (5) of Title 5, U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more SES performance review boards. The board reviews and evaluates the initial appraisal of a senior executive's performance by the supervisor, and considers recommendations to the appointing authority regarding the performance of the senior executive.

Office of Personnel Management.

Kay Coles James,

Director.

The following have been designated as regular members of the Performance Review Board of the Office of Personnel Management:

Paul T. Conway—Chair,
William E. Flynn,
Richard A. Ferris,
John C. Gartland,
Teresa M. Jenkins,
Kathleen M. McGettigan,
Mark A. Robbins,
Ronald P. Sanders.

BILLING CODE 6325–39–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 25457; 812–12706]

LaSalle Funding LLC; Notice of Application

March 11, 2002.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of application for exemption under section 6(c) of the Investment Company Act of 1940 (the "Act") from all provisions of the Act.

Summary of Application: Applicant, LaSalle Funding LLC ("LaSalle Funding"), seeks an order to permit LaSalle Funding to sell securities and use the proceeds to finance the business activities of certain companies controlled by its parent company, ABN AMRO Bank N.V. ("Bank").

Filing Dates: The application was filed on December 3, 2002 and amended on March 11, 2002.

Hearing or Notification of Hearing: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on April 8, 2002, and should be accompanied by proof of service on applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Applicant, 135 South LaSalle Street, Chicago, IL 60603.

FOR FURTHER INFORMATION CONTACT: John L. Sullivan, Senior Counsel, at (202) 942–0681, or Janet M. Grossnickle, Branch Chief, at (202) 942–0564 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549–0102 (tel. 202–942–8090).

Applicant's Representations

1. The ABN AMRO group ("ABN AMRO Group"), which consists of Bank, Bank's parent company ABN AMRO Holding N.V. ("Holdings") and subsidiaries of Holdings, offers a wide range of commercial and investment banking products and services on a global basis. Holdings and its subsidiaries, on a worldwide basis, are extensively regulated in The Netherlands by the Dutch Central Bank. ABN AMRO Group is one of the largest banking groups in the world with total consolidated assets, as of December 31, 2000, of EUR 543.2 billion.

2. LaSalle Funding, a Delaware limited liability company, is an indirect wholly owned subsidiary of Bank. LaSalle Funding was established to engage in financing activities and to provide financing to LaSalle Bank, National Association ("LaSalle Bank") and to other companies controlled by Bank within the meaning of rule 3a–5(b)(3) under the Act and after giving effect to the requested order (such companies, together with LaSalle Bank, collectively, the "Controlled Companies"). LaSalle Funding proposes to issue in the United States up to $2.5 billion of debt securities ("Notes") with maturities expected to range from nine months to 30 years pursuant to an effective "shelf" registration statement under the Securities Act of 1933 ("1933 Act"). LaSalle Funding may also offer other debt securities in the United States pursuant to a registration statement or an applicable exemption from registration under the 1933 Act.

3. The Notes and any other issuance of debt securities by LaSalle Funding will be guaranteed unconditionally by Bank with a guarantee that meets the requirements of rule 3a–5(a) ("Guarantee"). In accordance with rule 3a–5(a)(5), at least 85% of any cash or cash equivalents raised by LaSalle Funding will be invested in or loaned to Controlled Companies as soon as practicable, but in no event later than six months after LaSalle Funding's receipt of such cash or cash equivalents. In accordance with rule 3a–5(a)(6), all investments by LaSalle Funding, including temporary investments, will be made in Government securities (as defined in the Act), securities of Controlled Companies or debt securities that are exempted from the provisions of section 3(a)(3) of the 1933 Act.

4. In connection with LaSalle Funding's offering of securities guaranteed by Bank, Bank will submit to the jurisdiction of any State or Federal court located in the Borough of Manhattan in the City of New York and will appoint an agent to accept any process which may be served in any action based upon Bank's obligations to LaSalle Funding as described in the application. Such consent to jurisdiction and such appointment of an agent to accept service of process will be irrevocable until all amounts due and to become due with respect to securities issued by LaSalle Funding as described in the application have been paid.

Applicant's Legal Analysis

1. LaSalle Funding requests relief under section 6(c) of the Act for an exemption under 6(c) of the Act from all provisions of the Act. Rule 3a–5 under the Act provides an exemption from the definition of investment company for certain companies organized primarily to finance the business operations of their parent companies or companies controlled by their parent companies.

2. Rule 3a–5(b)(3)(i) in relevant part defines a "company controlled by the parent company" to be a corporation that is not considered an investment company under section 3(a) of the Act or that is excepted or exempted by order from the definition of investment company by section 3(b) of the Act or by the rules and regulations under section 3(a). Certain of the Controlled Companies do not, or are not expected to, fit within the definition of "companies controlled by the parent company" because they derive their non-investment company status from section 3(c) of the Act. LaSalle Funding states that neither LaSalle Bank, nor any other Controlled Company excluded under section 3(c), nor Bank will engage primarily in investment company activities.

3. Section 6(c) of the Act, in pertinent part, provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. LaSalle Funding submits that its exemptive request meets the standards set out in section 6(c).

Applicant's Condition

LaSalle Funding agrees that any order issued on the application shall be subject to the following condition:

LaSalle Funding will comply with all of the provisions of rule 3a-5 under the Act, except paragraph (b)(3)(i) to the extent that LaSalle Funding will be permitted to invest in or make loans to entities that do not meet that portion of the definition of "company controlled by the parent company" solely because they are corporations, partnerships and joint ventures that are excluded from the definition of investment company by section 3(c)(1), (2), (3), (4), (5), (6) or (7) of the Act, provided that any such entity:

(i) If excluded from the definition of investment company pursuant to section 3(c)(1) or section 3(c)(7) of the Act, will be engaged solely in lending, leasing or related activities (such as entering into credit derivatives to manage the credit risk exposures of its lending and leasing activities) and will not be structured as a means of avoiding regulation under the Act;

(ii) If excluded from the definition of investment company pursuant to section 3(c)(5) of the Act, will fall within section 3(c)(5)(A) or 3(c)(5)(B) solely by reason of its holding of accounts receivable of either its own customers or of the customers of other Bank subsidiaries, or by reasons of loans made by it to such subsidiaries or customers; and

(iii) If excluded from the definition of investment company pursuant to section 3(c)(6) of the Act, will not be engaged primarily, directly or indirectly, in one or more of the businesses described in section 3(c)(5) of the Act (except as permitted in (ii) above).

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 25456; 812–12771]

The Catholic Funds, Inc., et al.; Notice of Application

March 11, 2002.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of application under section 17(b) of the Investment Company Act of 1940 ("Act") for an exemption from section 17(a) of the Act.

Summary of Application: Applicants request an order to permit the proposed reorganizations of the following series of The Catholic Funds, Inc. ("CFI"): The Catholic Equity Income Fund ("Equity Income Fund") with and into The Catholic Equity Fund ("New Equity Fund"); The Catholic Large-Cap Growth Fund ("Large-Cap Growth Fund") with

2002
UMI

and into the New Equity Fund; and The Catholic Disciplined Capital Appreciation Fund ("Capital Appreciation Fund" and, together with the Equity Income Fund and the Capital Appreciation Fund, the "Existing Funds") with and into the New Equity Fund. Because of certain affiliations, applicants may not rely on rule 17a–8 under the Act.

Applicants: CFI and Catholic Financial Services Corporation ("CFSC").

Filing Dates: The application was filed on February 4, 2002. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

Hearing or Notification of Hearing: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on April 1, 2002, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Commission's Secretary.

ADDRESSES: Secretary, Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Applicants, c/o Fredrick G. Lautz, Esq., Quarles & Brady LLP, 411 East Wisconsin Avenue, Milwaukee, WI 53202.

FOR FURTHER INFORMATION CONTACT: John L. Sullivan, Senior Counsel, at (202) 942–0681, or Todd F. Kuehl, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 Fifth Street, NW, Washington, DC 20549–0102 (tel. 202–942–8090).

Applicants' Representations

1. CFI, a Maryland corporation, is registered under the Act as an open-end management investment company and currently offers several series, including the Existing Funds (and together with the New Equity Fund, the "Funds"). The New Equity Fund is a newly designated series of CFI. CFSC, a Wisconsin corporation, is registered under the Investment Advisers Act of 1940 and is the investment adviser to the Funds. As of December 31, 2001, Catholic Knights and Catholic Order of Foresters, both of which are non-profit organizations, each owned beneficially and of record more than 5% (and in some cases, more than 25%) of the outstanding voting securities of each Existing Fund.

2. On February 14, 2002, the board of directors of CFI ("Board"), including a majority of the directors who are not "interested persons," as defined in section 2(a)(19) of the Act ("Independent Directors"), unanimously approved separate Agreements and Plans of Reorganization and Liquidation (each, a "Plan"), whereby each of the Existing Funds would be consolidated with and into the New Equity Fund. In each of these reorganization transactions (a "Reorganization"), the relevant Existing Fund would transfer substantially all of its assets, net of its liabilities, to the New Equity Fund in exchange solely for shares of the New Equity Fund. In each Reorganization, shareholders of the relevant Existing Fund will receive shares of the New Equity Fund having an aggregate net asset value equal to the aggregate net asset value of the Existing Fund's shares. The value of the assets of each Fund will be determined in the manner set forth in each Fund's then-current prospectus and statement of additional information. Immediately after the exchange, each Existing Fund would liquidate and distribute the shares of the New Equity Fund received in the exchange to its shareholders pro rata.

3. Applicants state that the Board has determined that the investment objective, program and policies of the Funds are sufficiently similar to make an investment in the New Equity Fund an appropriate substitute investment for shareholders of the Existing Funds. Each Existing Fund offers one class of shares, Class A, and the New Equity Fund will offer three classes of shares, only one of which, Class A, will be issued in the Reorganizations. In connection with the Reorganizations, shareholders of each Existing Fund will receive the corresponding Class A shares of the New Equity Fund. No sales charge will be imposed on shares of The New Equity Fund issued to shareholders of the Existing Funds in the Reorganizations. CSFC has committed to pay all costs incurred by an Existing Fund in connection with each Reorganization.

4. The Board, including a majority of the Independent Directors, determined that the Reorganizations are in the best interests of the New Equity Fund and the Existing Funds and that the interests of the shareholders of the Existing Funds would not be diluted by the Reorganizations. In approving the Reorganizations, the Board considered various factors, including, among others: (a) The investment objectives and policies of the Existing Funds and the New Equity Fund; (b) the terms and conditions of each Plan; (c) the tax-free nature of the Reorganizations; and (d) the expense ratios of the Existing Funds and the New Equity Fund.

5. The consummation of each Reorganization is subject to a number of conditions, including, among others: (a) Approval of the Plan by the affirmative vote of a majority of the outstanding voting securities of the relevant Existing Fund; (b) receipt by CFI of an opinion from its legal counsel that the relevant Reorganization will not result in recognition of income, gain or loss for federal income tax purposes by the New Equity Fund, the relevant Existing Fund or the shareholders of the relevant Existing Fund, and (c) applicants receive from the Commission an exemption from section 17(a) of the Act for the Reorganizations. Each Plan also provides that, prior to completion of the Reorganization to which it relates, the relevant Existing Fund shall have declared and paid dividends and other distributions, effectively distributing to its shareholders substantially all investment company taxable income and all net capital gains for all taxable years ending on or before the date of the relevant Reorganization. Each Plan may be terminated by the Board. Applicants agree not to make any material changes to a Plan that would affect the application without prior approval of the Commission or its staff.

6. CFI began mailing definitive proxy statements/prospectuses for each of the three separate Reorganizations on March 1, 2002. The definitive proxy statements/prospectuses were filed with the Commission on March 6, 2002. Special meetings of shareholders of each of the Existing Funds are scheduled for April 2, 2002.

Applicants' Legal Analysis

1. Section 17(a) of the Act generally prohibits an affiliated person of a registered investment company, or an affiliated person of such a person, acting as principal, from selling any security to, or purchasing any security from, the company. Section 2(a)(3) of the Act defines an "affiliated person" of another person to include, among others: (a) Any person directly or indirectly owning, controlling, or holding with power to vote 5% or more of the outstanding voting securities of the other person; (b) any person 5% or more of whose securities are directly or indirectly owned, controlled, or held with power to vote by the other person; and (c) any person directly or indirectly controlling, controlled by, or under common control with the other person.

2. Section 2(a)(9) of the 1940 Act defines "control" in part to mean "the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company. Any person who owns beneficially, either directly or through one or more controlled companies, more than 25 per centum of the voting securities of any company shall be presumed to control such company."

3. Rule 17a–8 under the Act exempts from the prohibitions of section 17(a) mergers, consolidations, or purchases or sales of substantially all of the assets of registered investment companies that are affiliated persons, or affiliated persons of an affiliated person, solely by reason of having a common investment adviser, common directors/trustees, and/or common officers, provided that certain conditions set forth in the rule are satisfied.

4. Applicants believe that they may not rely on rule 17a–8 in connection with the Reorganizations because the Existing Funds and the New Equity Fund may be deemed to be affiliated by reasons other than having a common investment adviser, common directors/trustees, and/or common officers. Each Existing Fund and the New Equity Fund may be deemed affiliated persons since they are under the common control of CFSC. Additionally, the Existing Funds may be deemed affiliated persons since they are under the common control of Catholic Knights, which beneficially owns more than 25% of the outstanding voting securities of each Existing Fund.

5. Section 17(b) of the Act provides that the Commission may exempt a transaction from the provisions of section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

6. Applicants request an order under section 17(b) of the Act exempting them from section 17(a) to the extent necessary to complete the Reorganizations. Applicants submit that the Reorganizations satisfy the standards of section 17(b). Applicants state that the Reorganizations will be based on the relative net asset values of the Existing Funds and New Equity Fund's shares. Applicants also state that the investment objective and policies of the Funds are substantially similar. Applicants state that the Board, including the Independent Directors, has made the requisite determinations that the participation of each Existing Fund in the respective Reorganization is in the best interests of each Existing Fund and the New Equity Fund and that such participation will not dilute the interests of the existing shareholders of each Existing Fund.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act; Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of March 18, 2002: A closed meeting will be held on Tuesday, March 19, 2002 at 10 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (7), (9)(B), and (10) and 17 CFR 200.402(a)(3), (5), (7), 9(ii) and (10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting scheduled for Tuesday, March 19, 2002, will be: Opinion; litigation matter; formal order of private investigation; institution and settlement of injunctive actions; and institution and settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary at (202) 942–7070.

Dated: March 12, 2002.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45532; File No. SR–OPRA–2002–01]

Options Price Reporting Authority; Notice of Filing of a Proposal To Establish Terms Governing the Provision by OPRA of a Best Bid and Offer for Each of the Options Series Included in OPRA's Market Data Service, and Governing Its Use by Vendors

March 11, 2002.

Pursuant to Rule 11Aa3–2 under the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on February 26, 2002, the Options Price Reporting Authority ("OPRA"),[2] submitted to the Securities and Exchange Commission ("Commission") an amendment to the Plan for Reporting of Consolidated Options Last Sale Reports and Quotation Information ("OPRA Plan"). The amendment would add to the OPRA Plan terms governing the provision by OPRA of a best bid and offer ("BBO") for each of the options series included in OPRA's market data service, and governing the use of the BBO by vendors. The Commission is publishing this notice to solicit comments on the proposed amendment from interested persons.

I. Description and Purpose of the Amendment

The proposed amendment would establish in the OPRA Plan, and in BBO Guidelines that would be a part of the OPRA Plan, terms governing the provision by OPRA of a consolidated BBO service that would show the best

[1] 17 CFR 240.11Aa3–2.

[2] OPRA is a national market system plan approved by the Commission pursuant to Section 11A of the Exchange Act, 15 U.S.C. 78k–1, and Rule 11Aa3–2 thereunder, 17 CFR 240.11Aa3–2. *See* Securities Exchange Act Release No. 17638 (March 18, 1981), 22 S.E.C. Docket 484 (March 31, 1981). The OPRA Plan provides for the collection and dissemination of last sale and quotation information on options that are traded on the participant exchanges. The five signatories to the OPRA Plan that currently operate an options market are the American Stock Exchange, the Chicago Board Options Exchange, the International Securities Exchange, the Pacific Exchange, and the Philadelphia Stock Exchange. The New York Stock Exchange is a signatory to the OPRA Plan, but sold its options business to the Chicago Board Options Exchange in 1997. *See* Securities Exchange Act Release No. 38542 (April 23, 1997), 62 FR 23521 (April 30, 1997).

VOL
67
ISS

15
2002
UMI

bid and offer for each options series that is included in OPRA's market data service. The BBO for a given options series would show the number of contracts included in the best bid and best offer for that series subject to a minimum of ten contracts, and would identify the exchange where the best bid is being quoted and where the best offer is being quoted. In accordance with the proposed OPRA Plan amendment, OPRA vendors would be required to include only the consolidated BBO for any series of options included in the market data they provide to their customers (together with last sale reports for each such series of options), instead of having to show all bids and offers in all markets for each such series as they are currently required to do.

Under the proposed OPRA Plan amendment, the BBO for any series of options would be the highest bid and the lowest offer currently being quoted on any of OPRA's participant exchanges. In the case of options traded on two or more participant exchanges, if the same best bid or offer is quoted on more than one exchange, the exchange that is quoting at that price for the largest number of options contracts would be identified as the exchange that is quoting the best bid or offer, and if the same best bid or offer for the same number of options contracts is quoted on more than one exchange, the exchange that was first in time to quote that bid or offer for that number of contracts would be identified as the BBO. Thus, the BBO would be prioritized, in order, on the basis of price, size, and time.

The proposed BBO Guidelines provide that the minimum price increment for purposes of the BBO is no less than five cents, and that the minimum size increment for purposes of the BBO is no less than ten contracts.[3] This means that in order to displace the current BBO by improving the price at which an options series is quoted, the price improvement must be at least five cents per contract, and in order to displace the current BBO by increasing the number of contracts covered by a quote at the same price as the current BBO, the new bid or offer must be for at least ten contracts more than the current BBO. This would not preclude markets from entering bids and offers that improve the current BBO by less than five cents (to the extent such quotes may be permitted under applicable exchange rules) or that increase the number of contracts by less than ten. However, in order to displace the disseminated BBO, the price or size improvement must equal or exceed these minimums.

The adoption by OPRA of these minimum price and size increments occurred after OPRA received input from its vendors and subscribers, who view a BBO service that would enable OPRA to offer a meaningful options market data service as a significant benefit. Additionally, OPRA believes that the proposed BBO would require significantly less data processing and transmission capacity on the part of vendors and subscribers than is required by OPRA's full market data service. In this respect, OPRA anticipates that the BBO service would mitigate the huge increase in message traffic represented by OPRA's full service over the past several years, and the concomitant increase in the capacity required of vendors' and subscribers' systems in order to handle the full service. By proposing minimum price and size increments for purposes of the BBO at five cents and ten contracts respectively, OPRA believes that it has attempted to strike a balance between the need to show meaningful price and size improvement, and the need to keep the capacity demands of the BBO service at a level that is significantly less than the capacity demands of OPRA's full service.

OPRA states that its full market data service would continue to include all disseminated bids and offers from all of OPRA's participant exchanges and this information would continue to be available to vendors of, and subscribers to, the full service. OPRA believes that since major vendors may be expected to continue to offer the full OPRA service, and since most if not all broker-dealer subscribers would likely continue to subscribe to the full service in order to be able to fulfill their best execution obligations to customers, broker-dealers would have access to the same complete market data as they do today. For this reason, OPRA believes that the new BBO service should be viewed as an alternative to the full service for those persons who do not require the full service, and who therefore do not need to maintain the large systems needed to handle the full service.

The text of the amendment is set forth below. Text additions are in italics, deletions are in brackets:

III. Definitions

* * * * *

(g) "Quotation information" means bids, offers, or related information pertaining to quotations in eligible securities, *including information consisting of the BBO (as defined below) for eligible securities.*

* * * * *

(s) "BBO" ("Best Bid and Offer") means at any time the highest bid and the lowest offer for a given options series that is then available in one or more of the options markets maintained by the parties, as determined and disseminated by OPRA in accordance with "BBO Guidelines" adopted by the parties. The adoption of the initial BBO Guidelines shall require the approval of all of the parties; thereafter the BBO Guidelines may be amended from time to time by the affirmative vote of at least 75% of the parties, subject in all cases to being filed with and approved by the Commission.

* * * * *

V. Collection and Dissemination of Options Last Sale Reports and Quotation Information

* * * * *

(c) Dissemination of Last Sale Reports, Quotation Information and Other Information.

(i) The OPRA System shall provide for the uniform, nondiscriminatory dissemination of *consolidated options information*, on fair and reasonable terms over a network or networks to vendors, subscribers and other approved persons. [Last sale reports and quotation] *Such* information [with respect to eligible securities] shall [be disseminated only through the OPRA System,] *include consolidated last sale reports and consolidated quotation information for all series of options for which the parties are required to provide current market information to OPRA in accordance with paragraphs (a)–(b) of this Section V. Not later than _____ 2002,[4] or upon the earlier completion of modifications to the OPRA System necessary to enable the System to carry the BBO, such information shall also include* [and only] *the BBO for all* such [reports] *series of options. Once the BBO is available through the OPRA System, OPRA may offer a complete options market data service consisting of the BBO combined with consolidated last sale reports and quotation information, or OPRA may offer a limited service consisting of the BBO combined with consolidated last sale reports only while separately continuing to offer last sale reports and complete quotation information. Only such consolidated market information and related* information, together with other information that satisfies the conditions of paragraph (iv) of this Section V(c) or is approved by OPRA, shall be disseminated through the System.

* * * * *

VII. Vendors, Subscribers and Other Approved Persons

* * * * *

(b) Agreements. Agreements for the furnishing of options [last sale reports and/or quotation] information shall be designed to insure that such information is disseminated in an orderly, reliable and timely fashion, and that it is available only to approved vendors, subscribers and other approved persons. Such agreements may impose reasonable and nondiscriminatory charges for the privilege of receiving such information. OPRA may, in its discretion, contract separately for the dissemination of last sale reports and quotation information, or it may offer last sale reports and quotation information together in a single contract. *As provided in Section V(c), upon the availability of a BBO through the OPRA System OPRA may contract separately for last sale reports combined with the BBO, or it may offer last sale reports, quotation information and the BBO together in a single contract.* OPRA may *also* contract separately for access to information and facilities pertaining to FCO securities or index option securities.

Agreements with vendors shall provide that last sale reports and quotation information may be received by vendors only for the purpose of (A) developing a data base that enables the vendor to respond to inquiries from interrogation devices or other devices located in the office of approved subscribers that are capable of displaying last sale reports of transactions in, and/or quotations for, eligible securities as they occur; (B) reporting changes in last sale reports and quotation information through display devices located in the office of approved subscribers; and (C) providing last sale reports and/or quotation information to approved subscribers and to such other persons and in such other forms as OPRA may approve. In furtherance of the foregoing purposes, vendor agreements shall include provisions relating to the following:

(i) There shall be uniform specifications governing the manner in which last sale reports and quotation information are transmitted by or on behalf of OPRA to vendors. Such specifications may be different for different categories of eligible securities;

(ii) There shall be standards governing the services provided by vendors to subscribers which shall require that such services facilitate dissemination of last sale reports and quotation information in a manner that is consistent with applicable rules and regulations of the Securities and Exchange Commission and that is not discriminatory or contrary to the orderly operation and regulation of options markets;

(iii) Vendors shall not exclude reports or otherwise discriminate on the basis of the market in which a transaction or quotation took place, and the equipment used in connection with the display or retrieval of last sale reports or quotation information shall be capable of displaying all such reports or information regardless of the market where a transaction or quotation took place, and, unless exempted, shall identify such market , *provided, however, that agreements with vendors may provide that the requirements of this paragraph (b)(iii) will be deemed to be satisfied if a vendor's market data service includes last sale reports together with the BBO, or last sale reports together with all bids and offers furnished by OPRA, for each eligible security included in the service, notwithstanding that the service may also include additional unconsolidated information in respect of such security.*

All agreements entered into between the parties and persons receiving last sale reports and/or quotation information shall provide that the respective reports and information covered thereunder remain the property of the respective party on or in whose market the reported transaction or quotation took place, and all contracts shall be executed, and the fees collectable thereunder shall be billed and collected, on behalf of all parties, except that OPRA may provide for certain contracts pertaining exclusively to FCO securities or index option securities to be executed, and certain fees pertaining to such eligible securities to be billed and collected, on behalf of those parties that provide a market in such eligible securities.

* * * * *

Options Price Reporting Authority

BBO Guidelines

Section V(c)(i) of the OPRA Plan provides for the dissemination by OPRA of, among other things, a consolidated BBO. Section III(s) of the OPRA Plan defines the BBO as the highest bid and lowest offer for a series of options available in one or more of the options markets maintained by the parties, as determined in accordance with "BBO Guidelines" adopted by the parties to the Plan. The BBO Guidelines as currently in effect are as follows:

1. Price/Time Priority. The BBO is determined on the basis of the best price (highest bid and lowest offer) quoted first in time by a market, provided that in order to displace the current best bid or offer, a quote must improve the current quote by no less than five cents.

2. Size Included in BBO. The BBO will include the actual size of the included bid and offer, subject to a minimum size of 10 contracts. A bid or offer at the same price as the current BBO but for a size larger than the current BBO by no less than ten contracts will displace the current BBO.

3. Market Identifier. The BBO as disseminated by OPRA will include identification of the market quoting the best bid or best offer comprising the BBO in accordance with these Guidelines.

4. Crossed or Locked Markets. Crossed or locked markets may be shown as the BBO.

5. Excluded Quotes. Whenever quotes in a market are identified by that market as not being firm, those quotes will be excluded for purposes of determining the BBO. In addition, if, based on information provided by an exchange, the OPRA Processor determines that the exchange is experiencing system problems resulting in the unreliability of its quotes, the Processor will exclude those quotes from the BBO determination until it determines that these problems have been resolved.

II. Implementation of Plan Amendment

OPRA believes that its BBO service will be implemented upon the approval of the proposed OPRA Plan amendment (including its proposed BBO Guidelines) and promptly as practicable upon completion by OPRA's processor of the systems modifications necessary for its implementation. According to OPRA, its processor, the Securities Industry Automation Corporation ("SIAC"), is not now in a position to estimate when that work may be completed, since that depends upon certain technical decisions that have not yet been made by OPRA. However, OPRA has represented to the Commission that once SIAC is able to provide such an estimate, OPRA will amend this filing to include the latest date when the BBO service will go into production.[5] In addition, the introduction of OPRA's BBO service

[3] The minimum price variation for option quotes under the rules of OPRA's participant exchanges is currently five cents for options trading under $3.00 per share per option contract; *See, e.g.*, American Stock Exchange Rule 952.

[4] OPRA represents that it will specify the date when the BBO service will be in production by the filing of a subsequent amendment to this proposal. See letter from Joseph P. Corrigan, Executive Director, OPRA, to Deborah Flynn, Assistant Director, Division of Market Regulation, Commission, dated February 25, 2002.

[5] *Id.*

will likely necessitate certain changes to OPRA's forms of Vendor Agreement and Subscriber Agreements to make them conform to the revised requirements of the Plan, and perhaps to OPRA's fee structure. OPRA intends to file any such proposed amended agreements and fee changes with the Commission in one or more separate filings that may need to become effective prior to the implementation of the BBO service.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed OPRA Plan amendment is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, and all written statements with respect to the proposed plan amendment that are filed with the Commission, and all written communications relating to the proposed plan amendment between the Commission and any person, other than those withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available at the principal offices of OPRA. All submissions should refer to File No. SR–OPRA–2002–01 and should be submitted by April 5, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45527; File No. SR–EMCC–2002–02]

Self-Regulatory Organizations; Emerging Markets Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change Relating to Conforming Rule Changes Resulting From the Integration With The Depository Trust and Clearing Corporation

March 8, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on February 1, 2002, the Emerging Markets Clearing Corporation ("EMCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by EMCC. The Commission is publishing this notice and order to solicit comments on the proposed rule change from interested persons and to grant accelerated approval.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change will amend EMCC's rules to conform the rules to recent changes EMCC made to its by-laws.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, EMCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. EMCC has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.[2]

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On October 25, 2001, the Commission approved EMCC's integration with The Depository Trust and Clearing Corporation ("DTCC") whereby EMCC became a subsidiary of DTCC ("Integration Filing").[3] As part of the integration, (i) EMCC's Class A shareholders were to be offered the right to exchange their EMCC shares for DTCC common shares, (ii) the EMCC shares held by EMCC's trade association shareholders were to be repurchased and cancelled, and (iii) EMCC's certificate of incorporation and by-laws were to be revised to provide for a corporate governance structure consistent with its integration into the DTCC organization. The integration, including the exchange offer, trade association share repurchases, and amendment of EMCC's governing documents, was completed as of January 1, 2002, and on that date EMCC became a subsidiary of DTCC.

When EMCC's by-laws were amended, the reference to "participant directors" was deleted because that term was no longer relevant in the new corporate governance structure. A conforming change should also have been made to EMCC's rules in the Integration Filing but was inadvertently omitted. Also, because EMCC users are now given the opportunity to buy shares of DTCC at periodic intervals under the new structure, the obligation to become an EMCC shareholder as part of an applicant's initial membership requirements should have been omitted from EMCC's by-laws.

Accordingly, Rule 1 ("Definitions") and Rule 31 ("Hearing Procedures") are being amended to delete the definitions of "participant director." Rule 1 is also being amended to delete the definition of "ISMA," which was a "participant director." EMCC Rule 2 ("Members") is being amended to delete the requirement that applicants for membership become EMCC shareholders.

EMCC believes that the proposed rule change is consistent with the requirements of the section 17A of the Act[4] and the rules and regulations thereunder because it permits EMCC's rules to be consistent with its current corporate governance structure.

B. Self-Regulatory Organization's Statement on Burden on Competition

EMCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by EMCC.

[3] Securities Exchange Act Release No. 44987 (Oct. 25, 2001), 66 FR 55218 (Nov. 1, 2001).

[4] 15 U.S.C. 78q–1.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments relating to the proposed rule change have been solicited or received. EMCC will notify the Commission of any written comments it receives.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder and particularly with the requirements of section 17A(b)(3)(C)[5] of the Act, which requires that the rules of a clearing agency assure a fair representation of its shareholders and participants in the selection of its directors and administration of its affairs. In approving the Integration Filing, the Commission found that the proposed rule change was consistent with section 17A(b)(3)(C). Because this proposed rule change merely makes changes to EMCC's rules to conform them to the changes made in the Integration Filing, the Commission also finds this proposed rule change to be consistent with section 17A(b)(3)(C).

EMCC has requested that the Commission find good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing. The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing because such approval will allow EMCC to immediately conform its rule to its current corporate governance structure which should help to avoid confusion among participants.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, U.S. Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549–6069. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room in Washington, DC. Copies of such filing will also be available for inspection and copying at EMCC's principal office. All submissions should refer to File No. SR-EMCC–2002–02 and should be submitted by April 5, 2002.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR-EMCC–2002–02) be, and hereby is, approved on an accelerated basis.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45522; File No. SR–ISE–2002–04]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the International Securities Exchange LLC, Relating to the Status of Market Makers

March 8, 2002.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 11, 2002, the International Securities Exchange LLC ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE proposes to amend its rules to clarify that its market makers are specialists for all purposes under the Act.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the ISE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The ISE has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The term "specialist" includes any market maker deemed to be or treated as a specialist for purposes of the Act by an exchange.[3] The purpose of this proposed rule change is to specify in the Exchange's rules that ISE market makers are deemed to be specialists under the Act.

2. Statutory Basis

The ISE believes that the proposed rule change is consistent with section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5)[5] in particular, in that it is designed, among other things, to remove impediments to and perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has been filed by the Exchange as a "non-controversial" rule change pursuant to

[3] *See, e.g.*, Exchange Act Release No. 17574 (Feb. 25, 1981), 46 FR 15134 (Mar. 4, 1981). *See also* Rule 8.1 of the Chicago Board Options Exchange; Rule 958.01(a) of the American Stock Exchange; Rule 1014.01 of the Philadelphia Stock Exchange; and Rule 6.32 of the Pacific Exchange.

section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the foregoing proposed rule change: (1) Does not significantly affect the protection of investors or the public interest, (2) does not impose any significant burden on competition, and (3) by its terms does not become operative for 30 days after February 11, 2002, the date on which it was filed, or such shorter time as the Commission may designate, and the Exchange provided the Commission with written notice of its intent to file the proposed rule change at least five business days prior to the filing date, it has become effective pursuant to section 19(b)(3)(A)(iii)[8] of the Act and Rule 19b–4(f)(6)[9] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the ISE. All submissions should refer to File No. SR-ISE–2002–04 and should be submitted by April 5, 2002.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45529; File No. SR–ISE–2002–01]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 Thereto by the International Securities Exchange LLC Proposal to Restructure From a Limited Liability Company to a Corporation

March 8, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 11, 2002, the International Securities Exchange LLC ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. Amendment No. 1 was filed on March 5, 2002.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The International Securities Exchange LLC ("Old ISE") proposes to restructure from a limited liability company to a corporation, New ISE, (with the on-going business of both Old ISE and New ISE referred to collectively as "ISE" or the "Exchange") and to "demutualize" by separating the equity interest in the Exchange from members' trading rights. The text of the proposed rule change consists of: (1) A new Certificate of Incorporation; (2) a new Constitution; and (3) amendments to the Exchange's Rules. In addition, the Exchange has adopted the following interpretation of its Rules:

Upon reorganization, the Exchange would be a Delaware corporation. Pursuant to Paragraph (a)(ii) of section II of the Exchange's Certificate of Incorporation, the holders of the Exchange's Class A Common Stock "would be entitled to receive, when and if declared by the Board of Directors, out of the assets of [New ISE] which are by law available therefor, dividends payable either in cash, in stock or otherwise." The Exchange states its policy is that any revenues it receives from regulatory fees or regulatory penalties: would be segregated; would be applied to fund the legal, regulatory and surveillance operations of the Exchange; and would not be used to pay dividends to the holders of the Class A Common Stock.

The text of the proposed rule change is available for inspection at the Office of the Secretary, the ISE, the Commission's Public Reference Room, and on the Commission's Internet Web site (*http://www.sec.gov*).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

The ISE is currently structured as a limited liability company ("LLC"), in which memberships encompass both trading rights and equity ownership. The Exchange states that the purpose of this proposed rule change is to restructure the company into a corporation, in which trading rights are separated from equity ownership. Except as specified below, the Exchange represents that these changes do not affect the manner of the Exchange's operations or governance structure. The three documents that would accomplish the restructuring and demutualization of the Exchange, and that encompass this rule change, are as follows:

- Certificate of Incorporation: This is the basic corporate document and replaces Old ISE's current LLC Operating Agreement.
- Constitution and By-Laws: This document replaces Old ISE's Constitution.
- Amended rules: These proposed rule changes reflect the changes to the Certificate and Constitution. Most changes are non-substantive and reflect changes to "membership" terminology required by the demutualization. In particular, the applicability of various rules to "owners" of shares and to "Members" of the Exchange, which are broker-dealers that have been approved to exercise trading privileges on the Exchange, has been clarified.

Overview of the Restructuring and Demutualization

The Exchange would convert into a Delaware stockholder corporation through a merger of Old ISE with New ISE, its newly-formed subsidiary; the members of Old ISE would become stockholders of New ISE. Memberships in Old ISE would convert into shares of New ISE Class A Common Stock, par value $.01 per share (the "Class A Common Stock"), and shares of New ISE Class B Common Stock, par value $.01 per share (the "Class B Common Stock"). Other than the nominal par value of the Class B Common Stock, the Class A Common Stock would constitute all of the equity in New ISE. New ISE may issue classes of preferred stock in the future, the terms of which would be defined by the Board and filed with the Commission for approval.

The Class B Common Stock would confer upon holders trading privileges and specified voting rights associated with the memberships in Old ISE. The Class B shares would be issued in three series corresponding with the existing membership types. Each series of Class B Common Stock would confer the same trading privileges associated with the membership interest that is converted into such series, and would be distributed as follows:

- Each Class A Membership Interest (Primary Market Maker ("PMM") Members) would receive one share of Class B Common Stock, Series B–1 (the "Series B–1 Stock");
- Each Class B Membership Interest (Competitive Market Maker ("CMM") Members) would receive one share of Class B Common Stock, Series B–2 (the "Series B–2 Stock"); and
- Each Class C Membership Interest (Electronic Access Members ("EAM")) would receive one share of Class B Common Stock, Series B–3 (the "Series B–3 Stock").

Description of New ISE Stock

Class B Common Stock

As discussed below, the holders of the Class B Common Stock would have the right to elect six members of New ISE's Board of Directors. In addition, Series B–1 Stock holders and Series B–2 Stock holders would have voting rights with respect to actions affecting the number of issued shares of Series B–1 Stock and Series B–2 Stock (the "Core Rights"). A vote with respect to a Core Right would require the majority approval of the Series B–1 holders, voting as a separate class, and the Series B–2 holders, voting as a separate class. This replicates the voting provisions of Old ISE.

A holder of Class B Common Stock, together with any affiliate, may not own more than 20% of Series B–1 Stock or Series B–2 Stock. ISE Founders[4] would have a temporary exemption, not to extend past May 26, 2010, from the ownership concentration limits. Founders, however, would have no voting rights, other than a vote related to Core Rights, for any shares in excess of 20% of the Series B–1 Stock or 20% of the Series B–2 Stock.

The holders of Class B Common Stock would not have the right to receive any dividends. Upon liquidation of New ISE, holders of each series of Class B Common Stock would be entitled to receive a liquidation amount equal to the par value of the shares of Class B Common Stock ($0.01 per share). The shares of Series B–1 and B–2 Common Stock may be transferred only with approval of the Exchange, as is currently required with respect to PMM and CMM memberships. As with current EAM memberships, the shares of Series B–3 Stock would be non-transferable. In the event an EAM withdraws from trading, New ISE would buy back its share of B–3 Stock at par value.

Class A Common Stock

As discussed below, the holders of shares of Class A Common Stock would have the right to elect nine members of the Board of Directors of New ISE. The holders of the Class A Common Stock also would have the right to vote on any matter that requires a vote of the stockholders of New ISE, other than votes with respect to the Core Rights. Upon liquidation of New ISE, the holders of Class B Common Stock receive the par value of their stock and the holders of Class A Common Stock receive all residual amounts, subject to the rights of any classes of preferred shares.

If a holder of Class A Common Stock, together with any affiliate, owns more than 20% of the Class A Common Stock, the holder would have no voting rights for shares owned in excess of the 20% concentration limit. The New ISE Board, however, may approve an exemption to this prohibition for any person other than a New ISE member, an affiliate of a New ISE member, or a person subject to a statutory disqualification under section 3(a)(3) of the Act,[5] if the Board determines that such an exemption generally would be consistent with the New ISE's self-regulatory responsibilities. ISE Founders would have a temporary exemption, not to extend past May 26, 2010, from the voting limitation on Class A Common Stock shares owned in excess of 20%, but only with respect to any vote regarding any merger, consolidation, or dissolution of the New ISE or any sale of all or substantially all of the assets of the New ISE.

The holders of shares of Class A Common Stock would be entitled to receive dividends, when and if declared by the Board of Directors. Prior to its registration as a national securities exchange, the ISE adopted an interpretation restricting the ISE from paying dividends out of revenues received from regulatory fees or regulatory penalties.[6] The ISE proposes a similar interpretation to apply the same restrictions to New ISE.

Election of Board of Directors

The size and composition of the Board of Directors of New ISE would remain the same following the demutualization. The Board would be comprised of 15 directors, and initially would consist of the current Board of Old ISE. In future elections, the holders of the Class B Common Stock would elect six directors: Two directors elected by the holders of Series B–1 Stock; two directors elected by the holders of Series B–2 Stock; and two directors elected by the holders of Series B–3 Stock.

[10] 17 CFR 200.30–3(a)(12).
[1] 15 U.S.C. 78s(b)(1).
[2] 17 CFR 240.19b–4.
[3] See letter from Michael Simon, Senior Vice President and General Counsel, ISE, to Nancy Sanow, Assistant Director, Division of Market Regulation ("Division"), Commission, dated March 4, 2002 ("Amendment No. 1"). In Amendment No. 1, the Exchange expanded the concentration limits regarding ownership of the Class A Common Stock of its proposed corporation, International Securities Exchange, Inc. ("New ISE"). Specifically, the Exchange amended the proposed rule change to include a general prohibition on the voting rights with respect to stock that a person owns above a 20 percent ceiling. However, the Exchange states that its Board of Directors ("Board") would be able to exempt a person from the voting limit if such an exemption generally would be consistent with the Exchange's self-regulatory responsibilities. The Board would not be able to grant an exemption to: members; their affiliates; or persons subject to a statutory disqualification. In addition, Amendment No. 1 specifies that any "poison pill" New ISE adopts will be subject to prior Commission approval.

[4] As defined in the New ISE Constitution, the term "Founder" means a person or entity that purchased the former Class A or Class B Memberships directly from the Exchange on or prior to August 1, 1998, but only with respect to his or its ownership of such memberships.

[5] 15 U.S.C. 78c(a)(3).
[6] File No. 10–127, Amendment No. 2 (Letter from David Krell, President and Chief Executive Officer, ISE, to Jonathan G. Katz, Secretary, Commission, dated February 17, 2000).

VOL 67 ISS 51 MR 15 2002 UMI

The holders of the Class A Common Stock would elect nine directors: Eight non-industry directors (including at least two who would be public representatives) and the Chief Executive Officer. As opposed to the current structure, PMMs, CMMs, and EAMs would have the right to vote for the non-industry directors only to the extent they own Class A Common Stock. The Exchange believes that retaining members' rights to elect six directors fully complies with the statutory requirement that the ISE "assure a fair representation of its members in the selection of its directors. * * *."[7]

Currently, the Exchange has a single nominating committee, consisting of both industry and non-industry members, that nominates all candidates for election to the Board. Consistent with the new election structure, a nominating committee consisting of representatives of holders of the Series B Common Stock would select the nominees for Series B directors, and the non-industry directors on the Board would select the nominees for non-industry directors. Holders of the appropriate classes of common stock also would be able to nominate rival candidates for the Board.

Trading Privileges on the Exchange

The holders of each series of Class B Common Stock would have the same trading privileges they currently hold as PMMs, CMMs, and EAMs. The proposed rules of New ISE do not change any trading privileges. According to the Exchange, virtually all of the proposed changes are intended simply to conform the rules to the new Certificate of Incorporation and Constitution.

Transfer of Memberships

In filing number SR–ISE–2001–24, the Exchange proposed changes to the process by which members could transfer memberships. Concurrently with submitting the current filing, the ISE is withdrawing SR–ISE–2001–24 and including the substantive provisions of that filing in the Rules of New ISE. These changes update the Exchange's rules relating to the sale, transfer, and lease of market maker memberships. In particular, these changes eliminate the bid/offer system of selling these memberships and eliminate the claims process and deposit requirements for sales, transfer, and leases.[8]

Current ISE Rules provide that market maker memberships generally must be sold through a bid and offer system. Given its experience to date, the Exchange believes that the bid/offer system is not compatible with the unique structure of its market maker memberships. The PMM and CMM memberships are assigned to particular bins. In contrast to memberships on other exchanges, these memberships are not fungible with memberships outside those bins. In addition, there are relatively few memberships within each bin (1 PMM and 10 CMMs), rendering a bid/offer system limited to bin and class impractical. The Exchange proposes instead to allow members to negotiate their own purchases and sales, subject to the purchase or transfer agreement being filed with, and approved by, the Exchange. As a convenience, the Exchange would maintain a "bulletin board" for members to list memberships for sale, but use of that facility would be voluntary.

Currently, the Rules require the Exchange to hold proceeds from sales made pursuant to the bid/offer system for 20 days, during which time claims against the proceeds may be made. Similarly, under the lease provisions contained in the Exchange's current rules, a deposit is required prior to the lease becoming effective, to be applied at the beginning and the end of the lease term to satisfy the claims process. The Exchange proposes to remove the claims process and deposit requirements. These modifications would eliminate a significant administrative burden on the Exchange, Clearing Members, and other members that is a byproduct of the current membership claims process. As exists currently, Members can still pursue claims against other Members through the arbitration process.

(2) Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements under section 6(b)(5) of the Act [9] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transaction in securities, to remove impediments to and perfect the mechanism for a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange did not solicit or receive written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filings will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–ISE–2002–01 and should be submitted by April 5, 2002.

[7] Section 6(b)(3) of the Act. 15 U.S.C. 78f(b)(3).

[8] The Exchange also proposes to change the terminology used in these Rules to reflect the fact that the sale or transfer of market maker trading rights will be accomplished by the sale or transfer of the appropriate share of Series B–1 or Series B–2 Class B Common Stock.

[9] 15 U.S.C. 78f(b)(5).

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–10–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45531; File No. SR–NASD–2002–05]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc; Order Granting Approval to Proposed Rule Change Relating to Revisions to Form U–4 and Form U–5

March 11, 2002.

On January 9, 2002, the National Association of Securities Dealers, Inc. ("NASD" or the "Association"), through its wholly owned subsidiary, NASD Regulation, Inc. ("NASD Regulation"), filed with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change revising the Uniform Application for Securities Industry Registration or Transfer ("Form U–4") and Uniform Termination Notice for Securities Industry Registration ("Form U–5") (collectively, the "Forms"). On January 23, 2002, NASD Regulation submitted Amendment No. 1 to the proposed rule change.[3] On January 31, 2002, NASD Regulation submitted Amendment No. 2 to the proposed rule change.[4] On February 28, 2002, NASD Regulation submitted Amendment No. 3 to the proposed rule change.[5]

The proposed rule change, as amended, was published for comment in the **Federal Register** on February 7, 2002.[6] The Commission received no comments on the proposal.

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder,[7] and, in particular, the requirements of Section 15A of the Act [8] and the rules and regulations thereunder. The Commission finds specifically that the proposed rule change is consistent with Section 15A(b)(6) of the Act.[9] Section 15A(b)(6) [10] requires, among other things, that the NASD's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission believes that the proposed rule change promotes the objectives of this section of the Act. Specifically, the proposed rule change will accomplish these ends by making technical changes to the Forms to accommodate the electronic submission of investment adviser filings on the Investment Adviser Registration Depository ("IARD") system; establishing procedures that will enable broker/dealer firms and investment adviser firms employing dually registered persons to concur with information contained in the Forms; making certain formatting and technical changes to the Forms that would complete the transition from a paper-based filing model to an electronic-filing model; providing separate paper filing instructions for those filers that do not use the CRD or IARD systems; clarifying certain items that have been a source of confusion for Web CRD users; and updating the Form U–4 to add examination and registration categories that were not previously included. The proposed rule change also amends NASD IM–8310–2, Release of Disciplinary Information, to refer to the newly numbered Item 14 of the Form U–4.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[11] that the proposed rule change (File No. SR–NASD–2002–05) be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[12]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–45521; File No. SR–NYSE–99–51]

Self-Regulatory Organizations; Notice of Filing of Amendment No. 4 to a Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Requirements for Order Tracking by Exchange Members and Member Organizations

March 8, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] notice is hereby given that on February 27, 2002, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the NYSE. On May 24, 2000, the Exchange filed Amendment No. 1 to the proposal.[3] On August 14, 2001, the Exchange filed Amendment No. 2 to the proposal.[4] On January 17, 2002, the Exchange filed Amendment No. 3 to the proposal.[5] The

[3] *See* Letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Jennifer Colihan, Attorney, Division of Market Regulation ("Division"), Commission, dated May 22, 2000 ("Amendment No. 1"). In Amendment No. 1, the Exchange deleted the phrase "or execution" from proposed Rule 132B(a)(1)(C) as unnecessary for application of the Rule.

[4] *See* Letter from Darla C. Stuckey, Assistant Secretary, NYSE, to Nancy J. Sanow, Assistant Director, Division, Commission, dated August 14, 2001 ("Amendment No. 2"). In Amendment No. 2, the Exchange proposed to: (1) amend Rule 123 by adding proposed paragraph (f) which would set forth the details required to be recorded of each execution report, including a unique order identifier, and (2) amend Rule 132.30 by deleting 132.30(10), which would have required a unique order identifier be added to the data elements in post trade processing. The Exchange represents that this change will ensure that a unique order identifier will be attached throughout the life of an order, thus simplifying the tracking process.

[5] *See* Letter from Darla Stuckey, Corporate Secretary, NYSE, to Belinda Blaine, Associate Director, Division, Commission, dated January 17, 2002 ("Amendment No. 3"). In Amendment No. 3, the Exchange explained that it did not believe that it was cost-effective to store all order tracking data collected from members on a daily basis, and

Continued

proposed rule change was published, as amended, on January 30, 2002.[6] The Commission is publishing this notice to solicit comments on Amendment No. 4 to File No. SR–NYSE–99–51 from interested persons.

I.Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

As originally filed in SR–NYSE–99–51, the proposed rule change consisted of amendments to NYSE Rule 132, and the proposed adoption of NYSE Rules 132A, B and C on order tracking. In Amendment No. 4 to the proposed rule change, the Exchange proposes that the requirement that copies of execution reports be entered into an Exchange database be implemented within 6 months, instead of 15 months (as originally proposed), after Commission approval of the filing.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NYSE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange has adopted requirements for the electronic capture of orders at the point of sale (front end systemic capture, or "FESC") [7] and proposed requirements for the electronic capture of orders at the point of receipt (order tracking system, or "OTS").[8] The purpose of the requirements is to create a complete systemic record of orders handled by members and member organizations. These requirements will provide benefits both to the Exchange and members in terms of recordkeeping, surveillance and order processing. As originally filed in SR–NYSE–99–51, the proposed rule change consisted of amendment of Exchange Rule 132, and adoption of new Rules 132A, B and C on order tracking. These new rules require the recording of details of orders in Exchange listed securities by members and member organizations.

Amendment No. 1 effected a minor change to proposed NYSE Rule 132(B).[9] Amendment No. 2 proposed amendments to NYSE Rules 123 and 132 to require that members and member organizations provide a drop copy of the report of execution to FESC, with the unique order identifier linking the execution report to the original order, rather than requiring that the order identifier be submitted as part of audit trail post-trade processing.[10] Amendment No. 3 discussed the Exchange's position that data be submitted to the Exchange on an "as requested" basis rather than daily as a matter of routine under NYSE Rule 132C.[11]

As originally proposed in File No. SR-NYSE–99–51, the implementation date for the entire rule change and amendments would occur fifteen (15) months after Commission approval, if such approval is granted. The Exchange now proposes to amend this time frame with respect to the drop copy of execution reports requirement *only* (as described in Amendment No. 2 to the proposed rule change) to a shorter time frame, namely six (6) months after Commission approval of the filing. The Exchange believes that this is feasible since the system architecture for the Exchange database (FESC) is already in place. This six-month time frame should allow sufficient time for members and member organizations to do programming and training so that execution reports can be captured and drop-copied into the Exchange database. In addition, the Exchange believes that the phasing-in of the requirements will give members and member organizations time to better plan for full implementation of the rule changes proposed in File No. SR-NYSE–99–51.

2. Statutory Basis

The Exchange believes that the basis under the Act for Amendment No. 4 to this proposed rule change is the requirement under section 6(b)(5)[12] that an Exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The NYSE believes that this amendment to the proposed rule change will enhance the Exchange's tools to effectively surveil its market. The Exchange notes that the proposed rule change fulfills an undertaking contained in an order issued by the Commission relating to the Exchange's regulatory responsibilities.[13] Specifically, the Order directed the Exchange to "design and implement * * * an audit trail sufficient to enable the NYSE to reconstruct its market promptly. * * *" The Order called for "an accurate, time-sequenced record of orders * * *" throughout an order's life, from receipt through execution or cancellation and for synchronization of clocks used in connection with the audit trail of orders.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

clarified that therefore members would be required to submit data to the NYSE on an "as requested" basis rather than daily as a matter of routine. The Exchange also represented that the data collected would be used solely for regulatory purposes, and that it would not use data received from its members pursuant to the proposed rules to gain a competitive advantage over another self-regulatory organization or broker-dealer. Lastly, the Exchange explained what it considered order origination and time of receipt of an order.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to Amendment No. 4 of File No. SR–NYSE–99–51 and should be submitted by April 5, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[14]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45534; File No. SR–OCC–2001–18]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Amending the By-Laws

March 11, 2002.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1], notice is hereby given that on December 19, 2001, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared primarily by OCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would amend certain sections of Article IV and Article VI of OCC's By-Laws to correct minor errors.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.[2]

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The primary purpose of this rule change is to correct technical errors in Article IV of OCC's By-Laws that deals with officers. There are two principal errors that OCC desires to correct. First, in 1980, when Chapter XII of OCC's Rules was amended to eliminate the authority of the Chairman and the President to prescribe penalties for rule violations, Article IV of the By-Laws should have also been amended to eliminate references to that authority in Section 6 ("Chairman of the Board") and Section 8 ("President").

Second, in 1997, when Article IV was amended to create the office of Management Vice Chairman, OCC's stated intent was to remove the Member Vice Chairman from the line of succession.[3] However, language that should have been deleted in order to implement that intent was inadvertently left in. As a result, there are now mutually inconsistent By-Laws providing that in the absence or disability of the Chairman, the Management Vice Chairman and the Member Vice Chairman each succeed to the powers of the Chairman.

A secondary purpose of this rule change is to make minor corrections to Section 15 and 16 of Article VI of the By-Laws. Those corrections are to delete material that should have been deleted when references to market baskets were removed from the By-Laws and Rules.[4]

The proposed rule change is consistent with Section 17A of the Act because it provides consistency within OCC's by-laws.

(B) Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(i) of the Act [5] and Rule 19b–4(f)(1) [6] thereunder for it constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule. At any time within sixty days of the filing of this proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by OCC.

[3] Prior to that time, the By-Laws provided that Member Vice Chairman would succeed to the power of the Chairman in the absence or disability of the President and all the Vice Presidents. Securities Exchange Act Release No. 39420 (December 10, 1997), 62 FR 66167 (December 17, 1997) [File No. SR-OCC–97–08].

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-45523; File No. SR-Phlx-2002-12]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change and Amendment No. 1 Thereto by the Philadelphia Stock Exchange, Inc. Proposing To Adopt an Application Fee for Equity Trading Permits

March 8, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] notice is hereby given that on February 11, 2002, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed Amendment No. 1 on March 1, 2002.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to apply a $200 Application Fee to applicants for Equity Trading Permits ("ETPs") who, at the time application is made, are not Exchange members or foreign currency options ("FCO") participants. The Exchange states that it would not charge the $200 ETP Application Fee to ETP applicants who, at the time the application is made, are Exchange members or FCO participants. The text of the proposed rule change is available at the Phlx's Office of the Secretary and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On January 9, 2002, the Commission approved a proposed rule change to adopt Exchange Rule 23 which provides for ETPs.[4] The Exchange anticipates commencing an ETP program in the near future. Accordingly, the purpose of the proposed rule change is to amend the Exchange's Schedule of Dues, Fees and Charges, to establish that a $200 ETP Application Fee will be charged to applicants for ETPs who, at the time application is made, are not Exchange members or FCO participants.[5] The Exchange proposes this new ETP application fee to defray the Exchange's administrative costs of review and processing such applications.

Exchange Rule 23(b) provides that ETP holders must meet all qualifications that are required for membership in the Exchange. It provides that applications must be approved by the Exchange, and that applicants who are not Exchange members must be admitted by the Exchange. Exchange Rule 23(b) also states that the admissions process for applicants who are not members of the Exchange will be the same as that required for membership applicants for admission, and that the decision to grant or deny an application for admission will be made by the Admissions Committee. The Exchange noted in its filing proposing Exchange Rule 23, that ETP applicants who are members of the Exchange when they apply for an ETP will have already received a favorable admissions determination by the Exchange's Admissions Committee when they became a member. Consequently, they will not be charged the ETP Application Fee. The Exchange now proposes that a $200 ETP Application Fee apply to ETP applicants who are not members or FCO participants at the time of application in order to defray the administrative costs associated with processing applications made by individuals who have not previously been evaluated by the Exchange as applicants for membership or FCO participation.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[6] in general, and furthers the objectives of section 6(b)(4) of the Act,[7] in particular, by providing for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities. Specifically, the Exchange believes that the $200 ETP Application Fee is reasonable and equitable, because it is charged to all ETP applicants who are not members or FCO participants.

In addition, the Exchange believes that the proposed rule change is consistent with the requirements of section 6(b)(5) of the Act,[8] in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, and is not designed to permit unfair discrimination between customers, issuers, brokers or dealers. The Exchange believes that application of the $200 ETP Application Fee to ETP applicants who are not members or FCO participants when they apply will defray administrative costs involved in the review and processing of an ETP application when made by an individual with respect to whom this has not previously been done in the context of an application for a membership or FCO participation.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change establishes or changes a due, fee, or charge imposed by the Exchange and, therefore, has become effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act[9] and Rule 19b-4(f)(2) hereunder.[10] At any time within 60 days of the filing of Amendment No. 1 to the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purpose of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-Phlx-2002-12 and should be submitted by April 5, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-U

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-45533; File No. SR-SCCP-2002-02]

Self-Regulatory Organizations; Stock Clearing Corporation of Philadelphia; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Extension of its Pilot Program To Implement Its Existing Fee Schedule for Electronic Communications Networks

March 11, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on January 17, 2002, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared primarily by SCCP. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change extends SCCP's pilot program for an additional one year period thereby continuing to implement the existing SCCP fee waivers for SCCP participants for trades executed on the Philadelphia Stock Exchange, Inc. ("Phlx") for Electronic Communications Networks ("ECNs").[2] The current pilot program expired on January 23, 2002.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule

In its filing with the Commission, SCCP included statements concerning the purpose of and statutory basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. SCCP has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[3]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

SCCP previously filed with the Commission a proposed rule change to adopt a fee schedule for ECNs.[4] Pursuant to that proposed rule change, SCCP waived certain dues, fees, and charges, including trade recording fees, value fees, and treasury transaction charges but not account fees, research fees, computer transmission/tape charges, or miscellaneous charges on its fee schedule.[5] The fee schedule was to operate as a pilot program for one year. It was intended that after the initial pilot period, the ECN would be eligible for the SCCP fee schedule rates for ECNs only if the ECN achieved certain average daily equity volume on the Phlx.[6] At this time, SCCP proposes to continue to implement the existing fee schedule for ECNs, as described above, without imposing volume requirements.

This rule change affects ECN trades not related to such ECN acting as a Phlx specialist or floor broker. Thus, an ECN may incur specialist or floor brokerage transaction fees if it acts in that capacity. Currently, no ECN operates from Phlx's equity trading floor as a floor broker or specialist unit. If, however, an ECN did operate from the Phlx equity trading floor, it could be subject to various SCCP fees respecting

[11] 17 CFR 200.30-3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] ECNs shall mean any electronic system that widely disseminates to third parties orders entered therein by an Exchange market maker or over-the-counter ("OTC") market maker and permits such orders to be executed against in whole or in part except that the term ECN shall not include: any system that crosses multiple orders at one or more specified times at a specified price set by the ECN, algorithm, or by any derivative pricing mechanism and does not allow orders to be crossed or executed against directly by participants outside of such times or any system operated by or on behalf of an OTC market maker or exchange market maker that executes customer orders primarily against the account of such market maker as principal other than riskless principal.

[3] The Commission has modified parts of these statements.

[4] Securities Exchange Act Release No. 45145 (December 10, 2001), 66 FR 65017 (December 17, 2001) (SR-SCCP-2001-01).

[5] Certain provisions of the SCCP fee schedule do not apply to ECNs because they apply to specialists and/or relate to margin financing, such as specialist discount, margin account interest, P&L statement charges and buy-ins.

[6] The average daily equity volume requirements on the Phlx were initially at least 5,000 trades and 5,000,000 shares in the twelfth month after the ECN first became subject to the ECN fee schedule.

VOL 67 ISS 51 MR 15 2002 UMI

its non-ECN floor operation.[7] In addition, an ECN's transactions as a floor broker would be subject to the applicable SCCP fee as would any ECN's specialist trades. Even if the ECN is acting as a floor broker or specialist with respect to some trades, those trades for which it is not acting as a floor broker or specialist, but rather as an ECN, would be subject only to the monthly and not other transaction charges.

The proposed rule change extends SCCP's existing fee schedule for ECNs for an additional one year period in order to have the opportunity to fully review and evaluate the overall structure of the ECN program, including whether to impose volume threshold requirements.

SCCP believes that its current ECN fee schedule provides competitive fees with appropriate incentives thus proving a reasonable method to attract large order flow providers such as ECNs to Phlx and SCCP. Additional order flow should enhance liquidity and improve Phlx's, and therefore SCCP's, competitive position in equity trading and clearing.

SCCP believes that its proposal to extend its current pilot program for one year, thereby continuing to implement the existing SCCP fee waivers described above for ECNs, is consistent with section 17A(b)(3)(D) of the Act[8] because it provides for the equitable allocation of reasonable dues, fees, and other charges. SCCP believes that structuring this fee for ECNs is appropriate, as ECNs are unique in their role as order flow providers to Phlx. Specifically, SCCP points out that ECNs operate a unique electronic agency business similar to a securities exchange as opposed to directly executing orders for their own customers as principal or agent.

(B) Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee, or other charge imposed by SCCP, it has become effective pursuant to section 19(b)(3)(A)(ii) of the Act[9] and Rule 19b–4(f)(2) thereunder.[10] At any time within sixty days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at SCCP. All submissions should refer to the File No. SR–SCCP–2002–02 and should be submitted by April 5, 2002.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[11]

[Declaration of Disaster # 3397]

State of New York

Jefferson County and the contiguous counties of Lewis, Oswego and St. Lawrence in the State of New York constitute a disaster area as a result of a fire that occurred in the Village of Carthage on March 2, 2002. The fire destroyed nine buildings containing a number of rental units and businesses. Applications for loans for physical damage may be filed until the close of business on May 7, 2002 and for economic injury until the close of business on December 9, 2002 at the address listed below or other locally announced locations:

U.S. Small Business Administration, Disaster Area 1 Office, 360 Rainbow Blvd., South 3rd Floor, Niagara Falls, NY 14303.

The interest rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	6.625
Homeowners without credit available elsewhere	3.312
Businesses with credit available elsewhere	7.000
Businesses and non-profit organizations without credit available elsewhere	3.500
Others (including non-profit organizations) with credit available elsewhere	6.375
For Economic Injury:	
Businesses and small agricultural cooperatives without credit available elsewhere	3.500

The number assigned to this disaster for physical damage is 339705 and for economic injury the number is 9O7700.

BILLING CODE 4910–62–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Suffolk County, NY

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for proposed highway project in Suffolk County, New York.

FOR FURTHER INFORMATION CONTACT: Thomas F. Oelerich, P.E., Acting Regional Director, State Office Building; 250 Veterans Memorial Highway; Hauppauge, NY 11788; Telephone: (631) 952–6632 or Robert, E. Arnold, Division Administrator, Federal Highway Administration, New York Division, Leo W. O'Brien Federal Building, 7th Floor, Room 719, Clinton Avenue and North Pearl Street, Albany, New York 12207, Telephone: (518) 431–4127.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the New York State Department of Transportation (NYSDOT) will prepare an environmental impact statement (EIS) on a proposal to improve the Northern State Parkway/NYS Route 110 interchange in Suffolk County, New York. The proposed improvement would involve the reconstruction of the existing routes in the Town of Huntington for a distance of about 0.98 miles along Northern State Parkway and 1.65 miles along NYS Route 110. Improvements to this interchange are considered necessary to provide for the existing and projected traffic demand along NYS Route 110 and to address an area with a history of accidents. Also included in this project is the replacement of the Northern State Parkway bridge over NYS Route 110.

Alternatives under consideration include: (1) Taking no action; (2) reconfiguring the Northern State Parkway/NYS Route 110 interchange and replacing the existing Northern State Parkway bridge over NYS Route 110; (3) reconfiguring the Northern State Parkway/NYS Route 110 interchange without replacing the existing Northern State Parkway bridge over NYS Route 110; (4) replacing the Northern State Parkway bridge over NYS Route 110 without reconfiguring the interchange; this would include widening of the Northern State Parkway; and (5) widening NYS Route 110 to a six lane arterial. Incorporated into and studied with the various build alternatives will be design variations of grade and alignment and various intersection improvements.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. In addition to scoping discussion with these interested parties, the general public will have the opportunity to make scoping comments both in writing and in person at a Public Information/ Scoping Meeting that will be held at the Sunquam Elementary School, 15 Sweet Hollow Road, Melville on March 14, 2002. After the DEIS is prepared, it will available for public and agency review and comment. This will be followed by a public hearing. Public notice will be given of the time and place of the hearings.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the NYSDOT or FHWA at the addressed provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 315; CFR 771.123

Issued on: February 27, 2002.

Douglas P. Conlan,

District Operations Engineer, Federal Highway Administration, New York Division, Albany, New York.

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 34171]

Butte-Silver Bow County—Acquisition Exemption—Silver Bow County, MT

Butte-Silver Bow County (BSB, or the County), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 [1] to acquire an 11-mile rail line known as the Missoula Gulch and Butte Hill Line (MGBH) in and near Butte, in Silver Bow County, MT.[2] The MGBH extends from milepost 0.0 at Rocker, west of Butte, to milepost 4.40 at the Butte Hill Yard (Missoula Gulch segment), and also extends north and east from milepost 0.0 at the Butte Hill Yard to milepost 3.69 near the Badger Mine (Butte Hill segment). BSB is acquiring the MGBH in order to facilitate abandonment of the line, an environmental cleanup, and conversion of the railroad beds to trail and public use.[3]

The exemption was scheduled to become effective on February 22, 2002.

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 34171, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW, Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Susan J. Geer, Esq., Davis Graham & Stubbs LLP, 1550 17th Street, Suite 500, Denver, CO 80202.

Board decisions and notices are available on our website at *"WWW.STB.DOT.GOV."*

Decided: March 8, 2002.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 02–6308 Filed 3–14–02; 8:45 am]

BILLING CODE 4915–00–P

[1] BSB has also invoked 49 CFR 1180.2(d)(1), pertaining to finance transactions involving more than one railroad. However, because the acquisition in question does not involve more than one railroad, this provision is inapplicable.

[2] The MGBH was most recently owned and operated by a non-profit corporation called the Butte/Anaconda Historic Park and Railroad Corporation (BAHPR, or the Railroad). The BAHPR operated a tourist train over the portion of the MGBH between Rocker and the former Butte Hill Yard. BAHPR operated over the MGBH under a lease from the State of Montana from 1988 to 1991, at which time the BAHPR acquired the MGBH. *See Butte/Anaconda Historic Park and Railroad Corporation—Acquisition Exemption—State of Montana, Department of Commerce*, ICC Finance Docket No. 31982 (ICC served Feb. 11, 1992). In 1994, the Montana Secretary of State's Office involuntarily dissolved the BAHPR for failing to maintain its filings. However, the BAHPR continued intermittently to operate a tourist train over the MGBH through 1996, did not seek reinstatement, and never distributed its assets following dissolution.

[3] BSB states that it intends to seek authority to abandon the line following receipt of authority to acquire it. In *Land Conservancy—Acq. And Oper.—Burlington Northern*, 2 S.T.B. 673 (1997), reconsideration denied, STB Finance Docket No. 33389 (STB served May 13, 1998) (*Land Conservancy*), *pet. for judicial review dismissed sub nom. The Land Conservancy of Seattle and King County v. STB*, 238 F.3d 429 (9th Cir. 2000), the Board disallowed the sale of an active rail line to a purchaser that had, immediately after the purchase, sought to abandon the line. Acquisitions of active rail lines under 49 U.S.C. 10901 are supposed to be for continued rail use. In *Land Conservancy*, the Board found that the deliberate course of conduct on the part of the abandoning carrier and the purchaser constituted a misuse of Board procedures and acted to preserve the integrity of its processes.

Here, the acquisition is not taking place pursuant to an agreement or course of conduct by the parties—no transaction has occurred—but rather pursuant to the operation of state law. BAHPR didn't sell the line to BSB. Rather, the Railroad was dissolved by the Montana Secretary of State. The County acquired the Railroad's assets pursuant to an order of the Court of the Second Judicial District of Montana, Silver Bow County. Acquisition of an active rail line—the line is not presently in service, but it has never been abandoned—requires Board authority and BSB has sought to comply with the statute. BSB has no desire to go into the railroad business—it is an agency of local government, not a commercial enterprise—and seeks merely to dispose of the property. Under the circumstances, BSB's notice invoking the class exemption to obtain authority for its acquisition is consistent with the statute.

The line does not contain federally granted rights-of-way. Any documentation in CSXT's possession will be made available promptly to those requesting it.

The interest of railroad employees will be protected by the conditions set forth in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

By issuing this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision is anticipated to be issued by June 14, 2002.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) will be due no later than 10 days after service of a decision granting the petition for exemption. Each offer must be accompanied by a $1,000 filing fee. *See* 49 CFR 1002.2(f)(25).

All interested persons should be aware that, following abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 CFR 1152.28 or for trail use/rail banking under 49 CFR 1152.29 will be due no later than April 4, 2002. Each trail use request must be accompanied by a $150 filing fee. *See* 49 CFR 1002.2(f)(27).

All filings in response to this notice must refer to STB Docket No. AB–55 (Sub-No. 606X) and must be sent to: (1) Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001; and (2) Natalie S. Rosenberg, 500 Water Street, Jacksonville, FL 32202. Replies to the CSXT petition are due on or before April 4, 2002.

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Services at (202) 565–1592 or refer to the full abandonment or discontinuance regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis (SEA) at (202) 565–1552. [TDD for the hearing impaired is available at 1–800–877–8339.]

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by SEA will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Other interested persons may contact SEA to obtain a copy of the EA (or EIS). EAs in these abandonment proceedings normally will be made available within 60 days of the filing of the petition. DEPARTMENT OF THE TREASURY

Internal Revenue Service

Open Meeting of Citizen Advocacy Panel, Midwest District

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice.

SUMMARY: A meeting of the Midwest Citizen Advocacy Panel will be held in Omaha, Nebraska.

DATES: The meeting will be held Thursday, March 21, 2002, and Friday, March 22, 2002.

FOR FURTHER INFORMATION CONTACT: Sandra McQuin at 1–888–912–1227, or 414–297–1604.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988) that an open meeting of the Citizen Advocacy Panel (CAP) will be held Thursday, March 21, 2002, from 9 a.m. to 4 p.m. and Friday, March 22, 2002, from 8 a.m. to Noon at the Doubletree Hotel, 1616 Dodge Street, Omaha, Nebraska. The Citizen Advocacy Panel is soliciting public comment, ideas, and suggestions on improving customer service at the Internal Revenue Service. Public comments will be welcome during the meeting, or you can submit written comments to the panel by faxing to (414) 297–1623, or by mail to Citizen Advocacy Panel, Mail Stop 1006 MIL, 310 West Wisconsin Avenue, Milwaukee, WI 53203–2221.

The Agenda will include the following: Reports by the CAP sub-groups, presentation of taxpayer issues by individual members, discussion of issues, and an update on the recruitment for new panel members.

Note: Last minute changes to the agenda are possible and could prevent effective advance notice.

Dated: March 6, 2002.

Cynthia Vanderpool,

CAP Project Manager.

Federal Implementation Plans Under the Clean Air Act for Indian Reservations in Idaho, Oregon and Washington

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to promulgate Federal Implementation Plans (FIPs) under the Clean Air Act (CAA) for Indian reservations in Idaho, Oregon, and Washington. The FIPs would include basic air quality regulations for the protection of communities in and adjacent to such Indian reservations. These rules would be implemented by EPA, or a delegated Tribal Authority, until replaced by Tribal Implementation Plans (TIPs).

DATES: Comments must be received no later than June 13, 2002.

ADDRESSES: Written comments should be addressed to: David Bray, Office of Air Quality (OAQ–107), U.S. EPA Region 10, 1200 Sixth Avenue, Seattle, WA 98101–1128. Please cite the administrative docket, #A–2000–25, upon which you are providing comment.

Copies of all information supporting this action are available for public inspection and copying between 8:30 a.m. and 5:30 p.m. Eastern Standard Time at EPA's Central Docket Section, Office of Air and Radiation, Room 1500M (6102), 401 M Street, SW., Washington, DC 20460, and between 8:30 a.m. and 3:30 p.m. Pacific Standard Time at EPA Region 10, Office of Air Quality, 10th Floor, 1200 Sixth Avenue, Seattle, Washington 98101. A reasonable fee may be charged for copies.

I. Background

A. Today's Action

EPA is proposing to establish Federal Implementation Plans (FIPs) under the Clean Air Act (CAA) for Indian reservations in Idaho, Oregon, and Washington. These rules, when promulgated, would be an important step in ensuring that basic air quality protection is in place to protect health and welfare on Indian reservations located in the Pacific Northwest. In Region 10, EPA has been working with the Tribes to identify the primary sources of air pollution emissions on Indian reservations, and evaluating the CAA statutory authorities available to regulate those sources. EPA's evaluations have identified concerns with unregulated particulate matter, such as from open burning for agricultural purposes. A significant number of industrial major stationary sources subject to Title V of the CAA are located on these Indian reservations. By means of these rules, EPA would impose regulatory requirements on industry and residents on reservations, similar to those imposed by the rules of State and local air agencies in the surrounding areas. EPA believes that it is appropriate to focus initially on the sources in Region 10 that have been identified as ones that may cause or contribute to prevalent air quality problems on reservations and in shared airsheds of the Pacific Northwest. Aside from existing national emissions standards and requirements, the FIPs proposed in this rule are the first building blocks under the CAA to address such emissions.

In the Clean Air Act (42 U.S.C. 7401 to 7671q), Congress gave EPA broad authority to protect air resources throughout the nation, including the air resources on Indian reservations and other areas of Indian country. Based on the authority of section 301 of the CAA, EPA promulgated a final rule entitled "Indian Tribes: Air Quality Planning and Management," on February 12, 1998, 63 FR 7254. The rule, generally referred to as the "Tribal Authority Rule" or "TAR," establishes procedures for EPA determinations on Tribal eligibility applications for "treatment in the same manner as a State" (commonly referred to as "TAS") under CAA authorities for Indian reservations and for non-reservation areas within a Tribe's jurisdiction. The U.S. Court of Appeals for the District of Columbia Circuit recently upheld the TAR in *Arizona Public Service Co.* v. *EPA*, 211 F.3d 1280 (D.C. Cir. 2000), *cert. denied* 121 S. Ct. 1600 (2001).

In the TAR, EPA explained that it intends to use its authority under the CAA "to protect air quality throughout Indian country" [1] by directly implementing the CAA's requirements where Tribes have chosen not to develop or implement a CAA program. EPA wrote in the final rule at 40 CFR 49.11 that it would "promulgate without unreasonable delay such Federal implementation plan provisions as are necessary or appropriate to protect air quality" for these areas.

In order to further this commitment to protect air quality, EPA is proposing rules for Indian reservations in Idaho, Oregon, and Washington.[2] In exercising its authority under sections 301(a) and 301(d)(4) of the CAA and 40 CFR 49.11(a) to promulgate such FIP provisions as are necessary or

[1] "Indian country" is defined under 18 U.S.C. 1151 as: (1) All land within the limits of any Indian reservation under the jurisdication of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation, (2) all dependent Indian communities within the borders of the United States, whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a State, and (3) all Indian allotments, the Indian titles which have not been extinguished, including rights-of-way running through the same. Under this definition, EPA treats as reservations trust lands validly set aside for the use of a Tribe even if the trust lands have not been formally designated as a reservation.

[2] EPA is not proposing at this time to establish rules for Indian country areas in Alaska, and will continue to evaluate the need and appropriateness of air quality rules there in consultation with the Federally recognized Tribes in Alaska. EPA is working with the U.S. Bureau of Indian Affairs (BIA) to complete the mapping of the Indian country in Alaska. Once the extent and specific locations of the Indian country is better known, air quality characterization and subsequent assessment of the needs can be initiated in consultation with the affected Tribal governments. EPA anticipates that conditions and needs in Alaska may warrant a different array of requirements and provisions than are included in these proposed FIPs.

appropriate to protect air quality in Indian country, EPA has stated that it will carry out this authority in a prioritized way, beginning with sources that pose the greatest threat to public health and the environment. 64 FR at 8255. The FIPs proposed today are the first building block under the CAA to address the most prevalent gaps identified to date on reservations in the Pacific Northwest. EPA will continue to evaluate air quality conditions and the sources that cause or contribute to the degradation of air quality, and expects to promulgate additional FIP provisions, in consultation with Tribes, including Tribes that are developing TIPs. Thus, EPA views these FIP provisions as a first step towards establishing a complete plan for maintaining the NAAQS that, together with approved TIPs, would meet the goals of section 110(a) of the CAA.

After consulting with the Tribes in Idaho, Oregon, and Washington, EPA Region 10 is concerned that there is currently a gap in air quality requirements in these areas under the CAA. While many Tribes in Region 10 are in the process of developing air quality management programs, EPA Region 10 has approved only one Tribe, the Shoshone-Bannock Tribes of the Fort Hall Reservation in Idaho, to assume certain CAA authorities. Furthermore, States generally lack the authority to regulate air quality in Indian country. See *California* v. *Cabazon Band of Mission Indians*, 480 U.S. 202, 216 and n.18 (1987); see also *HRI* v. *EPA*, 198 F.3d 1224, 1242 (10th Cir. 2000), *Montana* v. *EPA*, 137 F.3d 1135 (9th Cir. 1998), *cert. denied* 525 U.S. 921 (1998). These proposed rules, as described below, are intended to fill the gap in current regulations until such time as individual Tribes develop and implement approved TIPs.

As discussed in greater detail below, EPA believes that in light of the particular air quality issues generally present on reservations in the Pacific Northwest, it is appropriate to establish each of the air quality rules for each reservation that are proposed today. These rules would regulate activities, pollutants, and sources by supplementing the existing Federal regulatory programs such as the Prevention of Significant Deterioration (PSD), National Emission Standards for Hazardous Air Pollutants (NESHAP), and New Source Performance Standards (NSPS) programs. These proposed rules would provide additional regulatory tools for EPA to use in implementing the CAA on Indian reservations. EPA has adequate enforcement authority under section 113 of the CAA to ensure compliance with the requirements that are proposed.

In Region 10, EPA is continuing to identify the primary sources of air pollution emissions on Indian reservations, and evaluating the CAA statutory authorities available to regulate those sources pending submission of a TIP by a Tribe and approval by EPA. This information is assisting EPA in determining, in consultation with affected Indian Tribes, the activities and sources of air pollution that threaten air resources. EPA believes that it is appropriate to focus its efforts to develop FIPs initially on the sources that may cause or contribute to air quality problems that have been identified.

EPA's evaluations and information from affected Indian Tribes identified concerns with pollution from unregulated sources of particulate matter. Examples of categories of sources of air pollution not currently regulated include emissions from open burning and fugitive dust. Agricultural burning has been identified as a source of uncontrolled particulate matter that if not properly regulated can endanger people's health and safety, as well as cause other environmental impacts such as regional haze. EPA Region 10 is working at a regional level in partnership with States, Tribes, local governments, growers, and citizen groups to support and strengthen tools and programs for addressing particulate matter, including the development of appropriate regulatory controls in each jurisdiction. EPA also is identifying the industrial and commercial sources of emissions that are not fully regulated. There are at least 11 facilities on these reservations that meet the definition of major source, under the Federal Operating Permits provisions in Title V of the CAA. Most of these facilities are in the forest products industry, that can emit plumes of particulate matter at levels that should be controlled. Industrial facilities such as these also use fuels containing sulfur that can cause excessive concentrations of ground-level sulfur dioxide if not properly controlled. Regulating these sources is appropriate in order to protect air quality from the potential for significant deterioration caused by the release of particulate matter and sulfur dioxide. Particulate matter and sulfur dioxide are regulated by National Ambient Air Quality Standards (NAAQS) under section 109 of the CAA. A number of rules proposed today would control emissions of particulate matter and sulfur dioxide to the atmosphere as appropriate for the purpose of maintaining or attaining the NAAQS. Along with the protections these Federal air quality rules would provide, the rules can also assist Tribes in developing air quality management programs by using the Federal rules as templates in drafting TIPs.

It is important to note that these proposed rules are analogous to, but different from, the types of rules generally approved by EPA into State Implementation Plans (SIPs). The rules proposed today represent an average program, and so are more stringent than some SIP rules and less stringent than others. However, while these would be Federal CAA rules, they would not change the minimum criteria in 40 CFR Part 51, the CAA, or the TAR for approval of rules in either a SIP or a TIP. [3] EPA encourages Tribes to develop individual TIPs and will work with Tribes seeking to replace these rules with TIPs. These regulations would apply until they are replaced by Tribal regulations in an approved TIP.

EPA Region 10 has actively consulted with and encouraged Tribes to assist EPA in developing these proposed regulations to ensure that Tribal considerations are addressed. EPA Region 10 staff has worked with, and will continue to work with, individual Tribes to assess air quality problems, and develop, in consultation with the Tribes, Tribal or Federal strategies for addressing these problems. For example, EPA Region 10 has worked with Tribes to develop emission inventories and air monitoring studies where appropriate, to determine the nature of air quality problems, and to identify a range of potential control strategies. During the development of the rules proposed here, EPA Region 10 staff consulted with affected Tribes in a series of group and individual meetings that are described in detail below in Section V.G, which discusses compliance with Executive Order 13175: Consultation and Coordination with Indian Tribal Governments.

B. Areas and Sources Covered by the Rules

These proposed rules would apply to any person who owns or operates an air pollution source within the exterior boundaries of an Indian reservation in Idaho, Oregon, or Washington, as set forth in 40 CFR Part 49, Subpart M Implementation Plans for Tribes—Region X. Further, as discussed in the TAR at 63 FR 7257–58, EPA interprets the term "reservation" consistent with U.S. Supreme Court case law to include

[3] EPA has used the planning requirements applicable to States as a guide in developing these FIPs.

VOL 67 ISS 51 MR 15 2002 UMI

trust lands that have been validly set apart for the use of a Tribe even though the land has not been formally designated as a reservation. EPA is not proposing to establish rules for all of Indian country, e.g., these rules would not apply to allotment lands that are held in trust for individual Indians that are located outside the exterior boundaries of a reservation or for dependent Indian communities. Based on consultations, EPA is not aware of any sources on those types of land outside of reservations to which these rules need to apply. This proposed rulemaking is a step in addressing known air quality concerns on reservations. If in the future, EPA becomes aware of air quality concerns for Indian country outside of reservations, EPA may propose other requirements that are deemed necessary or appropriate.

This proposal includes: (1) Rules of general applicability that would regulate emissions of particulate matter and sulfur dioxide from combustion and process sources, visible emissions and fugitive dust; and (2) additional proposed rules that would control particulate matter emissions from specific types of equipment used to burn wood wastes, sometimes known as "wigwam burners," and certain wood product industry sources. The proposed rules would also regulate open burning, and allow the Regional Administrator to impose restrictions on emissions during periods of impaired air quality or when emissions from sources are detrimental to human health and welfare. Finally, the proposed rules would require registration of many stationary sources of air pollution and would provide the opportunity for stationary sources with low emission levels to obtain potential to emit limits in operating permits. The specific rules that would apply to sources on a particular reservation are specified in today's proposed rule, at 40 CFR part 49, Subpart M.

EPA will decide whether a source or activity located on an Indian reservation is subject to the provisions of these rules as made applicable in the implementation plan for that reservation. Today's proposed rules include procedures for sources to obtain individual determinations from EPA as to whether they are subject to these regulatory requirements. A source that is uncertain regarding the applicability of a rule may submit a written request to EPA for an applicability determination. In response to a request for an applicability determination, EPA will issue a written determination stating whether the source or activity is subject to a particular Federal air quality rule. In most cases, determining whether the source or activity is on an Indian reservation will be straightforward and non-controversial. For example, in most cases EPA and the source will be able to easily determine whether a source is located within the exterior boundaries of a reservation, including Tribal trust lands. In the rarer, more complex factual cases, EPA will work with the U.S. Department of the Interior, Tribes, and stakeholders to assess the reservation status of the location. After EPA has reviewed the relevant materials, the Agency will send a letter to the source stating EPA's belief whether the source is located within the boundaries of a reservation. For sources or activities located on Indian reservations, the source or activity would be expected to comply with the applicable requirements of these FIPs.

C. Organization of the Rules

EPA has structured these proposed regulations consistent with the "modular" approach described in the TAR to allow for both variation among reservations and to facilitate the development and approval of TIPs to replace all or part of these Federal regulations. EPA is using this modular approach to propose a full set of regulations, and each regulation in today's proposal is effectively a "stand-alone" rule. Each FIP is tailored and is being proposed on a reservation-by-reservation basis. For example, the proposed regulation for particulate matter emissions from wood products industry sources would only be promulgated for reservations that have existing wood products industry sources or for those where such sources might be expected to locate. Similarly, the proposed regulation for forestry burning permits would only be promulgated for reservations with forestry lands where the use of fire as a forest management tool is prevalent.

EPA expects that many Tribes will develop their own air quality programs. However, Tribes are not required to adopt and implement all CAA programs at once. Under section 49.7(c) of the TAR, Tribes that meet the eligibility criteria for TAS have the option of developing severable elements of a TIP and submitting those elements to EPA for approval under the CAA. The modular approach used in these proposed regulations would allow EPA to approve a Tribal rule covering a particular source type or activity and revoke the EPA regulation, while still leaving in place the EPA regulations for other sources and/or activities. For example, a Tribe may initially want to adopt and implement Tribal rules for open burning and rules for the registration of air pollution sources, while EPA would continue to regulate industrial emissions under the FIP for that reservation. This modular approach would allow for an easy incremental transition from Federal regulations to EPA-approved Tribal rules.

While most of the rules in the FIPs constitute a "base program" that EPA is proposing to put in place in all reservations in Idaho, Oregon, and Washington, some of the proposed FIPs would include rules where specific needs exist or where EPA determines, in consultation with the relevant Tribe, that a more stringent provision than would otherwise apply is appropriate. These "additional rules" are being proposed only for certain reservations. For example, EPA is proposing rules specific to particular kinds of woodwaste burners and certain wood products industries that will require better controls for particulate matter emissions than the general limits for visible emissions and particulate matter. These regulations are proposed for reservations where such sources exist and where EPA determines, in consultation with the Tribe, that more stringent provisions are appropriate. The following table identifies the rules summarized below in section III.B that would be included in the "Base Program" and the "Additional Rules" that may be included as appropriate.

TABLE 1.—PROPOSED BASE PROGRAM AND ADDITIONAL RULES

Rule #	Title	Base program	Additional rules
Section 49.123	General provisions	X	
Section 49.124	Rule for limiting visible emissions	X	
Section 49.125	Rule for limiting the emissions of particulate matter	X	
Section 49.126	Rule for limiting fugitive particulate matter emissions	X	
Section 49.127	Rule for woodwaste burners		X

TABLE 1.—PROPOSED BASE PROGRAM AND ADDITIONAL RULES—Continued

Rule #	Title	Base program	Additional rules
Section 49.128	Rule for limiting particulate matter emissions from wood products industry sources.		X
Section 49.129	Rule for limiting emissions of sulfur dioxide	X	
Section 49.130	Rule for limiting sulfur in fuels	X	
Section 49.131	General rule for open burning	X	
Section 49.132	Rule for open burning permits		X
Section 49.133	Rule for agricultural burning permits		X
Section 49.134	Rule for forestry burning permits		X
Section 49.135 or	Rule for emissions detrimental to human health and welfare or	X	
Section 49.136	Tribal Alternative Rule		X
	Rule for emissions detrimental to persons or property, cultural or traditional resources.		
Section 49.137	Rule for air pollution episodes	X	
Section 49.138	Rule for the registration of air pollution sources and the reporting of emissions.	X	
Section 49.139	Rule for non-Title V operating permits	X	

The modular approach provides flexibility to promulgate provisions where EPA will have adequate resources to carry out the FIP, including situations where Tribes assist EPA in implementation of FIP provisions. For certain rules that are best administered at a local level, EPA is proposing to establish requirements for a reservation and to delegate to the affected Tribal government the authority to administer that particular program, as discussed below. A delegation agreement will authorize a Tribe, with Federal assistance, to administer the Federal program but refer unresolved noncompliance matters to EPA for Federal enforcement. This approach allows EPA to establish requirements tailored to local needs that can be effectively implemented through a partnership between EPA and the Tribe.

With respect to the rule that would regulate emissions detrimental to persons and property, EPA is proposing two versions. One version of the detrimental emissions regulation, proposed as § 49.135, would allow EPA to address situations where emissions would be injurious to human health and welfare. The Tribal alternative rule, § 49.136, would provide additional protection for situations where emissions would unreasonably interfere with the enjoyment of life or property, or would damage unique Tribal cultural or traditional resources. The second, more inclusive regulation (§ 49.136) is proposed for reservations where EPA, based on a request from the relevant Tribe, has considered and determined that regulatory authority to address such situations is appropriate and will generally include agreements with the Tribe to assist EPA in implementing the programs. EPA requests comment on this proposed determination. EPA developed § 49.136 to address the Tribes' unique concern regarding the holistic concept of health and welfare, which was emphasized by Tribes during consultation. In this rulemaking, EPA is proposing that § 49.136 will apply only on two reservations, the Nez Perce Reservation and the Umatilla Indian Reservation, as shown in Table 2. Section 49.135 will apply on all other reservations in Idaho, Oregon, and Washington. EPA is seeking comment on this proposed approach. If EPA does not finalize § 49.136, § 49.135 will be promulgated for the Nez Perce and Umatilla Indian Reservations.

Finally, EPA is proposing three additional open burning permit programs: general open burning (§ 49.132), agricultural open burning (§ 49.133), and forestry open burning (§ 49.134). These rules differ from the general open burning rule proposed in § 49.131 by requiring that any person who conducts a regulated open burn to obtain and comply with a permit. These permit programs are proposed only for reservations where EPA, in consultation with the relevant Tribe, has determined that the programs are appropriate and will generally include delegations of authority from EPA to the Tribe for implementation of the Federal rules upon promulgation, as discussed below.

D. Delegation

The modular approach will allow Tribes that are building air quality programs to gain experience by assisting with implementation of the Federal rules before they decide to adopt their own rules and regulations. EPA recognizes that a Tribe may choose not to develop a Tribal air program under Tribal law for approval under the TAR, but may still like to assist EPA in implementing the Federal air quality requirements for its reservation and to build its capacity in managing an air quality program. The rule proposed here at § 49.122 provides Tribal governments the alternative of seeking delegation from EPA of the authority to administer all or some of the Federal rules that have been promulgated for their reservation. These rules would allow EPA to delegate distinct and severable Federal regulations to a Tribe for implementation, without requiring a Tribe to take on all aspects of the Federal air regulations. For example, if a Tribe wished to implement the open burning permit program, or run the source registration program, EPA could delegate responsibility to the Tribe for just those regulations. The process EPA would follow to delegate the administration of a Federal program to a Tribal government is similar to the process EPA follows to delegate programs to State governments. As part of the process for delegating the authority to administer one or more of the rules, the Tribe and EPA would enter into an agreement that specifies how the governments would work together for the effective implementation of the particular CAA program(s) at issue on that reservation.

The delegation from EPA to a Tribe to implement a specific Federal air rule proposed in these rules is to be distinguished from EPA's interpretation that the CAA is a delegation of Federal authority from Congress to Tribes, as described in the TAR at 63 FR 7254–7259. It is EPA's position that the CAA TAS provision constitutes a statutory delegation of authority to eligible Tribes over their reservations. As described above, the TAR established how EPA can approve Tribal eligibility applications for a Tribe to operate a CAA program under Tribal law. When

VOL
67
ISS
51
MR
15
2002
UMI

EPA approves a Tribal eligibility application and approves a TIP, the approved Tribe will manage the approved air quality program under Tribal law, and the approved Tribal program is Federally enforceable. In contrast, the delegation approach proposed in these rules provides for EPA to administratively delegate its own Federal authority to a qualified Tribe to implement specified Federal rules. EPA has well-established processes for delegating its Federal authority to States for administering Federal rules under the CAA, such as for conducting new source review under 40 CFR part 52, at 40 CFR 52.21(u); and for issuing Federal operating permits under 40 CFR part 71, at 40 CFR 71.4(j). With delegated Federal programs, the Federal requirement administered by the delegated Tribe is subject to enforcement by EPA, not the Tribe, under Federal law.

EPA believes that the modular approach will provide the maximum flexibility for EPA and Tribes to work in partnership to ensure that the goals and objectives of the CAA will be met on Indian reservations and to make real the principles set out in the TAR. It will allow EPA and Tribes to jointly manage air quality on Indian reservations through a combination of TIP and FIP elements, and delegations to Tribes of FIP elements. Under this modular approach, Tribes may adopt and submit severable elements of TIPs that replace elements of FIPs while leaving in place FIP provisions that Tribes are not yet willing or able to take on.

II. Basis for Proposed Action

A. EPA's Authority To Promulgate a FIP in Indian Country

EPA's conclusion that CAA jurisdiction over Indian country generally lies with EPA and Federally recognized Indian Tribes leads to the conclusion that a regulatory gap exists with regard to air pollution sources there. EPA is proposing to take an initial step towards remedying this gap with a FIP for each Indian reservation in Idaho, Oregon, and Washington. These FIPs will establish new Federal requirements where no general air pollution control program other than nationally applicable rules is currently in effect.

As described above, the CAA Amendments of 1990 greatly expanded the role of Indian Tribes in implementing the provisions of the CAA in Indian country. Section 301(d) of the CAA authorizes EPA to issue regulations specifying the provisions of the CAA for which Indian Tribes may be treated in the same manner as States. See CAA sections 301(d)(1) and (2). Based on that authority, EPA promulgated the TAR.

In the preamble to the proposed and final TAR, EPA discusses generally the legal basis under the CAA by which EPA and Tribes are authorized to regulate sources of air pollution in Indian country. EPA concluded that the CAA constitutes a statutory delegation of Federal authority to eligible Indian Tribes over all sources on their reservations. Under the CAA, Tribes are allowed to develop air programs covering their reservations and non-reservation areas within their jurisdiction for submission to EPA for approval in the same manner as States. 63 FR 7254–7259; 59 FR 43958–43960.

EPA also concluded that the CAA authorizes EPA to protect air quality throughout Indian country, including on fee lands, until a Tribe is approved for TAS and Tribal programs are approved. See 63 FR 7262; 59 FR 43960–43961 (citing to CAA sections 101(b)(1), 301(a), and 301(d)); see also Federal Operating Permits Program, Final Rule, 64 FR 8251–8254. EPA decided that in areas of Indian country where no Tribal program has been explicitly approved by EPA, a gap exists in air quality requirements under the CAA that EPA is authorized to fill. In fact, in promulgating the TAR, EPA specifically stated that, pursuant to the discretionary authority explicitly granted to EPA under sections 301(a) and 301(d)(4) of the CAA, EPA:

> shall promulgate without unreasonable delay such Federal implementation plan provisions as are necessary or appropriate to protect air quality, consistent with the provisions of sections 301(a) and 301(d)(4), if a Tribe does not submit a Tribal implementation plan meeting the completeness criteria of 40 CFR Part 51, Appendix V, or does not receive EPA approval of a submitted Tribal implementation plan. 63 FR 7273 (codified at 40 CFR 49.11(a)).[4]

It is EPA's policy to aid Tribes in developing comprehensive and effective air quality management programs by providing technical and other assistance to them. EPA recognizes, however, that just as it required many years to develop the current State and Federal programs to cover State areas, it will also require time to develop Tribal and Federal programs to cover reservations and other areas of Indian country. 59 FR 43961.

Many of the Tribal governments in Idaho, Oregon, and Washington have expressed a strong interest in seeking authority under the TAR to regulate sources of air pollution located on their reservations and in non-reservation areas under Tribal jurisdiction pursuant to the CAA. Based on discussions with the Tribes, however, EPA believes that it will be some time before most Tribes will be ready to seek authority under the TAR to assume CAA planning and regulatory responsibilities and that, when they do, the Tribes are likely to build their capacity and seek authority for the various CAA programs over time, rather than all at once. Through government-to-government consultation between EPA and Tribal governments, the Tribes have advised EPA that they support EPA's efforts to impose such controls on Indian reservation air pollution sources as are necessary or appropriate to protect air quality in the interim.

Therefore, in these proposed FIPs, EPA is exercising its authority under sections 301(a) and 301(d)(4) of the CAA and 40 CFR 49.11(a) to promulgate FIPs in order to remedy an existing regulatory gap under the CAA with respect to Indian reservations located in the States of Idaho, Oregon, and Washington. Although many facilities in these areas have historically followed State, regional, and local government air quality programs, with only one exception EPA has never approved those governments to exercise regulatory authority under the CAA on any Indian reservations.[5] It is EPA's position that absent an explicit finding of jurisdiction and approval in Indian country, those governments lack authority under the CAA over the sources or their owners or operators for compliance or enforcement purposes. Given the longstanding air quality concerns in some areas and the need to establish requirements in all areas to maintain CAA standards, EPA believes that the proposed FIP provisions are appropriate to protect air quality on the identified reservations.

[4] In the preamble to the final TAR, EPA explained that it believed it was inappropriate to treat Tribes in the same manner as States with respect to section 110(c) of the CAA, that directs EPA to promulgate a FIP within two years after EPA finds a State has failed to submit a complete State plan or within two years after EPA disapproval of a State plan. Although EPA is not required to promulgate a FIP within the two-year period for Tribes, EPA promulgated 40 CFR 49.11(a) to clarify that EPA will continue to be subject to the basic requirement to issue any necessary or appropriate FIP provisions for affected Tribal areas within a reasonable time. See 63 FR 7264–7265.

[5] For purposes of approving the Washington Department of Ecology (WDOE) operating permits program under 40 CFR Part 70, EPA explicitly found that WDOE demonstrated that the Washington Indian Puyallup Land Claims Settlement Act, 25 U.S.C. 1773, gives explicit authority to State and local governments to administer their environmental laws on all non-trust lands within the 1873 Survey Area of the Puyallup Reservation in Tacoma, Washington.

B. Relation to Tribal Authority Rule

The TAR provides the framework for Tribes to obtain authority to administer Federally-approved and Federally-enforceable programs under the CAA. See 59 FR 43956, August 25, 1994 (proposed rule) and 63 FR 7254, February 12, 1998 (final rule). Thus, each Federally recognized Indian Tribe now has the option of assuming responsibility for the development and implementation of Federally-enforceable air quality programs under the CAA by seeking EPA approval of a Tribal air program established under Tribal law, i.e., a TIP. Until a Federally-approved implementation plan that covers a source is in place, however, EPA has the authority to regulate the source under the CAA. The regulations proposed here also offer another alternative. Specifically, Tribes in Idaho, Oregon, or Washington may seek delegation from EPA to assist EPA in implementing a Federal regulation (FIP).

III. Summary of FIP Provisions

A. Origin of the Rules

EPA's intention is to promulgate Federal regulations that reflect an important initial step to fill the "regulatory gap" on Indian reservations in Idaho, Oregon, and Washington. As described above, EPA has been evaluating, in consultation with affected Indian Tribes, the activities and sources of air pollution that threaten air resources. EPA believes it is appropriate to focus its efforts initially on developing FIPs for the most prevalent sources that cause or contribute to identified air quality problems.

However, EPA does not intend, nor does it expect, these gap-filling regulations to impose significantly different regulatory burdens upon industry or residents within reservations than those imposed by the rules of State and local air agencies in the surrounding areas. This approach is intended to formally "level the playing field". In other words, EPA intends that people living within reservation boundaries receive equivalent air quality protection, and that emissions from sources located within reservations are controlled to levels similar to those of sources located outside the reservations.

To do this, EPA Region 10 first determined what types of air pollution sources and pollutant-emitting activities were most prevalent on Indian reservations in Idaho, Oregon, and Washington. Then EPA Region 10 reviewed the State and local rules from air pollution agencies throughout the western United States that are included in SIPs that EPA has approved for those types of sources and activities. The gap-filling rules proposed here are generally based upon the aspects of these State and local rules most relevant to the air polluting activities on reservations in the Pacific Northwest, and follow a level of control of a typical air quality control program. The proposed regulations are not as restrictive as the most stringent State and local rules for the same class of sources or activities; likewise, they are not as lenient as the least stringent of the State and local rules. Nor do the proposed regulations look like State or local rules because they use the Federal regulatory structure and are written in a "plain language" format in accordance with the Plain Language Executive Memorandum, dated June 1, 1998. EPA invites your comments on ways to make these proposed rules easier to understand. Included in the docket for this proposed rulemaking are copies of all the State and local rules that EPA considered in this process, as well as a technical support document with summary tables showing the State and local agency levels of control as compared with the proposed regulations and a description of why EPA believes the proposed rules are appropriate.

Each of the rules proposed as part of the Base Program to be applicable on all reservations in Idaho, Oregon and Washington either addresses particular sources, activities or pollutants identified by EPA as the most prevalent and in need of regional regulation or implements an important structural aspect of the CAA regulatory scheme for Indian reservations. A number of the Base Program rules are proposed in order to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA (see § 49.124 Rule limiting visible emissions; § 49.125 Rule for limiting the emissions of particulate matter; § 49.126 Rule for limiting fugitive particulate matter emissions; and § 49.129 General rule for open burning). Two Base Program rules would protect air quality from the potential for significant deterioration caused by the release of sulfur dioxide, which is regulated by a NAAQS under section 109 of the CAA. These rules would limit the amount of sulfur dioxide emitted to the atmosphere from certain air pollution sources in order to control ground-level concentrations of sulfur dioxide (see § 49.130 Rule for limiting emissions of sulfur dioxide and § 49.131 Rule for limiting sulfur in fuels). The Base Program would also include a number of provisions to establish the infrastructure of a CAA regulatory program. Provisions at § 49.122 describe how EPA would process delegation requests from a Tribe; § 49.123 would define the terms that are used throughout the FIPs; § 49.135 would establish a process for EPA to limit emissions that are detrimental to human health and welfare; § 49.137 would establish the measures EPA could take to address excessive buildup of certain air pollutants during periods of stagnant air; § 49.138 would provide for the registration of air pollution sources and reporting of emissions so that EPA can maintain a current and accurate record of air pollution sources within an Indian reservation; and § 49.139 would set up a permitting program for non-Title V sources that would establish federally-enforceable requirements.

Further, EPA is proposing certain Additional Rules to be applicable on specified reservations where EPA has determined, in consultation with the relevant Tribe, that such additional regulatory measures are appropriate. During the course of its consultation with Tribes and analysis of regulatory needs, EPA attempted to identify instances where specific sources or pollution control needs beyond those addressed in the Base Program exist on particular reservations. For example, certain types of wood products industries, or certain practices of agricultural or forestry burning, may be prevalent on particular reservations and may be important contributors to air pollution concerns. In order to address these concerns, EPA has developed the current set of Additional Rules. As an initial step, EPA is proposing to promulgate some or all of these rules for those reservations where relevant sources have been identified as prevalent and where particular Tribes have indicated an interest in the additional regulation. For example, at the request of specific Tribes, EPA considered and is now proposing to promulgate a rule that would provide additional protections against emissions detrimental to their unique Tribal cultural or traditional resources. EPA considers this approach an appropriate first step in prioritizing its efforts to address these concerns consistent with CAA responsibilities. EPA anticipates that relevant Tribes may choose to assist in the implementation of the Additional Rules through the delegation process described above. EPA is continuing to consult with Tribes regarding sources of air pollution and air regulatory needs on their reservations and may propose some or all of the Additional Rules, or

VOL
67
ISS
51
MR
15
2002
UMI

may propose further additional rules, for reservations as needs and priorities are identified. As described in section I.C. the current package of Additional Rules includes § 49.127 Rule for woodwaste burners; § 49.128 Rule for limiting particulate matter emissions from wood products industry sources; § 49.132 Rule for open burning permits, § 49.133 Rule for agricultural burning permits, § 49.134 Rule for forestry burning permits; and § 49.136 Rule for emissions detrimental to persons or property, cultural or traditional resources. With this proposal, EPA is seeking comment on these Additional Rules, whether the criteria EPA used for selecting the Additional Rules are appropriate, and whether EPA has appropriately applied those criteria in this proposal.

In developing these regulations EPA also had two other objectives in mind, in addition to filling the regulatory gap. First, EPA is proposing only those regulations that it believes it has the resources to implement and enforce. To the extent practicable, these regulations minimize the implementation burdens upon EPA and the regulated community while establishing requirements that are unambiguous and enforceable. Second, EPA anticipates that these regulations can serve as models for Tribes as they develop their own air quality programs. To that end, the regulations are designed so they can be implemented by a small air pollution agency, and can be readily delegated to a Tribe for implementation.

B. Rule Summaries

These proposed rules would establish emission limitations and other requirements for air pollution sources located within Indian reservations in Idaho, Oregon, and Washington to ensure a basic level of air pollution control that protects public health and welfare. The following paragraphs summarize each of the proposed rules. The actual rule requirements being proposed are set forth in 40 CFR part 49, subpart C.

Section 49.122—Delegation of authority to a Tribe. This section would provide a mechanism for delegating to a Tribe, for administration, all or a portion of the FIP rules that apply within a reservation. It sets out the process a Tribe must follow to request delegation, how that delegation will be accomplished, and how the public and regulated sources will be informed of the delegation. The Regional Administrator will not delegate authority to a Tribe for areas for which EPA believes the Indian reservation status is in question. This section would not affect the requirements established under the TAR for Tribal applications to administer EPA-approved Tribal CAA programs or requirements for delegation of other EPA air programs such as Part 71 operating permits or PSD permits under 40 CFR 52.21.

Section 49.123—General provisions. This section includes definitions of the terms used in these rules as well as general provisions regarding requirements for emission testing, monitoring, recordkeeping, reporting, the use of credible evidence in compliance certifications and for establishing violations, and the incorporation by reference of the American Society for Testing and Materials Methods referenced in this rulemaking.

Section 49.124—Visible emissions. Section 49.124 would restrict visible emissions from air pollution sources to 20% opacity, averaged over 6 consecutive minutes, as measured by EPA Method 9. This rule would not apply to certain sources, such as: Open burning; agricultural activities; non-commercial smoke houses; sweat houses or lodges; smudge pots; furnaces and boilers used exclusively to heat residential buildings with four or fewer units; fugitive dust from public roads owned or maintained by any Federal, Tribal, State or local government; and emissions from fuel combustion in mobile sources. The visible emissions from an oil-fired boiler or solid fuel-fired boiler that continuously measures opacity with a continuous opacity monitoring system (COMS) may exceed the 20% opacity limit during start-up, soot blowing, and grate cleaning for a single period of up to 15 minutes in any 8 consecutive hours, but must not exceed 60% opacity at any time.

All of the State and local air agency rules that EPA reviewed contain a 20% opacity limit. Most of these visible emissions rules allow a 3-minute exception over a 60-minute period. However, EPA decided to use the method with an average opacity over a 6-minute interval to be consistent with the only Federally promulgated opacity measurement method, which is EPA Method 9, found at 40 CFR Part 60, Appendix A. This method is used to determine compliance with Federal New Source Performance Standards for numerous categories of industrial sources. This rule does not require any person to conduct Method 9 opacity readings or to install a COMS unless specifically required by the Regional Administrator in an information request pursuant to section 114 of the Act, a permit to construct, or permit to operate.

Section 49.125—Particulate matter. Particulate matter emissions from combustion (except for wood-fired boilers) and process sources would be limited to an average of 0.23 grams per dry standard cubic meter (0.1 grains per dry standard cubic foot), corrected to 7% oxygen (for combustion sources), during any 3-hour period. Particulate matter emissions from wood-fired boilers would be limited to an average of 0.46 grams per dry standard cubic meter (0.2 grains per dry standard cubic foot), corrected to 7% oxygen, during any 3-hour period. Woodwaste burners, furnaces, and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 British thermal units (Btu) per hour, non-commercial smoke houses, sweat houses or lodges, and mobile sources would be exempt from this rule.

For combustion sources and wood-fired boilers, the particulate matter limit in this rule is the same as the limit in most of the State and local agency air rules that EPA reviewed. For process sources, many State and local air agencies employ process weight rate tables in their rules to limit particulate matter. EPA is proposing to use a concentration limit rather than a process weight rate table for this rule to be consistent with the EPA method for measuring particulate matter, which is EPA Method 5, found at 40 CFR Part 60, Appendix A. The particulate matter limit for process sources in this rule equals the control of all but one of the concentration-based rules that EPA reviewed. This rule does not require any person to conduct a Method 5 source test unless specifically required by the Regional Administrator in an information request pursuant to section 114 of the Act, a permit to construct, or permit to operate.

Section 49.126—Fugitive particulate matter. The owner or operator of any source of fugitive particulate matter emissions would be required to take all reasonable precautions to prevent fugitive particulate matter emissions and to maintain and operate the source to minimize these emissions. A person subject to this rule would be required to periodically survey the air pollution source to determine if there are sources of fugitive particulate matter emissions, determine and document in a written plan the reasonable precautions that would be taken to prevent fugitive particulate matter emissions, and then implement the plan. This rule would not apply to activities associated with single-family residences or residential buildings with four or fewer dwelling units, agricultural activities, or public roads owned or maintained by any

Federal, Tribal, State, or local government.

All but one of the State and local air agency rules that EPA reviewed have rules for controlling fugitive particulate matter. All of these rules contain reasonable precautions provisions similar to the ones in § 49.126. A few rules control fugitive emissions beyond reasonable precautions, but these rules are primarily for nonattainment areas so EPA believes they are not appropriate here because the reservations at issue are generally not designated nonattainment for PM10.

Section 49.127—Woodwaste burners. Section 49.127 would phase out the operation of woodwaste burners (commonly known as wigwam or teepee burners). In the interim, visible emissions from a woodwaste burner would not be allowed to exceed 20% opacity, averaged over 6 consecutive minutes, as measured by EPA Method 9, and only wood waste generated onsite could be burned or disposed of in the woodwaste burner. The owner or operator would be required to submit a plan for shutting down the woodwaste burner to EPA within 180 days after the effective date of these rules and to shut down and dismantle the woodwaste burner by no later than 2 years after the effective date of these rules. Sources could apply to EPA for an extension of the 2-year deadline if there is no reasonably available alternative method of disposal for the wood waste.

EPA recognizes that on some reservations particulate matter from woodwaste burners can contribute to air quality deterioration. This section would be promulgated in Part 49 Subpart M on reservations only where EPA finds, in consultation with the relevant Tribe, that it is appropriate to establish this requirement in order to control air pollution. This section is designed to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. This rule would limit the amount of particulate matter emitted to the atmosphere. EPA will base the determination of whether this rule is appropriate for a particular reservation on a number of factors, including the prevalence of these sources on the reservation, the significance of the resulting pollution on air quality in the area, and the absence of Tribal laws to control the pollution. In this rulemaking, EPA is proposing that § 49.127 will apply only on the Nez Perce Reservation and the Colville Indian Reservation, as shown in Table 2.

Most woodwaste burners under programs of State and local air agencies have already been shut down. All but one of the State and local air agency rules that control the woodwaste burners that still exist have a 20% opacity limit. Most of these rules use an opacity measurement method with a 3-minute exception over a 60-minute period. However, EPA is proposing use of the method with an average opacity over a 6-minute interval to be consistent with the only Federally promulgated opacity measurement method, which is EPA Method 9, found at 40 CFR Part 60, Appendix A. This method is used to determine compliance with Federal New Source Performance Standards for numerous categories of industrial sources. This rule does not require any person to conduct Method 9 opacity readings unless specifically required by the Regional Administrator in an information request pursuant to section 114 of the Act, a permit to construct, or permit to operate.

Section 49.128—Particulate matter emissions from wood products industry sources. Section 49.128 would apply to any person who owns or operates any of the following wood products industry sources: veneer manufacturing operations, plywood manufacturing operations, particleboard manufacturing operations, or hardboard manufacturing operations. This section would impose limits on the amount of particulate matter that could be emitted from such sources, in addition to the particulate matter limits for combustion and process sources in § 49.125. The reference method for determining compliance with the particulate matter limits is EPA Method 202, found at 40 CFR part 51, Appendix M. This rule does not require any person to conduct a Method 202 source test unless specifically required by the Regional Administrator in an information request pursuant to section 114 of the Act, a permit to construct, or permit to operate.

In Part 49 Subpart M, EPA is proposing this requirement on reservations where EPA finds, in consultation with the relevant Tribe, that it is appropriate to establish this requirement in order to control air pollution. This section is appropriate to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. This rule would limit the amount of particulate matter emitted to the atmosphere from those specific wood products industry sources. EPA will base this determination on a number of factors, including the prevalence of these sources on the reservation, the significance of the resulting pollution on air quality in the area, and the absence of Tribal laws to control the pollution. In this rulemaking, EPA is proposing that § 49.128 will apply only on the Nez Perce Reservation and the Colville Indian Reservation, as shown in Table 2.

One State has both State-wide rules and area-specific rules to control particulate matter emissions from the wood products industry. The limits that EPA is proposing in this rule closely resembles the area-specific rules for that State.

Section 49.129—Sulfur dioxide. This rule would restrict sulfur dioxide emissions from combustion and process sources to no more than an average of 500 parts per million by volume, on a dry basis, and corrected to 7% oxygen (for combustion sources), during any 3-hour period. Furnaces and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 Btu per hour and mobile sources would be exempt from this rule.

This rule is appropriate to protect air quality from the potential for significant deterioration caused by the release of sulfur dioxide, which is regulated by a NAAQS under section 109 of the CAA. This section would limit the amount of sulfur dioxide emitted to the atmosphere from certain air pollution sources in order to control ground-level concentrations of sulfur dioxide. All of the concentration-based rules that EPA reviewed have one of two sulfur dioxide concentration limits: 500 ppm averaged over a 3-hour period or 1,000 ppm average over a 1-hour period. EPA is proposing to use the 500 ppm, 3-hour average limit because it does a better job of accounting for the short-term variability in process emissions and in the sulfur content of fuels. The reference methods for determining compliance with the SO2 limits are EPA Methods 6, 6A, 6B, and 6C as specified in the applicability section of each Method. These methods are found at 40 CFR 60, Appendix A. This rule does not require any person to conduct Method 6, 6A, 6B, or 6C source tests or to install a continuous emissions monitoring system (CEMS) unless specifically required by the Regional Administrator in an information request pursuant to section 114 of the Act, a permit to construct, or permit to operate.

Section 49.130—Sulfur content of fuels. This section would apply to any person who sells, distributes, uses, or makes available for use, any fuel oil, coal, solid fuel, or gaseous fuel on Indian reservations. This rule restricts the sulfur content of the previously

VOL
67
ISS
51
MR
15
2002
UMI

listed types of fuels. Fuels used exclusively for mobile sources, such as automotive or marine diesel fuel, would be exempt from this rule. A person subject to this rule would be required to demonstrate compliance through recordkeeping and/or continuous monitoring or sampling. Owners or occupants of a single-family residence and the owners or managers of a residential building with four or fewer units are not subject to the sulfur content recordkeeping requirements if the furnace fuel is purchased from a licensed fuel distributor.

This section is appropriate to protect air quality from the potential for significant deterioration caused by the release of sulfur dioxide, which is regulated by a NAAQS under section 109 of the CAA. Fuel combustion sources can emit sulfur dioxide. This section would limit the amount of sulfur in fuels to control the amount of sulfur dioxide emitted to the atmosphere and minimize ground-level concentrations of sulfur dioxide.

The majority of the State and local air agency rules that EPA reviewed contain the same level of control that EPA is proposing for the sulfur content in each type of fuel.

Section 49.131—Open burning. This rule would prohibit certain materials from being open burned, such as: Garbage, dead animals, junked motor vehicles, tires or rubber materials, plastics, asphalt or composition roofing, tar, tarpaper, petroleum products, paints, paper or cardboard other than what is necessary to start a fire, lumber or timbers treated with preservatives, construction debris or demolition waste, pesticides, herbicides, hazardous wastes, or any material other than natural vegetation that normally emits dense smoke or noxious fumes when burned (see rule for a complete list). The following situations would be exempt from certain provisions of this rule: Fires set for cultural or traditional purposes, including fires within structures such as sweat houses or lodges; fires set for recreational purposes, provided that no prohibited materials are burned; the burning of combustible household waste in burn barrels at single-family residences or residential buildings with four or fewer dwelling units; with permission from the Regional Administrator, open outdoor fires used by qualified personnel to train firefighters in the methods of fire suppression and fire fighting techniques, provided that training fires are not allowed to smolder after the training session has terminated; with permission from the Regional Administrator, one open outdoor fire each year to dispose of fireworks and associated packaging materials; and open burning for the disposal of diseased animals or infested material by order of a public health official. All open burning, except for cultural and traditional purposes, would be prohibited under the following circumstances: The Regional Administrator declares a burn ban due to deteriorating air quality; the National Weather Service issues an air stagnation advisory; or the Regional Administrator declares an air pollution alert, air pollution warning, or air pollution emergency. This section also describes the practices a person subject to this rule must follow in conducting an open burn.

This section is appropriate to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. This rule would limit the amount of particulate matter emitted to the atmosphere. All of the State and local air agency rules that EPA examined have an open burning rule with procedures, conditions, prohibitions and exemptions similar to those in the rule that EPA is proposing.

Section 49.132—Open burning permits. Any person who conducts an open burn would be required to: (1) Apply for and obtain a permit for each open burn; (2) have the permit available on site during the open burn; (3) conduct the open burn in accordance with the terms and conditions of the permit; and (4) comply with the General rule for open burning (§ 49.131) or the EPA-approved Tribal open burning rules in a TIP, as applicable. The following activities are exempt: Fires set for cultural or traditional purposes, including fires within structures such as sweat houses or lodges; fires for recreational purposes, provided that no prohibited materials are burned; forestry or silvicultural burning; agricultural burning; and the burning of combustible household waste in burn barrels at single family residences or residential buildings with four or fewer dwelling units. The Regional Administrator shall take into consideration the size, duration, and location of the proposed open burn, the current and projected air quality conditions, forecasted meteorological conditions, and other scheduled burning activities in the surrounding area in determining whether to issue the permit.

This section is designed to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. EPA is proposing to promulgate this rule only for reservations where EPA finds, in consultation with the relevant Tribe, that the rule is appropriate. EPA will base the determination of whether this rule is appropriate for a particular reservation on a number of factors, including the prevalence of these activities on the reservation, the significance of the resulting pollution on air quality in the area and adjacent airsheds, and the absence of Tribal laws to control the pollution. EPA anticipates that Tribes will seek EPA delegation to implement this rule on their reservation. In this rulemaking, EPA is proposing that § 49.132 will apply only on the Nez Perce Reservation and the Umatilla Indian Reservation, as shown in Table 2.

Most of the State and local air agency rules that EPA reviewed have a permitting program for open burning with procedures, conditions, prohibitions and exemptions similar to those in the rule that EPA is proposing.

Section 49.133—Agricultural burning permits. Any person who conducts an agricultural burn would be required to: (1) Apply for and obtain a permit for each agricultural burn; (2) have the permit available on site during the agricultural burn; (3) conduct the burn in accordance with the terms and conditions of the permit; and (4) comply with the General rule for open burning (§ 49.131) or the EPA-approved Tribal open burning rules in a TIP, as applicable.

This section is designed to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. This rule would limit the amount of particulate matter emitted to the atmosphere from unregulated agricultural burning activities. EPA is proposing to promulgate this rule only for reservations where EPA finds, in consultation with the relevant Tribe, that the rule is appropriate. EPA will base the determination of whether this rule is appropriate for a particular reservation on a number of factors, including the prevalence of agricultural burning activities on the reservation, the significance of the resulting pollution on air quality in the area and adjacent airsheds, and the absence of Tribal laws to control the pollution. EPA anticipates that Tribes will seek EPA delegation to implement this rule on their reservation. In this rulemaking, EPA is proposing that § 49.133 will apply only on the Nez Perce Reservation and the Umatilla Indian Reservation, as shown in Table 2.

Two of the States, three local air agencies, and one Tribe in Region 10 have established a permitting program

for agricultural burning with procedures, conditions, prohibitions, and exemptions similar to those in the rule that EPA is proposing.

Section 49.134—Forestry burning permits. Any person who conducts a forestry burn would be required to: (1) Apply for and obtain a permit for each forestry burn; (2) have the permit available on site during the forestry burn; (3) conduct the burn in accordance with the terms and conditions of the permit; and (4) comply with the General rule for open burning (§ 49.131) or the EPA-approved Tribal open burning rules in a TIP, as applicable.

This section is designed to protect air quality from the potential for significant deterioration caused by the release of particulate matter, which is regulated by a NAAQS under section 109 of the CAA. This rule would limit the amount of particulate matter emitted to the atmosphere from unregulated forestry burning activities. EPA is proposing to promulgate this rule only for reservations where EPA finds, in consultation with the relevant Tribe, that the rule is appropriate. EPA will base the determination of whether this rule is appropriate for a particular reservation on a number of factors, including the prevalence of forestry burning activities on the reservation, the significance of the resulting pollution on air quality in the area and adjacent airsheds, and the absence of Tribal laws to control the pollution. This rule would protect air quality on those reservations where forestry burning can contribute to air quality deterioration. EPA anticipates that Tribes will seek EPA delegation to implement this rule on their reservation. In this rulemaking, EPA is proposing that § 49.134 will apply only on the Nez Perce Reservation and the Umatilla Indian Reservation, as shown in Table 2.

Three of the States in Region 10 have established a permitting program for forestry burning with procedures, conditions, prohibitions, and exemptions similar to those in the rule that EPA is proposing.

Sections 49.135 and 49.136—Emissions detrimental to persons or property. These are two alternatives to regulate emissions that are detrimental, and EPA would promulgate one of the rules for each reservation. For both §§ 49.135 and 49.136, an owner or operator of an air pollution source would not be allowed to cause or allow the emission of any air pollutants, in sufficient quantities and of such characteristics and duration, that the Regional Administrator determines is, or would likely be, injurious to human health and welfare. The Tribal alternative rule § 49.136 would include the same requirements as § 49.135, and also authorize controls when the Regional Administrator determines an emission does, or is likely to, unreasonably interfere with the enjoyment of life or property or damage unique Tribal cultural or traditional resources. If the Regional Administrator makes such a determination under § 49.135 or § 49.136, EPA is proposing that the Regional Administrator would be able to require the source to install air pollution controls or to take reasonable precautions to reduce or prevent the emissions.

Section 49.136 would provide additional protection of unique Tribal resources, and would be promulgated on reservations only where EPA finds, in consultation with the relevant Tribe, that the rule is appropriate. EPA will base this determination on a number of factors, including the prevalence of activities on the reservation which can affect unique Tribal cultural or traditional resources, the significance of the resulting pollution on those resources, and the absence of Tribal laws to control the pollution. In this rulemaking, EPA is proposing that the Tribal alternative rule § 49.136 will apply only on the Nez Perce Reservation and the Umatilla Indian Reservation, as shown in Table 2.

Most State and local air agency rules incorporate similar provisions prohibiting emissions detrimental to persons or property.

Section 49.137—Air pollution episodes. Under § 49.137, the Regional Administrator could issue warnings about air quality that would apply to any person who owns or operates an air pollution source on Indian reservations. An air pollution alert, air pollution warning, or air pollution emergency could be declared by the Regional Administrator whenever it is determined that the accumulation of air pollutants in any place is attaining, or has attained, levels that could lead to a threat to human health. These announcements would be broadcast on local television and radio stations in the affected area and posted on their websites. Announcements will also be posted on the EPA Region 10 website and, where possible, on the websites of Tribes within the affected area. These announcements will indicate that air pollution levels exist that could potentially be harmful to human health, describe actions that people can take to reduce exposure, request voluntary actions to reduce emissions from sources of air pollutants, and indicate that a ban on open burning is in effect. Voluntary or mandatory curtailment of emissions could be declared by the Regional Administrator.

Most State and local air agencies have rules for air pollution episodes with procedures and conditions similar to those in the rule that EPA is proposing. Section 110(a)(2)(G) of the Clean Air Act and 40 CFR part 51, Subpart H of EPA's regulations require agencies to have pre-planned procedures to follow in the event of an air pollution episode as well as adequate authorities to require sources to reduce emissions in order to protect public health. Section 49.137 is consistent with EPA's requirements for State and local agencies as set forth in 40 CFR part 51, Subpart H and the model procedures in 40 CFR part 51, Appendix L.

Section 49.138—Registration of air pollution sources and reporting of emissions. Any person who owns or operates an air pollution source except those exempted below would be required to register the source with EPA. A person subject to this rule must register the air pollution source by no later than one year after the effective date of these rules. A new air pollution source must register within 90 days after beginning operation. Sources must re-register each year and provide updates on any changes since the previous registration. The following sources are exempt from this rule: mobile sources; single family residences, and residential buildings with four or fewer units; air conditioning units used for human comfort that are not subject to applicable requirements under Title VI of the CAA and do not exhaust air pollutants into the atmosphere from any manufacturing or industrial process; ventilating units used for human comfort that do not exhaust air pollutants into the atmosphere from any manufacturing or industrial process; furnaces and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 Btu per hour; cooking of food, except for retail and wholesale businesses that both cook and sell cooked food; consumer use of office equipment and products; janitorial services and consumer use of janitorial products; maintenance and repair activities, except for air pollution sources engaged in the business of maintaining and repairing equipment, such as automobile repair shops or appliance repair shops; agricultural activities and forestry activities, including agricultural burning and forestry burning; and open burning.

This requirement is appropriate as it would enable EPA to develop and maintain accurate records of air pollution sources and their emissions

VOL 67 ISS 51 MR 15 2002 UMI

on reservation lands. Maintaining an accurate inventory of sources and emissions would help EPA protect air quality from potential significant deterioration that can occur if many sources within a particular area increase their air pollutant emissions. While the emission increase at each facility may be de minimis, the cumulative effect of the increases may be significant. The registration program would enable EPA to track trends and identify potential problems before they arise.

Many State and local air agencies have a registration program or a permitting program to collect information similar to that required by the registration program in this section.

Section 49.139—Rule for non-Title V operating permits. This section would create a permitting program to provide for the establishment of Federally-enforceable requirements for air pollution sources on Indian reservations. This rule would apply in the following three situations: (1) The owner or operator of any source wishes to obtain a Federally-enforceable limitation on the source's actual emissions or potential to emit and submits an application to the Regional Administrator requesting such limitation; (2) the Regional Administrator determines that additional Federally-enforceable requirements for a source are necessary to ensure compliance with the Federal or, if applicable, Tribal Implementation Plan; or (3) the Regional Administrator determines that additional Federally-enforceable requirements for a source are necessary to ensure the attainment and maintenance of any NAAQS or PSD increment. A source that would otherwise require a Part 71 Federal operating permit may instead obtain an operating permit under this section that limits its potential to emit to below major source thresholds so that the source is not subject to Part 71. The Regional Administrator would write the operating permit and follow the consultation and public comment procedures described in this rule.

This rule would provide air pollution sources on reservations with air quality control requirements and regulatory alternatives similar to those available to sources located off-reservation. The rule also would enable the Regional Administrator to require further air emission reductions if necessary to attain or maintain the NAAQS or PSD increment.

All State and local air agencies have a permitting mechanism to control emissions and to allow a source to limit its potential to emit so that it is not subject to Title V or other requirements for major stationary sources with procedures, conditions, prohibitions, and exemptions similar to those in the rule that EPA is proposing.

C. Rules Proposed for Specific Reservations

The proposed rules that follow this discussion identify for each Indian Tribe listed in Subpart M the specific rules that EPA is proposing to promulgate as a FIP for the Indian reservation of that Tribe. Subpart M is organized to contain the implementation plan for each Indian Tribe with a reservation. This plan will consist of a combination of Tribal rules and measures and Federal regulations and measures that apply to all applicable sources within the specific reservation, including trust lands set aside for the Tribe.

While most of the rules in the FIPs constitute a base program that EPA is proposing for all reservations in Idaho, Oregon, and Washington, some of the proposed FIPs would include additional rules where specific needs have been identified through consultation with Tribes. Table 1 lists the "Base Program" rules, as well as the "Additional Rules". The following "Additional Rules" are being proposed for three reservations (see Table 2 below) where EPA has found, in consultation with the relevant Tribe, that it is appropriate to establish these requirements in order to control air pollution.

EPA is proposing the rules listed in Table 2 for the Nez Perce Reservation to limit the amount of particulate matter emitted to the atmosphere in the airsheds in and around the Reservation. EPA has found, in consultation with the Nez Perce Tribe, that these rules are appropriate because the activities that would be regulated by these rules are taking place on the Nez Perce Reservation. Specifically, the woodwaste burners, the wood products industries, open burning, agricultural, and forestry activities may be significant contributors to air quality concerns in the area. Based on consultations with the Nez Perce Tribe, EPA also is concerned that air pollution sources could adversely affect cultural or traditional resources of the Tribe in ways that may not be adequately protected by Tribal law.

For the Umatilla Reservation, EPA is proposing the rules listed in Table 2 to limit the amount of particulate matter emitted to the atmosphere and airsheds in and around the Reservation. EPA has found, in consultation with the Confederated Tribes of the Umatilla Reservation, that these rules are appropriate because the activities that would be regulated by these rules are taking place on the Umatilla Reservation. Specifically, open burning, agricultural, and forestry activities may be significant contributors to air quality concerns in the area. Based on consultations with the Confederated Tribes of the Umatilla Reservation, EPA also is concerned that air pollution sources could adversely affect cultural or traditional resources of the Tribes in ways that may not be adequately protected by Tribal law.

Finally, EPA is proposing the rules listed in Table 2 for the Colville Reservation to limit the amount of particulate matter emitted to the atmosphere in the airsheds in and around the area. EPA has found, in consultation with the Confederated Tribes of the Colville Reservation, that these rules are appropriate because the operations of woodwaste burners and wood products facilities located on the Colville Reservation cause the release of particulate matter which may adversely affect air quality in ways that may not be adequately protected by Tribal law.

Correspondence from these Tribes providing relevant information and requesting that EPA propose these Additional Rules are included in the docket for this proposal.

TABLE 2.—RESERVATION SPECIFIC ADDITIONAL RULES

Rule #	Additional rules
Nez Perce Reservation, Lapwai, Idaho	
Section 49.127	Rule for woodwaste burners.
Section 49.128	Rule for limiting particulate matter emissions from wood products industry sources.
Section 49.132	Rule for open burning permits.
Section 49.133	Rule for agricultural burning permits.
Section 49.134	Rule for forestry burning permits.
Section 49.136	Rule for emissions detrimental to persons, property, cultural or traditional resources.
Umatilla Indian Reservation, Pendleton, Oregon	
Section 49.132	Rule for open burning permits.
Section 49.133	Rule for agricultural burning permits.
Section 49.134	Rule for forestry burning permits.
Section 49.136	Rule for emissions detrimental to persons, property, cultural or traditional resources.
Colville Indian Reservation, Nespelem, Washington	
Section 49.127	Rule for woodwaste burners.
Section 49.128	Rule for limiting particulate matter emissions from wood products industry sources.

TABLE 2.—RESERVATION SPECIFIC ADDITIONAL RULES—Continued

D. Costs Associated With These Rules and Request for Comment

As part of developing these proposed rules, EPA conducted an analysis of the expected costs should these rules be adopted. Included in the docket for this rulemaking is an Economic Impact Analysis (EIA) that was prepared to assist EPA in estimating the costs of compliance for the sources that would be subject to these rules.

For the purposes of generating cost estimates for each of the proposed rules, EPA assumed that there will be no capital costs incurred under any of these rules. EPA makes this assumption because the unique nature of this rule—sources are believed to be complying in the absence of the rule because they thought they were subject to State and local rules—makes it difficult to establish a counterfactual baseline showing what sources would be doing had they realized they were not subject to those rules under the CAA. Furthermore, based on information obtained from State, local, and Tribal authorities, as well as the businesses and other entities affected by these rules, EPA does not anticipate that facilities will add control devices as a result of these rules. In addition, EPA has not estimated operation and maintenance (O&M) costs to comply with these rules. EPA believes that O&M costs should be considered, but insufficient data were available to estimate them. O&M costs estimates based on information gathered from comments on the proposal will be included in the analysis for the final rule.

Thus the costs estimated for these rules are primarily the labor costs associated with record keeping and reporting under the regulations. Costs for both the basic rules and additional rules were estimated in the EIA. For the basic rules, the annualized labor costs and non-labor costs were estimated to be $117,000 and $17,000, respectively, while incremental capital costs and incremental O&M costs were assumed to be zero. Thus, the total estimated cost associated with the basic rules is $134,000. Cost estimates for the additional rules only account for costs on those reservations for which EPA has proposed additional rules. The additional rules were estimated to have annualized labor costs of $23,000, while non-labor costs, incremental capital costs, and incremental O&M costs were each assumed to equal zero for a total of $23,000. Overall, annualized labor costs were estimated to be $140,000, annualized non-labor costs are estimated to be $17,000, incremental capital costs are assumed to be zero, and incremental O&M costs are assumed to be zero for a total estimated cost of $157,000.

The information available to EPA for this analysis was assembled from a number of sources, including surveys of sources on the reservations, consultations with the sources and Tribal governments, and EPA's experience with air quality issues in the Pacific Northwest. Based on this information, several assumptions were made in order to estimate the expected compliance costs associated with these rules. EPA is now seeking comment on these assumptions. While comments on all aspects of the analysis are solicited, EPA specifically is soliciting comments on the assumptions described below regarding capital costs, O&M costs, and the costs of meeting visible emission and fugitive emission requirements, conducting source tests, and meeting the sulfur content in fuel limits.

EPA is seeking comments on the assumption that no incremental capital costs would be required by these rules. The O&M costs associated with the continued compliance with these rules are expected to be small. However, there were insufficient data to estimate the magnitude of these costs. Therefore, EPA is requesting comment and supplemental information if appropriate on the expected O&M costs that would result from continued compliance with these rules. In addition, EPA would like comments on the following assumptions used for costing several of the individual rules. For the visible emission rule, it was assumed for costing purposes that two facilities would voluntarily train their own visible emissions readers and would send them to retraining each year. For the fugitive particulate matter emissions rule, it was assumed that an average of one construction project per reservation per year would need to develop and update particulate matter control plans. Under the particulate matter rule and the sulfur dioxide rule, it was assumed that six facilities and one facility, respectively, would conduct source tests within the first three years (Method 5 tests for the particulate matter rule and Method 6 tests for the sulfur dioxide rule). Finally, for the sulfur content of fuels rule, EPA assumed that fuel distributors have access to data on the sulfur content of delivered fuel and that fuel purchases would be unaffected because the fuel currently available already meets the sulfur limits established in the rule. EPA would like feedback from interested parties on the accuracy of these assumptions and suggestions for modifications, if applicable. For additional details on the assumptions used in the development of the estimated compliance costs associated with these rules, the reader is referred to the EIA.

IV. Request for Public Comment

EPA solicits comments on all aspects of today's proposal. In this proposal, EPA is trying to create a level playing field without imposing significant new costs to sources. Interested parties should submit comments by mail or in person to the address listed in the front of this proposal. Be sure to identify the

VOL

appropriate docket control number (#A–2000–25) in your correspondence. Your comments must be received by June 13, 2002 to be considered in the final action taken by EPA.

You may also comment on this proposal by attending the public hearing if one is held and providing oral comments. If EPA determines that a hearing should be held, the date and time will be announced in the local papers. You may also call David Bray at (206) 553–4253 to determine if a hearing will be held and to obtain the time and location.

V. Administrative Requirements

A. Executive Order 12866: Regulatory Planning and Review

Under Executive Order 12866 (58 FR 51735 (October 4, 1993)), EPA must determine whether the regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, EPA has determined that this proposed rulemaking is a "significant regulatory action" because it may raise novel legal or policy issues. The rulemaking marks the first time that, under the Clean Air Act, EPA has proposed Federal Implementation Plans for specific reservations that would be generally applicable to all sources within the exterior boundaries of those reservations.

However, EPA's analysis indicates that this rulemaking will not have a significant economic impact. EPA is finding that many sources on Indian reservations have historically been following similar air programs that are established by State and local agencies acting under State law or local rules. Although EPA has not approved SIPs as extending into Indian country under the CAA, some sources located on Indian reservations have made efforts to follow those programs. Most industrial sources on the Region 10 reservations have installed or upgraded air pollution control equipment to conform with State or local air programs without challenging the authority of those agencies within Indian country. As a result, these sources already have pollution controls that would satisfy State and local rules.

As discussed above in section III.A. this rulemaking would establish regulatory requirements for sources under the authority of the CAA that are substantially similar to the requirements of adjacent jurisdictions that most sources already meet. Thus, it is EPA's expectation that these rules would not impose significant costs or require changes at regulated sources. Nevertheless, because of the limited precedent this rulemaking would set, this action was submitted to OMB for review. Any written comments from OMB to EPA, any written EPA response to those comments, and any changes made in response to OMB suggestions or recommendations are included in the docket. The docket is available for public inspection at the EPA's Air Docket Section in Washington DC and at EPA Region 10 in Seattle, Washington. See the **ADDRESSES** section of this preamble for specific addresses and times when the docket may be reviewed.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act, (5 U.S.C. 601 *et seq.*) (RFA), as amended by the Small Business Regulatory Enforcement Fairness Act (Pub. L. 104–121) (SBREFA), generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's rulemaking on small entities, small entity is defined as: (1) A small business as defined by the RFA (based on Small Business Administration size standards); (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

Based on our economic analysis, we certify that this action will not have a significant economic impact on a substantial number of small entities. The economic analysis shows the total annual compliance costs of the basic and additional rules to be approximately $1,000 per small business. The cost-to-sales ratio for small business entities is expected to be less than one percent, with the exception of one facility whose estimated ratio is 1.15, when the worst-case scenario is applied.

Although this proposed rulemaking will not have a significant economic impact on a substantial number of small entities, EPA also has included a number of exemptions in the rules where appropriate to reduce impacts of this rulemaking on small entities. There are 13 rules that EPA proposes to apply to all reservations in Idaho, Oregon and Washington. Of these 13 rules, one (§ 49.121) provides an introduction, one (§ 49.122) provides delegation procedures for Tribes, and one (§ 49.123) provides definitions. The remaining ten (§§ 49.124, 49.125, 49.126, 49.129, 49.130, 49.131, 49.135, 49.137, 49.138, 49.139) have some regulatory effect. Eight of these ten contain exemptions for sources considered sufficiently small, such as households or the owners of mobile sources. Only two rules, one that addresses emissions detrimental to persons (§ 49.135) and one that addresses air pollution episodes (§ 49.137), do not include exemptions. These two rules require determinations by the Regional Administrator and would only be used when EPA determines that adverse effects of air pollution warrant their use.

In developing this proposal, EPA consulted extensively with Tribal governments regarding the potential impacts of these rules (see section G below). In order to better understand the implications of these rules for small entities, as part of the consultations with Tribal representatives, EPA also explored the possible effects for small businesses operating on Tribal lands. Moreover, while making site visits to Tribal reservations, EPA staff met one-on-one with numerous small business owner/operators and discussed today's proposal. Also during the course of these rules' development, EPA attended and made presentations about this activity at numerous public meetings and conferences; venues at which representatives of Tribally-owned and Indian-owned small businesses were present and had opportunities to comment on the rule. We continue to be interested in the potential impacts of the proposed rulemaking on small entities and welcome comments on issues related to such impacts. In addition, EPA intends to continue outreach to affected businesses, especially small businesses, during the public comment period to provide additional opportunities for input from small entities.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures by State, local, and Tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Section 205 generally requires that, before promulgating a rule for which a written statement must be prepared, EPA identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator explains why that alternative was not adopted. Finally, section 203 requires that, before establishing any regulatory requirements that may significantly or uniquely affect small governments, EPA must have developed a small government agency plan. The plan must provide for notifying any potentially affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that this rulemaking does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. With regard to State and local governments, there is no expenditure because these rules only apply on Indian reservations. With regard to Tribal governments, there is no expenditure in implementing and enforcing the rules because the rules would provide that EPA would take on that responsibility unless a Tribe chooses to assist EPA or assume responsibility for its own reservation. In such a case, EPA would seek to provide funding to support these efforts. Thus, today's rules are not subject to the requirements of sections 202 and 205 of UMRA.

In developing this rulemaking, EPA consulted with small governments pursuant to its interim plan established under section 203 of the UMRA to address impacts of regulatory requirements in the rules that might significantly or uniquely affect small governments. As explained in the discussion of Executive Order 13175 in section G below, among other things, we notified all potentially affected Tribal governments of the requirements in these proposed rules. Further, although there are no significant Federal intergovernmental mandates, we provided officials of all potentially affected Tribal governments an opportunity for meaningful and timely input in the development of the regulatory proposals. Finally, through consultation meetings and other forums, we will continue to keep Tribal governments involved by providing them with opportunities for learning about and receiving advice on compliance with the regulatory requirements.

D. Paperwork Reduction Act

The information collection requirements in this proposed rulemaking have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (ICR No. 2020.01) and a copy may be obtained from Sandy Farmer by mail at Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW, Washington, DC 20460, by email at *farmer.sandy@epamail.epa.gov*, or by calling (202) 260–2740. A copy may also be downloaded off the internet at *http://www.epa.gov/icr.*

The proposed FIPs include information collection requirements related to the registration of and reporting of emissions from air pollution sources. EPA believes these information collection requirements are appropriate because they would enable EPA to develop and maintain accurate records of air pollution sources and their emissions on reservation lands. As discussed in the summary of § 49.138 in section III.A. of this preamble, maintaining an accurate inventory of sources and emissions would, among other things, help EPA protect air quality from potential significant deterioration that can occur if many sources within a particular area increase their air pollutant emissions. These registration requirements would be mandatory under § 49.138. Regulated entities would be able to assert claims of business confidentiality and EPA would treat these claims in accordance with the provisions of 40 CFR part 2, Subpart B.

The reporting and record keeping burden for this collection of information is described below. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

EPA estimates that the owners or operators of facilities affected by these basic and additional rules will incur a total of $140,000 in labor costs and $17,000 in non-labor costs to comply with the information collection requirements of these rules.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Comments are requested on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques. Send comments on the ICR to the Director, Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., NW., Washington, DC 20503, marked "Attention: Desk Officer for

VOL

MR
15
2002
UMI

EPA." Include the ICR number in any correspondence. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after March 15, 2002, a comment to OMB is best assured of having its full effect if OMB receives it by April 15, 2002. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

E. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045 (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This proposed rulemaking is not subject to the Executive Order because it is not economically significant as defined in Executive Order 12866. Further, it does not concern an environmental health or safety risk that EPA has reason to believe may have disproportionate effect on children.

F. Executive Order 13132: Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications." "Policies that have Federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Under section 6 of Executive Order 13132, EPA may not issue a regulation that has Federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that had Federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This proposed rulemaking does not have Federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. These rules only prescribe regulations for facilities in areas where a State does not administer an approved Clean Air Act program, and thus does not have any direct effect on any State. Moreover, it does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. Thus, Executive Order 13132 does not apply to this rulemaking. EPA has provided advance draft copies of the proposed rules to State and local authorities in Idaho, Oregon and Washington. Generally, the States are pleased that EPA is developing rules for Indian reservations, as the rules will create more parity in the regulatory environment between on-reservation and off-reservation lands. In the spirit of Executive Order 13132, and consistent with EPA policy to promote communications between EPA and State and local governments, EPA specifically solicits comment on this proposed rulemaking from State and local officials.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

Under section 5(b) of Executive Order 13175, EPA may not issue a regulation that has Tribal implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by Tribal governments, or EPA consults with Tribal officials early in the process of developing the proposed regulation. Under section 5(c) of Executive Order 13175, EPA may not issue a regulation that has Tribal implications and that preempts Tribal law, unless the Agency consults with Tribal officials early in the process of developing the proposed regulation.

EPA has concluded that this proposed rule will have Tribal implications. These regulations would significantly affect specific Indian reservation communities by filling the gap in air quality regulations and thus creating a level of air quality protection not previously provided under the CAA. However, the air quality requirements proposed here are applicable broadly to all sources within the identified Indian reservation areas, and are not uniquely applicable to Tribal governments. The gap-filling approach used in this proposal would create Federal requirements similar to those that are already in place in jurisdictions adjacent to the reservations covered by the proposal. Tribal governments may incur some compliance costs in meeting those requirements that apply to sources they own or operate; however, the economic impacts analysis does not indicate that those costs will be significant. Finally, although Tribal governments are encouraged to partner with EPA on the implementation of these regulations, they are not required to do so. EPA will seek to provide funding to Tribes that apply for delegation of EPA's authority to administer specific rules to support their activities. Since this proposed rulemaking will neither impose substantial direct compliance costs on Tribal governments, nor preempt Tribal law, the requirements of sections 5(b) and 5(c) of the Executive Order do not apply to this rule.

Consistent with EPA policy, EPA consulted with Tribal officials and representatives of Tribal governments early in the process of developing this regulation to permit them to have meaningful and timely input into its development. The concept for this rulemaking grew from discussions related to implementation of the CAA and the TAR with Tribes throughout Region 10 who are engaged in developing Tribal air quality programs. EPA Region 10 began assembling an inventory of air pollution sources in 1995, and EPA has been working with Tribes and other air management agencies since then to better determine the need for specific rules and to evaluate alternatives for Tribal and Federal programs. Based on the discussions and inventory development, EPA decided to develop the proposed approach to rulemaking that would be tailored to the air quality issues of Tribes in Idaho, Oregon and Washington.

In June 1999, EPA Region 10 met in Seattle, Washington, with Tribal leaders, managers, and attorneys to introduce the Tribal Air Rules Project. A generally favorable response from Tribal leadership to the project led EPA to prepare a formal consultation package that included preliminary rules, and the package was distributed for review to the leadership of all of the potentially affected Tribes in Idaho, Oregon, and Washington. In August 1999, EPA Region 10 held three technical meetings with Tribal staff who are air specialists for in-depth discussions. Thirteen Tribes participated in these technical meetings. The Consultation Record in the docket for this proposal provides detailed information on the consultations.

In July 2000, a complete draft of the proposed rules was formally distributed to all 41 of the Tribal governments in Idaho, Oregon, and Washington. At the time of this proposal, 39 of the 41 Tribes have reservations. Two Tribes recently received Federal recognition and do not have reservation lands yet. The letter that transmitted the rule package was addressed to the Tribal Chair and sent by certified mail. Complete copies of the package were sent to the Natural Resource or Environmental Director at each Tribe and to the air specialist, in cases where the Tribe has one. In the letter, EPA Region 10 requested that the Tribe provide their views and comments on the proposed rules by September 30, 2000, and identify any additional rules that the Tribe would like EPA to propose for a particular reservation.

EPA Region 10 conducted follow-up telephone inquiries to offer opportunities for Tribes to participate in conference calls, group consultation meetings with EPA Region 10, and individual meetings with EPA Region 10. EPA Region 10 reached 39 of the 41 Tribes through these initial telephone contacts. In September and October of 2000, EPA Region 10 held four consultation meetings to discuss the draft proposed rulemaking package in Spokane, Puyallup, the Swinomish Reservation, and Portland. In the 2000 consultation round, 19 Tribes participated in face-to-face meetings with EPA Region 10. Another seven tribes consulted with EPA Region 10 through individual or group conference calls. Three Tribes submitted comments supporting the rule and requesting that EPA propose specific rules for their reservation. Please see the consultation record for more detailed information on the consultations. In the spirit of Executive Order 13175, and consistent with EPA policy to promote communications between EPA and Tribal governments, EPA specifically solicits additional comment on this proposed rule from Tribal officials.

H. Executive Order 13211: Energy Effects

This rule is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Further, we have concluded that this rule is not likely to have any adverse energy effects, because the facilities affected already have the pollution controls in place to enable them to comply with these rules.

I. National Technology Transfer and Advancement Act of 1995 (NTTAA)

Section 12(d) of NTTAA, Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary standards.

This proposed rulemaking involves technical standards. EPA proposes to use American Society for Testing and Materials (ASTM) Methods and generally accepted test methods previously promulgated by EPA. Because all of these methods are generally accepted and are widely used by State and local agencies for determining compliance with similar rules, EPA believes it would be impracticable and potentially confusing to put in place methods that vary from what is already accepted. As a result, EPA believes it is unnecessary and inappropriate to consider alternative technical standards. Nevertheless, EPA welcomes comments on this aspect of the proposed rulemaking and, specifically, invites the public to identify potentially-applicable voluntary consensus standards and to explain why such standards should be used in these regulations.

List of Subjects in 40 CFR Part 49

Environmental protection; Air pollution control, Indians, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: February 13, 2002.

Christine Todd Whitman,

Administrator.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is proposed to be amended as follows:

PART 49—TRIBAL CLEAN AIR ACT AUTHORITY

1. The authority citation for part 49 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Part 49 is amended by revising subpart C to read as follows:

Subpart C—General Federal Implementation Plan Provisions

Sec.

49.101–49.120 [Reserved]

General Rules for Application to Indian Reservations in EPA Region 10

49.121 Introduction.
49.122 Delegation of authority to a Tribe.
49.123 General provisions.
49.124 Rule for limiting visible emissions.
49.125 Rule for limiting the emissions of particulate matter.
49.126 Rule for limiting fugitive particulate matter emissions.
49.127 Rule for woodwaste burners.
49.128 Rule for limiting particulate matter emissions from wood products industry sources.
49.129 Rule for limiting emissions of sulfur dioxide.
49.130 Rule for limiting sulfur in fuels.
49.131 General rule for open burning.
49.132 Rule for open burning permits.
49.133 Rule for agricultural burning permits.
49.134 Rule for forestry burning permits.
49.135 Rule for emissions detrimental to human health and welfare.
49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.
49.137 Rule for air pollution episodes.
49.138 Rule for the registration of air pollution sources and the reporting of emissions.
49.139 Rule for non-Title V operating permits.
49.140–49.200 [Reserved]

VOL 67 ISS 51 MR 15 2002 UMI

Subpart C—General Federal Implementation Plan Provisions

§§ 49.101–49.120 [Reserved]

General Rules for Application to Indian Reservations in EPA Region 10

§ 49.121 Introduction.

(a) *What is the purpose of these rules?* These "General Rules for Application to Indian Reservations in EPA Region 10" establish emission limitations and other requirements for air pollution sources located within Indian reservations in Idaho, Oregon, and Washington that are appropriate in order to ensure a basic level of air pollution control and to protect public health and welfare.

(b) *How were these rules developed?* These "General Rules for Application to Indian Reservations in EPA Region 10" were developed through consultation with the Indian Tribes located in Idaho, Oregon, and Washington. The rules take into consideration the current air quality situations within Indian reservations, the known sources of air pollution, the needs and concerns of the Indian Tribes in that portion of Region 10, and the air quality rules in adjacent jurisdictions.

(c) *When are these rules applicable to sources on a particular Indian reservation?* These "General Rules for Application to Indian Reservations in EPA Region 10" apply to air pollution sources on a particular Indian reservation when EPA has specifically promulgated one or more rules into effect for that reservation. Rules shall be promulgated into effect through notice and comment rulemaking and will be specifically identified in the implementation plan for that reservation in Subpart M—Implementation Plans for Tribes—Region 10, of this Part. These "General Rules for Application to Indian Reservations in EPA Region 10" will not apply to air pollution sources located on newly established Tribal trust lands located outside the exterior boundaries of an Indian reservation until after they are promulgated into effect through notice and comment rulemaking.

§ 49.122 Delegation of authority to a Tribe.

(a) *What is the purpose of this rule?* The purpose of this rule, § 49.122, is to establish the process by which the Regional Administrator may delegate to an Indian Tribe the authority to administer all, or a portion of, the rules that have been promulgated into effect in Subpart M of this Part for a particular Indian reservation. This section provides for administrative delegation and does not affect the eligibility criteria under 40 CFR 49.6 for treatment in the same manner as a State.

(b) *How does a Tribe request delegation?* In order to be delegated authority to administer the rules that are in effect in Subpart M of this Part for a particular Indian reservation, the authorized representative of a Tribe must submit a request to the Regional Administrator that:

(1) Identifies the specific rules and provisions for which delegation is requested;

(2) Identifies the Indian reservation for which delegation is requested;

(3) Includes a statement by the applicant's legal counsel (or equivalent official) that includes the following information:

(i) A statement that the applicant is an Indian Tribe recognized by the Secretary of the Interior;

(ii) A descriptive statement demonstrating that the applicant is currently carrying out substantial governmental duties and powers over a defined area and that meets the requirements of § 49.7(a)(2); and

(iii) A description of the laws of the Indian Tribe that provide adequate authority to carry out the aspects of the rules and provisions for which delegation is requested; and

(4) Demonstrates that the Tribe has, or will have, adequate resources to carry out the aspects of the rules and provisions for which delegation is requested.

(c) *How is the delegation of authority accomplished?*

(1) A Delegation of Authority Agreement will set forth the terms and conditions of the delegation, will specify the rules and provisions that the Tribe shall be authorized to implement, and shall be entered into by the Regional Administrator and the Tribe. The Regional Administrator will not delegate authority to a Tribe for areas for which EPA believes the Indian reservation status is in question. The Agreement will become effective upon the date that both the Regional Administrator and the authorized representative of the Tribe have signed the Agreement. Once the delegation becomes effective, the Tribe will have the authority under the Act, to the extent specified in the Agreement, for administering the rules in effect in Subpart M of this Part for the particular Indian reservation and shall act as the Regional Administrator as that term is used in these regulations.

(2) A Delegation of Authority Agreement may be modified, amended, or revoked, in part or in whole, by the Regional Administrator after consultation with the Tribe.

(d) *How will any delegation of authority be publicized?* The Regional Administrator shall publish a notice in the **Federal Register** informing the public of any delegation of authority to a Tribe to administer all or a portion of the rules in Subpart M of this Part that apply for an Indian reservation and will indicate such delegation in the implementation plan for the Indian reservation. The Regional Administrator shall also publish an announcement of the delegation in local newspapers.

§ 49.123 General provisions.

(a) *Definitions.* The following definitions apply for the purposes of the "General Rules for Application to Indian Reservations in EPA Region 10". Terms not defined herein have the meaning given to them in the Act.

Act means the Clean Air Act, as amended (42 U.S.C. 7401 *et seq.*).

Actual emissions means the actual rate of emissions, in tons per year, of an air pollutant from an air pollution source. For an existing source, the actual emissions are the actual rate of emissions for the most recently completed calendar year and must be calculated using the actual operating hours, production rates, and types of materials processed, stored, or combusted during that calendar year. For a new source that has not operated for a complete calendar year, the actual emissions are the estimated actual rate of emissions for the current calendar year.

Administrator means the Administrator of the United States Environmental Protection Agency (EPA) or an authorized representative of the Administrator.

Agricultural activities means the usual and customary activities of cultivating the soil, producing crops, and raising livestock for use and consumption. Agricultural activities do not include manufacturing, bulk storage, handling for resale, or the formulation of any agricultural chemical.

Agricultural burning means burning of vegetative debris from an agricultural activity that is necessary for disease or pest control, or for crop propagation and/or crop rotation.

Air pollutant means any air pollution agent or combination of such agents, including any physical, chemical, biological, radioactive (including source material, special nuclear material, and by-product material) substance or matter that is emitted into or otherwise enters the ambient air. Such term includes any precursors to the formation of any air pollutant, to the extent the Administrator has identified such precursor or precursors for the particular purpose for which the term air pollutant is used.

Air pollution source means any building, structure, facility, installation, activity, or equipment that emits, or may emit, an air pollutant.

Allowable emissions means the emission rate of an air pollution source calculated using the maximum rated capacity of the source (unless the source is subject to Federally-enforceable limits that restrict the operating rate, hours of operation, or both) and the most stringent of the following:

(1) The applicable standards in 40 CFR parts 60, 61, 62 and 63;

(2) The applicable implementation plan emission limitations, including those with a future compliance date; or

(3) The emissions rates specified in Federally-enforceable permit conditions.

Ambient air means that portion of the atmosphere, external to buildings, to which the general public has access.

British thermal unit (Btu) means the quantity of heat necessary to raise the temperature of one pound of water one degree Fahrenheit.

Burn barrel means a cylindrical steel vessel, no greater than 55 gallons in size, with an open top, bottom air holes, and equipped with a steel spark screen, used for burning combustible household waste.

Coal means all fuels classified as anthracite, bituminous, sub-bituminous, or lignite by the American Society for Testing and Materials (ASTM) in ASTM Method D388–99, Standard Classification of Coals by Rank.

Combustible household waste means paper, paper products, cardboard, food packaging, plastic containers, garbage, rags, wood, and other combustible waste materials resulting from general residential activities, but does not include the following household wastes: tires; rubber materials or products; plastic materials or products (except containers); asphalt or composition roofing, or any other asphaltic material or product; tar or tarpaper; petroleum products; paints; timbers treated with preservatives; pesticides, herbicides, or fertilizers; insulated wire; batteries; light bulbs; materials containing mercury; or materials containing asbestos.

Combustion source means any source that combusts a solid fuel, liquid fuel, or gaseous fuel, or an incinerator.

Continuous emissions monitoring system (CEMS) means the total equipment used to sample, condition (if applicable), analyze, and provide a permanent record of emissions.

Continuous opacity monitoring system (COMS) means the total equipment used to sample, analyze, and provide a permanent record of opacity.

Distillate fuel oil means any oil meeting the specifications of ASTM Grade 1 or Grade 2 fuel oils in ASTM Method D396–98, Standard Specification for Fuel Oils.

Emission means a direct or indirect release into the atmosphere of any air pollutant; or the air pollutants released into the atmosphere.

Emission factor means an estimate of the rate at which an air pollutant is released into the atmosphere, as the result of some activity, divided by the rate of that activity.

Emission unit means any part of an air pollution source that emits, or may emit air pollutants into the atmosphere.

Federally enforceable means enforceable by the Administrator under the Act.

Fuel means any solid, liquid, or gaseous material that is combusted in order to produce heat or energy.

Fuel oil means a liquid fuel derived from crude oil or petroleum, including distillate oil, residual oil, and used oil.

Forestry or silvicultural burning means burning of vegetative debris from a forestry or silvicultural activity that is necessary for disease or pest control, reduction of fire hazard, reforestation, or ecosystem management.

Fugitive dust means a particulate matter emission made airborne by forces of wind, mechanical disturbance of surfaces, or both. Unpaved roads, construction sites, and tilled land are examples of sources of fugitive dust.

Fugitive particulate matter means particulate matter emissions that do not pass through a stack, chimney, vent, or other functionally equivalent opening. Fugitive particulate matter includes fugitive dust.

Garbage means food wastes.

Gaseous fuel means any fuel that exists in a gaseous state at standard conditions, including but not limited to natural gas, propane, fuel gas, process gas, and landfill gas.

Grate cleaning means removing ash from fireboxes.

Hardboard means a flat panel made from wood that has been reduced to basic wood fibers and bonded by adhesive properties under pressure.

Heat input means the total gross calorific value (where gross calorific value is measured by ASTM Method D240–92(1997)e2, D1826–94(1998), D5865–99a, or E711–87(1996)) of all fuels burned.

Implementation plan means a Tribal implementation plan approved by EPA pursuant to this Part or 40 CFR Part 51, or a Federal implementation plan promulgated by EPA in this Part or in 40 CFR Part 52 that applies in Indian country, or a combination of Tribal and Federal implementation plans.

Incinerator means any device, including a flare, designed to reduce the volume of solid, liquid, or gaseous waste by combustion. This includes air curtain incinerators, but does not include open burning.

Indian country means:

(1) All land within the limits of any Indian reservation under the jurisdiction of the United States government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation;

(2) All dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a State; and

(3) All Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

Marine vessel means a waterborne craft, ship, or barge.

Mobile sources means locomotives, aircraft, motor vehicles, non-road vehicles, non-road engines, and marine vessels.

Motor vehicle means any self-propelled vehicle designed for transporting people or property on a street or highway.

New air pollution source means an air pollution source that begins actual construction after the effective date of the "General Rules for Application to Indian Reservations in EPA Region 10".

Noncombustibles means materials that are not flammable, capable of catching fire, or burning.

Non-road engine means:

(1) Except as discussed below, any internal combustion engine:

(i) In or on a piece of equipment that is self-propelled or that serves a dual purpose by both propelling itself and performing another function (such as garden tractors, off-highway mobile cranes and bulldozers); or

(ii) In or on a piece of equipment that is intended to be propelled while performing its function (such as lawnmowers and string trimmers); or

(iii) That, by itself or in or on a piece of equipment, is portable or transportable, meaning designed to be and capable of being carried or moved from one location to another. Indicia of transportability include, but are not limited to, wheels, skids, carrying handles, dolly, trailer, or platform.

(2) An internal combustion engine is not a nonroad engine if:

(i) The engine is used to propel a motor vehicle or a vehicle used solely

VOL 67 ISS 51 MR 15 2002 UMI

for competition, or is subject to standards promulgated under section 202 of the Act; or

(ii) The engine is regulated by a Federal new source performance standard promulgated under section 111 of the Act; or

(iii) The engine that is otherwise portable or transportable remains or will remain at a location for more than 12 consecutive months or a shorter period of time for an engine located at a seasonal source. A location is any single site at a building, structure, facility, or installation. Any engine (or engines) that replaces an engine at a location and that is intended to perform the same or similar function as the engine replaced will be included in calculating the consecutive time period. An engine located at a seasonal source is an engine that remains at a seasonal source during the full annual operating period of the seasonal source. For purposes of this paragraph, a seasonal source is a stationary source that remains in a single location on a permanent basis (i.e., at least 2 years) and that operates at that single location approximately 3 months (or more) each year. This paragraph does not apply to an engine after the engine is removed from the location.

Non-road vehicle means a vehicle that is powered by a nonroad engine and that is not a motor vehicle or a vehicle used solely for competition.

Oil-fired boiler means a furnace or boiler used for combusting fuel oil for the primary purpose of producing steam or hot water by heat transfer.

Opacity means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background. For continuous opacity monitoring systems, opacity means the fraction of incident light that is attenuated by an optical medium.

Open burning means the burning of a material that results in the products of combustion being emitted directly into the atmosphere without passing through a stack. Open burning includes burning in burn barrels.

Owner or operator means any person who owns, leases, operates, controls or supervises an air pollution source.

Particleboard means a matformed flat panel consisting of wood particles bonded together with synthetic resin or other suitable binder.

Particulate matter means any airborne finely divided solid or liquid material, other than uncombined water.

Permit to construct or construction permit means a permit issued by the Regional Administrator pursuant to 40 CFR 52.10 or 52.21, or a permit issued by a Tribe pursuant to a program approved by the Administrator under 40 CFR Part 51, Subpart I, authorizing the construction or modification of a stationary source.

Permit to operate or operating permit means a permit issued by the Regional Administrator pursuant to § 49.139 or 40 CFR Part 71, or by a Tribe pursuant to a program approved by the Administrator under 40 CFR Part 51 or 40 CFR Part 70, authorizing the operation of a stationary source.

Plywood means a flat panel built generally of an odd number of thin sheets of veneers of wood in which the grain direction of each ply or layer is at right angles to the one adjacent to it.

PM10 means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method based on Appendix J of 40 CFR Part 50 and designated in accordance with 40 CFR Part 53 or by an equivalent method designated in accordance with 40 CFR Part 53.

Potential to emit means the maximum capacity of an air pollution source to emit an air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the air pollution source to emit an air pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is Federally enforceable.

Press/Cooling vent means any opening through which particulate and gaseous emissions from plywood, particleboard, or hardboard manufacturing are exhausted, either by natural draft or powered fan, from the building housing the process. Such openings are generally located immediately above the board press, board unloader, or board cooling area.

Process source means an air pollution source using a procedure or combination of procedures for the purpose of causing a change in material by either chemical or physical means, excluding combustion.

Rated capacity means the maximum sustainable capacity of the equipment.

Reference method means any method of sampling and analyzing for an air pollutant as specified in the applicable rule.

Refuse means all solid, liquid, or gaseous waste material, including but not limited to, garbage, trash, household refuse, municipal solid waste, construction or demolition debris, or waste resulting from the operation of any business, trade, or industry.

Regional Administrator means the Regional Administrator of EPA Region 10 or an authorized representative of the Regional Administrator.

Residual fuel oil means any oil meeting the specifications of ASTM Grade 4, Grade 5, or Grade 6 fuel oils in ASTM Method D396–98, Standard Specification for Fuel Oils.

Solid fuel means wood, refuse, refuse-derived fuel, tires, tire-derived fuel, and other solid combustible material (other than coal), including any combination thereof.

Solid fuel-fired boiler means a furnace or boiler used for combusting solid fuel for the primary purpose of producing steam or hot water by heat transfer.

Soot blowing means using steam or compressed air to remove carbon from a furnace or from a boiler's heat transfer surfaces.

Stack means any point in a source that conducts air pollutants to the atmosphere, including, but not limited to, a chimney, flue, conduit, pipe, vent, or duct, but not including a flare.

Standard conditions means a temperature of 293 degrees Kelvin (68 degrees Fahrenheit, 20 degrees Celsius) and a pressure of 101.3 kilopascals (29.92 inches of mercury).

Start-up means the setting into operation of a piece of equipment.

Stationary source means any building, structure, facility, or installation that emits, or may emit, any air pollutant.

Tempering oven means any facility used to bake hardboard following an oil treatment process.

Uncombined water means droplets of water that have not combined with hygroscopic particles or contain dissolved solids.

Used oil means petroleum products that have been recovered from another application.

Veneer means a single flat panel of wood not exceeding ¼ inch in thickness formed by slicing or peeling from a log.

Veneer dryer means equipment in which veneer is dried.

Visible emissions means air pollutants in sufficient amount to be observable to the human eye.

Wood means wood, wood residue, bark, or any derivative or residue thereof, in any form, including but not limited to sawdust, sanderdust, wood chips, scraps, slabs, millings, shavings, and processed pellets made from wood or other forest residues.

Wood-fired boiler means a furnace or boiler used for combusting wood for the primary purpose of producing steam or hot water by heat transfer.

Wood-fired veneer dryer means a veneer dryer that is directly heated by the products of combustion of wood in addition to, or exclusive of, steam or natural gas or propane combustion.

Woodwaste burner means a wigwam burner, teepee burner, silo burner, olivine burner, truncated cone burner, or other such wood waste burning device used by the wood products industry for the disposal of wood wastes by burning.

(b) *Requirement for testing.* The Regional Administrator may require, in a permit to construct or a permit to operate, that a person demonstrate compliance with the "General Rules for Application to Indian Reservations in EPA Region 10" by performing a source test and submitting the test results to the Regional Administrator. A person may also be required by the Regional Administrator, in a permit to construct or permit to operate, to install and operate a continuous opacity monitoring system (COMS) or a continuous emissions monitoring system (CEMS) to demonstrate compliance. Nothing in the "General Rules for Application to Indian Reservations in EPA Region 10" limits the authority of the Regional Administrator to require, in an information request pursuant to section 114 of the Act, a person subject to the "General Rules for Application to Indian Reservations in EPA Region 10" to demonstrate compliance by performing source testing, even where the source does not have a permit to construct or a permit to operate.

(c) *Requirement for monitoring, recordkeeping, and reporting.* Nothing in the "General Rules for Application to Indian Reservations in EPA Region 10" precludes the Regional Administrator from requiring monitoring, recordkeeping and reporting, including monitoring, recordkeeping and reporting in addition to that already required by an applicable requirement, in a permit to construct or permit to operate in order to ensure compliance.

(d) *Credible evidence.* For the purposes of submitting compliance certifications or establishing whether or not a person has violated or is in violation of any requirement, nothing in the "General Rules for Application to Indian Reservations in EPA Region 10" shall preclude the use, including the exclusive use, of any credible evidence or information, relevant to whether a source would have been in compliance with applicable requirements if the appropriate performance or compliance test had been performed.

(e) *Incorporation by reference.* The materials listed in this section are incorporated by reference in the corresponding sections noted. These incorporations by reference were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. These materials are incorporated as they exist on the date of the approval, and a notice of any change in these materials will be published in the **Federal Register**. The materials are available for purchase at the corresponding addresses noted below, or are available for inspection at the Office of the Federal Register, 800 North Capitol Street, NW., Suite 700, Washington, DC, at the Air and Radiation Docket and Information Center, U.S. EPA, 401 M Street, SW., Washington, DC, and at the EPA Library (MD–35), U.S. EPA, Research Triangle Park, North Carolina.

(1) The materials listed below are available for purchase from at least one of the following addresses: American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, Pennsylvania 19428–2959; or University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

(i) ASTM D388–99, Standard Classification of Coals by Rank, IBR approved for § 49.123(a).

(ii) ASTM D396–98, Standard Specification for Fuel Oils, IBR approved for § 49.123(a) and § 49.130(d).

(iii) ASTM D240–92(1997)e2, Standard Test Method for Heat of Combustion of Liquid Hydrocarbon Fuels by Bomb Calorimeter, IBR approved for § 49.123(a).

(iv) ASTM D1826–94(1998), Standard Test Method for Calorific (Heating) Value of Gases in Natural Gas Range by Continuous Recording Calorimeter, IBR approved for § 49.123(a).

(v) ASTM D5865–99a, Standard Test Method for Gross Calorific Value of Coal and Coke, IBR approved for § 49.123(a).

(vi) ASTM E711–87(1996) Standard Test Method for Gross Calorific Value of Refuse-Derived Fuel by the Bomb Calorimeter, IBR approved for § 49.123(a).

(vii) ASTM D2880–98, Standard Specification for Gas Turbine Fuel Oils, IBR approved for § 49.130(e)(1).

(viii) ASTM D4294–98, Standard Test Method for Sulfur in Petroleum Products by Energy-Dispersive X-ray Fluorescence Spectroscopy, IBR approved for § 49.130(e)(1).

(ix) ASTM D6021–96, Standard Test Method for Measurement of Total Hydrogen Sulfide in Residual Fuels by Multiple Headspace Extraction and Sulfur Specific Detection, IBR approved for § 49.130(e)(1).

(x) ASTM D3177–89(1997), Standard Test Methods for Total Sulfur in the Analysis Sample of Coal and Coke, IBR approved for § 49.130(e)(2).

(xi) ASTM D4239–00, Standard Test Methods for Sulfur in the Analysis Sample of Coal and Coke Using High Temperature Tube Furnace Combustion Methods, IBR approved for § 49.130(e)(2).

(xii) ASTM D2492–90(1998), Standard Test Method for Forms of Sulfur in Coal, IBR approved for § 49.130(e)(2).

(xiii) ASTM E775–87(1996), Standard Test Methods for Total Sulfur in the Analysis Sample of Refuse-Derived Fuel, IBR approved for § 49.130(e)(3).

(xiv) ASTM D1072–90(1999), Standard Test Method for Total Sulfur in Fuel Gases, IBR approved for § 49.130(e)(4).

(xv) ASTM D3246–96, Standard Test Method for Sulfur in Petroleum Gas by Oxidative Microcoulometry, IBR approved for § 49.130(e)(4).

(xvi) ASTM D4084–94(1999) Standard Test Method for Analysis of Hydrogen Sulfide in Gaseous Fuels (Lead Acetate Reaction Rate Method), IBR approved for § 49.130(e)(4).

(xvii) ASTM D5504–98, Standard Test Method for Determination of Sulfur Compounds in Natural Gas and Gaseous Fuels by Gas Chromatography and Chemiluminescence, IBR approved for § 49.130(e)(4).

(xviii) ASTM D4468–85(1995)e1, Standard Test Method for Total Sulfur in Gaseous Fuels by Hydrogenolysis and Rateometric Colorimetry, IBR approved for § 49.130(e)(4).

(xix) ASTM D2622–98, Standard Test Method for Sulfur in Petroleum Products by Wavelength Dispersive X-ray Fluorescence Spectrometry, IBR approved for § 49.130(e)(4).

(xx) ASTM D6228–98 Standard Test Method for Determination of Sulfur Compounds in Natural Gas and Gaseous Fuels by Gas Chromatography and Flame Photometric Detection, IBR approved for § 49.130(e)(4).

§ 49.124 Rule for limiting visible emissions.

(a) *What is the purpose of this rule?* This rule, § 49.124, limits the visible emissions of air pollutants from air pollution sources operating within the Indian reservation in order to control emissions of particulate matter to the atmosphere and ground-level concentrations of PM10 and to detect the violation of any other rules and regulations.

(b) *Who is affected by this rule?* This rule, § 49.124, applies to any person who owns or operates an air pollution source that emits, or could emit, particulate matter or other visible air pollutants to the atmosphere, unless exempted in paragraph (c) of this section.

VOL
67
ISS
51
MR
15
2002
UMI

(c) *What is exempted from this rule?* This rule, § 49.124, does not apply to open burning, agricultural activities, non-commercial smoke houses, sweat houses or lodges, smudge pots, furnaces and boilers used exclusively to heat residential buildings with four or fewer dwelling units, fugitive dust from public roads owned or maintained by any Federal, Tribal, State or local government, and emissions from fuel combustion in mobile sources.

(d) *What are the opacity limits for air pollution sources?*

(1) The visible emissions from an air pollution source must not exceed 20% opacity, averaged over any consecutive 6-minute period, unless paragraph (d)(2) or (d)(3) of § 49.124 applies to the air pollution source.

(2) The visible emissions from an air pollution source may exceed the 20% opacity limit if the owner or operator of the air pollution source demonstrates to the Regional Administrator's satisfaction that the presence of uncombined water, such as steam, is the only reason for the failure of an air pollution source to meet the 20% opacity limit.

(3) The visible emissions from an oil-fired boiler or solid fuel-fired boiler that continuously measures opacity with a continuous opacity monitoring system (COMS) may exceed the 20% opacity limit during start-up, soot blowing, and grate cleaning for a single period of up to 15 minutes in any 8 consecutive hours, but must not exceed 60% opacity at any time.

(e) *What is the reference method for determining compliance?*

(1) The reference method for determining compliance with the opacity limits is EPA Method 9 of Appendix A of 40 CFR Part 60. A complete description of this method is found in Appendix A.

(2) An alternative reference method for determining compliance is a COMS that complies with Performance Specification 1 found in Appendix B of 40 CFR Part 60.

(3) This rule, § 49.124, does not require any person to conduct Method 9, of Appendix A of 40 CFR Part 60, opacity readings or to install a COMS unless specifically required by the Regional Administrator in a permit to construct or permit to operate.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.124, are defined in § 49.123 General provisions: Act, agricultural activities, air pollutant, air pollution source, ambient air, coal, continuous opacity monitoring system (COMS), distillate fuel oil, emission, fuel, fuel oil, fugitive dust, gaseous fuel, grate cleaning, marine vessel, mobile sources, motor vehicle, non-road engine, non-road vehicle, oil-fired boiler, opacity, open burning, particulate matter, permit to construct, permit to operate, PM10, reference method, refuse, Regional Administrator, residual fuel oil, solid fuel, solid fuel-fired boiler, soot blowing, stack, standard conditions, start-up, stationary source, uncombined water, used oil, visible emissions, and wood.

§ 49.125 Rule for limiting the emissions of particulate matter.

(a) *What is the purpose of this rule?* This rule, § 49.125, limits the amount of particulate matter that can be emitted from certain air pollution sources within the Indian reservation in order to control ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.125, applies to any person who owns or operates an air pollution source that emits, or could emit, particulate matter to the atmosphere, unless exempted in paragraph (c) of this section.

(c) *What is exempted from this rule?* This rule, § 49.125, does not apply to woodwaste burners, furnaces and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 British thermal units (Btu) per hour, non-commercial smoke houses, sweat houses or lodges, and mobile sources.

(d) *What are the particulate matter limits for sources?*

(1) Particulate matter emissions from a combustion source (except for wood-fired boilers) must not exceed an average of 0.23 grams per dry standard cubic meter (0.1 grains per dry standard cubic foot), corrected to seven (7) percent oxygen, during any three (3) hour period.

(2) Particulate matter emissions from a wood-fired boiler must not exceed an average of 0.46 grams per dry standard cubic meter (0.2 grains per dry standard cubic foot), corrected to seven (7) percent oxygen, during any three (3) hour period.

(3) Particulate matter emissions from a process source must not exceed an average of 0.23 grams per dry standard cubic meter (0.1 grains per dry standard cubic foot) during any three (3) hour period.

(e) *What is the reference method for determining compliance?*

(1) The reference method for determining compliance with the particulate matter limits for a combustion source, wood-fired boiler, or process source is EPA Method 5. A complete description of this method is found in Appendix A of 40 CFR Part 60.

(2) This rule, § 49.125, does not require any person to conduct a Method 5 source test unless specifically required by the Regional Administrator in a permit to construct or permit to operate.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.125, are defined in § 49.123 General provisions: Act, air pollutant, air pollution source, ambient air, British thermal unit (Btu), coal, combustion source, distillate fuel oil, emission, fuel, fuel oil, gaseous fuel, heat input, incinerator, marine vessel, mobile sources, motor vehicle, non-road engine, non-road vehicle, open burning, particulate matter, permit to construct, permit to operate, PM10, process source, reference method, refuse, residual fuel oil, solid fuel, stack, standard conditions, stationary source, uncombined water, used oil, wood, wood-fired boiler, and woodwaste burner.

§ 49.126 Rule for limiting fugitive particulate matter emissions.

(a) *What is the purpose of this rule?* This rule, § 49.126, limits the amount of fugitive particulate matter that can be emitted from air pollution sources within the Indian reservation in order to control ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.126, applies to any person who owns or operates a source of fugitive particulate matter emissions.

(c) *What is exempted from this rule?* This rule, § 49.126, does not apply to activities associated with single family residences or residential buildings with four or fewer dwelling units, agricultural activities, or public roads owned or maintained by any Federal, Tribal, State or local government.

(d) *What are the requirements for sources of fugitive particulate matter emissions?*

(1) The owner or operator of any source of fugitive particulate matter emissions, including any source or activity engaged in materials handling or storage, construction, demolition, or any other operation that is or may be a source of fugitive particulate matter emissions, must take all reasonable precautions to prevent fugitive particulate matter emissions and must maintain and operate the source to minimize fugitive particulate matter emissions.

(2) Reasonable precautions include, but are not limited to the following:

(i) Use, where possible, of water or chemicals for control of dust in the demolition of buildings or structures, construction operations, grading of roads, or clearing of land.

(ii) Application of asphalt, oil (but not used oil), water, or other suitable chemicals on unpaved roads, materials stockpiles, and other surfaces that can create airborne dust.

(iii) Full or partial enclosure of materials stockpiles in cases where application of oil, water, or chemicals is not sufficient or appropriate to prevent particulate matter from becoming airborne.

(iv) Implementation of good housekeeping practices to avoid or minimize the accumulation of dusty materials that have the potential to become airborne, and the prompt cleanup of spilled or accumulated materials.

(v) Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty materials.

(vi) Adequate containment during sandblasting or other similar operations.

(vii) Covering, at all times when in motion, open bodied trucks transporting materials likely to become airborne.

(viii) The prompt removal from paved streets of earth or other material that does or may become airborne.

(e) *Are there additional requirements that must be met?*

(1) A person subject to this rule, § 49.126, must:

(i) Periodically survey the air pollution source during typical operating conditions to determine if there are sources of fugitive particulate matter emissions. This must be done at least once each calendar quarter, and must be done weekly if dry or dusty materials are handled at the air pollution source. Document the results of the survey, including the date and time of the survey and identification of any sources of fugitive particulate matter emissions found.

(ii) If sources of fugitive particulate matter emissions are present, determine the reasonable precautions that will be taken to prevent fugitive particulate matter emissions.

(iii) Prepare, and update as necessary following each periodic survey, a written plan that specifies the reasonable precautions to be taken and the procedures to be followed to prevent fugitive particulate matter emissions.

(iv) Implement the reasonable precautions and procedures plan, and maintain and operate the source to minimize fugitive particulate matter emissions.

(v) Maintain records for five years that document the periodic surveys and the reasonable precautions that were taken to prevent fugitive particulate matter emissions.

(2) The Regional Administrator may require specific actions to prevent fugitive particulate matter emissions, or impose conditions to maintain and operate the air pollution source to minimize fugitive particulate matter emissions, in a permit to construct or a permit to operate for the source.

(3) A prudent approach to complying with this rule, § 49.126, requires that the owner or operator consider all environmental implications of any particular measures. Efforts to comply with this rule cannot be used as a reason for not complying with other environmental rules, or in the absence of such rules, creating other environmental problems.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.126, are defined in § 49.123 General provisions: Agricultural activities, air pollutant, air pollution source, ambient air, emission, fugitive dust, fugitive particulate matter, owner or operator, particulate matter, permit to construct, permit to operate, PM10, Regional Administrator, stack, and uncombined water.

§ 49.127 Rule for woodwaste burners.

(a) *What is the purpose of this rule?* This rule, § 49.127, phases out the operation of woodwaste burners (commonly known as wigwam or teepee burners), and in the interim, limits the visible emissions from woodwaste burners operating within the Indian reservation in order to control emissions of particulate matter to the atmosphere and ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.127, applies to any person who owns or operates a woodwaste burner.

(c) *What are the requirements for woodwaste burners?*

(1) The owner or operator of a woodwaste burner must shut down and dismantle the woodwaste burner by no later than 2 years after the effective date of this rule, § 49.127. Until the woodwaste burner is shut down, visible emissions from the woodwaste burner must not exceed 20% opacity, averaged over any consecutive 6-minute period.

(2) Until the woodwaste burner is shut down, only wood waste generated onsite may be burned or disposed of in the woodwaste burner.

(3) If there is no reasonably available alternative method of disposal for the wood waste other than by burning it onsite in a woodwaste burner, the owner or operator of the woodwaste burner that is in compliance with the opacity limit in paragraph (c)(1) of this section, may apply to the Regional Administrator for an extension of the 2-year deadline. If the Regional Administrator finds that there is no reasonably available alternative method of disposal, then a 2-year extension of the deadline may be granted. There is no limit to the number of extensions that may be granted by the Regional Administrator.

(d) *What is the reference method for determining compliance with the opacity limit?*

(1) The reference method for determining compliance with the opacity limit is EPA Method 9. A complete description of this method is found in 40 CFR Part 60, Appendix A.

(2) This rule, § 49.127, does not require any person to conduct Method 9 opacity readings unless specifically required by the Regional Administrator in a permit to construct or permit to operate.

(e) *Are there additional requirements that must be met?* A person subject to this rule, § 49.127, must submit a plan to shut down and dismantle the woodwaste burner to the Regional Administrator within 180 days after the effective date of this rule, § 49.127. Unless an extension has been granted by the Regional Administrator, the woodwaste burner must be shut down and dismantled within 2 years after the effective date of this rule, § 49.127. The owner or operator of the woodwaste burner must notify the Regional Administrator that the woodwaste burner has been shut down and dismantled within 30 days after completion.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.127, are defined in § 49.123 General provisions: Air pollutant, ambient air, emission, opacity, owner or operator, particulate matter, permit to construct, permit to operate, PM10, reference method, Regional Administrator, stationary source, uncombined water, visible emissions, wood, and woodwaste burner.

§ 49.128 Rule for limiting particulate matter emissions from wood products industry sources.

(a) *What is the purpose of this rule?* This rule, § 49.128, limits the amount of particulate matter that can be emitted from certain wood products industry sources within the Indian reservation in order to control ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.128, applies to any person who owns or operates any of the following wood products industry sources:

VOL
67
ISS
51
MR
15
2002
UMI

(1) Veneer manufacturing operations;
(2) Plywood manufacturing operations;
(3) Particleboard manufacturing operations; and
(4) Hardboard manufacturing operations.

(c) *What are the particulate matter limits for wood products industry sources?* These particulate matter limits are in addition to, and not in lieu of, the particulate matter limits for combustion sources and process sources.

(1) *Veneer Dryers at Veneer Manufacturing Operations and Plywood Manufacturing Operations.*

(i) Particulate matter emissions from direct natural gas fired or direct propane fired veneer dryers must not exceed 0.3 pounds per 1000 square feet of veneer dried (3/8 inch basis), one-hour average.

(ii) Particulate matter emissions from steam heated veneer dryers must not exceed 0.3 pounds per 1000 square feet of veneer dried (3/8 inch basis), one-hour average.

(iii) Particulate matter emissions from wood fired veneer dryers must not exceed a total of 0.3 pounds per 1000 square feet of veneer dried (3/8 inch basis) and 0.2 pounds per 1000 pounds of steam generated in boilers, prorated for the amount of combustion gases routed to the veneer dryer, one-hour average.

(2) *Wood Particle Dryers at Particleboard Manufacturing Operation.* Particulate matter emissions from wood particle dryers must not exceed a total of 0.4 pounds per 1000 square feet of board produced by the plant (3/4 inch basis), one-hour average.

(3) *Press/Cooling Vents at Hardboard Manufacturing Operations.* Particulate matter emissions from hardboard press/cooling vents must not exceed 0.3 pounds per 1000 square feet of hardboard produced (1/8 inch basis), one-hour average.

(4) *Tempering Ovens at Hardboard Manufacturing Operations.* A person must not operate any hardboard tempering oven unless all gases and vapors are collected and treated in a fume incinerator capable of raising the temperature of the gases and vapors to at least 1500 degrees Fahrenheit for 0.3 seconds or longer.

(d) *What is the reference method for determining compliance?*

(1) The reference method for determining compliance with the particulate matter limits is EPA Method 202. A complete description of this method is found in 40 CFR Part 51, Appendix M.

(2) This rule, § 49.128, does not require any person to conduct a Method 202 source test unless specifically required by the Regional Administrator in a permit to construct or permit to operate.

(e) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.128, are defined in § 49.123 General provisions: Act, combustion source, emissions, hardboard, particleboard, particulate matter, permit to construct, permit to operate, plywood, PM10, press/cooling vent, process source, tempering oven, veneer, veneer dryer, wood, and wood-fired veneer dryer.

§ 49.129 Rule for limiting emissions of sulfur dioxide.

(a) *What is the purpose of this rule?* This rule, § 49.129, limits the amount of sulfur dioxide (SO_2) that can be emitted from certain air pollution sources within the Indian reservation in order to control ground-level concentrations of SO_2.

(b) *Who is affected by this rule?* This rule, § 49.129, applies to any person who owns or operates an air pollution source that emits, or could emit, SO_2 to the atmosphere.

(c) *What is exempted from this rule?* This rule, § 49.129, does not apply to furnaces and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 British thermal units (Btu) per hour, and mobile sources.

(d) *What are the sulfur dioxide limits for sources?*

(1) Sulfur dioxide emissions from a combustion source must not exceed an average of 500 parts per million by volume, on a dry basis and corrected to seven (7) percent oxygen, during any three (3) hour period.

(2) Sulfur dioxide emissions from a process source must not exceed an average of 500 parts per million by volume, on a dry basis, during any three (3) hour period.

(e) *What are the reference methods for determining compliance?*

(1) The reference methods for determining compliance with the SO_2 limits are EPA Methods 6, 6A, 6B, and 6C as specified in the applicability section of each Method. A complete description of these methods are found in 40 CFR Part 60, Appendix A.

(2) An alternative reference method is a continuous emissions monitoring system (CEMS) that complies with Performance Specification 2 found in 40 CFR Part 60, Appendix B.

(3) This rule, § 49.129, does not require any person to conduct Method 6, 6A, 6B, or 6C of Appendix A of 40 CFR Part 60 source tests or to install a continuous emissions monitoring system (CEMS) unless specifically required by the Regional Administrator in a permit to construct or permit to operate.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.129, are defined in § 49.123 General provisions: Act, air pollutant, air pollution source, ambient air, British thermal unit (Btu), coal, combustion source, continuous emissions monitoring system (CEMS), distillate fuel oil, emission, fuel, fuel oil, gaseous fuel, heat input, incinerator, marine vessel, mobile sources, motor vehicle, non-road engine, non-road vehicle, open burning, permit to construct, permit to operate, process source, reference method, refuse, residual fuel oil, solid fuel, stack, standard conditions, stationary source, used oil, wood, and woodwaste burner.

§ 49.130 Rule for limiting sulfur in fuels.

(a) *What is the purpose of this rule?* This rule, § 49.130, limits the amount of sulfur contained in fuels that are burned at stationary sources within the Indian reservation in order to control emissions of sulfur dioxide (SO_2) to the atmosphere and ground-level concentrations of SO_2.

(b) *Who is affected by this rule?* This rule, § 49.130, applies to any person who sells, distributes, uses, or makes available for use, any fuel oil, coal, solid fuel, or gaseous fuel within the Indian reservation.

(c) *What is exempted from this rule?* This rule, § 49.130, does not apply to fuel oils used exclusively for mobile sources, such as automotive and marine diesel fuels.

(d) *What are the sulfur limits for fuels?* A person must not sell, distribute, use, or make available for use any fuel oil, coal, solid fuel, or gaseous fuel that contains more than the following amounts of sulfur:

(1) For distillate fuel oil—0.3 percent by weight for ASTM Grade 1 fuel oil;
(2) For distillate fuel oil—0.5 percent by weight for ASTM Grade 2 fuel oil;
(3) For residual fuel oil—1.75 percent sulfur by weight for ASTM Grades 4, 5, or 6 fuel oil;
(4) For used oil—2.0 percent sulfur by weight;
(5) For coal—1.0 percent sulfur by weight;
(6) For solid fuels—2.0 percent sulfur by weight;
(7) For gaseous fuels—1.1 grams of sulfur per dry standard cubic meter of gaseous fuel (400 parts per million at standard conditions).

(e) *What are the reference methods for determining compliance?* The reference methods for determining the amount of sulfur in a fuel are as follows:

(1) Sulfur content in fuel oil—ASTM methods D2880–98, D4294–98, and D6021–96;
(2) Sulfur content in coal—ASTM methods D3177–89(1997), D4239–00, and D2492–90(1998);
(3) Sulfur content in solid fuels—ASTM method E775–87(1996);
(4) Sulfur content in gaseous fuels—ASTM methods D1072–90(1999), D3246–96, D4084–94(1999), D5504–98, D4468–85(1995)e1, D2622–98, and D6228–98.

(f) *Are there additional requirements that must be met?*

(1) A person subject to this rule, § 49.130, must:

(i) For fuel oils, obtain, record, and keep records of the percent sulfur by weight from the vendor for each purchase of fuel oil. If the vendor is unable to provide this information, then obtain a representative grab sample for each purchase and test the sample using the reference method.

(ii) For gaseous fuels, either obtain, record, and keep records of the sulfur content from the vendor, or continuously monitor the sulfur content of the fuel gas line using EPA Methods 11 or 16. Complete descriptions of these Methods are found in 40 CFR Part 60, Appendix A. If only pipeline natural gas is used, then keep records showing that only pipeline quality natural gas was used.

(iii) For coal and solid fuels, either obtain, record, and keep records of the percent sulfur by weight from the vendor for each purchase of coal or solid fuel, or obtain a representative grab sample for each day of operation and test the sample using the reference method. The owner or operator of a coal or solid fuel-fired source may apply to the Regional Administrator for a waiver of this provision or for approval of an alternative fuel sampling program.

(2) Records of fuel purchases and fuel sulfur content must be kept for a period of five (5) years and must be made available to the Regional Administrator upon request.

(3) The owner or occupant of a single family residence, and the owner or manager of a residential building with four or fewer dwelling units, is not subject to the requirement to obtain and record the percent sulfur content from the vendor if the fuel used in an oil, coal, or gas furnace is purchased from a licensed fuel distributor.

(g) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.130, are defined in § 49.123 General provisions: Act, air pollutant, ambient air, coal, distillate fuel oil, emission, fuel, fuel oil, gaseous fuel, marine vessel, mobile sources, motor vehicle, non-road engine, non-road vehicle, owner or operator, reference method, refuse, Regional Administrator, residual fuel oil, solid fuel, standard conditions, stationary source, and used oil.

§ 49.131 General rule for open burning.

(a) *What is the purpose of this rule?* This rule, § 49.131, limits the types of materials that can be open burned within the Indian reservation in order to control emissions of particulate matter and other noxious fumes to the atmosphere and ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.131, applies to any person who conducts open burning.

(c) *What is exempted from this rule?* The following open fires are exempted from this rule, § 49.131:

(1) Outdoor fires set for cultural or traditional purposes;

(2) Fires set for cultural or traditional purposes within structures such as sweat houses or lodges;

(3) Except during a burn ban under paragraphs (d)(2) and (d)(3) of this section, fires set for recreational purposes provided that no prohibited materials are burned;

(4) Except during a burn ban under paragraphs (d)(2) and (d)(3) of this section, burn barrels located at single family residences or residential buildings with four or fewer dwelling units that are only used to dispose of combustible household wastes generated onsite;

(5) With permission from the Regional Administrator, open outdoor fires used by qualified personnel to train firefighters in the methods of fire suppression and fire fighting techniques, provided that training fires are not allowed to smolder after the training session has terminated. Prior to igniting any structure, the fire protection service shall ensure that the structure does not contain any asbestos or asbestos containing materials; batteries; stored chemicals such as pesticides, herbicides, fertilizers, paints, glues, sealers, tars, solvents, household cleaners, or photographic reagents; stored linoleum, plastics, rubber, tires, or insulated wire; or hazardous wastes. Before requesting permission from the Regional Administrator, the fire protection service must notify any appropriate Tribal air pollution authority and obtain any permissions or approvals required by the Tribe;

(6) With permission from the Regional Administrator, one open outdoor fire each year to dispose of fireworks and associated packaging materials. Before requesting permission from the Regional Administrator, the owner or operator must notify any appropriate Tribal air pollution authority and obtain any permissions or approvals required by the Tribe;

(7) Open burning for the disposal of diseased animals or infested material by order of a public health official.

(d) *What are the requirements for open burning?*

(1) A person must not open burn, or allow the open burning of, the following materials:

(i) Garbage;
(ii) Dead animals or parts of dead animals;
(iii) Junked motor vehicles or any materials resulting from a salvage operation;
(iv) Tires or rubber materials or products;
(v) Plastics;
(vi) Asphalt or composition roofing, or any other asphaltic material or product;
(vii) Tar, tarpaper, petroleum products, or paints;
(viii) Paper or cardboard other than what is necessary to start a fire;
(ix) Lumber or timbers treated with preservatives;
(x) Construction debris or demolition waste;
(xi) Pesticides, herbicides, fertilizers, or other chemicals;
(xii) Insulated wire;
(xiii) Batteries;
(xiv) Light bulbs;
(xv) Materials containing mercury (thermometers for example);
(xvi) Asbestos or materials containing asbestos;
(xvii) Pathogenic wastes;
(xviii) Hazardous wastes; or
(xix) Any material other than natural vegetation that normally emits dense smoke or noxious fumes when burned.

(2) Except for exempted fires set for cultural or traditional purposes, all open burning is prohibited whenever the Regional Administrator declares a burn ban due to deteriorating air quality. A burn ban may be declared whenever the Regional Administrator determines that air quality levels have exceeded, or are expected to exceed, 75% of any national ambient air quality standard and will continue to exceed that level for at least the next 24 hours.

(3) Except for exempted fires set for cultural or traditional purposes, all open burning is prohibited whenever the National Weather Service issues an air stagnation advisory, or the Regional Administrator declares an air pollution alert, air pollution warning, or air pollution emergency pursuant to § 49.137 Air pollution episodes.

(4) Nothing in this rule, § 49.131, exempts or excuses any person from

VOL 67 ISS 51 MR 15 2002 UMI

complying with applicable laws and ordinances of other governmental jurisdictions responsible for fire control.

(e) *Are there additional requirements that must be met?*

(1) A person subject to this rule, § 49.131, must conduct open burning as follows:

(i) Prohibited materials must not be open burned;

(ii) All materials to be open burned must be kept as dry as possible through the use of a cover or dry storage;

(iii) Before igniting a burn, noncombustibles must be separated from the materials to be open burned to the greatest extent practicable;

(iv) Natural or artificially induced draft must be present;

(v) To the greatest extent practicable, materials to be open burned must be separated from the grass or peat layer; and

(vi) A fire must not be allowed to smolder.

(2) A person must not initiate any open burning subject to this rule when:

(i) The Regional Administrator has declared a burn ban;

(ii) An air stagnation advisory has been issued by the National Weather Service; or

(iii) An air pollution alert, warning, or emergency has been declared by the Regional Administrator.

(3) Any person conducting open burning subject to this rule, § 49.131, when such an advisory is issued or declaration is made must either immediately extinguish the fire, or immediately withhold additional material such that the fire burns down.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.131, are defined in § 49.123 General provisions: Air pollutant, ambient air, burn barrel, combustible household wastes, emission, open burning, particulate matter, PM10, Regional Administrator, stack, and uncombined water.

§ 49.132 Rule for general open burning permits.

(a) *What is the purpose of this rule?* This rule, § 49.132, establishes a permitting program for open burning within the Indian reservation in order to control emissions of particulate matter and other noxious fumes to the atmosphere and ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.132, applies to any person who conducts open burning.

(c) *What is exempted from this rule?* The following open fires are exempted from this rule, § 49.132:

(1) Outdoor fires set for cultural or traditional purposes;

(2) Fires set for cultural or traditional purposes within structures such as sweat houses or lodges;

(3) Fires set for recreational purposes, provided that no prohibited materials are burned;

(4) Forestry or silvicultural burning;

(5) Agricultural burning; and

(6) Burn barrels located at single family residences or residential buildings with four or fewer dwelling units that are only used to dispose of combustible household wastes generated onsite.

(d) *What are the requirements for open burning?*

(1) A person must apply for and obtain a permit for the open burn, have the permit available on site during the open burn, and conduct the open burning in accordance with the terms and conditions of the permit.

(2) A person must comply with the § 49.131 General rule for open burning or the EPA-approved Tribal open burning rule, as applicable.

(3) Nothing in this rule, § 49.132, exempts or excuses any person from complying with applicable laws and ordinances of other governmental jurisdictions responsible for fire control.

(e) *Are there additional requirements that must be met?*

(1) A person subject to this rule, § 49.132, must submit an application to the Regional Administrator for each open burn. An application must be submitted in writing at least one working day, and no earlier than 5 working days, prior to the requested date that the burn would be conducted, and must contain, at a minimum, the following information:

(i) Street address of the property upon that the proposed open burning will occur. If there is no street address of the property, the legal description of the property.

(ii) Name, mailing address, and telephone number of the person who will be responsible for conducting the proposed open burning.

(iii) A plot plan showing the location of the proposed open burning in relation to the property lines and indicating the distances and directions of the nearest residential and commercial properties.

(iv) The type and quantity of materials proposed to be burned, including the estimated volume of material to be burned and the area over that burning will be conducted.

(v) A description of the measures that will be taken to prevent escaped burns, including but not limited to the availability of water.

(vi) The requested date (or dates if the duration of the burn is more than one day) that the proposed open burning would be conducted.

(vii) Any other information specifically requested by the Regional Administrator.

(2) If the proposed open burning is consistent with this rule (§ 49.132) and § 49.131 General rule for open burning (or the EPA-approved Tribal open burning rule), the Regional Administrator may issue a burn permit. The permit will authorize burning only for the requested date(s) and will include any conditions that the Regional Administrator determines are necessary to ensure compliance with this rule (§ 49.132), § 49.131 General rule for open burning (or the EPA-approved Tribal open burning rule), and to protect the public health and welfare.

(3) When reviewing an application, the Regional Administrator shall take into consideration the size, duration, and location of the proposed open burn, the current and projected air quality conditions, the forecasted meteorological conditions, and other scheduled burning activities in the surrounding area. Where the Regional Administrator determines that the proposed open burning can be conducted without causing an adverse impact on air quality, a permit may be issued.

(4) The Regional Administrator, to the extent practical, will coordinate the issuance of open burning permits with the opening burning permit programs of surrounding jurisdictions.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.132, are defined in § 49.123 General provisions: Agricultural burning, air pollutant, ambient air, burn barrel, combustible household wastes, emission, forestry or silvicultural burning, open burning, particulate matter, PM10, Regional Administrator, stack, and uncombined water.

§ 49.133 Rule for agricultural burning permits.

(a) *What is the purpose of this rule?* This rule, § 49.133, establishes a permitting program for agricultural burning within the Indian reservation in order to control emissions of particulate matter and other noxious fumes to the atmosphere and ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.133, applies to any person who conducts agricultural burning.

(c) *What are the requirements for agricultural burning?*

(1) A person must apply for and obtain a permit for the agricultural burn, have the permit available onsite during the agricultural burn, and conduct the agricultural burning in accordance with the terms and conditions of the permit.

(2) A person must comply with § 49.131 General rule for open burning or the EPA-approved Tribal open burning rule, as applicable.

(3) Nothing in this rule, § 49.133, exempts or excuses any person from complying with applicable laws and ordinances of other governmental jurisdictions responsible for fire control.

(d) *Are there additional requirements that must be met?*

(1) A person subject to this rule, § 49.133, must submit an application to the Regional Administrator for each proposed agricultural burn. An application must contain, at a minimum, the following information:

(i) Street address of the property upon which the proposed agricultural burning will occur. If there is no street address of the property, the legal description of the property.

(ii) Name, mailing address, and telephone number of the person who will be responsible for conducting the proposed agricultural burning.

(iii) A plot plan showing the location of the proposed agricultural burning in relation to the property lines and indicating the distances and directions of the nearest residential and commercial properties.

(iv) The type and quantity of agricultural wastes proposed to be burned, including the estimated weight of material to be burned and the area over which burning will be conducted.

(v) A description of the burning method(s) to be used (pile or stack burn, open field or broadcast burn, windrow burn, mobile field sanitizer, etc.) and the amount of material to be burned with each method.

(vi) A description of the measures that will be taken to prevent escaped burns, including but not limited to the availability of water and plowed firebreaks.

(vii) The requested date(s) that the proposed agricultural burning would be conducted.

(viii) Any other information specifically requested by the Regional Administrator.

(2) If the proposed agricultural burning is consistent with this rule, § 49.133, and § 49.131 General rule for open burning (or the EPA-approved Tribal open burning rule), the Regional Administrator may issue a preliminary burn permit.

(3) On the morning of the day that the agricultural burning is to be conducted (or on Friday morning if the burn is to be conducted on a weekend, or on the morning of the last workday before a holiday), the person responsible for the burning must contact the Regional Administrator to receive final approval for the burn. Final approval can be obtained either verbally or in writing and will authorize burning to be conducted in accordance with the preliminary burn permit.

(4) When reviewing an application, the Regional Administrator shall take into consideration the size, duration, and location of the proposed burn, the current and projected air quality conditions, the forecasted meteorological conditions, and other scheduled burning activities in the surrounding area. Where the Regional Administrator determines that the proposed agricultural burning can be conducted without causing an adverse impact on air quality, final approval may be granted.

(5) The Regional Administrator, to the extent practical, will consult with and coordinate final approvals with the open burning permit programs of surrounding jurisdictions.

(e) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.133, are defined in § 49.123 General provisions: Agricultural burning or agricultural burn, air pollutant, ambient air, emission, open burning, particulate matter, PM10, Regional Administrator, stack, and uncombined water.

§ 49.134 Rule for forestry burning permits.

(a) *What is the purpose of this rule?* This rule, § 49.134, establishes a permitting program for forestry burning within the Indian reservation in order to control emissions of particulate matter and other noxious fumes to the atmosphere and ground-level concentrations of PM10.

(b) *Who is affected by this rule?* This rule, § 49.134, applies to any person who conducts forestry burning.

(c) *What are the requirements for forestry burning?*

(1) A person must apply for and obtain a permit for the forestry burn, have the permit available onsite during the forestry burn, and conduct the forestry burning in accordance with the terms and conditions of the permit.

(2) A person must comply with § 49.131 General rule for open burning or the EPA-approved Tribal open burning rule, as applicable.

(3) Nothing in this rule, § 49.134, exempts or excuses any person from complying with applicable laws and ordinances of other governmental jurisdictions responsible for fire control.

(d) *Are there additional requirements that must be met?*

(1) A person subject to this rule must submit an application to the Regional Administrator for each forestry burn. An application must contain, at a minimum, the following information:

(i) Street address of the property upon which the proposed forestry burning will occur. If there is no street address of the property, the legal description of the property.

(ii) Name, mailing address, and telephone number of the person who will be responsible for conducting the proposed forestry burning.

(iii) A plot plan showing the location of the proposed forestry burning in relation to the property lines and indicating the distances and directions of the nearest residential and commercial properties.

(iv) The type and quantity of forestry residues proposed to be burned, including the estimated weight of material to be burned and the area over which burning will be conducted.

(v) A description of the burning method(s) to be used (pile burn, broadcast burn, windrow burn, understory burn, etc.) and the amount of material to be burned with each method.

(vi) A description of the measures that will be taken to prevent escaped burns, including but not limited to the availability of water and firebreaks.

(vii) The requested date(s) that the proposed forestry burning would be conducted.

(viii) Any other information specifically requested by the Regional Administrator.

(2) If the proposed forestry burning is consistent with this rule, § 49.134, and § 49.131 General rule for open burning (or the EPA-approved Tribal open burning rule), the Regional Administrator may issue a preliminary burn permit.

(3) On the morning of the day that the forestry burning is to be conducted (or on Friday morning if the burn is to be conducted on a weekend, or on the morning of the last workday before a holiday), the person responsible for the burning must contact the Regional Administrator to receive final approval for the burn. Final approval can be obtained either verbally or in writing and will authorize burning to be conducted in accordance with the preliminary burn permit.

(4) When reviewing an application, the Regional Administrator shall take into consideration the size, duration, and location of the proposed burn, the current and projected air quality conditions, the forecasted meteorological conditions, and other scheduled burning activities in the surrounding area. Where the Regional Administrator determines that the proposed forestry burning can be

VOL
67
ISS
51
MR
15
2002
UMI

conducted without causing an adverse impact on air quality, final approval may be granted.

(5) The Regional Administrator, to the extent practical, will consult with and coordinate final approvals with the opening burning permit programs of surrounding jurisdictions.

(e) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.134, are defined in § 49.123 General provisions: Air pollutant, ambient air, emission, forestry or silvicultural burning, open burning, particulate matter, PM10, Regional Administrator, stack, and uncombined water.

§ 49.135 Rule for emissions detrimental to human health and welfare.

(a) *What is the purpose of this rule?* This rule, § 49.135, is intended to prevent the emission of air pollutants from any air pollution source operating within the Indian reservation from being detrimental to human health and welfare.

(b) *Who is affected by this rule?* This rule, § 49.135, applies to any person who owns or operates an air pollution source.

(c) *What are the requirements for air pollution sources?*

(1) A person must not cause or allow the emission of any air pollutants from an air pollution source, in sufficient quantities and of such characteristic and duration, that the Regional Administrator determines:

(i) Causes or contributes to a violation of any national ambient air quality standard; or

(ii) Is, or would likely be, injurious to human health and welfare.

(2) If the Regional Administrator makes either of the above determinations, then the Regional Administrator may require the owner or operator of the source to install air pollution controls or to take reasonable precautions to reduce or prevent the emissions. If the Regional Administrator determines that the installation of air pollution controls or reasonable precautions are necessary, then the Regional Administrator will require the owner or operator to obtain a permit to construct or permit to operate for the source. The specific requirements will be established in the required permit to construct or permit to operate.

(3) Nothing in this rule, § 49.135, affects the ability of the Regional Administrator to issue an order pursuant to section 303 of the Act to require the owner or operator to immediately reduce or cease the emission of air pollutants.

(4) Nothing in this rule, § 49.135, shall be construed to impair any cause of action or legal remedy of any person, or the public, for injury or damages arising from the emission of any air pollutant in such place, manner, or amount as to constitute a common law nuisance.

(d) *What does someone subject to this rule need to do?* A person subject to this rule, § 49.135, must comply with the terms and conditions of any permit to construct, permit to operate, or order issued by the Regional Administrator.

(e) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.135, are defined in § 49.123 General provisions: Air pollutant, air pollution source, ambient air, emission, owner or operator, permit to construct, permit to operate, Regional Administrator, and stationary source.

Tribal Alternative Rule

§ 49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.

(a) *What is the purpose of this rule?* This rule, § 49.136, is intended to prevent the emission of air pollutants from any air pollution source operating within the Indian reservation from being detrimental to persons, property, or cultural or traditional resources.

(b) *Who is affected by this rule?* This rule, § 49.136, applies to any person who owns or operates an air pollution source.

(c) *What are the requirements for air pollution sources?*

(1) A person must not cause or allow the emission of any air pollutants from an air pollution source, in sufficient quantities and of such characteristic and duration, that the Regional Administrator determines:

(i) Causes or contributes to a violation of any national ambient air quality standard;

(ii) Is, or would likely be, injurious to human health and welfare, animal or plant life, or property;

(iii) Unreasonably interferes with the enjoyment of life or property; or

(iv) Is, or would likely be, damaging to unique Tribal cultural or traditional resources.

(2) If the Regional Administrator makes any of the above determinations, then the Regional Administrator may require the owner or operator of the source to install air pollution controls or to take reasonable precautions to reduce or prevent the emissions. If the Regional Administrator determines that the installation of air pollution controls or reasonable precautions are necessary, then the Regional Administrator will require the owner or operator to obtain a permit to construct or permit to operate for the source. The specific requirements will be established in the required permit to construct or permit to operate.

(3) Nothing in this rule, § 49.136, affects the ability of the Regional Administrator to issue an order pursuant to section 303 of the Act to require the owner or operator to immediately reduce or cease the emission of air pollutants.

(4) Nothing in this rule, § 49.136, shall be construed to impair any cause of action or legal remedy of any person, or the public, for injury or damages arising from the emission of any air pollutant in such place, manner, or amount as to constitute a common law nuisance.

(d) *What does someone subject to this rule need to do?* A person subject to this rule, § 49.136, must comply with the terms and conditions of any permit to construct, permit to operate, or order issued by the Regional Administrator.

(e) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.136, are defined in § 49.123 General provisions: Air pollutant, air pollution source, ambient air, emission, owner or operator, permit to construct, permit to operate, Regional Administrator, and stationary source.

§ 49.137 Rule for air pollution episodes.

(a) *What is the purpose of this rule?* This rule, § 49.137, establishes procedures for addressing the excessive buildup of certain air pollutants during periods of stagnant air. This rule is intended to prevent the occurrence of an air pollution emergency within the Indian reservation due to the effects of these air pollutants on human health.

(b) *Who is affected by this rule?* This rule, § 49.137, applies to the Regional Administrator and any person who owns or operates an air pollution source within the Indian reservation.

(c) *What are the requirements of this rule?*

(1) *Air pollution action level triggers.* Conditions justifying the declaration of an air pollution alert, air pollution warning, or air pollution emergency shall exist whenever the Regional Administrator determines that the accumulation of air pollutants in any place is attaining, or has attained, levels that could lead to a threat to human health. The following criteria will be used for making these determinations:

(i) *Air stagnation advisory.* An air stagnation advisory shall be declared whenever the National Weather Service issues an atmospheric stagnation advisory.

(ii) *Air pollution alert.* An air pollution alert shall be declared when any one of the following levels is reached, or is projected to be reached, at any monitoring site and the meteorological conditions are such that the level is expected to continue or reoccur over the next 24 hours.

(A) Particulate matter (PM10)—350 micrograms per cubic meter, 24-hour average;

(B) Carbon monoxide (CO)—17 milligrams per cubic meter (15 ppm), 8-hour average;

(C) Sulfur dioxide (SO_2)—800 micrograms per cubic meter (0.3 ppm), 24-hour average;

(D) Ozone (O_3)—400 micrograms per cubic meter (0.2 ppm), 1-hour average;

(E) Nitrogen dioxide (NO_2)—1,130 micrograms per cubic meter (0.6 ppm), 1-hour average; and 282 micrograms per cubic meter (0.15 ppm), 24-hour average.

(iii) *Air pollution warning.* An air pollution warning shall be declared when any one of the following levels is reached, or is projected to be reached, at any monitoring site and the meteorological conditions are such that the level is expected to continue or reoccur over the next 24 hours.

(A) Particulate matter (PM10)—420 micrograms per cubic meter, 24-hour average;

(B) Carbon monoxide (CO)—34 milligrams per cubic meter (30 ppm), 8-hour average;

(C) Sulfur dioxide (SO_2)—1,600 micrograms per cubic meter (0.6 ppm), 24-hour average;

(D) Ozone (O_3)—800 micrograms per cubic meter (0.4 ppm), 1-hour average;

(E) Nitrogen dioxide (NO_2)—2,260 micrograms per cubic meter (1.2 ppm), 1-hour average; and 565 micrograms per cubic meter (0.3 ppm), 24-hour average.

(iv) *Air pollution emergency.* An air pollution emergency shall be declared when any one of the following levels is reached, or is projected to be reached, at any monitoring site and the meteorological conditions are such that the level is expected to continue or reoccur over the next 24 hours.

(A) Particulate matter (PM10)—500 micrograms per cubic meter, 24-hour average;

(B) Carbon monoxide (CO)—46 milligrams per cubic meter (40 ppm), 8-hour average;

(C) Sulfur dioxide (SO_2)—2,100 micrograms per cubic meter (0.8 ppm), 24-hour average;

(D) Ozone (O_3)—1,000 micrograms per cubic meter (0.5 ppm), 1-hour average;

(E) Nitrogen dioxide (NO_2)—3,000 micrograms per cubic meter (1.6 ppm), 1-hour average; and 750 micrograms per cubic meter (0.4 ppm), 24-hour average.

(v) *Termination.* Once declared, an air pollution alert, warning, or emergency shall remain in effect until the criteria for that level is no longer met. At such time, the Regional Administrator will make a new determination and shall make an appropriate declaration of the new level.

(2) *Announcements by the Regional Administrator.* The Regional Administrator shall request that announcement of an air stagnation advisory, air pollution alert, air pollution warning, or air pollution emergency be broadcast on local television and radio stations in the affected area and posted on their websites. Announcements will also be posted on the EPA Region 10 website and, where possible, on the websites of Tribes within the affected area. These announcements will indicate that air pollution levels exist that could potentially be harmful to human health and indicate actions that people can take to reduce exposure. The announcements will also request voluntary actions to reduce emissions from sources of air pollutants as well as indicate that a ban on open burning is in effect.

(3) *Voluntary curtailment of emissions by sources.* Whenever the Regional Administrator declares an air stagnation advisory or air pollution alert sources of air pollutants shall be requested to take voluntary actions to reduce emissions. People should refrain from using their wood-stoves and fireplaces unless they are their sole source of heat. People should reduce their use of motor vehicles to the extent possible. Industrial sources should curtail operations or switch to a cleaner fuel if possible.

(4) *Mandatory curtailment of emissions by order of the Regional Administrator.*

(i) Open burning must cease in accordance with the requirements of § 49.131 General rule for open burning.

(ii) During an air pollution warning or air pollution emergency, the Regional Administrator may issue an order to any air pollution source requiring such source to curtail or eliminate the emissions.

(d) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.137, are defined in § 49.123 General provisions: Air pollutant, air pollution source, ambient air, emission, fuel, motor vehicle, open burning, and Regional Administrator.

§ 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(a) *What is the purpose of this rule?* This rule, § 49.138, allows the Regional Administrator to develop and maintain a current and accurate record of air pollution sources and their emissions within the Indian reservation.

(b) *Who is affected by this rule?* This rule, § 49.138, applies to any person who owns or operates an air pollution source except those exempted below.

(c) *What is exempted from this rule?* This rule, § 49.138, does not apply to the following air pollution sources:

(1) Mobile sources;

(2) Single family residences, and residential buildings with four or fewer dwelling units;

(3) Air conditioning units used for human comfort that are not subject to applicable requirements under Title VI of the Act and do not exhaust air pollutants into the atmosphere from any manufacturing or industrial process;

(4) Ventilating units used for human comfort that do not exhaust air pollutants into the atmosphere from any manufacturing or industrial process;

(5) Furnaces and boilers used exclusively for space heating with a rated heat input capacity of less than 400,000 British thermal units (Btu) per hour;

(6) Cooking of food, except for retail and wholesale businesses that both cook and sell cooked food (restaurants, for example);

(7) Consumer use of office equipment and products;

(8) Janitorial services and consumer use of janitorial products;

(9) Maintenance and repair activities, except for air pollution sources engaged in the business of maintaining and repairing equipment, such as automobile repair shops or appliance repair shops;

(10) Agricultural activities and forestry activities, including agricultural burning and forestry burning; and

(11) Open burning.

(d) *What are the requirements of this rule?* Any person who owns or operates an air pollution source subject to this rule must register the source with the Regional Administrator as specified below.

(e) *Are there additional requirements that must be met?* A person subject to this rule, § 49.138, must register an air pollution source as follows:

(1) *Initial registration.* The owner or operator of an air pollution source that exists on the effective date of this rule must register the air pollution source with the Regional Administrator by no later than one year after the effective date of this rule. The owner or operator of a new air pollution source must register with the Regional Administrator within 90 days after beginning operation. Submitting an initial registration does not relieve the owner

VOL
67
ISS
51
MR
15
2002
UMI

or operator from the requirement to obtain a permit to construct if the new air pollution source is subject to those rules.

(2) *Annual re-registration.* After initial registration, the owner or operator of an air pollution source must re-register with the Regional Administrator by February 15 of each year. The re-registration must include all of the information required in the initial registration and must be updated to reflect any changes since the previous registration. For information that has not changed since the previous registration, the owner or operator may reaffirm in writing the correctness and current status of the information previously furnished to the Regional Administrator.

(3) *Information to include in initial registration and annual re-registration (all that are applicable).*

(i) Name of the air pollution source and the nature of the business.

(ii) Street address, telephone number, and facsimile number of the air pollution source.

(iii) Name, mailing address, and telephone number of the owner or operator.

(iv) Name, mailing address, telephone number, and facsimile number of the local individual responsible for compliance with this rule.

(v) Name and mailing address of the individual authorized to receive requests for data and information.

(vi) A description of the production processes and a related flow chart.

(vii) Identification of emission units and air pollutant generating activities.

(viii) A plot plan showing the location and height of all emission units and air pollutant generating activities. The plot plan must also show the property lines of the air pollution source and indicate the distance and direction of the nearest residential or commercial property.

(ix) Type and quantity of fuels, including the sulfur content of fuels, used on a daily and annual basis.

(x) Type and quantity of raw materials used on a daily and annual basis.

(xi) Estimates of the total actual emissions for the air pollution source of the following air pollutants: particulate matter emissions, PM10 emissions, sulfur dioxide (SO_2), nitrogen oxides (NO_X), carbon monoxide (CO), volatile organic compounds (VOC), lead (Pb), fluorides, sulfuric acid mist, hydrogen sulfide (H_2S), total reduced sulfur (TRS), and reduced sulfur compounds. Include all of the calculations for the estimates.

(xii) Estimated efficiency of air pollution control equipment under present or anticipated operating conditions.

(xiii) Any other information specifically requested by the Regional Administrator.

(4) *Procedure for estimating emissions.* The initial registration and annual re-registration must include an estimate of actual emissions taking into account equipment, operating conditions, and air pollution control measures. The emission estimates must be based upon actual test data, or in the absence of such data, upon procedures acceptable to the Regional Administrator. Any emission estimates submitted to the Regional Administrator must be verifiable using currently accepted engineering criteria. The following procedures are generally acceptable for estimating emissions from air pollution sources:

(i) Source-specific emission tests;

(ii) Mass balance calculations;

(iii) Published, verifiable emission factors that are applicable to the source;

(iv) Other engineering calculations; or

(v) Other procedures to estimate emissions specifically approved by the Regional Administrator.

(5) *Report of relocation.* The owner or operator of an air pollution source must report any relocation of the source to the Regional Administrator no later than 30 days prior to the relocation of the source. Submitting a report of relocation does not relieve the owner or operator from the requirement to obtain a permit to construct if the relocation of the air pollution source would be a new source or modification subject to any Federal or Tribal permit to construct rule.

(6) *Report of change of ownership.* The owner or operator of an air pollution source must report any change of ownership to the Regional Administrator within 90 days after the change in ownership is effective.

(7) *Report of closure.* The owner or operator of an air pollution source must submit a report of closure to the Regional Administrator within 90 days after the cessation of operations.

(8) *Certification of truth and accuracy.* All registrations and reports must include a certification by the owner or operator as to the truth, accuracy, and completeness of the information. This certification must state that, based on information and belief formed after reasonable inquiry, the statements and information are true, accurate, and complete.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.138, are defined in § 49.123 General provisions: Act, actual emissions, agricultural activities, air pollutant, air pollution source, ambient air, British thermal unit (Btu), emission, emission factor, emission unit, fuel, marine vessel, mobile source, motor vehicle, new air pollution source, non-road engine, non-road vehicle, open burning, owner or operator, particulate matter, permit to construct, PM10, rated capacity, Regional Administrator, stack, stationary source, and uncombined water.

§ 49.139 Rule for non-Title V operating permits.

(a) *What is the purpose of this rule?* This rule, § 49.139, establishes a permitting program to provide for the establishment of Federally-enforceable requirements for air pollution sources within the Indian reservation.

(b) *Who is affected by this rule?*

(1) This rule, § 49.139, applies to:

(i) The owner or operator of any air pollution source who wishes to obtain a Federally-enforceable limitation on the source's actual emissions or potential to emit;

(ii) Any air pollution source for which the Regional Administrator determines that additional Federally-enforceable requirements are necessary to ensure compliance with the implementation plan; or

(iii) Any air pollution source for which the Regional Administrator determines that additional Federally-enforceable requirements are necessary to ensure the attainment and maintenance of any national ambient air quality standard or prevention of significant deterioration increment.

(2) To the extent allowed by 40 CFR Part 71, or a Tribal operating permit program approved pursuant to 40 CFR Part 70, a Title V operating permit may be used in lieu of an operating permit under this section to establish the limitations or requirements in paragraph (b)(1).

(c) *What are the procedures for obtaining an owner-requested operating permit?*

(1) The owner or operator of an air pollution source who wishes to obtain a Federally-enforceable limitation on the source's actual emissions or potential to emit shall submit an application to the Regional Administrator requesting such limitation. The application must contain the information specified in paragraph (d) of this section.

(2) Within 60 days after receipt of an application, the Regional Administrator shall determine if it contains the information specified in paragraph (d) of this section and if so, shall deem it complete for the purpose of preparing a draft permit to operate. If the Regional Administrator determines that the application is incomplete, it shall be returned to the owner or operator along with a description of the necessary information that must be submitted in order for the application to be deemed complete.

(3) The Regional Administrator shall prepare a draft permit to operate and a draft technical support document that describes the proposed limitations and their effect on the actual emissions and/or potential to emit of the air pollution source.

(4) The Regional Administrator shall provide a copy of the draft permit to operate and draft technical support document to the owner or operator of the ~~air~~ pollution source and shall provide an opportunity for the owner or operator to meet with EPA and discuss the proposed limitations.

(5) The Regional Administrator shall provide an opportunity for public comment on the draft permit to operate as follows:

(i) A copy of the draft permit to operate, the draft technical support document, the permit application, and all other supporting materials will be made available for public inspection in at least one location in the area affected by the air pollution source.

(ii) A notice shall be made by prominent advertisement in a newspaper of general circulation in the area affected by the air pollution source of the availability of the draft permit to operate and supporting materials and of the opportunity to comment. Where possible, notices shall also be made in the Tribal newspaper.

(iii) Copies of the notice shall be provided to the owner or operator of the air pollution source, the Tribal governing body, and the State, local, and Tribal air pollution authorities having jurisdiction in areas outside of the Indian reservation potentially impacted by the air pollution source.

(iv) A 30-day period for submittal of public comments shall be provided starting upon the date of publication of the notice. If requested, the Regional Administrator may extend the public comment period for up to an additional 30 days.

(6) After the close of the public comment period, the Regional Administrator shall review all comments received and prepare a final permit to operate and final technical support document. The final technical support document will include the responses to all comments received during the public comment period.

(7) The final permit to operate and final technical support document shall be sent to the owner or operator of the air pollution source and will be made available at all of the locations where the draft permit was made available. In addition, the final permit to operate and final technical support document shall be sent to all persons who provided comments on the draft permit to operate.

(8) The final permit to operate shall be a final agency action for purposes of administrative appeal and judicial review.

(d) *What must the owner or operator of an air pollution source include in an application for a Federally-enforceable limitation?*

(1) The owner or operator of an air pollution source that wishes to obtain a Federally-enforceable limitation must submit to the Regional Administrator an application for a permit to operate that includes the following information:

(i) Name of the air pollution source and the nature of the business.

(ii) Street address, telephone number, and facsimile number of the air pollution source.

(iii) Name, mailing address, and telephone number of the owner or operator.

(iv) Name, mailing address, telephone number, and facsimile number of the local individual responsible for compliance with this rule.

(v) Name and mailing address of the individual authorized to receive requests for data and information.

(vi) For each air pollutant and for all emission units and air pollutant generating activities to be covered by a limitation:

(A) The proposed limitation and a description of its effect on actual emissions or the potential to emit. Proposed limitations may include, but are not limited to, emission limitations, production limits, operational restrictions, fuel or raw material specifications, and/or requirements for installation and operation of emission controls. Proposed limitations must have a reasonably short averaging period, taking into consideration the operation of the air pollution source and the methods to be used for demonstrating compliance.

(B) Proposed testing, monitoring, recordkeeping, and reporting requirements to be used to demonstrate and assure compliance with the proposed limitation.

(C) A description of the production processes and a related flow chart.

(D) Identification of emission units and air pollutant generating activities.

(E) Type and quantity of fuels and/or raw materials used.

(F) Estimated efficiency of air pollution control equipment under present or anticipated operating conditions.

(G) Estimates of the current actual emissions and current potential to emit. Include all of the calculations for the estimates.

(H) Estimates of the allowable emissions and/or potential to emit that would result from compliance with the proposed limitation. Include all of the calculations for the estimates.

(vii) Any other information specifically requested by the Regional Administrator.

(2) Estimates of actual emissions must be based upon actual test data, or in the absence of such data, upon procedures acceptable to the Regional Administrator. Any emission estimates submitted to the Regional Administrator must be verifiable using currently accepted engineering criteria. The following procedures are generally acceptable for estimating emissions from air pollution sources:

(i) Source-specific emission tests;

(ii) Mass balance calculations;

(iii) Published, verifiable emission factors that are applicable to the source;

(iv) Other engineering calculations; or

(v) Other procedures to estimate emissions specifically approved by the Regional Administrator.

(3) All applications for a permit to operate must include a certification by the owner or operator as to the truth, accuracy, and completeness of the information. This certification must state that, based on information and belief formed after reasonable inquiry, the statements and information are true, accurate, and complete.

(e) *What are the procedures that the Regional Administrator will follow to require an operating permit?*

(1) Whenever the Regional Administrator determines that additional Federally-enforceable requirements are necessary to ensure compliance with the implementation plan or to ensure the attainment and maintenance of any national ambient air quality standard or prevention of significant deterioration increment, the owner or operator of the air pollution source shall be so notified in writing.

(2) The Regional Administrator may require that the owner or operator provide whatever information that the Regional Administrator determines is necessary to establish such requirements in a permit to operate under this rule, § 49.139.

(3) The Regional Administrator shall prepare a draft permit to operate and a draft technical support document that describes the reasons and need for the proposed requirements.

(4) The Regional Administrator shall provide a copy of the draft permit to operate and draft technical support document to the owner or operator of the air pollution source and shall

provide an opportunity for the owner or operator to meet with EPA and discuss the proposed requirements.

(5) The Regional Administrator shall provide an opportunity for public comment on the draft permit to operate as follows:

(i) A copy of the draft permit to operate, the draft technical support document, and all other supporting materials will be made available for public inspection in at least one location in the area affected by the air pollution source.

(ii) A notice shall be made by prominent advertisement in a newspaper of general circulation in the area affected by the air pollution source of the availability of the draft permit to operate and supporting materials and of the opportunity to comment. Where possible, notices shall also be made in the Tribal newspaper.

(iii) Copies of the notice shall be provided to the owner or operator of the air pollution source, the Tribal governing body, and the State, local, and Tribal air pollution authorities having jurisdiction in areas outside of the Indian reservation potentially impacted by the air pollution source.

(iv) A 30-day period for submittal of public comments shall be provided starting upon the date of publication of the notice. If requested, the Regional Administrator may extend the public comment period for up to an additional 30 days.

(6) After the close of the public comment period, the Regional Administrator shall review all comments received and prepare a final permit to operate and final technical support document, unless the Regional Administrator determines that additional requirements are not necessary to ensure compliance with the implementation plan or to ensure the attainment and maintenance of any national ambient air quality standard or prevention of significant deterioration increment. The final technical support document will include the responses to all comments received during the public comment period.

(7) The final permit to operate and final technical support document shall be sent to the owner or operator of the air pollution source and will be made available at all of the locations where the draft permit was made available. In addition, the final permit to operate and final technical support document shall be sent to all persons who provided comments on the draft permit to operate.

(8) The final permit to operate shall be a final agency action for purposes of administrative appeal and judicial review.

(f) *Definitions of terms used in this rule.* The following terms, that are used in this rule, § 49.139, are defined in § 49.123 General provisions: Act, actual emissions, air pollutant, air pollution source, allowable emissions, ambient air, emission, emission factor, Federally enforceable, implementation plan, owner or operator, potential to emit, and Regional Administrator.

§§ 49.140–49.200 [Reserved]

3. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.9861 through 49.9870 to read as follows:

Subpart M—Implementation Plans for Tribes—Region X

Implementation Plan for the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon

§ 49.9861 Identification of plan.

This section and §§ 49.9862 through 49.9890 contain the implementation plan for the Burns Paiute Tribe of the Burns Paiute Indian Colony. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Burns Paiute Indian Colony.

§ 49.9862 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Burns Paiute Indian Colony.

§ 49.9863 Legal authority. [Reserved]

§ 49.9864 Source surveillance. [Reserved]

§ 49.9865 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Burns Paiute Indian Colony is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.9866 Contents of implementation plan.

The implementation plan for the Reservation of the Burns Paiute Indian Colony consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9871–49.9890 [Reserved]

4. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.9891 through 49.9900 to read as follows:

Implementation Plan for the Confederated Tribes of the Chehalis Reservation, Washington

§ 49.9891 Identification of plan.

This section and §§ 49.9892 through 49.9920 contain the implementation plan for the Confederated Tribes of the Chehalis Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Chehalis Reservation.

§ 49.9892 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Chehalis Reservation.

§ 49.9893 Legal authority. [Reserved]

§ 49.9894 Source surveillance. [Reserved]

§ 49.9895 Classification of regions for episode plans.

The air quality control region which encompasses the Chehalis Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.9896 Contents of implementation plan.

The implementation plan for the Chehalis Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.9897 EPA-approved Tribal rules and plans. [Reserved]

§ 49.9898 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.9899 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.9900 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Chehalis Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9901–49.9920 [Reserved]

5. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.9921 through 49.9930 to read as follows:

Implementation Plan for the Coeur D'Alene Tribe of the Coeur D'Alene Reservation, Idaho

§ 49.9921 Identification of plan.

This section and §§ 49.9922 through 49.9950 contain the implementation plan for the Coeur D'Alene Tribe of the Coeur D'Alene Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Coeur D'Alene Reservation.

§ 49.9922 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Coeur D'Alene Reservation.

§ 49.9923 Legal authority. [Reserved]

§ 49.9924 Source surveillance. [Reserved]

§ 49.9925 Classification of regions for episode plans.

The air quality control region which encompasses the Coeur D'Alene Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	I
Sulfur oxides	II

§ 49.9926 Contents of implementation plan.

The implementation plan for the Coeur D'Alene Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.9927 EPA-approved Tribal rules and plans. [Reserved]

§ 49.9928 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.9929 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.9930 Federally-promulgated regulations and Federal implementation plans.

(a) The following regulations are incorporated and made part of the implementation plan for the Coeur D'Alene Reservation:

VOL 67 ISS 51 MR 15 2002 UMI

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9931–49.9950 [Reserved]

6. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.9951 through 49.9960 to read as follows:

Implementation Plan for the Confederated Tribes of the Colville Reservation, Washington

§ 49.9951 Identification of plan.

This section and §§ 49.9952 through 49.9980 contain the implementation plan for the Confederated Tribes of the Colville Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Colville Reservation.

§ 49.9952 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Colville Reservation.

§ 49.9953 Legal authority. [Reserved]

§ 49.9954 Source surveillance. [Reserved]

§ 49.9955 Classification of regions for episode plans.

The air quality control region which encompasses the Colville Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.9956 Contents of implementation plan.

The implementation plan for the Colville Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.127 Rule for woodwaste burners.
(f) Section 49.128 Rule for limiting particulate matter emissions from wood products industry sources.
(g) Section 49.129 Rule for limiting emissions of sulfur dioxides.
(h) Section 49.130 Rule for limiting sulfur in fuels.
(i) Section 49.131 General rule for open burning.
(j) Section 49.135 Rule for emissions detrimental to human health and welfare.
(k) Section 49.137 Rule for air pollution episodes.
(l) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(m) Section 49.139 Rule for non-Title V operating permits.

§ 49.9957 EPA-approved Tribal rules and plans. [Reserved]

§ 49.9958 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.9959 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.9960 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Colville Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.127 Rule for woodwaste burners.
(f) Section 49.128 Rule for limiting particulate matter emissions from wood products industry sources.
(g) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(h) Section 49.130 Rule for limiting sulfur in fuels.
(i) Section 49.131 General rule for open burning.
(j) Section 49.135 Rule for emissions detrimental to human health and welfare.
(k) Section 49.137 Rule for air pollution episodes.
(l) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(m) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9961–49.9980 [Reserved]

7. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.9981 through 49.9990 to read as follows:

Implementation Plan for the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians of Oregon

§ 49.9981 Identification of plan.

This section and §§ 49.9982 through 49.10010 contain the implementation plan for the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians.

§ 49.9982 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians.

§ 49.9983 Legal authority. [Reserved]

§ 49.9984 Source surveillance. [Reserved]

§ 49.9985 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.9986 Contents of implementation plan.

The implementation plan for the Reservation of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9987 EPA-approved Tribal rules and plans. [Reserved]

§ 49.9988 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.9989 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.9990 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.9991–49.10010 [Reserved]

8. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10011 through 49.10020 to read as follows:

Implementation Plan for the Coquille Tribe of Oregon

§ 49.10011 Identification of plan.

This section and §§ 49.10012 through 49.10040 contain the implementation plan for the Coquille Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Coquille Tribe.

§ 49.10012 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Coquille Tribe.

§ 49.10013 Legal authority. [Reserved]

§ 49.10014 Source surveillance. [Reserved]

§ 49.10015 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Coquille Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.10016 Contents of implementation plan.

The implementation plan for the Reservation of the Coquille Tribe consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10017–49.10040 [Reserved]

9. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10041 through 49.10050 to read as follows:

Implementation Plan for the Cow Creek Band of Umpqua Indians of Oregon

§ 49.10041 Identification of plan.

This section and §§ 49.10042 through 49.10100 contain the implementation

VOL

UMI

plan for the Cow Creek Band of Umpqua Indians. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Cow Creek Band of Umpqua Indians.

§ 49.10042 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Cow Creek Band of Umpqua Indians.

§ 49.10043 Legal authority. [Reserved]

§ 49.10044 Source surveillance. [Reserved]

§ 49.10045 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Cow Creek Band of Umpqua Indians is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.10046 Contents of implementation plan.

The implementation plan for the Reservation of the Cow Creek Band of Umpqua Indians consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10047 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10048 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10049 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10050 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Cow Creek Band of Umpqua Indians:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10051–49.10100 [Reserved]

10. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10101 through 49.10110 to end as follows:

Implementation Plan for the Confederated Tribes of the Grand Ronde Community of Oregon

§ 49.10101 Identification of plan.

This section and §§ 49.10102 through 49.10130 contain the implementation plan for the Confederated Tribes of the Grand Ronde Community. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Confederated Tribes of the Grand Ronde Community.

§ 49.10102 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Confederated Tribes of the Grand Ronde Community.

§ 49.10103 Legal authority.[Reserved]

§ 49.10104 Source surveillance. [Reserved]

§ 49.10105 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Confederated Tribes of the Grand Ronde Community is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10106 Contents of implementation plan.

The implementation plan for the Reservation of the Confederated Tribes of the Grand Ronde Community consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10107 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10108 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10109 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10110 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Confederated Tribes of the Grand Ronde Community:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10111–49.10130 [Reserved]

11. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10131 through 49.10140 to read as follows:

Implementation Plan for the Hoh Indian Tribe of the Hoh Indian Reservation, Washington

§ 49.10131 Identification of plan.

This section and §§ 49.10132 through 49.10160 contain the implementation plan for the Hoh Indian Tribe of the Hoh Indian Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Hoh Indian Reservation.

§ 49.10132 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Hoh Indian Reservation.

§ 49.10133 Legal authority. [Reserved]

§ 49.10134 Source surveillance. [Reserved]

§ 49.10135 Classification of regions for episode plans.

The air quality control region which encompasses the Hoh Indian Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10136 Contents of implementation plan.

The implementation plan for the Hoh Indian Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10137 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10138 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10139 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10140 Federally-promulgated regulations and Federal implementation plans.

(a) The following regulations are incorporated and made part of the implementation plan for the Hoh Indian Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10141–49.10160 [Reserved]

12. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10161 through 49.10170 to read as follows:

Implementation Plan for the Jamestown S'Klallam Tribe of Washington

§ 49.10161 Identification of plan.

This section and §§ 49.10162 through 49.10190 contain the implementation plan for the Jamestown S'Klallam Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Jamestown S'Klallam Tribe.

§ 49.10162 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Jamestown S'Klallam Tribe.

§ 49.10163 Legal authority. [Reserved]

§ 49.10164 Source surveillance. [Reserved]

§ 49.10165 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Jamestown S'Klallam Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10166 Contents of implementation plan.

The implementation plan for the Reservation of the Jamestown S'Klallam Tribe consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10167 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10168 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10169 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10170 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Jamestown S'Klallam Tribe:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10171–49.10190 [Reserved]

13. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10191 through 49.10200 to read as follows:

Implementation Plan for the Kalispel Indian Community of the Kalispel Reservation, Washington

§ 49.10191 Identification of plan.

This section and §§ 49.1019192 through 49.10220 contain the implementation plan for the Kalispel Indian Community. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Kalispel Reservation.

§ 49.10192 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Kalispel Reservation.

§ 49.10193 Legal authority. [Reserved]

§ 49.10194 Source surveillance. [Reserved]

§ 49.10195 Classification of regions for episode plans.

The air quality control region which encompasses the Kalispel Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.10196 Contents of implementation plan.

The implementation plan for the Kalispel Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10197 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10198 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10199 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10200 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Kalispel Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10201–49.10220 [Reserved]

14. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10221 through 49.10230 to read as follows:

Implementation Plan for the Klamath Indian Tribe of Oregon

§ 49.10221 Identification of plan.

This section and §§ 49.10222 through 49.10250 contain the implementation plan for the Klamath Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Klamath Indian Tribe.

§ 49.10222 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Klamath Indian Tribe.

§ 49.10223 Legal authority. [Reserved]

§ 49.10224 Source surveillance. [Reserved]

§ 49.10225 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Klamath Indian Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.10226 Contents of implementation plan.

The implementation plan for the Reservation of the Klamath Indian Tribe consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10227 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10228 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10229 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10230 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Klamath Indian Tribe:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10231–49.10250 [Reserved]

15. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10251 through 49.10260 to read as follows:

Implementation Plan for the Kootenai Tribe of Idaho

§ 49.10251 Identification of plan.

This section and §§ 49.10252 through 49.10280 contain the implementation plan for the Kootenai Tribe of Idaho. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Kootenai Tribe of Idaho.

§ 49.10252 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Kootenai Tribe of Idaho.

§ 49.10253 Legal authority. [Reserved]

§ 49.10254 Source surveillance. [Reserved]

§ 49.10255 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Kootenai Tribe of Idaho is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	I
Sulfur oxides	III

§ 49.10256 Contents of implementation plan.

The implementation plan for the Reservation of the Kootenai Tribe of Idaho consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10257 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10258 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10259 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR part 71 in accordance with the requirements of § 49.139.

§ 49.10260 Federally-promulgated regulations and Federal implementation plans.

(a) The following regulations are incorporated and made part of the implementation plan for the Reservation of the Kootenai Tribe of Idaho:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.103261–49.10280 [Reserved]

16. Subpart M of part 49 is amended by adding an undesignated center heading and §§ 49.10281 through 49.10290 to read as follows:

Implementation Plan for the Lower Elwha Tribal Community of the Lower Elwha Reservation Washington

§ 49.10281 Identification of plan.

This section and §§ 49.10282 through 49.10310 contain the implementation plan for the Lower Elwha Tribal Community. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Lower Elwha Reservation.

§ 49.10282 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Lower Elwha Reservation.

§ 49.10283 Legal authority. [Reserved]

§ 49.10284 Source surveillance. [Reserved]

§ 49.10285 Classification of regions for episode plans.

The air quality control region which encompasses the Lower Elwha Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10286 Contents of implementation plan.

The implementation plan for the Lower Elwha Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10291–49.10310 [Reserved]

17. Subpart M of part 49 is amended by adding an undesignated center heading and §§ 49.10311 through 49.10320 to read as follows:

Implementation Plan for the Lummi Tribe of the Lummi Reservation, Washington

§ 49.10311 Identification of plan.

This section and §§ 49.10312 through 49.10340 contain the implementation plan for the Lummi Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Lummi Reservation.

§ 49.10312 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Lummi Reservation.

§ 49.10313 Legal authority. [Reserved]

§ 49.10314 Source surveillance. [Reserved]

§ 49.10315 Classification of regions for episode plans.

The air quality control region which encompasses the Lummi Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10316 Contents of implementation plan.

The implementation plan for the Lummi Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10317 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10318 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10319 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10320 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Lummi Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10321–49.10340 [Reserved]

18. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10341 through 49.10350 to read as follows:

Implementation Plan for the Makah Indian Tribe of the Makah Indian Reservation, Washington

§ 49.10341 Identification of plan.

This section and §§ 49.10342 through 49.10370 contain the implementation plan for the Makah Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Makah Indian Reservation.

§ 49.10342 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Makah Indian Reservation.

§ 49.10343 Legal authority. [Reserved]

§ 49.10344 Source surveillance. [Reserved]

§ 49.10345 Classification of regions for episode plans.

The air quality control region which encompasses the Makah Indian Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10346 Contents of implementation plan.

The implementation plan for the Makah Indian Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10347 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10348 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10349 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10350 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Makah Indian Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10351–49.10370 [Reserved]

19. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10371 through 49.10380 as follows:

Implementation Plan for the Muckleshoot Indian Tribe of the Muckleshoot Reservation, Washington

§ 49.10371 Identification of plan.

This section and §§ 49.10372 through 49.10400 contain the implementation plan for the Muckleshoot Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Muckleshoot Reservation.

§ 49.10372 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Muckleshoot Reservation.

§ 49.10373 Legal authority. [Reserved]

§ 49.10374 Source surveillance. [Reserved]

§ 49.10375 Classification of regions for episode plans.

The air quality control region which encompasses the Muckleshoot Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10376 Contents of implementation plan.

The implementation plan for the Muckleshoot Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10377 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10378 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10379 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10380 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Muckleshoot Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10381–49.10400 [Reserved]

20. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10401 through 49.10410 as follows:

Implementation Plan for the Nez Perce Tribe of Idaho

§ 49.10401 Identification of plan.

This section and §§ 49.10402 through 49.10430 contain the implementation plan for the Nez Perce Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Nez Perce Reservation.

§ 49.10402 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Nez Perce Reservation.

§ 49.10403 Legal authority. [Reserved]

§ 49.10404 Source surveillance. [Reserved]

§ 49.10405 Classification of regions for episode plans.

The air quality control region which encompasses the Nez Perce Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	I
Sulfur oxides	III

§ 49.10406 Contents of implementation plan.

The implementation plan for the Nez Perce Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.127 Rule for woodwaste burners.
(f) Section 49.128 Rule for limiting particulate matter emissions from wood products industry sources.
(g) Section 49.129 Rule for limiting emissions of sulfur dioxides.
(h) Section 49.130 Rule for limiting sulfur in fuels.
(i) Section 49.131 General rule for open burning.
(j) Section 49.132 Rule for open burning permits.
(k) Section 49.133 Rule for agricultural burning permits.
(l) Section 49.134 Rule for forestry burning permits.
(m) Section 49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.
(n) Section 49.137 Rule for air pollution episodes.
(o) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(p) Section 49.139 Rule for non-Title V operating permits.

§ 49.10407 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10408 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10409 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10410 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Nez Perce Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.127 Rule for woodwaste burners.
(f) Section 49.128 Rule for limiting particulate matter emissions from wood products industry sources.
(g) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(h) Section 49.130 Rule for limiting sulfur in fuels.
(i) Section 49.131 General rule for open burning.
(j) Section 49.132 Rule for open burning permits.
(k) Section 49.133 Rule for agricultural burning permits.
(l) Section 49.134 Rule for forestry burning permits.
(m) Section 49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.
(n) Section 49.137 Rule for air pollution episodes.
(o) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(p) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10411–49.10430 [Reserved]

21. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10431 through 49.10440 to read as follows:

Implementation Plan for the Nisqually Indian Tribe of the Nisqually Reservation, Washington

§ 49.10431 Identification of plan.

This section and §§ 49.10432 through 49.10460 contain the implementation plan for the Nisqually Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Nisqually Reservation.

§ 49.10432 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Nisqually Reservation.

§ 49.10433 Legal authority. [Reserved]

§ 49.10434 Source surveillance. [Reserved]

§ 49.10435 Classification of regions for episode plans.

The air quality control region which encompasses the Nisqually Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10436 Contents of implementation plan.

The implementation plan for the Nisqually Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10437 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10438 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10439 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR part 71 in accordance with the requirements of § 49.139.

§ 49.10440 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Nisqually Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10441–49.10460 [Reserved]

22. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10461 through 49.10470 to read as follows:

Implementation Plan for the Nooksack Indian Tribe of Washington

§ 49.10461 Identification of plan.

This section and §§ 49.10462 through 49.10490 contain the implementation plan for the Nooksack Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Nooksack Indian Tribe.

§ 49.10462 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Nooksack Indian Tribe.

§ 49.10463 Legal authority. [Reserved]

§ 49.10464. Source surveillance. [Reserved]

§ 49.10465 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Nooksack Indian Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10466 Contents of implementation plan.

The implementation plan for the Reservation of the Nooksack Indian Tribe consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10467 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10468 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10469 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10470 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the

VOL 67 ISS 51 MR 15 2002 UMI

implementation plan for the Reservation of the Nooksack Indian Tribe:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10471–49.10490 [Reserved]

23. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10491 through 49.10500 to read as follows:

Implementation Plan for the Port Gamble Indian Community of the Port Gamble Reservation, Washington

§ 49.10491 Identification of plan.

This section and §§ 49.10492 through 49.10520 contain the implementation plan for the Port Gamble Indian Community. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Port Gamble Reservation.

§ 49.10492 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Port Gamble Reservation.

§ 49.10493 Legal authority. [Reserved]

§ 49.10494 Source surveillance. [Reserved]

§ 49.10495 Classification of regions for episode plans.

The air quality control region which encompasses the Port Gamble Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10496 Contents of implementation plan.

The implementation plan for the Port Gamble Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10497 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10498 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10499 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10500 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Port Gamble Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10501–49.10520 [Reserved]

24. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10521 through 49.10530 as follows:

Implementation Plan for the Puyallup Tribe of the Puyallup Reservation, Washington

§ 49.10521 Identification of plan.

This section and §§ 49.10522 through 49.10550 contain the implementation plan for the Puyallup Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply to lands in trust that are within the 1873 survey area of the Puyallup Tribe (Puyallup Reservation), consistent with the Puyallup Tribe of Indians Land Claims Settlement Act, ratified by Congress in 1989 (25 U.S.C. 1773).

§ 49.10522 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the lands in trust that are within the Puyallup Reservation.

§ 49.10523 Legal authority. [Reserved]

§ 49.10524 Source surveillance. [Reserved]

§ 49.10525 Classification of regions for episode plans.

The air quality control region which encompasses the lands in trust that are within the Puyallup Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10526. Contents of implementation plan.

The implementation plan for the lands in trust that are within the Puyallup Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10527 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10528 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10529 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10530 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the lands in trust that are within the Puyallup Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10531–49.10550 [Reserved]

25. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10551 through 49.10560 to read as follows:

Implementation Plan for the Quileute Tribe of the Quileute Reservation, Washington

§ 49.10551 Identification of plan.

This section and §§ 49.10552 through 49.10580 contain the implementation plan for the Quileute Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Quileute Reservation.

§ 49.10552 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Quileute Reservation.

§ 49.10553 Legal authority. [Reserved]

§ 49.10554 Source surveillance. [Reserved]

§ 49.10555 Classification of regions for episode plans.

The air quality control region which encompasses the Quileute Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10556 Contents of implementation plan.

The implementation plan for the Quileute Reservation consists of the following rules, regulations, and measures:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10557 EPA-approved tribal rules and plans. [Reserved]

§ 49.10558 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10559 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10560 Federally-promulgated regulations and federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Quileute Reservation:
(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10561–49.10580 [Reserved]

26. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10581 through 49.10590 to read as follows:

Implementation Plan for the Quinault Tribe of the Quinault Reservation, Washington

§ 49.10581 Identification of plan.

This section and §§ 49.10582 through 49.10640 contain the implementation plan for the Quinault Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Quinault Reservation.

§ 49.10582 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Quinault Reservation.

§ 49.10583 Legal authority. [Reserved]

§ 49.10584 Source surveillance. [Reserved]

§ 49.10585 Classification of regions for episode plans.

The air quality control region which encompasses the Quinault Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10586 Contents of implementation plan.

The implementation plan for the Quinault Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10591–49.10640 [Reserved]

27. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10641 through 49.10650 to read as follows:

Implementation Plan for the Sauk-Suiattle Indian Tribe of Washington

§ 49.10641 Identification of plan.

This section and §§ 49.10642 through 49.10670 contain the implementation plan for the Sauk-Suiattle Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Sauk-Suiattle Tribe.

§ 49.10642 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Sauk-Suiattle Tribe.

§ 49.10643 Legal authority. [Reserved]

§ 49.10644 Source surveillance. [Reserved]

§ 49.10645 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Sauk-Suiattle Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10646 Contents of implementation plan.

The implementation plan for the Reservation of the Sauk-Suiattle Tribe consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10647 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10648 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10649 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10650 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Sauk-Suiattle Tribe:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10651–49.10670 [Reserved]

28. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10671 through 49.10680 to read as follows:

Implementation Plan for the Shoalwater Bay Tribe of the Shoalwater Bay Indian Reservation, Washington

§ 49.10671 Identification of plan.

This section and §§ 49.10672 through 49.10700 contain the implementation plan for the Shoalwater Bay Tribe of the Shoalwater Bay Indian Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Shoalwater Bay Indian Reservation.

§ 49.10672 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Shoalwater Bay Indian Reservation.

§ 49.10673 Legal authority. [Reserved]

§ 49.10674 Source surveillance. [Reserved]

§ 49.10675 Classification of regions for episode plans.

The air quality control region which encompasses the Shoalwater Bay Indian Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10676 Contents of implementation plan.

The implementation plan for the Shoalwater Bay Indian Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10677 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10678 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10679 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10680 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Shoalwater Bay Indian Reservation:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10681–49.10700 [Reserved]

29. Subpart M of Part 49 is amended by revising the undesignated center heading and §§ 49.10701 and 49.10702 to read as follows:

Implementation Plan for the Shoshone-Bannock Tribes of the Fort Hall Indian Reservation of Idaho

§ 49.10701 Identification of plan.

This section and §§ 49.10702 through 49.10730 contain the implementation plan for the Shoshone-Bannock Tribes of the Fort Hall Indian Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Fort Hall Indian Reservation.

§ 49.10702 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Fort Hall Indian Reservation.

30. Subpart M of Part 49 is amended by revising §§ 49.10704 through 49.10706 to read as follows:

§ 49.10704 Source surveillance. [Reserved]

§ 49.10705 Classification of regions for episode plans.

The air quality control region which encompasses the Fort Hall Indian Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	I
Sulfur oxides	II

§ 49.10706 Contents of implementation plan.

The implementation plan for the Fort Hall Indian Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.
(l) Section 49.10711 Federal Implementation Plan for the Astaris-Idaho LLC Facility (formerly owned by FMC Corporation) in the Fort Hall PM–10 Nonattainment Area.

31. Subpart M of Part 49 is amended by revising §§ 49.10709 through 49.10710 to read as follows:

VOL
67
ISS
51
MR
15
2002
UMI

§ 49.10709 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10710 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Fort Hall Indian Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

(l) Section 49.10711 Federal Implementation Plan for the Astaris-Idaho LLC Facility (formerly owned by FMC Corporation) in the Fort Hall PM–10 Nonattainment Area.

32. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10731 through 49.10740 to read as follows:

Implementation Plan for the Confederated Tribes of the Siletz Reservation, Oregon

§ 49.10731 Identification of plan.

This section and §§ 49.10732 through 49.10760 contain the implementation plan for the Confederated Tribes of the Siletz Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Siletz Reservation.

§ 49.10732 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Siletz Reservation.

§ 49.10733 Legal authority. [Reserved]

§ 49.10734 Source surveillance. [Reserved]

§ 49.10735 Classification of regions for episode plans.

The air quality control region which encompasses the Siletz Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	III
Sulfur oxides	III

§ 49.10736 Contents of implementation plan.

The implementation plan for the Siletz Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10737 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10738 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10739 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10740 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Siletz Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permit.

§§ 49.10741–49.10760 [Reserved]

33. Subpart M of part 49 is amended by adding an undesignated center heading and §§ 49.10761 through 49.10770 to read as follows:

Implementation Plan for the Skokomish Indian Tribe of the Skokomish Reservation, Washington

§ 49.10761 Identification of plan.

This section and §§ 49.10762 through 49.10820 contain the implementation plan for the Skokomish Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Skokomish Reservation.

§ 49.10762 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Skokomish Reservation.

§ 49.10763 Legal authority. [Reserved]

§ 49.10764 Source surveillance. [Reserved]

§ 49.10765 Classification of regions for episode plans.

The air quality control region which encompasses the Skokomish Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10766 Contents of implementation plan.

The implementation plan for the Skokomish Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10767 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10768 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10769 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR part 71 in accordance with the requirements of § 49.139.

§ 49.10770 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Skokomish Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10771–49.10820 [Reserved]

34. Subpart M of part 49 is amended by adding an undesignated center heading and §§ 49.10821 through 49.10830 to read as follows:

Implementation Plan for the Spokane Tribe of the Spokane Reservation, Washington

§ 49.10821 Identification of plan.

This section and §§ 49.10822 through 49.10850 contain the implementation plan for the Spokane Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Spokane Reservation.

§ 49.10822 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Spokane Reservation.

§ 49.10823 Legal authority. [Reserved]

§ 49.10824 Source surveillance. [Reserved]

§ 49.10825 Classification of regions for episode plans.

The air quality control region which encompasses the Spokane Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.10826 Contents of implementation plan.

The implementation plan for the Spokane Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10827 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10828 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10829 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10830 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Spokane Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10831–49.10850 [Reserved]

35. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10851 through 49.10860 to read as follows:

Implementation Plan for the Squaxin Island Tribe of the Squaxin Island Reservation, Washington

§ 49.10851 Identification of plan.

This section and §§ 49.10852 through 49.10880 contain the implementation

plan for the Squaxin Island Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Squaxin Island Reservation.

§ 49.10852 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Squaxin Island Reservation.

§ 49.10853 Legal authority. [Reserved]

§ 49.10854 Source surveillance. [Reserved]

§ 49.10855 Classification of regions for episode plans.

The air quality control region which encompasses the Squaxin Island Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10856 Contents of implementation plan.

The implementation plan for the Squaxin Island Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10857 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10858 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10859 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10860 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Squaxin Island Reservation:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10861–49.10880 [Reserved]

36. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10881 through 49.10890 to read as follows:

Implementation Plan for the Stillaguamish Tribe of Washington

§ 49.10881 Identification of plan.

This section and §§ 49.10882 through 49.10920 contain the implementation plan for the Stillaguamish Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Stillaguamish Tribe.

§ 49.10882 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Stillaguamish Tribe.

§ 49.10883 Legal authority. [Reserved]

§ 49.10884 Source surveillance. [Reserved]

§ 49.10885 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Stillaguamish Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10886 Contents of implementation plan.

The implementation plan for the Reservation of the Stillaguamish Tribe consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10887 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10888 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10889 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10890 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Stillaguamish Tribe:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10891–49.10920 [Reserved]

37. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10921 through 49.10930 to read as follows:

Implementation Plan for the Suquamish Indian Tribe of the Port Madison Reservation, Washington

§ 49.10921 Identification of plan.

This section and §§ 49.10922 through 49.10950 contain the implementation plan for the Suquamish Indian Tribe of the Port Madison Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Port Madison Reservation.

§ 49.10922 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Port Madison Reservation.

§ 49.10923 Legal authority. [Reserved]

§ 49.10924 Source surveillance. [Reserved]

§ 49.10925 Classification of regions for episode plans.

The air quality control region which encompasses the Port Madison Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10926 Contents of implementation plan.

The implementation plan for the Port Madison Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.10927 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10928 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10929 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10930 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Port Madison Reservation:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10931–49.10950 [Reserved]

38. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10951 through 49.10960 to read as follows:

Implementation Plan for the Swinomish Indians of the Swinomish Reservation, Washington

§ 49.10951 Identification of plan.

This section and §§ 49.10952 through 49.10980 contain the implementation plan for the Swinomish Indians. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Swinomish Reservation.

§ 49.10952 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Swinomish Reservation.

§ 49.10953 Legal authority. [Reserved]

§ 49.10954 Source surveillance. [Reserved]

§ 49.10955 Classification of regions for episode plans.

The air quality control region which encompasses the Swinomish Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.10956 Contents of implementation plan.

The implementation plan for the Swinomish Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

VOL 67 ISS 51 MR 15 2002 UMI

§ 49.10957 EPA-approved Tribal rules and plans. [Reserved]

§ 49.10958 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.10959 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.10960 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Swinomish Reservation:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10961–49.10980 [Reserved]

39. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.10981 through 49.10990 to read as follows:

Implementation Plan for the Tulalip Tribes of the Tulalip Reservation, Washington

§ 49.10981 Identification of plan.

This section and §§ 49.10982 through 49.11010 contain the implementation plan for the Tulalip Tribes. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Tulalip Reservation.

§ 49.10982 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Tulalip Reservation.

§ 49.10983 Legal authority. [Reserved]

§ 49.10984 Source surveillance. [Reserved]

§ 49.10985 Classification of regions for episode plans.

The air quality control region which encompasses the Tulalip Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	I
Nitrogen dioxide	III
Ozone	I
Particulate matter (PM10)	I
Sulfur oxides	IA

§ 49.10986 Contents of implementation plan.

The implementation plan for the Tulalip Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.10991–49.11010 [Reserved]

40. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.11011 through 49.11020 to read as follows:

Implementation Plan for the Confederated Tribes of the Umatilla Reservation, Oregon

§ 49.11011 Identification of plan.

This section and §§ 49.11012 through 49.11040 contain the implementation plan for the Confederated Tribes of the Umatilla Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Umatilla Reservation.

§ 49.11012 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Umatilla Reservation.

§ 49.11013 Legal authority. [Reserved]

§ 49.11014 Source surveillance. [Reserved]

§ 49.11015 Classification of regions for episode plans.

The air quality control region which encompasses the Umatilla Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.11016 Contents of implementation plan.

The implementation plan for the Umatilla Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.132 Rule for open burning permits.
(i) Section 49.133 Rule for agriculture burning permits.
(j) Section 49.134 Rule for forestry burning permits.
(k) Section 49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.
(l) Section 49.137 Rule for air pollution episodes.
(m) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(n) Section 49.139 Rule for non-Title V operating permits.

§ 49.11017 EPA-approved Tribal rules and plans. [Reserved]

§ 49.11018 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.11019 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.11020 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Umatilla Reservation:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.132 Rule for open burning permits.
(i) Section 49.133 Rule for agriculture burning permits.
(j) Section 49.134 Rule for forestry burning permits.
(k) Section 49.136 Rule for emissions detrimental to persons, property, cultural or traditional resources.
(l) Section 49.137 Rule for air pollution episodes.
(m) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(n) Section 49.139 Rule for non-Title V operating permits.

§§ 49.11021–49.11040 [Reserved]

41. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.11041 through 49.11050 to read as follows:

Implementation Plan for the Upper Skagit Indian Tribe of Washington

§ 49.11041 Identification of plan.

This section and §§ 49.11042 through 49.11070 contain the implementation plan for the Upper Skagit Indian Tribe. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Reservation of the Upper Skagit Indian Tribe.

§ 49.11042 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Reservation of the Upper Skagit Indian Tribe.

§ 49.11043 Legal authority. [Reserved]

§ 49.11044 Source surveillance. [Reserved]

§ 49.11045 Classification of regions for episode plans.

The air quality control region which encompasses the Reservation of the Upper Skagit Indian Tribe is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	II

§ 49.11046 Contents of implementation plan.

The implementation plan for the Reservation of the Upper Skagit Indian Tribe consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.11047 EPA-approved Tribal rules and plans. [Reserved]

§ 49.11048 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.11049 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.11050 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Reservation of the Upper Skagit Indian Tribe:

(a) Section 49.123 General provisions.
(b) Section 49.124 Rule for limiting visible emissions.
(c) Section 49.125 Rule for limiting the emissions of particulate matter.
(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.
(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.
(f) Section 49.130 Rule for limiting sulfur in fuels.
(g) Section 49.131 General rule for open burning.
(h) Section 49.135 Rule for emissions detrimental to human health and welfare.
(i) Section 49.137 Rule for air pollution episodes.
(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.
(k) Section 49.139 Rule for non-Title V operating permits.

VOL 67 ISS 51 MR 15 2002 UMI

§§ 49.11051–49.11070 [Reserved]

42. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.11071 through 49.11080 to read as follows:

Implementation Plan for the Confederated Tribes of the Warm Springs Reservation of Oregon

§ 49.11071 Identification of plan.

This section and §§ 49.11072 through 49.11100 contain the implementation plan for the Confederated Tribes of the Warm Springs Reservation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Warm Springs Reservation.

§ 49.11072 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Warm Springs Reservation.

§ 49.11073 Legal authority. [Reserved]

§ 49.11074 Source surveillance. [Reserved]

§ 49.11075 Classification of regions for episode plans.

The air quality control region which encompasses the Warm Springs Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	III
Particulate matter (PM10)	II
Sulfur oxides	III

§ 49.11076 Contents of implementation plan.

The implementation plan for the Warm Springs Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.11081–49.11100 [Reserved]

43. Subpart M of Part 49 is amended by adding an undesignated center heading and §§ 49.11101 through 49.11110 to read as follows:

Implementation Plan for the Confederated Tribes and Bands of the Yakama Indian Nation of the Yakama Reservation, Washington

§ 49.11101 Identification of plan.

This section and §§ 49.11102 through 49.11130 contain the implementation plan for the Confederated Tribes and Bands of the Yakama Indian Nation. This plan consists of a combination of Tribal rules and measures and Federal regulations and measures which apply within the Yakama Reservation.

§ 49.11102 Approval status.

There are currently no EPA-approved Tribal rules or measures in the implementation plan for the Yakama Reservation.

§ 49.11103 Legal authority. [Reserved]

§ 49.11104 Source surveillance. [Reserved]

§ 49.11105 Classification of regions for episode plans.

The air quality control region which encompasses the Yakama Reservation is classified as follows for purposes of episode plans:

Pollutant	Classification
Carbon monoxide	III
Nitrogen dioxide	III
Ozone	IIII
Particulate matter (PM10)	I
Sulfur oxides	III

§ 49.11106 Contents of implementation plan.

The implementation plan for the Yakama Reservation consists of the following rules, regulations, and measures:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§ 49.11107 EPA-approved Tribal rules and plans. [Reserved]

§ 49.11108 Permits to construct.

Permits to construct are required for new major stationary sources and major modifications to existing major stationary sources pursuant to 40 CFR 52.21.

§ 49.11109 Permits to operate.

Permits to operate are required for sources not subject to 40 CFR Part 71 in accordance with the requirements of § 49.139.

§ 49.11110 Federally-promulgated regulations and Federal implementation plans.

The following regulations are incorporated and made part of the implementation plan for the Yakama Reservation:

(a) Section 49.123 General provisions.

(b) Section 49.124 Rule for limiting visible emissions.

(c) Section 49.125 Rule for limiting the emissions of particulate matter.

(d) Section 49.126 Rule for limiting fugitive particulate matter emissions.

(e) Section 49.129 Rule for limiting emissions of sulfur dioxide.

(f) Section 49.130 Rule for limiting sulfur in fuels.

(g) Section 49.131 General rule for open burning.

(h) Section 49.135 Rule for emissions detrimental to human health and welfare.

(i) Section 49.137 Rule for air pollution episodes.

(j) Section 49.138 Rule for the registration of air pollution sources and the reporting of emissions.

(k) Section 49.139 Rule for non-Title V operating permits.

§§ 49.11111–49.11130 [Reserved]

§§ 49.11131–49.17810 [Reserved]

44. Subpart M of Part 49 is amended by revising the "Appendix to Subpart M—Alphabetical Listing of Tribes and Corresponding Sections" to read as follows:

Appendix to Subpart M—Alphabetical Listing of Tribes and Corresponding Sections

Indian tribe	Refer to the following sections in subpart M
Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon	§§ 49.9861 to 49.9890
Chehalis Reservation, Washington—Confederated Tribes of the	§§ 49.9891 to 49.9920
Coeur d'Alene Tribe of the Coeur D'Alene Reservation, Idaho	§§ 49.9921 to 49.9950

COURT SERVICES AND OFFENDER SUPERVISION AGENCY FOR THE DISTRICT OF COLUMBIA

28 CFR Part 802

[CSOSA–0003–P]

RIN 3225–AA01

Freedom of Information, Privacy Act and Other Disclosure of Records

AGENCY: Court Services and Offender Supervision Agency for the District of Columbia.

ACTION: Proposed rule.

SUMMARY: In this document, the Court Services and Offender Supervision Agency for the District of Columbia ("CSOSA" or "Agency") is proposing to adopt regulations on the disclosure of CSOSA or the District of Columbia Pretrial Services Agency ("PSA" or "Agency") records. These regulations include procedures for processing requests for disclosure under the Freedom of Information Act, under the Privacy Act, and for the production of records in response to a subpoena or other legal demand for testimony. The regulations also identify Privacy Act systems of records exemptions for both CSOSA and PSA. These regulations are necessary in order to ensure that the public has appropriate access to information maintained by the Agency and that adequate safeguards are in place to protect the privacy rights of individuals.

DATES: Comments due by May 14, 2002.

ADDRESSES: Office of the General Counsel, CSOSA, Room 1253, 633 Indiana Avenue, NW., Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Records Manager (telephone: (202) 220–5359; e-mail: *roy.nanovic@csosa.gov).*

SUPPLEMENTARY INFORMATION: The Court Services and Offender Supervision Agency for the District of Columbia ("CSOSA" or "Agency") is proposing to adopt regulations (28 CFR part 802) on the disclosure of records maintained by CSOSA or the District of Columbia Pretrial Services Agency ("PSA" or "Agency"). CSOSA previously published its organizational regulations (28 CFR part 800) in the **Federal Register** on January 8, 2001 (66 FR 1259). As noted in these organizational regulations, PSA is an independent entity within CSOSA.

Summary of Regulatory Provisions

Subpart A of the proposed regulations provides a general introduction. Subpart B covers procedures for Freedom of Information Act (FOIA) requests; subpart C covers procedures for Privacy Act requests; subpart D covers disclosures in response to subpoenas or other legal demands; and subpart E covers exemptions to CSOSA and PSA Privacy Act systems of records.

Freedom of Information Act Requests

The general guidelines for disclosure (§ 802.3) under the FOIA note that a record must be in the possession and control of the agency at the time of the request to be considered subject to release under the regulations. There is no obligation to create, compile, or obtain a record to satisfy a FOIA request. Hard copy of electronic records which are subject to FOIA, but which are available to the public through an established distribution system, the **Federal Register**, or the Internet at CSOSA's web site (*www.csosa.gov*), normally do not need to be processed under the FOIA. CSOSA will process such requests under the FOIA only if the requester insists on such processing.

Definitions for certain terms used in the subpart are contained in § 802.4. The procedures for submitting and processing FOIA requests are contained in § 802.5. Section 802.6 explains how CSOSA handles requests for documents which relate to or were created by another agency.

Section 802.7 covers the denial of a request. This section also explains how the requester may appeal the denial. Section 802.8 explains how to request expedited processing. Section 802.9 covers procedures for the disclosure of business information which may have been provided to the Agency. The business submitter (any entity which provided the business information to the Agency and which has a proprietary interest in the information) will receive notice of the FOIA request and have an opportunity to object to disclosure. Section 802.10 contains the fee schedule for FOIA requests.

Privacy Act Requests

The regulations in subpart C are intended to let you know how you can determine whether CSOSA or PSA maintains records about you, how you can obtain access to your records, and how to have your records corrected or amended.

Definitions for certain terms used in the subpart are contained in § 802.12. Section 802.13 explains how to verify your identity when making a request for your own records and how to document that you have consent when you make a request for information concerning another individual. The procedures for submitting and processing requests for access to records are contained in § 802.14. Section 802.15 covers the denial of a request. Section 802.16 explains how the requester may appeal the denial. Section 802.17 explains how CSOSA or PSA handle requests for documents which relate to or were created by another agency.

Section 802.18 explains how you may request to correct or amend a record about you which the Agency maintains. Section 802.19 contains procedures for appealing a denial to correct or amend your record.

Section 802.20 contains the procedures for accounting for disclosures, and § 802.21 notes your appeal rights for a denial of a request for an accounting. Fees for Privacy Act requests are described in § 802.22. Section 802.23 explains the Agency's policy on the use and disclosure of social security numbers.

Subpoenas or Other Legal Demands for Testimony or Production or Disclosure of Records or Other Information

Subpart D contains procedures for the production of records in response to subpoenas or demands of courts or other authorities in connection with a proceeding to which the Agency is not a party. These regulations establish a systematic means by which the Agency can evaluate requests for production of official agency information. The regulations are intended to: (1) Conserve Agency employee's time for conducting official business, (2) minimize the possibility of involving the Agency in controversial issues that are not related to the mission of the Agency, (3) prevent the possibility that the public will misconstrue variances between personal opinions of Agency employees and Agency policy, (4) avoid spending the government's time and money for private purposes, (5) preserve the integrity of the administrative process, and (6) protect confidential, sensitive information and the deliberative process of the Agency.

Exemption of Record Systems

The Privacy Act permits specific systems of records to be exempt from some of its requirements. Subpart E identifies these exemptions and explains the basis for making the exemptions. CSOSA exemptions are contained in § 802.28; PSA exemptions are contained in § 802.29. The full text of CSOSA and PSA systems of records appear in a separate notice document in today's **Federal Register**.

Matters of Regulatory Procedure

Administrative Procedure Act

Interested persons may participate in this proposed rulemaking by submitting data, views, or arguments in writing or by e-mailing the agency at the addresses given above in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** captions. Comments received during the comment period will be considered before final action is taken. Comments received after the expiration of the comment period will be considered to the extent practicable. All comments received remain on file for public inspection at the above address. The proposed rule may be changed in light of the comments received. We will not be holding oral hearings on this proceeding.

Executive Order 12866

This proposed rule has been determined to be significant under Executive Order 12866 and has been reviewed by the Office of Management and Budget (OMB).

Executive Order 13132

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, the Director of CSOSA has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Act

The Director of CSOSA, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule and by approving it certifies that this rule will not have a significant economic impact upon a substantial number of small entities. This rule pertains to agency management, and its economic impact is limited to the agency's appropriated funds.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, the Director of CSOSA has determined that no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by sec. 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

Plain Language Instructions

We want to make CSOSA's documents easy to read and understand. If you have suggestions on how to improve the clarity of these regulations, write, e-mail, or call the Records Manager (Roy Nanovic) at the address or telephone number given above in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** captions.

List of Subjects in 28 CFR Part 802

Freedom of information; Privacy; Probation and parole.

Jasper Ormond,

Interim Director.

Accordingly, we propose to amend chapter VIII, Title 28 of the Code of Federal Regulations by adding a new part 802 as set forth below.

PART 802—DISCLOSURE OF RECORDS

Subpart A—General

Sec.
802.1 Introduction.

Subpart B—Freedom of Information Act

802.2 Purpose and scope.
802.3 Guidelines for disclosure.
802.4 Definitions.
802.5 Freedom of Information Act requests.
802.6 Documents from other agencies.
802.7 Denial of request.
802.8 Expedited processing.
802.9 Business information.
802.10 Fee schedule.

Subpart C—Privacy Act

802.11 Purpose and scope.
802.12 Definitions.
802.13 Verifying your identity.
802.14 Requests for access to records.
802.15 Denial of request.
802.16 Administrative appeal.
802.17 Documents from other agencies.
802.18 Correction or amendment of record.
802.19 Appeal of denial to correct or amend.
802.20 Accounting of disclosures.
802.21 Appeals.
802.22 Fees.
802.23 Use and disclosure of social security numbers.

Subpart D—Subpoenas or Other Legal Demands for Testimony or the Production or Disclosure of Records or Other Information

802.24 Purpose and scope.
802.25 Definitions.
802.26 Receipt of demand.
802.27 Compliance/noncompliance.

Subpart E—Exemption of record systems under the Privacy Act

802.28 Exemption of the Court Services and Offender Supervision System—limited access.
802.29 Exemption of the Pretrial Services Agency System.

Authority: 5 U.S.C. 301, 552, 552a; Pub. L. 105–33, 111 Stat. 251, 712 (D.C. Code 24–1232, 24–1233).

Subpart A—General

§ 802.1 Introduction.

This part contains regulations of the Court Services and Offender Supervision Agency for the District of Columbia ("CSOSA" or "Agency") and the District of Columbia Pretrial Services Agency ("PSA" or "Agency") which implement the Freedom of Information Act (FOIA), 5 U.S.C. 552, and the Privacy Act, 5 U.S.C. 552a, and provide for the production of records in response to a demand from a court or other non-congressional authority in connection with a proceeding to which the Agency is not a party.

Subpart B—Freedom of Information Act

§ 802.2 Purpose and scope.

The purpose of this subpart is to establish procedures for the release of records in the possession of the Agency pursuant to the provisions of the FOIA.

§ 802.3 Guidelines for disclosure.

(a) The authority to release or deny access to records and information under the FOIA is limited to the General Counsel and his or her designee.

(b) An agency record will be released in response to a written request, unless a valid legal exemption to disclosure is asserted.

(1) Any applicable exemption to disclosure which is provided under the FOIA in 5 U.S.C. 552 may be asserted.

(2) A record must exist and be in the possession and control of the agency at the time of the request to be considered subject to this part and the FOIA. There is no obligation to create, compile, or obtain a record to satisfy a FOIA request.

(3) Hard copy of electronic records that are subject to FOIA requests under 5 U.S.C. 552(a)(3), and that are available

VOL
67
ISS
51
MR
15
2002
UMI

to the public through an established distribution system or through the **Federal Register** or the Internet, normally need not be processed under the provisions of the FOIA. However, if the requester insists that the request be processed under the FOIA, then the request shall be processed under the FOIA.

§ 802.4 Definitions.

As used in this subpart, the following terms have the following meanings:

(a) *Agency* has the meaning given in 5 U.S.C. 551(1) and 5 U.S.C. 552(f).

(b) *Appeal* means a request for a review of the agency's determination with regard to a fee waiver, category of requester, expedited processing, or denial in whole or in part of a request for access to a record or records.

(c) *Business information* means trade secrets or other commercial or financial information.

(d) *Business submitter* means any entity which provides business information to the Agency and which has a proprietary interest in the information.

(e) *Computer software* means tools by which records are created, stored, and retrieved. Normally, computer software, including source code, object code, and listings of source and object codes, regardless of medium, are not agency records. Proprietary (or copyrignted) software is not an agency record.

(f) *Confidential commercial information* means records provided to the government by a submitter that arguably contain material exempt from release under Exemption 4 of the Freedom of Information Act, 5 U.S.C. 552(b)(4), because disclosure could reasonably be expected to cause substantial competitive harm.

(g) *Duplication* refers to the process of making a copy of a record in order to respond to a FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine-readable documentation (e.g., magnetic tape or disk), among others.

(h) *Electronic records* mean those records and information which are created, stored, and retrievable by electronic means. This ordinarily does not include computer software, which is a tool by which to create, store, or retrieve electronic records.

(i) *Request* means any request for records made pursuant to 5 U.S.C. 552(a)(3).

(j) *Requester* means any person who makes a request for access to records.

(k) *Review,* for fee purposes, refers to the process of examining records located in response to a commercial use request to determine whether any portion of any record located is permitted to be withheld. It also includes processing any records for disclosure; e.g., doing all that is necessary to excise them and otherwise prepare them for release.

(l) *Search* includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within records. Searches may be done manually or by automated means.

§ 802.5 Freedom of Information Act requests.

(a) *Submission, processing, and release procedures.* (1) Requests for any record (including policy) ordinarily will be processed pursuant to the Freedom of Information Act, 5 U.S.C. 552. Your request must be made in writing and addressed to the FOIA Officer, Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The requester should clearly mark on the face of the letter and the envelope "Freedom of Information Request."

(2) Your request will be considered received as of the date it is received by the FOIA Office. For quickest possible handling, you should mark both your request letter and the envelope "Freedom of Information Act Request."

(3) Generally, all FOIA requests will be processed in the approximate order of receipt, unless the requester shows exceptional circumstances exist to justify an expedited response (see § 802.8).

(4) You must state in your request a firm agreement to pay the fees for search, duplication, and review as may ultimately be determined. The agreement may state the upper limit (but not less than $25) that the requester is willing to pay for processing the request. A request that fees be waived or reduced may accompany the agreement to pay fees and will be considered to the extent that such request is made in accordance with § 802.4(b) and provides supporting information to be measured against the fee waiver standard set forth in § 802.9(g). The requester shall be notified in writing of the decision to grant or deny the fee waiver. If a requester has an outstanding balance of search, review, or duplication fees due for FOIA request processing, the requirements of this paragraph are not met until the requester has remitted the outstanding balance due.

(b) *Description of records sought.* You must describe the records that you seek in enough detail to enable Agency personnel to locate them with a reasonable amount of effort. Whenever possible, your request should include specific information about each record sought, such as the date, title or name, author, recipient and subject matter of the record. As a general rule, the more specific you are about the records or type of records that you want, the more likely the Agency will be able to locate the records in response to your request. If a determination is made that your request does not reasonably describe records, the Agency will tell you either what additional information is needed or why your request is otherwise insufficient. You will be given the opportunity to discuss your request so that you may modify it to meet the requirements of this section.

(1) If a document contains information exempt from disclosure, any reasonably segregable portion of the record will be provided to you after deletion of the exempt portions.

(2) You will be notified of the decision on the request within 20 days after its receipt (excluding Saturdays, Sundays, and legal public holidays).

§ 802.6 Documents from other agencies.

(a) *Documents from or relating to Federal agencies.* (1) When a request for records includes a document from another Federal agency, the document will be referred to the originating Federal agency for a determination of its releasability. The requester will be informed of the referral. This is not a denial of a FOIA request; thus no appeal rights accrue to the requester.

(2) When a FOIA request is received for a record created by the Agency that includes information originated by another federal agency, the record will be referred to the originating agency for review and recommendation on disclosure. The Agency will not release any such record without prior consultation with the originating agency.

(b) *Documents from non-Federal agencies.* When a request for records includes a document from a non-Federal agency, CSOSA staff must make a determination of its releasability.

§ 802.7 Denial of request.

(a) *Denial in whole or in part.* If it is determined that the request for records should be denied in whole or in part, the requester shall be notified by mail. The letter of notification shall:

(1) State the exemptions relied on in not granting the request;

(2) If technically feasible, indicate the amount of information deleted at the place in the record where such deletion is made (unless providing such indication would harm an interest protected by the exemption relied upon to deny such material);

(3) Set forth the name and title or position of the responsible official;

(4) Advise the requester of the right to administrative appeal in accordance with paragraph (c) of this section; and

(5) Specify the official or office to which such appeal shall be submitted.

(b) *No records found.* If it is determined, after a thorough search for records by the responsible official or his delegate, that no records have been found to exist, the responsible official will so notify the requester in writing. The letter of notification will advise the requester of the right to administratively appeal the determination that no records exist (i.e., to challenge the adequacy of the search for responsive records) in accordance with paragraph (c) of this section. The response shall specify the official or office to which the appeal shall be submitted for review.

(c) *Administrative appeal.* (1) A requester may appeal an initial determination when:

(i) Access to records has been denied in whole or in part;

(ii) There has been an adverse determination of the requester's category as provided in § 802.10(d);

(iii) A request for fee waiver or reduction has been denied; or

(iv) It has been determined that no responsive records exist.

(2) Appeals must be made within 30 days of the receipt of the letter denying the request. Both the envelope and the letter of appeal should be sent to the Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Room 1220, Washington, DC 20004 and must be clearly marked "Freedom of Information Act Appeal."

(3) The General Counsel will make an appeal determination within 20 days (excluding Saturdays, Sundays, and holidays) from the date of receipt of the appeal. However, for a good reason, this time limit may be extended up to an additional 10 days. If, after review, the General Counsel determines that additional information should be released, it will accompany the appeal response. If, after review, the General Counsel determines to uphold the initial review, we will inform you.

§ 802.8 Expedited processing.

(a) Requests and appeals will be taken out of order and given expedited treatment whenever staff determines that they involve:

(1) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual. The requester must fully explain the circumstances warranting such an expected threat so that the Agency may make a reasoned determination.

(2) With respect to a request made by a person primarily engaged in disseminating information, a matter of widespread and exceptional media interest in which there exist possible questions about the government's integrity which affect public confidence. A person "primarily engaged in disseminating information" does not include individuals who are engaged only incidentally in the dissemination of information. The standard of "widespread and exceptional media interest" requires that the records requested pertain to a matter of current exigency to the American public and that delaying a response to a request for records would compromise a significant recognized interest to and throughout the general public. The requester must adequately explain the matter or activity and why it is necessary to provide the records being sought on an expedited basis.

(b) If you seek expedited processing, you must submit a statement, certified to be true and correct to the best of your knowledge and belief. The statement must be in the form prescribed by 28 U.S.C. 1746, "I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed on [date]."

(c) The determination as to whether to grant or deny the request for expedited processing will be made, and the requester notified, within ten days after the date of the request. Because a decision to take a FOIA request out of order delays other requests, simple fairness demands that such a decision be made by the FOIA Officer only upon careful scrutiny of truly exceptional circumstances. The decision will be made solely based on the information contained in the initial letter requesting expedited processing.

(d) Appeals of initial determinations to deny expedited processing must be made promptly. Both the envelope and the letter of appeal should be sent to the Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Room 1220, Washington, DC 2004 and must be clearly marked "Expedited Processing Appeal."

(e) The General Counsel will make an appeal determination regarding expedited processing as soon as practicable.

§ 802.9 Business information.

(a) *In general.* Business information provided to the Agency by a business submitter will not be disclosed pursuant to a Freedom of Information Act request except in accordance with this section. Any claim of confidentiality must be supported by a statement by an authorized representative of the company providing specific justification that the information in question is in fact confidential commercial or financial information and has not been disclosed to the public.

(b) *Notice to business submitters.* The Agency will provide a business submitter with prompt written notice of receipt of a request or appeal encompassing its business information whenever required in accordance with paragraph (c) of this section, and except as is provided in paragraph (g) of this section. Such written notice shall either describe the exact nature of the business information requested or provide copies of the records or portions of records containing the business information.

(c) *When notice is required.* (1) Notice of a request for business information falling within paragraph (c)(2)(i) or (ii) of this section will be required for a period of not more than ten years after the date of submission unless the business submitter had requested, and provided acceptable justification for, a specific notice period of greater duration.

(2) The Agency shall provide a business submitter with notice of receipt of a request or appeal whenever:

(i) The business submitter has in good faith designated the information as commercially or financially sensitive information, or

(ii) The Agency has reason to believe that disclosure of the information could reasonably be expected to cause substantial competitive harm.

(d) *Opportunity to object to disclosure.*

(1) Through the notice described in paragraph (b) of this section, the Agency shall afford a business submitter ten days from the date of the notice (exclusive of Saturdays, Sundays, and legal public holidays) to provide a detailed statement of any objection to disclosure. Such statement shall specify why the business submitter believes the information is considered to be a trade secret or commercial or financial information that is privileged or confidential. Information provided by a business submitter pursuant to this paragraph might itself be subject to disclosure under the FOIA.

(2) When notice is given to a submitter under this section, the requester shall be advised that such

VOL
67
ISS
51
MR
15
2002
UMI

notice has been given to the submitter. The requester shall be further advised that a delay in responding to the request may be considered a denial of access to records and that the requester may proceed with an administrative appeal or seek judicial review, if appropriate. However, the requester will be invited to agree to a voluntary extension of time so that staff may review the business submitter's objection to disclose.

(e) *Notice of intent to disclose.* The Agency will consider carefully a business submitter's objections and specific grounds for nondisclosure prior to determining whether to disclose business information. Whenever a decision to disclose business information over the objection of a business submitter is made, the Agency shall forward to the business submitter a written notice which shall include:

(1) A statement of the reasons for which the business submitter's disclosure objections were not sustained;

(2) A description of the business information to be disclosed; and

(3) A specified disclosure date which is not less than ten days (exclusive of Saturdays, Sundays, and legal public holidays) after the notice of the final decision to release the requested information has been mailed to the submitter.

(f) *Notice of FOIA lawsuit.* Whenever a requester brings suit seeking to compel disclosure of business information covered by paragraph (c) of this section, the Agency shall promptly notify the business submitter.

(g) *Exception to notice requirement.* The notice requirements of this section shall not apply if:

(1) The Agency determines that the information shall not be disclosed;

(2) The information lawfully has been published or otherwise made available to the public; or

(3) Disclosure of the information is required by law (other than 5 U.S.C. 552).

§ 802.10 Fee schedule.

(a) The fees described in this section conform to the Office of Management and Budget Uniform Freedom of Information Act Fee Schedule and Guidelines. They reflect direct costs for search, review (in the case of commercial requesters), and duplication of documents, collection of which is permitted by the FOIA. However, for each of these categories, the fees may be limited, waived, or reduced for the reasons given below or for other reasons.

(b) The term *direct costs* means those expenditures the agency actually makes in searching for, review (in the case of commercial requesters), and duplicating documents to respond to a FOIA request.

(c) Fees shall be charged in accordance with the schedule contained in paragraph (i) of this section for services rendered in responding to requests for records, unless any one of the following applies:

(1) Services were performed without charge;

(2) The fees were waived or reduced in accordance with paragraph (f) of this section.

(d) Specific levels of fees are prescribed for each of the following categories of requesters.

(1) *Commercial use requesters.* These requesters are assessed charges, which recover the full direct costs of searching for, reviewing, and duplicating the records sought. Commercial use requesters are not entitled to two hours of free search time or 100 free pages of duplication of documents. Moreover, when a request is received for disclosure that is primarily in the commercial interest of the requester, the Agency is not required to consider a request for a waiver or reduction of fees based upon the assertion that disclosure would be in the public interest. The Agency may recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records, or no records are located.

(2) *Educational and non-commercial scientific institution requesters.* Records shall be provided to requesters in these categories for the cost of duplication alone, excluding charges for the first 100 pages. To be eligible, requesters must show that the request is made under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research. These categories do not include requesters who want records for use in meeting individual academic research or study requirements.

(3) *Requesters who are representatives of the news media.* Records shall be provided to requesters in this category for the cost of duplication alone, excluding charges for the first 100 pages.

(4) All other requesters. Requesters who do not fit any of the categories described in paragraphs (d)(1) through (3) of this section shall be charged fees that will recover the full direct cost of searching for and duplicating records that are responsive to the request, except that the first 100 pages of duplication and the first two hours of search time shall be furnished without charge. The Agency may recover the cost of searching for records even if there is ultimately no disclosure of records, or no records are located. Requests from persons for records about themselves filed in a systems of records shall continue to be treated under the fee provisions of the Privacy Act of 1974 which permit fees only for duplication.

(e) *Fee waiver determination.* Where the initial request includes a request for reduction or waiver of fees, the responsible official shall determine whether to grant the request for reduction or waiver before processing the request and notify the requester of this decision. If the decision does not waive all fees, the responsible official shall advise the requester of the fact that fees shall be assessed and, if applicable, payment must be made in advance pursuant to paragraph (g) of this section.

(f) *Waiver or reduction of fees.*

(1) Fees may be waived or reduced on a case-by-case basis in accordance with this paragraph by the official who determines the availability of the records, provided such waiver or reduction has been requested in writing. Fees shall be waived or reduced by this official when it is determined, based upon the submission of the requester, that a waiver or reduction of the fees is in the public interest because furnishing the information is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. Fee waiver/reduction requests shall be evaluated against the current fee waiver policy guidance issued by the Department of Justice.

(2) Appeals from denials of requests for waiver or reduction of fees shall be decided in accordance with the criteria set forth in this section by the official authorized to decide appeals from denials of access to records. Appeals shall be addressed in writing to the Office of the General Counsel, Court Services and Offender Supervision Agency, Office of the General Counsel, 633 Indiana Avenue, NW., Washington, DC 20004 within 30 days of the denial of the initial request for waiver or reduction and shall be decided within 20 days (excluding Saturdays, Sundays and holidays).

(3) Appeals from an adverse determination of the requester's category as described in paragraphs (d)(1) through (3) of this section shall be decided by the official authorized to decide appeals from denials of access to records and shall be based upon a review of the requester's submission and the Agency's own records. Appeals shall be addressed in writing to the office or officer specified in § 802.7(c)(2) within 30 days of the receipt of the Agency's determination of the requester's category and shall be decided within 20 days (excluding Saturdays, Sundays, and holidays).

(g) *Advance notice of fees.*

(1) When the fees for processing the request are estimated to exceed the limit set by the requester, and that amount is less than $250.00, the requester shall be notified of the estimated costs. The requester must provide an agreement to pay the estimated costs; however, the requester will also be given an opportunity to reformulate the request in an attempt to reduce fees.

(2) If the requester has failed to state a limit and the costs are estimated to exceed $250.00, the requester shall be notified of the estimated costs and must pre-pay such amount prior to the processing of the request, or provide satisfactory assurance of full payment if the requester has a history of prompt payment of FOIA fees. The requester will also be given an opportunity to reformulate the request in an attempt to reduce fees.

(h) *Form of payment.*

(1) Payment may be made by check or money order payable to the Treasury of the United States.

(2) The Court Services and Offender Supervision Agency reserves the right to request prepayment after a request is processed and before documents are released in the following circumstances.

(i) When costs are estimated or determined to exceed $250.00, the Agency shall either obtain satisfactory assurance of full payment of the estimated cost where the requester has a history of prompt payment of FOIA fees or require the requester to make an advance payment of the entire estimated or determined fee before continuing to process the request.

(ii) If a requester has previously failed to pay a fee within 30 days of the date of the billing, the requester shall be required to pay the full amount owed plus any applicable interest, and to make an advance payment of the full amount of the estimated fee before the Agency begins to process a new request or the pending request. Whenever interest is charged, the Agency shall begin assessing interest on the 31st day following the day on which billing was sent. Interest shall be at the rate prescribed in 31 U.S.C. 3717.

(i) *Amounts to be charged for specific services.* The fees for services performed by an employee of the Agency shall be imposed and collected as set forth in this paragraph.

(1) *Duplicating records.* All requesters, except commercial requesters, shall receive the first 100 pages duplicated without charge; the first two hours of search time free; or charge which total $10.00 or less. Fees for the copies are to be calculated as follows:

(i) The duplication cost is calculated by multiplying the number of pages in excess of 100 by $0.25.

(ii) Photographs, films, and other materials—actual cost of duplication.

(iii) Other types of duplication services not mentioned above—actual cost.

(iv) Material provided to a private contractor for copying shall be charged to the requester at the actual cost charged by the private contractor.

(2) *Search services.* The cost of search time is calculated by multiplying the number of quarter hours in excess of two hours by the following rates for the staff conducting the search:

(i) $7.00 per quarter hour for clerical staff;

(ii) $10.00 per quarter hour for professional staff; and

(iii) $14.00 per quarter hour for managerial personnel.

(3) *Assessment exclusions.* Only fees in excess of $10.00 will be assessed. This means that the total cost must be greater than $10.00, either for the cost of the search (for time in excess of two hours), for the cost of duplication (for pages in excess of 100), or for both costs combined.

(j) *Searches for electronic records.* The Agency shall charge for actual direct cost of the search, including computer search time, runs, and the operator's salary. The fee for computer output shall be actual direct costs. For requesters in the "all other" category, when the cost of the search (including the operator time and the cost of operating the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the person performing the search (i.e., the operator), the charge for the computer search will begin.

(k) *Aggregating requests.* When the Agency reasonably believes that a requester or group of requesters is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, the Agency shall aggregate any such requests and charge accordingly.

Subpart C—Privacy Act

§ 802.11 Purpose and scope.

The regulations in this subpart apply to all records which are contained in a system of records maintained by the Agency and which are retrieved by an individual's name or personal identifier. This subpart implements the Privacy Act by establishing Agency policy and procedures providing for the maintenance of and guaranteed access to records. Under these procedures:

(a) You can ask us whether we maintain records about you or obtain access to your records; and

(b) You may seek to have your record corrected or amended if you believe that your record is not accurate, timely, complete, or relevant.

§ 802.12 Definitions.

As used in this subpart, the following terms shall have the following meanings:

(a) *Agency* has the meaning as defined in 5 U.S.C. 552(e).

(b) *Individual* means a citizen of the United States or an alien lawfully admitted for permanent residence.

(c) *Maintain* includes maintain, collect, use, or disseminate.

(d) *Record* means any item, collection, or grouping of information about an individual that is maintained by the Agency. This includes, but is not limited to, the individual's education, financial transactions, medical history, and criminal or employment history and that contains the name, or an identifying number, symbol, or other identifying particular assigned to the individual, such as a finger print or a photograph.

(e) *System of records* means a group of any records under the control of the Agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

(f) *Statistical record* means a record in a system of records maintained for statistical research or reporting purposes only and not used in whole or part in making any determination about an identifiable individual, except as provided by 13 U.S.C. 8.

(g) *Routine use* means the disclosure of a record that is compatible with the purpose for which the record was collected.

(h) *Request for access* means a request made pursuant to 5 U.S.C. 552a(d)(1).

(i) *Request for amendment* means a request made pursuant to 5 U.S.C. 552a(d)(2).

(j) *Request for accounting* means a request made pursuant to 5 U.S.C. 552a(c)(3).

§ 802.13 Verifying your identity.

(a) *Requests for your own records.* When you make a request for access to records about yourself, you must verify your identity. You must state your full

VOL
67
ISS
51
MR
15
2002
UMI

name, current address, and date and place of birth. You must sign your request and your signature must either be notarized or submitted by you under 28 U.S.C. 1746. In order to help the identification and location of requested records, you may also, at your option, include your social security number.

(b) *Requests on behalf of another.* Information that concerns an individual and that is contained in a system of records maintained by the Agency shall not be disclosed to any person, or to another agency, except under the provisions of the Privacy Act, 5 U.S.C. 552a, or the Freedom of Information Act, 5 U.S.C. 552.

(c) *Disclosure criteria.* Staff may disclose information from an agency system of records only if one or more of the following criteria apply:

(1) With the written consent of the individual to whom the record pertains.

(2) Pursuant to a specific exception listed under the Privacy Act (5 U.S.C. 552a(b)). For example, specific exceptions allow disclosure:

(i) To employees within the Agency who have a need for the record in the performance of their duties.

(ii) If disclosure is permitted under FOIA, e.g. "public information," when the public interest in disclosure of the information outweighs the privacy interest involved.

(iii) For a routine use described in the agency system of records as published in the **Federal Register**.

(A) The published notices for these systems describe the records contained in each system and the routine uses for disclosing these records without first obtaining the consent of the person to whom the records pertain.

(B) CSOSA publishes notices of system of records, including all pertinent routine uses, in the **Federal Register**.

§ 802.14 Requests for access to records.

(a) *Submission, processing, and release procedures.*

(1) Requests for any agency record about yourself ordinarily will be processed pursuant to the Privacy Act, 5 U.S.C. 552a. Such a request must be made in writing and addressed to the FOIA Officer, Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The requester should clearly mark on the face of the letter and the envelope "Privacy Act Request."

(2) Your request will be considered received as of the date it is received by the FOIA Office. For quickest possible handling, you should mark both your request letter and the envelope "Privacy Act Request."

(b) *Description of records sought.* You must describe the records that you seek in enough detail to enable Agency personnel to locate them with a reasonable amount of effort. Whenever possible, your request should include specific information about each record sought, such as the date, title or name, author, recipient and subject matter of the record. As a general rule, the more specific you are about the records or type of records that you want, the more likely the Agency will be able to locate the records in response to your request. If a determination is made that your request does not reasonably describe records, the Agency will tell you either what additional information is needed or why your request is otherwise insufficient. You will be given the opportunity to discuss your request so that you may modify it to meet the requirements of this section.

(1) If a document contains information exempt from disclosure, any reasonably segregable portion of the record will be provided to the requester after deletion of the exempt portions.

(2) A requester will be notified of the decision on the request in writing. Every effort will be made to respond to the requester within the time limit set under the governing disclosure statute.

(3) Generally, all Privacy Act requests will be processed in the approximate order of receipt, unless the requester shows exceptional circumstances exist to justify an expedited response (see § 802.8).

§ 802.15 Denial of request.

(a) *Denial in whole or in part.* If it is determined that the request for records should be denied in whole or in part, the requester shall be notified by mail. The letter of notification shall:

(1) State the FOIA exemptions relied on in not granting the request;

(2) If technically feasible, indicate the amount of information deleted at the place in the record where such deletion is made (unless providing such indication would harm an interest protected by the exemption relied upon to deny such material);

(3) Set forth the name and title or position of the responsible official;

(4) Advise the requester of the right to administrative appeal in accordance with § 802.16(e); and

(5) Specify the official or office to which such appeal shall be submitted.

(b) *No records found.* If it is determined, after a thorough search for records by the responsible official or his delegate, that no records have been found to exist, the responsible official will so notify the requester in writing. The letter of notification will advise the requester of the right to administratively appeal the determination that no records exist (i.e., to challenge the adequacy of the search for responsive records) in accordance with paragraph (a)(1) of this section. The response shall specify the official or office to which the appeal shall be submitted for review.

§ 802.16 Administrative appeal.

(a) A requester may appeal an Agency initial determination when:

(1) Access to records has been denied in whole or in part;

(2) There has been an adverse determination of the requester's category as provided in § 802.9(d);

(3) A request for fee waiver or reduction has been denied; or

(4) It has been determined that no responsive records exist.

(b) Appeals of initial determinations must be made within 30 days of the receipt of the letter denying the request. Both the envelope and the letter of appeal should be sent to the Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Room 1220, Washington, DC 20004 and must be clearly marked "Privacy Act Appeal."

(c) The General Counsel will make an appeal determination within 20 days (excluding Saturdays, Sundays, and holidays) from the date of receipt of the appeal. However, for a good reason, this time limit may be extended up to an additional 10 days. If, after review, the General Counsel determines that additional information should be released, it will accompany the appeal response. If, after review, the General Counsel determines to uphold the initial review, we will inform you of that decision.

§ 802.17 Documents from other agencies.

(a)(1) *Documents from or pertaining to Federal agencies.* When a request for records includes a document from another Federal agency, the document will be referred to the originating Federal agency for a determination of its releasability. The requester will be informed of the referral. This is not a denial of a Privacy Act request; thus no appeal rights accrue to the requester.

(2) When a Privacy Act request is received for a record created by the Agency that includes information originated by another Federal agency, the record will be referred to the originating agency for review and recommendation on disclosure. The Agency will not release any such record without prior consultation with the originating agency.

(b) *Documents from non-Federal agencies.* When a request for records includes a document from a non-Federal agency, CSOSA staff must make a determination of its releasability.

§ 802.18 Correction or amendment of records.

This section applies to all records kept by the Agency except for records of earnings. If you believe your record is not accurate, relevant, timely, or complete, you may request that your record be corrected or amended. A request for correction or amendment must identify the particular record in question, state the correction or amendment sought, and set forth the justification for the correction. To amend or correct your record, you should write to the Office of the General Counsel identified in § 802.14(a)(1). You should submit any available evidence to support your request. Both the request and the envelope must be clearly marked "Privacy Act Correction Request." Your request should indicate:

(a) The system of records from which the record is retrieved;

(b) The particular record which you want to correct or amend;

(c) Whether you want to add, delete or substitute information in the records; and

(d) Your reasons for believing that your record should be corrected or amended.

§ 802.19 Appeal of denial to correct or amend.

(a) Agency staff may grant or deny requests for correction of agency records. One basis for denial may be that the records are contained in an agency system of records that has been published in the **Federal Register** and exempted from the Privacy Act provisions requiring amendment and correction.

(1) Any denial of a request for correction should contain a statement of the reason for denial and notice to the requester that the denial may be appealed to the General Counsel by filing a written appeal.

(2) The appeal should be marked on the face of the letter and the envelope, "PRIVACY APPEAL—DENIAL OF CORRECTION," and be addressed to the Office of the General Counsel, address cited at § 802.14(a)(1).

(3) The General Counsel will review your request within 30 days from the date of receipt. However, for a good reason, this time limit may be extended. If, after review, the General Counsel determines that the record should be corrected, the record will be corrected. If, after review, the General Counsel refuses to amend the record exactly as you requested, we will inform you:

(i) That your request has been refused and the reason;

(ii) That this refusal is the Agency's final decision;

(iii) That you have a right to seek court review of this request to amend the record; and

(iv) That you have a right to file a statement of disagreement with the decision. Your statement should include the reason you disagree. We will make your statement available to anyone to whom the record is subsequently disclosed, together with a statement of our reasons for refusing to amend the record.

(b) Requests for correction of records prepared by other federal agencies shall be forwarded to that agency for appropriate action and the requester will be immediately notified of the referral in writing.

(c) When the request is for correction of non-Federal records, the requester will be advised to write to that non-Federal entity.

§ 802.20 Accounting of disclosures.

(a) We will maintain an accounting of all disclosures of a record for five years or until the record is destroyed, whichever is longer, except that, we will not make an accounting for:

(1) Disclosures of public information;

(2) Disclosures made within the agency; and

(3) Disclosures of your record made with your written consent.

(b) The accounting will include:

(1) The date, nature, and purpose of the disclosure; and

(2) The name and address of the person or entity to whom the disclosure is made.

(c) You may request access to an accounting of disclosures of your record. Your request should be in accordance with the procedures in § 802.14. You will be granted access to an accounting of the disclosures of your record in accordance with the procedures of this part which govern access to the related record, excepting disclosures made for an authorized civil or criminal law enforcement agency as provided by subsection (c)(3) of the Privacy Act. You will be required to provide reasonable identification.

§ 802.21 Appeals.

You may appeal a denial of a request for an accounting to the Office of the General Counsel in the same manner as a denial of a request for access to records (See § 802.16) and the same procedures will be followed.

§ 802.22 Fees.

The Agency shall charge fees for duplication of records under the Privacy Act in the same way in which it charges duplication fees under the Freedom of Information Act (See § 802.10).

§ 802.23 Use and disclosure of social security numbers.

(a) *In general.* An individual shall not be denied any right, benefit, or privilege provided by law because of such individual's refusal to disclose his or her social security number.

(b) *Exceptions.* The provisions of paragraph (a) of this section do not apply with respect to:

(1) Any disclosure which is required by Federal statute, or

(2) The disclosure of a social security number to any Federal, State, or local agency maintaining a system of records in existence and operating before January 1, 1975, if such disclosure was required under statute or regulation adopted prior to such date to verify the identity of an individual.

(c) *Requests for disclosure of social security number.* If the Agency requests an individual to disclose his or her social security account number, we shall inform that individual whether:

(1) Disclosure is mandatory or voluntary.

(2) By what statutory or other authority such number is solicited, and

(3) What uses will be made of it.

Subpart D—Subpoenas or Other Legal Demands for Testimony or the Production or Disclosure of Records or Other Information

§ 802.24 Purpose and scope.

(a) These regulations state the procedures which the Court Services and Offender Supervision Agency ("CSOSA" or "Agency") and the District of Columbia Pretrial Services Agency ("PSA" or "Agency") follow in response to a demand from a Federal, state, or local administrative body for the production and disclosure of material in connection with a proceeding to which the Agency is not a party.

(b) These regulations do not apply to congressional requests. Neither do these regulations apply in the case of an employee making an appearance solely in his or her private capacity in judicial or administrative proceedings that do not relate to the Agency (such as cases arising out of traffic accidents, domestic relations, etc.).

(c) This part is not intended and does not create and may not be relied upon to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States or specifically CSOSA or PSA.

VOL

UMI

§ 802.25 Definitions.

Demand means a request, order, or subpoena for testimony or documents to use in a legal proceeding.

Employee includes a person employed in any capacity by CSOSA or PSA, currently or in the past; any person appointed by, or subject to the supervision, jurisdiction, or control of the head of the Agency, or any Agency official, currently or in the past. A person who is subject to the Agency's jurisdiction or control includes any person who hired as a contractor by the agency, any person performing services for the agency under an agreement, and any consultant, contractor, or subcontractor of such person. A former employee is also considered an employee only when the matter about which the person would testify is one in which he or she was personally involved while at the Agency, or where the matter concerns official information that the employee acquired while working at the Agency, such as sensitive or confidential agency information.

Legal Proceeding includes any pretrial, trial, and post-trial state of any existing or reasonably anticipated judicial or administrative action, hearing, investigation, or similar proceeding before a court, commission, board, agency, or other tribunal, authority or entity, foreign or domestic. Legal proceeding also includes any deposition or other pretrial proceeding, including a formal or informal request for testimony made by an attorney or other person, or a request for documents gathered or drafted by an employee.

§ 802.26 Receipt of demand.

If, in connection with a proceeding to which the Agency is not a party, an employee receives a demand from a court or other authority for material contained in the Agency's files, any information relating to material contained in the Agency's files, or any information or material acquired by an employee as a part of the performance of that person's official duties or because of that person's official status, the employee must:

(a) Immediately notify the Office of the General Counsel and forward the demand to the General Counsel if the demand pertains to CSOSA; or

(b) Immediately notify the Deputy Director of PSA and forward the demand to the Deputy Director if the demand pertains to PSA.

§ 802.27 Compliance/noncompliance.

The General Counsel is responsible for determining if CSOSA should comply or not comply with the demand, and the Deputy Director of PSA is responsible for determining if PSA should comply with the demand.

(a) An employee may not produce any documents, or provide testimony regarding any information relating to, or based upon Agency documents, or disclose any information or produce materials acquired as part of the performance of that employee's official duties, or because of that employee's official status without prior authorization from the General Counsel or Deputy Director. The reasons for this policy are as follows:

(1) To conserve the time of the agency for conducting official business;

(2) To minimize the possibility of involving the agency in controversial issues that are not related to the agency's mission;

(3) To prevent the possibility that the public will misconstrue variances between personal opinions of agency employees and agency policies;

(4) To avoid spending the time and money of the United States for private purposes;

(5) To preserve the integrity of the administrative process; and

(6) To protect confidential, sensitive information and the deliberative process of the agency.

(b) An attorney from the Office of the General Counsel shall appear with any CSOSA employee upon whom the demand has been made (and with any PSA employee if so requested by the Deputy Director), and shall provide the court or other authority with a copy of the regulations contained in this part. The attorney shall also inform the court or authority that the demand has been or is being referred for prompt consideration by the General Counsel or Deputy Director. The court or other authority will be requested respectfully to stay the demand pending receipt of the requested instructions from the General Counsel or Deputy Director.

(c) If the court or other authority declines to stay the effect of the demand pending receipt of instructions from the General Counsel or Deputy Director, or if the court or other authority rules that the demand must be complied with irrespective of the instructions from the General Counsel or Deputy Director not to produce the material or disclose the information sought, the employee upon whom the demand was made shall respectfully decline to produce the information under *United States ex rel. Touhy* v. *Ragen*, 340 U.S. 462 (1951). In this case, the Supreme Court held that a government employee could not be held in contempt for following an agency regulation requiring agency approval before producing government information in response to a court order.

(d) The agency will consider the following factors in determining whether a demand should be complied with:

(1) The Privacy Act, 5 U.S.C. 522a;

(2) Department of Health and Human Services statute and regulations concerning drug and alcohol treatment programs found at 42 U.S.C. 290dd and 42 CFR 2.1 et. seq.;

(3) The Victims Rights Act, 42 U.S.C. 10606(b);

(4) D.C. statutes and regulations;

(5) Any other state or federal statute or regulation;

(6) Whether disclosure is appropriate under the rules of procedure governing the case or matter in which the demand arose;

(7) Whether disclosure is appropriate under the relevant substantive law concerning privilege;

(8) Whether disclosure would reveal a confidential source or informant, unless the investigative agency and the source or informant have no objection;

(9) Whether disclosure would reveal investigatory records compiled for law enforcement purposes, and would interfere with enforcement proceedings or disclose investigative techniques and procedures the effectiveness of which would thereby be impaired.

Subpart E—Exemption of Records Systems Under the Privacy Act

§ 802.28 Exemption of the Court Services and Offender Supervision Agency System—limited access.

The Privacy Act permits specific systems of records to be exempt from some of its requirements.

(a)(1) The following systems of records are exempt from 5 U.S.C. 552a(c)(3) and (4), (d), (e)(1)–(3), (4)(G)–(I), (5) and (8), (f) and (g):

(i) Background Investigation (CSOSA–2).

(ii) Supervision Offender Case File (CSOSA–9).

(iii) Pre-Sentence Investigations (CSOSA–10).

(iv) Supervision & Management Automated Record Tracking (SMART) (CSOSA–11).

(v) Recidivism Tracking Database (CSOSA–12).

(vi) Employment Profile (CSOSA–14).

(vii) Substance Abuse Treatment Database (CSOSA–15).

(viii) Screener (CSOSA–16).

(ix) Sex Offender Registry (CSOSA–18).

(2) Exemptions from the particular subsections are justified for the following reasons:

(i) From subsection (c)(3) because offenders will not be permitted to gain access or to contest contents of these record systems under the provisions of subsection (d) of 5 U.S.C. 552a. Revealing disclosure accountings can compromise legitimate law enforcement activities and CSOSA responsibilities.

(ii) From subsection (c)(4) because exemption from provisions of subsection (d) will make notification of formal disputes inapplicable.

(iii) From subsection (d), (e)(4)(G) through (e)(4)(I), (f) and (g) because exemption from this subsection is essential to protect internal processes by which CSOSA personnel are able to formulate decisions and policies with regard to offenders, to prevent disclosure of information to offenders that would jeopardize legitimate correctional interests of rehabilitation, and to permit receipt of relevant information from other federal agencies, state and local law enforcement agencies, and federal and state probation and judicial offices.

(iv) From subsection (e)(1) because primary collection of information directly from offenders about criminal history or criminal records is highly impractical and inappropriate.

(A) It is not possible in all instances to determine relevancy or necessity of specific information in the early stages of a criminal or other investigation.

(B) Relevance and necessity are questions of judgment and timing; what appears relevant and necessary when collected ultimately may be deemed unnecessary. It is only after the information is assessed that its relevancy and necessity in a specific investigative activity can be established.

(C) In interviewing individuals or obtaining other forms of evidence or information during an investigation, information could be obtained, the nature of which would leave in doubt its relevancy and necessity. Such information, however, could be relevant to another investigation or to an investigative activity under the jurisdiction of another agency.

(v) From subsection (e)(2) because the nature of criminal and other investigative activities is such that vital information about an individual can only be obtained from other persons who are familiar with such individual and his/her activities. In such investigations it is not feasible to rely upon information furnished by the individual concerning his/her own activities.

(vi) From subsection (e)(3) because disclosure would provide the subject with substantial information which could impede or compromise the investigation. The individual could seriously interfere with investigative activities and could take appropriate steps to evade the investigation or flee a specific area.

(vii) From subsection (e)(8) because the notice requirements of this provision could seriously interfere with a law enforcement activity by alerting the subject of a criminal or other investigation of existing investigative interest.

(viii) Those sections would otherwise require CSOSA to notify an individual of investigatory materials contained in a record pertaining to him/her, permit access to such record, permit requests for its correction (section 552a(d), (e)(4)(G), and (H)); make available to him/her any required accounting of disclosures made of the record (section 552a(c)(3)), publish the sources of records in the system (section 552a(4)(I)); and screen records to insure that there is maintained only such information about an individual as is relevant to accomplish a required purpose of the Agency (section 552(e)(1)). In addition, screening for relevancy to Agency purposes, a correction or attempted correction of such materials could require excessive amounts of time and effort on the part of all concerned.

(b)(1) The following system of records is exempt from 5 U.S.C. 552a(c)(3) and (4), (d), (e)(1)–(e)(3), (4)(H), (5), (8) and (g):

(i) Office of Professional Responsibility Record (OPR) (CSOSA–17).

(ii) [Reserved].

(2) Exemptions from the particular subsections are justified for the following reasons:

(i) From subsection (c)(3) because release of disclosure accounting could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation and the fact that they are subjects of the investigation, and reveal investigative interest by not only the OPR but also by the recipient agency. Since release of such information to the subjects of an investigation would provide them with significant information concerning the nature of the investigation, release could result in activities that would impede or compromise law enforcement such as: the destruction of documentary evidence; improper influencing of witnesses; endangerment of the physical safety of confidential sources, witnesses, and law enforcement personnel; fabrication of testimony; and flight of the subject from the area. In addition, release of disclosure accounting could result in the release of properly classified information which could compromise the national defense or disrupt foreign policy.

(ii) From subsection (c)(4) because this system is exempt from the access provisions of subsection (d) pursuant to subsections (j) and (k) of the Privacy Act.

(iii) From the access and amendment provisions of subsection (d) because access to the records contained in this system of records could provide the subject of an investigation with information concerning law enforcement activities such as that relating to an actual or potential criminal, civil or regulatory violation; the existence of an investigation; the nature and scope of the information and evidence obtained as to his activities; the identity of confidential sources, witnesses, and law enforcement personnel; and information that may enable the subject to avoid detection or apprehension. Such disclosure would present a serious impediment to effective law enforcement where they prevent the successful completion of the investigation; endanger the physical safety of confidential sources, witnesses, and law enforcement personnel; and/or lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony. In addition, granting access to such information could disclose security-sensitive or confidential business information or information that would constitute an unwarranted invasion of the personal privacy of third parties. Amendment of the records would interfere with ongoing investigations and law enforcement activities and impose an impossible administrative burden by requiring investigations to be continuously reinvestigated.

(iv) From subsection (e)(1) because the application of this provision could impair investigations and interfere with the law enforcement responsibilities of the OPR for the following reasons:

(A) It is not possible to detect relevance or necessity of specific information in the early stages of a civil, criminal or other law enforcement investigation, case, or matter, including investigations in which use is made of properly classified information. Relevance and necessity are questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established.

(B) During the course of any investigation, the OPR may obtain information concerning actual or potential violations of laws other than those within the scope of its jurisdiction. In the interest of effective law enforcement, the OPR should retain

2002
UMI

this information as it may aid in establishing patterns of criminal activity, and can provide valuable leads for Federal and other law enforcement agencies.

(C) In interviewing individuals or obtaining other forms of evidence during an investigation, information may be supplied to an investigator which relates to matters incidental to the primary purpose of the investigation but which may relate also to matters under the investigative jurisdiction of another agency. Such information cannot readily be segregated.

(v) From subsection (e)(2) because, in some instances, the application of this provision would present a serious impediment to law enforcement for the following reasons:

(A) The subject of an investigation would be placed on notice as to the existence of an investigation and would therefore be able to avoid detection or apprehension, to improperly influence witnesses, to destroy evidence, or to fabricate testimony.

(B) In certain circumstances the subject of an investigation cannot be required to provide information to investigators, and information relating to a subject's illegal acts, violations of rules of conduct, or any other misconduct must be obtained from other sources.

(C) In any investigation it is necessary to obtain evidence from a variety of sources other than the subject of the investigation in order to verify the evidence necessary for successful litigation.

(vi) From subsection (e)(3) because the application of this provision would provide the subject of an investigation with substantial information which could impede or compromise the investigation. Providing such notice to a subject of an investigation could interfere with an undercover investigation by revealing its existence, and could endanger the physical safety of confidential sources, witnesses, and investigators by revealing their identities.

(vii) From subsection (e)(5) because the application of this provision would prevent the collection of any data not shown to be accurate, relevant, timely, and complete at the moment it is collected. In the collection of information for law enforcement purposes, it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Material which may seem unrelated, irrelevant, or incomplete when collected may take on added meaning or significance as an investigation progresses. The restrictions of this provision could interfere with the preparation of a complete investigation report, and thereby impede effective law enforcement.

(viii) From subsection (e)(8) because the application of this provision could prematurely reveal an ongoing criminal investigation to the subject of the investigation, and could reveal investigation techniques, procedures, and/or evidence.

(ix) From subsection (g) to the extent that this system is exempt from the access and amendment provisions of subsection (d) pursuant to subsections (j)(2), (k)(1), and (k)(2) of the Privacy Act.

§ 802.29 Exemption of the Pretrial Services Agency System.

The Privacy Act permits specific systems of records to be exempt from some of its requirements.

(a)(1) The following systems of records are exempt from 5 U.S.C. 552a(c)(3) and (4), (d), (e)(1)-(3), (4)(G)-(I), (5) and (8), (f) and (g):

(i) Automated Bail Agency Database (ABADABA) (CSOSA/PSA–1).

(ii) Drug Test Management System (DTMS) (CSOSA/PSA–2).

(iii) Interview and Treatment Files (CSOSA/PSA–3).

(iv) Pretrial, Probation and Parole Realtime Information Systems Manager (PRISM) (CSOSA/PSA–6).

(2) Exemptions from the particular subsections are justified for the following reasons:

(i) From subsection (c)(3) because offenders will not be permitted to gain access or to contest contents of these record systems under the provisions of subsection (d) of 5 U.S.C. 552a. Revealing disclosure accountings can compromise legitimate law enforcement activities and CSOSA/PSA responsibilities.

(ii) From subsection (c)(4) because exemption from provisions of subsection (d) will make notification of formal disputes inapplicable.

(iii) From subsection (d), (e)(4)(G) through (e)(4)(I), (f) and (g) because exemption from this subsection is essential to protect internal processes by which CSOSA/PSA personnel are able to formulate decisions and policies with regard to offenders, to prevent disclosure of information to offenders that would jeopardize legitimate correctional interests of rehabilitation, and to permit receipt of relevant information from other federal agencies, state and local law enforcement agencies, and federal and state probation and judicial offices.

(iv) From subsection (e)(1) because primary collection of information directly from offenders about criminal history or criminal records is highly impractical and inappropriate.

(A) It is not possible in all instances to determine relevancy or necessity of specific information in the early stages of a criminal or other investigation.

(B) Relevancy and necessity are questions of judgment and timing; what appears relevant and necessary when collected ultimately may be deemed unnecessary. It is only after the information is assessed that its relevancy and necessity in a specific investigative activity can be established.

(C) In interviewing individuals or obtaining other forms of evidence or information during an investigation, information could be obtained, the nature of which would leave in doubt its relevancy and necessity. Such information, however, could be relevant to another investigation or to an investigative activity under the jurisdiction of another agency.

(v) From subsection (e)(2) because the nature of criminal and other investigative activities is such that vital information about an individual can only be obtained from other persons who are familiar with such individual and his/her activities. In such investigations it is not feasible to rely upon information furnished by the individual concerning his/her own activities.

(vi) From subsection (e)(3) because disclosure would provide the subject with substantial information which could impede or compromise the investigation. The individual could seriously interfere with investigative activities and could take appropriate steps to evade the investigation or flee a specific area.

(vii) From subsection (e)(8) because the notice requirements of this provision could seriously interfere with a law enforcement activity by alerting the subject of a criminal or other investigation of existing investigative interest.

(viii) Those sections would otherwise require CSOSA to notify an individual of investigatory materials contained in a record pertaining to him/her, permit access to such record, permit requests for its correction (section 552a(d), (e)(4)(G), and (H)); make available to him/her any required accounting of disclosures made of the record (section 552a(c)(3)), publish the sources of records in the system (section 552a(4)(I)); and screen records to insure that there is maintained only such information about an individual as is relevant to accomplish a required purpose of the Agency (section 552(e)(1)). In addition, screening for relevancy to Agency purposes, a correction or attempted correction of such materials could require excessive amounts of time and effort on the part of all concerned.

(b) [Reserved].

COURT SERVICES AND OFFENDER SUPERVISION AGENCY FOR THE DISTRICT OF COLUMBIA

Privacy Act of 1974; Notice of New Systems

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Court Services and Offender Supervision Agency for the District of Columbia (CSOSA) gives notice that it proposes to establish the following new systems of records for itself and for the Pretrial Services Agency, an independent entity within CSOSA.

Public Affairs File (CSOSA–1). Information in this system relates to matters for which the Office of Legislative, Intergovernmental and Public Affairs has responsibility pursuant to 5 U.S.C. 301. Responsibilities include handling and responding to inquiries from Congress, the DC City Council and the news media. This system covers records relating to Congressional inquiries relating to CSOSA and its employees (identified in the system description below).

Background Investigation (CSOSA–2). Information in this system relates to matters for which the Security Office has responsibility pursuant to Executive Order 10450 and 5 CFR parts 5, 731, 732 and 736. Responsibilities include providing investigatory information for employee suitability determinations to include FBI and name checks. This system covers records relating to CSOSA employee background checks (identified in the system description below).

Employee Credential System (CSOSA–3). Information in this system relates to matters for which Management and Administration has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing investigatory information for employee suitability determinations. This system covers records relating to issuance of CSOSA employee credentials (identified in the system description below).

Proximity Card System (CSOSA–4). Information in this system relates to matters for which Management and Administration has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing security determinations for agency employees. This system covers records relating to CSOSA employee access to agency offices.

Budget System (CSOSA–5). Information in this system relates to matters for which Management and Administration has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing payroll projections for budget purposes. This system covers records relating to CSOSA payroll and budget projections and to track employees by organizations within CSOSA (identified in the system description below).

Payroll and Leave Records (CSOSA–6). Information in this system relates to matters for which Human Resources Management has responsibility pursuant to 5 U.S.C. 301 and 44 U.S.C. 3101. Responsibilities include providing personnel management services to the agency. This system covers records relating to CSOSA employee name and other personal identifying information as well as salaries, leave balances, withholdings and financial allotments (identified in the system description below).

Time and Attendance Records (CSOSA–7). Information in this system relates to matters for which Human Resources Management has responsibility pursuant to 5 CFR, part 630. Responsibilities include maintaining time and attendance reports, leave slips and audit reports on agency employees. This system covers records relating to CSOSA employee time and attendance, leave category, leave balances and organization code.

Training Management System (CSOSA–8). Information in this system relates to matters for which Human Resources Management has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing training to agency employees. This system covers records relating to CSOSA employee training, class schedules and attendance.

Supervision Offender Case File (CSOSA–9). Information in this system relates to matters for which Community Supervision Services has responsibility pursuant to the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33 and 5 U.S.C. 301. Responsibilities include providing supervision for individuals sentenced as District of Columbia offenders who are under parole and/or probation supervision. This system covers records relating to, for example, risk/needs assessment, supervision documentation and case management (identified in the system description below).

Pre-sentence Investigations (CSOSA–10). Information in this system relates to matters for which Community Supervision Services has responsibility pursuant to the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33 and 5 U.S.C. 301. Responsibilities include providing the sentencing judge with criminal and social history investigations on defendants. This system covers records relating to defendants sentenced in the District of Columbia Superior Court (identified in the system description below).

Supervision & Management Automated Record Tracking (SMART) (CSOSA–11). Information in this system relates to matters for which CSOSA has responsibility pursuant to the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33 and 5 U.S.C. 301. Responsibilities include providing supervision for individuals sentenced as District of Columbia offenders who are under parole and/or probation supervision. This system covers records relating to, for example, risk/needs assessment, supervision documentation and case management (identified in the system description below).

Recidivism Tracking Database (CSOSA–12). Information in this system relates to matters for which Community Supervision Services has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing community relations and partnerships and treatment management. This system covers records relating to offenders' employment in the community (identified in the system description below).

Freedom of Information-Privacy Acts System (CSOSA–13). Information in this system relates to matters for which the Office of the General Counsel has responsibility pursuant to 5 U.S.C. 552 and 552a. Responsibilities include providing legal representation and legal advice, ethics advice and processing of FOIA/PA requests for agency records. This system covers records relating to CSOSA FOIA/PA requests and responses (identified in the system description below).

Employment Profile Database (CSOSA–14). Information in this system relates to matters for which Community Justice Programs has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing community relations and partnerships and treatment management. This system covers records relating to offenders employment in the community (identified in the system description below).

Substance Abuse Treatment Database (CSOSA–15). Information in this system relates to matters for which Community Supervision Services has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing community relations and partnerships and treatment management. This system covers records relating to offender substance abuse treatment (identified in the system description below).

Screener Database (CSOSA–16). Information in this system relates to matters for which Community Justice Programs has responsibility pursuant to 5 U.S.C. 301. Responsibilities include providing community relations and partnerships and treatment management. This system covers records relating to offender risk assessments (identified in the system description below).

Office of Professional Responsibility Record (OPR) (CSOSA–17). Information in this system relates to matters for which the Office of Professional Responsibility has oversight pursuant to 5 U.S.C. 301. Responsibilities include auditing, inspecting and investigating agency programs and employee misconduct and preventing waste, fraud and abuse in agency programs. This system covers records relating to CSOSA OPR investigations of staff misconduct (identified in the system description below).

Sex Offender Registry (CSOSA–18). Information in this system relates to matters for which Community Supervision Services has responsibility pursuant to the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33, section 11231–11234 and section 11271–11280. Responsibilities include sex offender registration and sentencing commission issues for individuals sentenced as District of Columbia offenders. This system covers records relating to, for example, sex offender registration (identified in the system description below).

Drug Free Workplace Program (CSOSA–19). Information in this system relates to matters for which Management and Administration has responsibility pursuant to Executive Order 12564. Responsibilities include providing finance and budget information as well as security information for employee suitability determinations. This system covers records relating to CSOSA employee and applicant drug testing (identified in the system description below).

Automated Bail Agency Database (ABA DABA) (CSOSA/PSA–1). Information in this system relates to matters for which PSA has responsibility pursuant the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33, section 11231–11234 and section 11271–11280, 5 U.S.C. 301 and D.C. Code 23, sections 1301–1309. Responsibilities include supervision and monitoring of defendants on pretrial release. This system covers records relating to District of Columbia defendants charged with federal and local misdemeanor and felony charges (identified in the system description below).

Drug Test Management System (DTMS) (CSOSA/PSA–2). Information in this system relates to matters for which PSA has responsibility pursuant the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33, section 11231–11234 and section 11271–11280, 5 U.S.C. 301 and D.C. Code 23, sections 1301–1309. Responsibilities include supervision and monitoring of defendants on pretrial release. This system covers records relating to District of Columbia defendants charged with federal and local misdemeanor and felony charges (identified in the system description below).

Interview and Treatment Files (CSOSA/PSA–3). Information in this system relates to matters for which PSA has responsibility pursuant the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33, section 11231–11234 and section 11271–11280, 5 U.S.C. 301 and D.C. Code 23, sections 1301–1309. Responsibilities include supervision and monitoring of defendants on pretrial release. This system covers records relating to District of Columbia defendants charged with federal and local misdemeanor and felony charges (identified in the system description below).

Payroll Files (CSOSA/PSA–4). Information in this system relates to matters for which the PSA Human Resources has responsibility pursuant to 5 U.S.C. 301 and 44 U.S.C. 3101. Responsibilities include providing personnel management services to the agency. This system covers records relating to PSA employee name and other personal identifying information as well as salaries, leave balances, withholdings and financial allotments (identified in the system description below).

Time and Attendance Files (CSOSA/PSA–5). Information in this system relates to matters for which the PSA Human Resources has responsibility pursuant to 5 CFR, Part 630. Responsibilities include maintaining time and attendance reports, leave slips and audit reports on agency employees. This system covers records relating to PSA employee time and attendance, leave category, leave balances and organization code.

Pretrial, Probation and Parole Realtime Information Systems Manager (PRISM) (CSOSA/PSA–6). Information in this system relates to matters for which PSA has responsibility pursuant the National Capital Revitalization and Self-Government Improvement Act of 1997, Public Law 105–33, section 11231–11234 and section 11271–11280, 5 U.S.C. 301 and D.C. Code 23, sections 1301–1309. Responsibilities include supervision and monitoring of defendants on pretrial release. This system covers records relating to District of Columbia defendants charged with federal and local misdemeanor and felony charges and municipal and traffic violations (identified in the system description below).

A rule document promulgating exemptions for these systems appears in the Proposed Rules Section of today's **Federal Register**.

Title 5 U.S.C. 552a(e)(4) and (11) provide that the public be provided a 30-day period in which to comment on the routine uses of a new system; the Office of Management and Budget (OMB), which has oversight responsibilities under the Act, requires that it be given a 40-day period in which to review the system.

Therefore, please submit any comments by April 15, 2002. The public, OMB and Congress are invited to send written comments to Renee Barley, FOIA Officer, Office of the General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

In accordance with Privacy Act requirements, CSOSA has provided a report on the proposed systems to OMB and Congress.

Dated: March 7, 2002.

Jasper Ormond,

Interim Director, Court Services and Offender Supervision Agency.

Court Services and Offender Supervision Agency for the District of Columbia (Including Pretrial Services Agency)

CSOSA–1

SYSTEM NAME:

Public Affairs File.

SECURITY CLASSIFICATION:

None,

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Office of Legislative, Intergovernmental and Public Affairs Division, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of the United States Congress and the District of Columbia (D.C.) City Council.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Inquiries from Members of Congress and D.C. City Council; (2) Replies to congressional and D.C. City Council inquiries.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

This system is maintained to provide a history of congressional and D.C. City Council inquiries. Also, to provide the capability to control and track correspondence to ensure a timely response and/or any other required action.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Primary use of the system is limited to the Office of Legislative, Intergovernmental and Public Affairs staff and to officials who need access to perform official duties. Records in this system may be disclosed as follows:

A. Information permitted to be released to the news media and that may be made available unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

B. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of an employee, contractor, vendor employed by or offender under supervision of CSOSA and/or PSA.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, State, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. Information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, *e.g.*, the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA or PSA and/or who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, *e.g.*, debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information in this system is stored manually in file jackets in hardcopy (paper copies).

RETRIEVABILITY:

Information is arranged and retrieved alphabetically by the name of the congressional staff member or D.C. City Council member.

SAFEGUARDS:

Information is stored in file cabinets in secured offices or in guarded buildings, and accessed only by authorized, screened personnel.

RETENTION AND DISPOSAL:

Records in this system are retained and disposed of in accordance with General Records Schedule 12.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Office of Legislative, Intergovernmental and Public Affairs, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORD ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual who corresponded with the agency. Requesters should also reasonably specify the record contents being sought. The address is the same as indicated in the Notification procedure.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

Information is derived from the incoming and outgoing correspondence from congressional and/or D.C. City Council members and CSOSA and/or PSA.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None. Although no exemption has been claimed for this system of records, certain information may be duplicative of records contained in another system of records which may have an exemption. In those circumstances, the exemption will still apply.

CSOSA–2

SYSTEM NAME:

Background Investigation.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Management and Administration Division, 633 Indiana Avenue, NW., Washington, DC 20004

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The two systems (Background Investigation Files and Background Investigation Database) maintain records on: (1) Current and former employees of CSOSA; (2) Current or former contract employees; and (3) Applicants for employment with CSOSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Records containing investigative material compiled solely for the purpose of determining suitability, eligibility or qualifications for Federal civilian employment; (2) FBI and other agency name checks.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10450 and 5 CFR parts 5, 731, 732 and 736.

PURPOSE(S):

To provide investigatory information for determinations concerning compliance with Federal personnel regulations and for individual personnel determinations including suitability and fitness for Federal employment, access and security clearances and evaluations of qualifications for performance of contractual services for the Court Services and Offender Supervision Agency.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member(s) in response to an inquiry made at the request of an employee or contractor employed by CSOSA.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

D. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

E. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

F. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

G. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

H. To disclose information to consumer reporting agencies to obtain commercial credit reports.

I. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure to consumer reporting agencies under subsection (b)(12) of the Privacy Act. Disclosure may be made from this system to consumer reporting agencies as defined in the Debt Collection Act of 1982 (31 U.S.C. 3701 (a)(3)) or the Fair Credit Reporting Act (15 U.S.C. 1681a(f)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is maintained manually in file jackets in hardcopy (paper copies) and electronically.

RETRIEVABILITY:

Information is arranged and retrieved alphabetically by the name of the employee, applicant or contractor.

SAFEGUARDS:

The information is stored in GSA approved security containers, which use GP–1 combination locks in a guarded building. Electronic information is stored on a computer which is password protected in a locked office.

RETENTION AND DISPOSAL:

Records in this system are retained and disposed of in accordance with General Records Schedule 18.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Management and Administration, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The Director of the Court Services and Offender Supervision Agency has exempted this system from the provisions of 5 U.S.C. 552a (e)(4)(G).

RECORD ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures. The Director of the Court Services and Offender Supervision Agency has exempted this system from the provisions of 5 U.S.C. 552a (e)(4)(H).

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

The information provided or verified by applicants or employees whose files are on record as authorized, information obtained from current and former employers, co-workers, neighbors, acquaintances, educational records and instructors, and police and credit record checks. The Director of the Court Services and Offender Supervision Agency has exempted this system from the provisions of 5 U.S.C. 552a (e)(4)(I).

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (j),

VOL
67

UMI

(k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–3

SYSTEM NAME:

Employee Credential System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency (CSOSA), Management and Administration Division, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system maintains a record of each employee issued an agency credential with badge or medallion.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

The information is used to maintain a record of each individual issued an agency credential as well as the accountability of each badge and medallion.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional member or staff in response to an inquiry made at the request of an employee employed by CSOSA.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

D. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

E. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

F. Information permitted to be released to the news media and that may be made available unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is stored on a stand-alone computer system in a room which is protected by a control access device.

RETRIEVABILITY:

Information is retrieved by the name and/or social security number of the employee.

SAFEGUARDS:

See storage procedures above.

RETENTION AND DISPOSAL:

Records in this system are retained and disposed of in accordance with General Records Schedule 18.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Management and Administration, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number or similar information). The address is the same as indicated in the notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

The information is provided by employees of CSOSA.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–4

SYSTEM NAME:

Proximity Card System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Management and Administration Division, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Current and former employees and (2) current or former contract employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains the name and proximity card number for each current or former employee or contractor.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

The information is used to track each individual issued an agency proximity card and their associated access control level, as well as the accountability of each card. Also used to ensure the physical security of the employee and work environment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee or contractor.

B. To disclose to other government agencies and to the public whether an individual is a current employee of CSOSA.

C. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

D. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

E. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

F. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

G. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

H. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

I. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is maintained manually in file jackets in hardcopy (paper copies) and electronically.

RETRIEVABILITY:

Information is retrieved by the name and/or identification number of the individual.

SAFEGUARDS:

The information is stored on a computer system that is password protected and located in a room with limited access.

RETENTION AND DISPOSAL:

The information is retained and disposed of in accordance with General Records Schedule 18.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Management and Administration, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

The information provided or verified by employees whose files are on record as authorized and information obtained from current and former employers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–5

SYSTEM NAME:

Budget System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Management and Administration Division, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of CSOSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system maintains a record of each individual employed by the agency. Each record contains the name, social security number, position title, salary and benefits of the individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

The information is used to make payroll projections for budget purposes and to track employees by organization within CSOSA.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee or contractor.

B. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. To the appropriate Federal, state, local, foreign or other public authority

responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is stored on a personal computer which is password protected.

RETRIEVABILITY:

The information can be retrieved by the name and/or personal identifier of the employee.

SAFEGUARDS:

The information is maintained on a server with limited access by user-ID and password.

RETENTION AND DISPOSAL:

The information is retained and disposed of in accordance with General Records Schedule 2.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Management and Administration, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

The information provided by employees and information obtained from current and former employers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–6

SYSTEM NAME:

Payroll and Leave Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of CSOSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information relating to the individual's name, social security number, age, sex, marital status, appointment, tenure, employment status and occupation series. These records also contain data as of the year to date and the most recent pay period with regard to leave earned, used and balances, withholdings and allotments to financial institutions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3101; 5 CFR 550.

PURPOSE(S):

Document employee salary, tax and related information and to track and document employee leave transfers, reinstatements and other leave issues.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member or D.C. City Council member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee or contractor.

B. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

F. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

G. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

H. To provide a copy of an employee's Department of the Treasury Form W–2, Wage and Tax Statement, to the state, city or other local jurisdiction which is authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the state, city or other jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 5516, 5517 or 5520, or in response to a written request from an appropriate official of the taxing jurisdiction. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax their employee is based on a place of residence, place of employment or both.

I. To disclose information to the Department of Agriculture, National Finance Center to effect distribution of pay according to employee directions and other authorized purposes.

J. Release information to the Internal Revenue Service (IRS). Information contained in the system may be disclosed to the IRS to obtain taxpayer mailing addresses for the purpose of locating such taxpayer to collect or compromise a Federal claim against the taxpayer.

K. Information directly related to the identity of debtors and the history of claims contained in the system of records may be disclosed to consumer reporting agencies for the purpose of encouraging repayment of overdue debts. Such disclosures will be made only when a claim is overdue and only after due process steps have been taken to notify the debtor and give him or her a chance to meet the terms of the debt.

L. Information may be released about debtors to the U.S. Treasury or other Federal employers in order to effect salary or administrative offsets. Information contained in the system of records may be disclosed to an employer in order to effect salary or administrative offsets to satisfy a debt owed the United States by that person. Such disclosures will be made only when all procedural steps established by the Debt Collection Act have been taken.

M. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

N. Information may be disclosed to the General Accounting Office during a records management audit or inspection pursuant to GAO's audit authority.

O. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure to consumer reporting agencies under subsection (b)(12) of the Privacy Act. Disclosure may be made from this system to consumer reporting agencies as defined in the Debt Collection Act of 1982 (31 U.S.C. 3701 (a)(3)) or the Fair Credit Reporting Act (15 U.S.C. 1681a(f)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored in individual folders or on computer.

RETRIEVABILITY:

Information is retrieved by the name or personal identifier of the individual.

SAFEGUARDS:

This information is maintained on either a password protected computer or filed in a locked file cabinet in a private office.

RETENTION AND DISPOSAL:

Information is maintained and disposed of in accordance with General Records Schedule 2.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Office of Human Resources, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

(1) Individuals who are current or former employees of the agency; (2) information obtained from current and former employers; (3) National Finance Center.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–7

SYSTEM NAME:

Time and Attendance Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of CSOSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Time and attendance reports, leave slips and audit reports which contain the name, social security number, grade, leave category, leave balances and organization code.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR part 630.

PURPOSE(S):

To provide control, reporting and accounting for employee leave.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member or D.C. City Council member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee or contractor.

B. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting

UMI

individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

F. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

G. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

H. To disclose information to the Department of Agriculture, National Finance Center to effect maintenance of leave.

I. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

J. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is stored manually in individual folders. Electronic access to the information is maintained on a password protected computer.

RETRIEVABILITY:

Information is retrieved by the name of the individual employee.

SAFEGUARDS:

Information is either locked in a file cabinet or in offices that are locked.

RETENTION AND DISPOSAL:

Information is maintained and disposed of in accordance with General Record Schedule 2.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Office of Human Resources, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

(1) Current or former employee; (2) current or former Time and Attendance personnel; (3) current or former employer; (4) National Finance Center staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–8

SYSTEM NAME:

Training Management System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of the agency.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records containing the type and dates of training programs for CSOSA employees.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

To track individual employees and their training history, class schedules, attendance and to ensure prerequisites have been met.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Information is maintained to assist in performing the administrative functions of the Training and Career Development Office and is used to prepare class directories, class rosters and statistical reports.

B. To provide information to a congressional or D.C. City Council member from the record of an individual in response to an inquiry from that congressional or D.C. City Council member made at the request of the employee or contractor.

C. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

D. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored manually in individual file folders and electronically.

RETRIEVABILITY:

Information is retrieved by the name of the individual.

SAFEGUARDS:

The manual records are maintained in locked file cabinets and the automated portion is maintained on a password-protected computer

RETENTION AND DISPOSAL:

Information is maintained and disposed of in accordance with General Records Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Office of Human Resources, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of

employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

(1) Individuals who are now or were employees of the agency; (2) individuals from other Federal, state and local agencies, and (3) individuals from formally established schools who may train agency employees.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA–9

SYSTEM NAME:

Supervision Offender Case File.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. See 28 CFR part 800, Appendix A for field office addresses.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and/or former District of Columbia offenders under parole, supervised release and/or probation supervision. These offenders were sentenced by the D.C. Superior Court.

CATEGORIES OF RECORDS IN THE SYSTEM:

The files may contain but are not limited to presentence information, sentencing information, institutional adjustment (parole only), treatment records, compliance orders, field notes, PD–163 (police report), judgment and commitment orders, program reports, psychiatric reports, assessments, Parole Board and judicial decisions and post-release information to include risk assessment, substance abuse testing, referrals, offender reporting forms, progress and behavior reports and correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

Information is maintained and used to determine risk/needs assessment, supervision documentation, case management and documentation of the offenders' compliance with release conditions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or member or D.C. City Council member in response to an inquiry made at the request of a current or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation unless prohibited by 42 CFR part 2.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested unless prohibited by 42 CFR part 2.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation unless prohibited by 42 CFR part 2.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties unless prohibited by 42 CFR part 2.

F. To provide information relating to D.C. offenders to Federal, local and state courts, court personnel and probation officials to the extent necessary to accomplish their assigned duties unless prohibited by 42 CFR part 2.

G. To provide information to employers or prospective employers concerning an offender's criminal history and other pertinent information where there is a foreseeable risk of harm unless prohibited by 42 CFR part 2.

H. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906 unless prohibited by 42 CFR part 2.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored manually in file folders.

RETRIEVABILITY:

Information can be retrieved by the name of the offender or by the DC Department of Corrections (DCDC) number.

SAFEGUARDS:

Information is maintained manually in file cabinets which are kept in locked offices.

RETENTION AND DISPOSAL:

Information will be maintained for 20 years after expiration of parole and/or probation supervision.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Supervision Services, Court Services and Offender Supervision Agency, 300 Indiana Avenue, NW., Room 2132, Washington, DC 20001.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) Federal, state and local law enforcement agencies; (3) state and Federal probation agencies; (4) relatives, friends, and other community individuals; (5) evaluation, observations, and findings of agency staff and treatment staff; and (6) employers and/or social service agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8), (f) and (g) of the Privacy Act pursuant to 5

UMI

U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–10

SYSTEM NAME:

Pre-sentence Investigations.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and/or former District of Columbia offenders under parole and/or probation supervision. These offenders were sentenced in the D.C. Superior Court.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain but are not limited to D.C. Superior Court information, offender information, details of the casework performed by CSOSA staff and a completed copy of the pre-sentence report (investigation).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

At the direction of a sentencing judge, criminal and social histories investigations of defendants are performed by staff to aid the judge in the disposition of the defendant's criminal case.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current and/or former offender, supervised by CSOSA.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, local or foreign, which requires information relevant to a civil or criminal investigation.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties.

F. To provide information relating to D.C. defendants to Federal, local and state courts, court personnel and probation officials to the extent necessary to accomplish their assigned duties.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored manually in individual file folders or electronically on password protected computers or on microfilm.

RETRIEVABILITY:

Information is retrieved by the name of the individual, case number assigned or police department identification (PDID) number.

SAFEGUARDS:

Information is kept in a locked file room with access by authorized personnel only.

RETENTION AND DISPOSAL:

Information will be maintained for 20 years after expiration of parole and/or probation supervision.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Supervision Services, Court Services and Offender Supervision Agency, 300 Indiana Avenue, NW., Room 2132, Washington, DC, 20001.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) Federal, state and local law enforcement agencies; (3) state and Federal probation agencies; (4) relatives, friends, and other community individuals; (5) evaluation, observations and findings of agency staff and treatment staff; and (6) employers, schools (primary and secondary), colleges/universities, social agencies and public defenders.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–11

SYSTEM NAME:

Supervision & Management Automated Record Tracking (SMART)

SECURITY CLASSIFICATION:

None

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former offenders sentenced by the D.C. Superior Court and currently on parole and/or probation or supervised release.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. *Identification Data Records:* Stores client's base record containing identification, socio-demographical and case status information (i.e., DCDC number, name, aliases, police department ID number, social security

number, date of birth, current location, full term date, parole/probation/probation eligibility date, date of parole/probation or probation status, date off parole/probation or probation status.)

2. *Substance Abuse Data Records:* Stores substance abuse testing information on up to four illegal drugs for each client if applicable.

3. *Release Data Records:* Stores information on each time the client is released from D.C. Department of Corrections custody, if applicable.

4. *Special Events Data Records:* Stores special event information for each client while incarcerated through supervision until the sentence expires.

5. *File Folder Tracking Data Records:* Stores information on last time a client's case folder was checked out of the file room, by whom and for what reason.

6. *Reports Received Data Records:* Stores information on all reports received by the USPC and/or Superior Court except for Face Sheets, PV Face Sheets, Reports of Alleged Violations and Work Release Violations.

7. *Work Release Violation Reports Data Records:* Stores information on Work Release Violation reports received by the USPC and/or Superior Court.

8. *Reports of Alleged Violations Data Records:* Stores information on all Reports of Alleged Violations received by the USPC and/or Superior Court including date report prepared, and the state where alleged violations were committed.

9. *Sentence Data Records:* Stores information on new and updated Face Sheets (FS) received by the USPC and/or Superior Court including date update received, prepared, minimum aggregate sentence, maximum aggregate sentence, full term date, mandatory release/short term date parole/probation eligibility date, reason PED was changed, maximum supervision date.

10. *Offense Data Record:* Stores offense information listed on new Face Sheet received by the USPC and/or Superior Court including Court's case number, date sentenced, minimum sentence, maximum sentence, whether consecutive or concurrent sentence, type of sentence.

11. *Detainer Data Records:* Stores detainer information listed on Face Sheets received by the USPC and/or Superior Court including jurisdiction placing detainer, and the date detainer was logged.

12. *Conduct Credit Data Records:* Stores conduct credit information listed on Face Sheets received by the USPC and/or Superior Court including date started credit time, number of days credited, number of days forfeited, number of forfeited days restored, and remaining number of days balance.

13. *Time Credit Data Records:* Stores time credit information listed on new and updated Face Sheets received by the USPC and/or Superior Court including type of time credit, date time credit started, date time credit ended, and the number of days credited.

14. *Parole/probation Violator Face Sheet Data Records:* Stores information on Parole/probation Violator Face Sheets (PV–FS) received by the USPC and/or Superior Court including date PV-FS prepared, date PV–FS received, case number (assigned by the Court), full term date, mandatory release/short term date, maximum date of supervision, time owed, and the date warrant executed.

15. *Hearing Calendar Data Records:* Stores list of hearing and non-hearing events scheduled for USPC Members and Hearing Examiners. Include name of hearing official, date of event, and the docket number.

16. *Hearing Data Records:* Stores information on each client's scheduled hearing. A record is added to the file each time a client is scheduled for a hearing. Includes hearing docket number, type of consideration, the hearing outcome, the hearing recommendation, date case into office docket, and the date case came out of office docket.

17. *Non-Hearing Data Records:* Stores information each time a case is presented to the USPC through a non-hearing docket. Includes non-hearing docket number, date office docket prepared, date into office docket, date out of office docket, analyst who reviewed the case, type of consideration, outcome of the review, and the analyst's recommendation.

18. *USPC and/or Superior Court Order Data Records:* Stores USPC and/or Superior Court Order information for every case presented to the USPC and/or Superior Court for review thru a hearing or non-hearing docket. A minimum of one record is added to the file per case per docket. Includes disposition, date USPC and/or Superior Court made decision, and any special conditions/instructions.

19. *Conditions Data Records:* Stores information on special conditions and instructions imposed by the USPC and/or Superior Court, or a Community Supervision officer.

20. *Parole/probation Certificates Data Records:* Stores information on parole/probation certificates issued by the USPC and/or Superior Court. Only one certificate can be issued per USPC and/or Superior Court Order. Includes hearing/non-hearing docket number, date certificate was issued, and the type of certificate issued.

21. *Parole/probation Plan Data Records:* Stores information on parole/probation plan requested and plan status. When the USPC and/or Superior Court grant parole/probation, a record is added to the file if the DCDC number does not already exist. Otherwise, the existing record is updated. Includes type of plan requested, date plan was requested, person requested plan, and the plan/report due date.

22. *Case Assignment Data Records:* Stores parole/probation supervision case assignment information for each client granted parole/probation. When the USPC and/or Superior Court grant parole/probation, a record is added to the file if the DCDC number does not already exist. Otherwise, the existing record is updated. Includes parole/probation supervision unit assigned, date parole/probation unit assigned, community supervision officer (CSO) assigned, date CSO assigned, CSO's phone number, and the supervision level assigned.

23. *Field Contact Data Records:* Stores field supervision information for scheduled and unscheduled contacts between parolee/probationer and the CSO. Date CSO made contact. Includes type of contact, location where contact was established, and the purpose of contact.

24. *Order to Appear for Revocation Data Records:* Stores information on Orders to Appear for Revocation issued by the USPC and/or Superior Court on non-hearing cases presented for review. Includes date PDS issued OAR, hearing/non-hearing docket number, date PSS received OAR, date OAR sent to CSO, and the date served OAR returned to PDS.

25. *OAR Contact Data Records:* Stores information on attempts to service the OAR issued by the USPC and/or Superior Court.

26. *Warrant Issued Data Records:* Stores information on warrant issued by the USPC and/or Superior Court as a result of a Report of Alleged Violation.

27. *Notice of Rights Data Records:* Stores information on Notices Of Rights that must be served by the USPC and/or Superior Court as a result of a warrant being executed.

28. *Housing Data Records:* Stores residence information verified by parole/probation officers as part of a client's parole/probation plan and case supervision. Includes street address.

29. *Job/Employment Data Records:* Stores employment information verified by CSOs as part of a client's parole/probation plan and case supervision. For each job held, a record is added to

VOL
67
ISS
51
MR
15
2002
UMI

the file. Includes job description and employer.

30. *Programs Data Records:* Stores information on academic, vocational and/or treatment programs in which the client enrolls/participates. Includes program name, date started program, date finished program, and the type of program.

31. *Narcotics Data Records:* Stores information on urine test surveillance program in which a client must participate as a condition for parole/probation. For each urine sample collected, a record is added to the file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The District of Columbia parole/probation statute authorizes to USPC and/or Superior Court of Parole/probation (integrated into CSOSA on August 5, 1997 by the National Capital Revitalization and Self-Government Act—D.C. Code 24–1231) to determine if and when to terminate parole/probation or conditional release or to modify the terms or conditions of parole/probation or conditional release. Also see D.C. Code 24–201.2, D.C. Code 24–205, D.C. Code 24–201.3, 28 DCMR 217.x

PURPOSE(S):

Information maintained in the system is used to assist the Court Services and Offender Supervision Agency (CSOSA), USPC and/or Superior Court in monitoring the compliance with conditions of release of parolees, probationers, and supervised releasees, in measuring adjustment to and progress under community supervision and in protecting the safety of the public.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Relevant information contained in this system of records may be disclosed as follows:

A. To a Member of Congress or congressional office staff member or D.C. Council member or D.C. Council office staff member in response to an inquiry made at the request of a current or former offender under CSOSA supervision.

B. To any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation to the extent necessary to accomplish their assigned duties.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

E. To Federal, state, and local authorities participating in the JUSTIS database system through database access to limited information to permit a determination of an individual's status on parole, probation, or supervised release and the assigned supervision officer to the extent necessary for the accomplishment of the participating authorities' assigned duties. The participants in the JUSTIS database that will have limited access to CSOSA's SMART information are the Federal Bureau of Prisons, the D.C. Department of Corrections, the D.C. Superior Court, the Metropolitan Police Department, the D.C. Pretrial Services Agency, the United States Attorney's Office for the District of Columbia, the United States Marshals Service, and the United States Parole Commission.

F. To provide an information source for contract or treatment facilities that provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The SMART database and processing programs are hosted on servers, which are managed by CSOSA IT Staff. The system provides online data entry and query in a real-time fashion using preformatted input/output screens.

RETRIEVABILITY:

Information can be retrieved by name, DCDC number, PDID number, Social Security Number, FBI number, and Interstate Compact Number. 22

SAFEGUARDS:

The server room is locked; access to the servers are restricted and end users must have a valid User ID and password before they can gain access to the one processing program they have been authorized to use.

RETENTION AND DISPOSAL:

Information in this system will be destroyed 20 years after date of last entry.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Technology Officer, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) Federal, state and local law enforcement agencies; (3) state and Federal probation services; (4) relatives, friends, and other community individuals; (5) evaluation, observations and findings of agency staff and treatment staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–12

SYSTEM NAME:

Recidivism Tracking Database.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Community Supervision Services, 300 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former offenders under agency supervision.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, police department identification number (PDID), DC Department of Corrections number (DCDC), type of supervision, offense code, docket number, source of information, pretrial release status, police service area and arrest and conviction information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

To track and detail all official incidents of recidivism by offenders under the jurisdiction of the agency.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties.

F. To provide information relating to D.C. offenders to Federal, local and state courts, court personnel and probation officials to the extent necessary to accomplish their assigned duties.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored in paper format and electronically on a computer which is password protected.

RETRIEVEABILITY:

Information is retrieved by the name, DCDC or PDID number assigned to the individual.

SAFEGUARDS:

The electronic database is protected by a password and only authorized staff have access. Paper copies are maintained in a locked file cabinet.

RETENTION AND DISPOSAL:

Records will be maintained for 20 years after expiration of sentence.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Supervision Services, Court Services and Offender Supervision Agency, 300 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender, (2) agency staff, (3) treatment facilities, (4) Federal, state and local law enforcement agencies, (5) U.S. Parole Commission and (6) Federal, state and local courts and court personnel.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–13

SYSTEM NAME:

Freedom of Information-Privacy Acts System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Individuals or organizations who have requested access to information pursuant to the Freedom of Information Act or Privacy Act; (2) individuals who have made a request to access or correct records pertaining to themselves; and (3) persons who, on behalf of another individual, have made a request to access or correct that individual's records.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Records contain Freedom of Information Act and Privacy Act requests for CSOSA/PSA records requested and any other correspondence or internal memoranda related to the processing of these requests. Records will also contain such data as the name of requester, address of requester, subject of request. (2) Documents relevant to appeals and litigation under the Freedom of Information Act and Privacy Act.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 552 and 552a.

PURPOSE(S):

To assist CSOSA staff in carrying out their responsibilities under the Freedom of Information Act and the Privacy Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Public information permitted to be released to the news media and the public may be made available unless it is determined that release of the specific information in the context of a

VOL 67 ISS 51 MR 15 2002 UMI

particular case would constitute an unwarranted invasion of personal privacy.

B. Disclosure may be made to a congressional office. Member of Congress or member of the D.C. City Council in response to an inquiry made at the request of an employee, contractor, vendor or offender (current and/or former) employed by or under supervision of CSOSA and/or PSA.

C. Information may be disseminated to a Federal agency which furnished the record for the purpose of permitting a decision as to access or correction to be made by that agency or for the purpose of consulting with that agency as to the propriety of access or correction.

D. Records may be disseminated to any appropriate Federal, state, local or foreign agency for the purpose of verifying the accuracy of information submitted by an individual who has requested amendment or correction of records.

E. Release of information to the National Archives and Records Administration (NARA) and to the General Services Administration (GSA): A record may be disclosed to NARA and GSA in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual requests are stored in a locked file cabinet. Automated information is contained on a password-protected computer.

RETRIEVABILITY:

Requests are retrieved and filed under the name and/or personal identifier of the requester or subject of the request.

SAFEGUARDS:

Access to records is limited to CSOSA staff who have a need for the records to perform their official duties. Request files are stored in a locked file cabinet.

RETENTION AND DISPOSAL:

Records are retained and disposed of in accordance with General Records Schedule 14.

SYSTEM MANAGER(S) AND ADDRESS:

General Counsel, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual who corresponded with the agency. Requesters should also reasonably specify the record contents being sought. The address is the same as indicated in the Notification procedure.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

Information is derived from the individuals and/or companies making requests, the system of records searched in the process of responding to requests, and other agencies referring requests for access to or correction of records.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None. Although no exemption has been claimed for this system of records, certain information may be duplicative of records contained in another system of records which may have an exemption. In those circumstances, the exemption will still apply.

CSOSA–14

SYSTEM NAME:

Employment Profile, Database.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency (CSOSA), 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former offenders under agency supervision.

CATEGORIES OF RECORDS IN THE SYSTEM:

Supervision information to include the police department identification number (PDID), DC Department of Corrections number (DCDC), social security number, phone number, address, conviction information, dates supervision begins and ends, education, restrictions, expenses, interests and needs of the offender.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

To track the employment status of offenders. This information is examined to assess the number of employment slots needed for offenders.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current and/or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision.

F. To provide information relating to D.C. defendants to Federal, local and state courts, court personnel and probation officials.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is maintained electronically and manually.

RETRIEVABILITY:

Information can be retrieved by the name, social security number, PDID number or DCDC number.

SAFEGUARDS:

Electronic information is maintained on a password-protected computer. Manual information is maintained in a locked file cabinet in a secured office.

RETENTION AND DISPOSAL:

Records will be maintained for 20 years after expiration of sentence.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Justice Programs, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender and (2) evaluation, observations and findings of agency staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–15

SYSTEM NAME:

Substance Abuse Treatment Database.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency (CSOSA), Community Supervision Services, 300 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former offenders under the supervision of CSOSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, police department identification number (PDID), DC Department of Corrections number (DCDC), supervision status, date referred for treatment, social security number, FBI number, employment status, education level, date of birth, sex, race, reason for referral and drug test information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

To assist staff in tracking offenders through the treatment continuum.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation unless prohibited by 42 CFR part 2.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested unless prohibited by 42 CFR part 2.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation unless prohibited by 42 CFR part 2.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision unless prohibited by 42 CFR part 2.

F. To provide information relating to D.C. defendants to Federal, local and state courts, court personnel and probation officials unless prohibited by 42 CFR part 2.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906 unless prohibited by 42 CFR part 2.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is maintained electronically and manually.

RETRIEVABILITY:

Information can be retrieved by the name of the offender or DCDC or PDID number assigned to the offender.

SAFEGUARDS:

Electronic information is stored on a password-protected computer.

RETENTION AND DISPOSAL:

Records will be maintained for 20 years after expiration of supervision.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Supervision Services, Court Services and Offender Supervision Agency, 300 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) evaluation, observations and findings of agency staff and treatment staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g)

of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–16

SYSTEM NAME:

Screener Database.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency (CSOSA), 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former offenders under CSOSA supervision.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, police department identification number (PDID), DC Department of Corrections number (DCDC), social security number, date of birth, race, sex, type of supervision, offense code, age, education, home address, employment information, criminal history, history of substance abuse and level of supervision.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

To track and detail all screeners (risk assessments) conducted on offenders under the agency's supervision.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation unless prohibited by 42 CFR part 2.

C. To any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested unless prohibited by 42 CFR part 2.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation unless prohibited by 42 CFR part 2.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties unless prohibited by 42 CFR part 2.

F. To provide information relating to D.C. offenders to Federal, local and state courts, court personnel and probation officials to the extent necessary to accomplish their assigned duties unless prohibited by 42 CFR part 2.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906 unless prohibited by 42 CFR part 2.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored electronically at the University of Maryland, 4511 Knox Road, Suite 301, College Park, MD 20740 and paper copies are stored in a locked file and in the offender's supervision file.

RETRIEVABILITY:

Information can be retrieved by the name of the offender and the DCDC or PDID assigned to the offender.

SAFEGUARDS:

Paper copies are maintained in locked files in locked offices, accessible only by unique employee numeric code.

RETENTION AND DISPOSAL:

Records will be maintained for 20 years after expiration of sentence.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Justice Programs, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) Federal, state and local law enforcement agencies; (3) state and Federal probation services; (4) evaluation, observations and findings of agency staff and treatment staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–17

SYSTEM NAME:

Office of Professional Responsibility Record.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

In connection with its investigative duties, the Office of Professional Responsibility (OPR) will maintain records on the following categories of individuals:

(1) Individuals or entities who are or have been the subject of inquiries or investigations conducted by OPR including current or former employees; current and former consultants, contractors and subcontractors with whom the agency has contracted and their employees; and such other individuals or entities in association with CSOSA as it relates to alleged violation(s) of CSOSA's rules of conduct, the Civil Service merit system, and/or criminal or civil law, which may affect the integrity or physical facilities of CSOSA; and (2) Individuals who are witnesses; complainants; confidential or nonconfidential informants; and parties who have been identified by CSOSA or by other agencies, by constituent units of CSOSA, or by members of the general public as potential subjects of or parties to an investigation under the jurisdiction of OPR.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information relating to investigations, including: (1) Letters, memoranda and other documents citing complaints of alleged criminal, civil or administrative misconduct; and (2) Investigative files which include: reports of investigations to resolve allegations of misconduct or violations of law with related exhibits, statements, affidavits or records obtained during investigations; prior criminal or noncriminal records of individuals as they relate to the investigations; reports from or to other law enforcement bodies; information obtained from informants and identifying data with respect to such informants; nature of allegations made against suspects and identifying data concerning such subjects; and public source materials.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

The Office of Professional Responsibility (OPR) for the Court Services and Offender Supervision Agency (CSOSA) will maintain this system of records in order to conduct its responsibilities pursuant to 5 U.S.C. 301. The OPR is directed to conduct and supervise investigations relating to programs and operations of CSOSA; to promote economy, efficiency, and effectiveness in the administration of such programs and operations; and to prevent and detect fraud, waste and abuse in such programs and operations. Accordingly, the records in this system are used in the course of investigating individuals and entities suspected of having committed illegal or unethical acts and in conducting related criminal prosecutions, civil proceedings or administrative actions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records in this system may be disclosed as follows:

A. In the event that records indicate a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by rule, regulation, or other pursuant thereto, or if records indicate a violation or potential violation of a contract, the relevant records may be disclosed to the appropriate agency, whether Federal, state, local, foreign or international, charged with the responsibility of investigating or prosecuting such violation, enforcing or implementing such statute, rule, regulation or order, or with enforcing such contract.

B. A record may be disclosed to a Federal, state, local, foreign or international agency, or to an individual or organization when necessary to elicit information which will assist an investigation, inspection or audit.

C. A record may be disclosed to a Federal, state, local, foreign or international agency maintaining civil, criminal or other relevant information if necessary to obtain information relevant to an OPR decision concerning the assignment, hiring or retention of an individual, the issuance or revocation of a security clearance, the reporting of an investigation of an individual, the letting of a contract, or the issuance or revocation of a license, grant or other benefit.

D. A record may be disclosed to a Federal, state, local, foreign or international agency in response to its request in connection with the assignment, hiring or retention of an individual, the issuance or revocation of a security clearance, the reporting of an investigation of an individual, letting of a contract or the issuance or revocation of a license, grant, or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

E. A record may be disclosed to a Member of Congress or D.C. City Council member or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and the request of, the individual who is the subject of the record.

F. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

G. To provide relevant information to Federal, local, state and foreign courts, court personnel and probation officials.

H. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information in this system is stored manually in file jackets in a locked, fireproof safe and electronically on a password-protected computer.

RETRIEVABILITY:

Entries are arranged numerically and/or alphabetically and are retrieved with reference to the surname of the individual covered by this system of records or the assigned case number.

SAFEGUARDS:

Information and/or manual records are stored in a locked, fireproof safe and office automation equipment in a secured office and accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Records in this system are retained and disposed of 10 years after final review.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Professional Responsibility, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The Director of the Court Services and Offender Supervision Agency has exempted this system from the provisions of 5 U.S.C. 552a (e)(4)(G).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempted from this requirement

VOL
67
ISS
51
MR
15
2002
UMI

pursuant to 5 U.S.C. 552a(j)(2) and (k)(2). To the extent that this system of records is not subject to exemption, it is subject to access. A determination as to exemption shall be made at the time a request for access is received. A request for access to records contained in this system shall be made in writing. Include in this request the full name of the individual involved, his or her current address, date and place of birth, notarized signature, and any other identifying number or information which may be of assistance in locating the record. The requester shall also provide a return address for transmitting the information.

CONTESTING RECORD PROCEDURES:

The major part of this system is exempted from this requirement pursuant to 5 U.S.C. 552a(j)(2) and (k)(2). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for contest is received. Requesters shall clearly and concisely state which information is being contested, the reason for contesting it and the proposed amendment to the information.

RECORD SOURCE CATEGORIES:

The subjects of the investigations; individuals with whom the subjects of investigations are associated; current and former CSOSA employees; officials of Federal, state, local and foreign law enforcement and non-law enforcement agencies; private citizens, witnesses; confidential and nonconfidential informants; and public source materials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

The Director has exempted this system from subsections (c)(3) and (4), (d), (e)(1) through (e)(3), (4)(H), (5) and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a (j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–18

SYSTEM NAME:

Sex Offender Registry.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Community Supervision Services, 300 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and/or former sex offenders, sentenced by a court in the District of Columbia and those offenders sentenced as a sex offender in other jurisdictions who live, work or attend school within the District of Columbia.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal and identifying information, including, but not limited to, photograph, fingerprints, physical description and identifying marks or characteristics, aliases, identifying numbers assigned by law enforcement agencies, home, work and school address, type of automobile owned by offender, criminal history, crime for which offender was convicted, the official version of the offense and the presentence report, the sentence that was imposed and when the offender was released into the community.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Capital Revitalization and Self-Government Improvement Act of 1997, Pub. L. 105–33, sections 11231–11234 and sections 11271–11280 as amended by the District of Columbia Appropriations Act, 2000, and the District of Columbia Sex Offender Registration Act of 1999, 24 DC Code Sections 1117–1137.

PURPOSE(S):

Pursuant to delegation by Congress, the Court Services and Offender Supervision Agency will exercise the powers and functions for the District of Columbia relating to sex offender registration as provided in the District of Columbia Sex Offender Registration Act of 1999.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of a current and/or former offender under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. To any source from which information is requested in the course of an agency investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation and to identify the type of information requested.

D. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

E. To provide information source for contract or treatment facilities who provide services to offenders under CSOSA supervision to the extent necessary to accomplish their assigned duties.

F. To provide information relating to D.C. defendants to Federal, local and state courts, court personnel, pretrial, parole and/or probation officials to the extent necessary to accomplish their assigned duties.

G. To provide information to Federal, state and local law enforcement agencies responsible for monitoring, enforcing and/or implementing a Federal, state or local statute or regulation related to sex offenders.

H. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is maintained in individual file folders and electronically on a password-protected computer.

RETRIEVABILITY:

Information can be retrieved by the name and/or personal identifier assigned to the offender.

SAFEGUARDS:

Information is maintained manually in a locked file cabinet and electronic information is maintained on a password-protected computer with limited access.

RETENTION AND DISPOSAL:

Records will be maintained until the death of the individual.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Community Supervision Services, Court Services and Offender Supervision Agency, 300 Indiana Avenue, NW., Room 2132, Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j).

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Offender; (2) Federal, state and local law enforcement agencies; (3) state and Federal parole or probation services; (4) Federal, state and local courts or court personnel.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA–19

SYSTEM NAME:

Drug Free Workplace Program.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The two systems (Drug Free Workplace Program Files and Drug Free Workplace Program Database) maintain records of each individual who has provided a urine specimen for testing. It also includes employees determined by the Agency to fill a designated testing position subject to random urinalysis testing as well as individuals who have volunteered to be part of the random pool.

CATEGORIES OF RECORDS IN THE SYSTEM:

Each record contains the name, social security number, date of birth as well as the collection information, reason for testing, types of drugs tested for and laboratory results.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 12564, Drug-Free Federal Workplace.

PURPOSE(S):

The information is used to make employment or continued employment determinations. The database is used to randomly select individuals for urinalysis testing.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office or D.C. City Council member in response to an inquiry made at the request of an employee or contractor employed by CSOSA.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

C. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

D. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by CSOSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

E. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where CSOSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

F. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for CSOSA.

G. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is either stored in locked bar file cabinets fitted with combination locks or stored on a stand-alone computer in a room which is protected by a control access device.

RETRIEVABILITY:

The information is retrieved by the name of the individual or by the assigned drug test control number.

SAFEGUARDS:

Information is limited to those agency employees with a need-to-know and is stored in an office protected by a control access device.

RETENTION AND DISPOSAL:

Information is maintained in accordance with General Records Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Management and Administration, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure

VOL
67
ISS

MR
15
2002
UMI

above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

The information provided or verified by applicants or employees whose files are on record as authorized.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA/PSA–1

SYSTEM NAME:

Automated Bail Agency Database (ABA DABA).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004. The database is housed at the Metropolitan Police Department, 300 Indiana Avenue, NW., and the application is used at the following locations: 633, 601, 500 and 300 Indiana Avenue, NW., and 333 Constitution Avenue, NW., Washington, DC.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Defendants charged with federal and local misdemeanor and felony charges, municipal violations and traffic offenses in the District of Columbia.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information includes defendants' personal, health and demographic information, criminal histories, substance abuse information and defendants' personal references.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301 and the National Capital Revitalization and Self-Government Improvement Act of 1997, Pub. L. 105–33, Sections 11231–11234 and Sections 11271–11280.

PURPOSE(S):

Information is used to set bail, provide substance abuse treatment, monitor compliance with release conditions, report compliance with and violations of release conditions and assist with sentencing decisions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office member in response to an inquiry made at the request of a current or former offender under CSOSA/PSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to disposition of a criminal justice matter in accordance with 42 CFR 2.35.

C. To provide information, except substance abuse and mental health treatment information, relating to D.C. defendants to Federal, local and state courts, court personnel, prosecutors, defense attorneys and/or corrections, parole, other pretrial and probation officials.

D. To provide information source for contract or treatment facilities who provide services to defendants under PSA supervision (except substance abuse and mental health treatment information).

E. To provide information to the attorney on record for the defendant (except substance abuse and mental health treatment information).

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is currently stored on the Metropolitan Police Department's mainframe.

RETRIEVABILITY:

Information can be retrieved by the name of the individual, aliases, PDID, Bail Agency ID (BAID) number, case docket number and Bail Agency Case Entry (BACE) number.

SAFEGUARDS:

Information is maintained in a building which has 24-hour security.

RETENTION AND DISPOSAL:

Information will be retained for 20 years after disposition of charge(s).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Defendant; (2) Federal, state and local law enforcement agencies; (3) local, state and Federal corrections; (4) Federal, state and local probation, parole and pretrial services; (5) relatives, friends, and other community individuals; (6) evaluation, observations and findings of agency staff, treatment staff and other social service agencies/staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA/PSA–2

SYSTEM NAME:

Drug Test Management System (DTMS).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Pretrial Services Agency (PSA), 633 Indiana Avenue, NW., Washington, DC 20004. The main server is located at 500 Indiana Avenue, NW., Room C–225 and the application is on workstations at all PSA and Community Supervision Services locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals charged with federal and local misdemeanor and felony charges, municipal violations and traffic offenses in the District of Columbia and on probation and parole for local offenses.

CATEGORIES OF RECORDS IN THE SYSTEM:

Substance abuse testing and treatment information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Capital Revitalization and Self-Government Improvement Act of 1997, Pub. L. 105–33, sections 11231–11234 and Sections 11271–11260 and 5 U.S.C. 301.

PURPOSE(S):

Information is used to determine bail, make recommendations for sentencing, provide substance abuse treatment, monitor compliance with release conditions and report compliance with and violations of release conditions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office in response to an inquiry made at the request of a current and/or former offender/defendant under CSOSA/PSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to disposition of a criminal justice matter in accordance with 42 CFR 2.35.

C. To provide information relating to D.C. defendants and offenders to Federal, local and state courts, court personnel, prosecutors, defense attorneys, corrections, probation, parole and other pretrial officials (except substance abuse and mental health treatment information).

D. To provide information source for contract or treatment facilities who provide services to defendants under PSA supervision (except substance abuse and mental health treatment information).

E. To provide information to the attorney of record for the defendant (except substance abuse and mental health treatment information).

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic information is maintained on a computer which is password-protected and accessed by the personal identifier assigned.

RETRIEVABILITY:

Information can be retrieved by the name of the individual, aliases and PDID, temporary ID numbers and by an "A" number.

SAFEGUARDS:

Information is maintained on a password-protected computer.

RETENTION AND DISPOSAL:

Records will be retained for 20 years after disposition of charge(s).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a (j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Defendant and Offender, (2) treatment facility staff, (3) Federal, state and local law enforcement agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA/PSA–3

SYSTEM NAME:

Interview and Treatment Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004, 500 Indiana Avenue, NW., 601 Indiana Avenue, NW., 300 Indiana Avenue, NW., and 333 Constitution Avenue, NW.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Defendants charged with federal and local misdemeanor and felony charges, municipal violations and traffic offenses in the District of Columbia.

CATEGORIES OF RECORDS IN THE SYSTEM:

Interview information, criminal history and treatment assessments.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

Information is used to determine bail, provide substance abuse treatment, monitor compliance with release conditions and report compliance with and violations of release conditions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office in response to an inquiry made at the request of a current and/or former offender/defendant under CSOSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to disposition of a criminal justice matter in accordance with 42 CFR 2.35.

C. To provide information relating to D.C. defendants to Federal, local and state courts, court personnel, prosecutors, defense attorneys, and corrections, probation, parole and/or other pretrial officials except substance abuse and mental health treatment information.

D. To provide information source for contract or treatment facilities who provide services to defendants under PSA supervision (except substance abuse and mental health treatment information).

E. To provide information to the attorney on record for the defendant (except substance abuse and mental health treatment information).

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

VOL 67 ISS 51 MR 15 2002 UMI

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual files (paper copies) are maintained in locked file cabinets.

RETRIEVABILITY:

Information can be retrieved by the name of the individual or by the Bail Agency Case Entry (BACE) number.

SAFEGUARDS:

Files are kept in locked drawers and behind locked doors.

RETENTION AND DISPOSAL:

Records will be retained for 5 years after disposition of charge(s).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as Records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Defendant, (2) Federal and local law enforcement agencies, (3) family and friends, (4) substance abuse treatment and medical facilities, and (5) Federal and local courts, (6) Federal, state and local corrections, pretrial, probation and parole agencies, and (7) evaluation, observations and findings of agency staff, treatment staff and other social service agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register**.

CSOSA/PSA–4

SYSTEM NAME:

Payroll Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of PSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information relating to the individual's name, social security number, age, sex, marital status, appointment, tenure, employment status and occupation series. These records also contain data as of the year to date and the most recent pay period with regard to leave earned, used and balances, withholdings and allotments to financial institutions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101 and 5 CFR part 550.

PURPOSE(S):

Document employee salary, tax and related information.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee.

B. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by PSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

F. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where PSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

G. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

H. To provide a copy of an employee's Department of the Treasury Form W–2, Wage and Tax Statement, to the state, city or other local jurisdiction which is authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the state, city or other jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 5516, 5517 or 5520, or in response to a written request from an appropriate official of the taxing jurisdiction. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax their employee is based on a place of residence, place of employment or both.

I. To disclose information to the Department of Agriculture, National Finance Center, to effect distribution of pay according to employee directions and other authorized purposes.

J. Release information to the Internal Revenue Service (IRS). Information contained in the system may be disclosed to the IRS to obtain taxpayer mailing addresses for the purpose of locating such taxpayer to collect or compromise a Federal claim against the taxpayer.

K. Information directly related to the identity of debtors and the history of claims contained in the system of records may be disclosed to consumer reporting agencies for the purpose of encouraging repayment of overdue debts. Such disclosures will be made only when a claim is overdue and only after due process steps have been taken to notify the debtor and give him or her a chance to meet the terms of the debt.

L. Information may be released about debtors to the U.S. Treasury or other Federal employers in order to effect salary or administrative offsets. Information contained in the system of records may be disclosed to an employer in order to effect salary or administrative offsets to satisfy a debt owed the United States by that person. Such disclosures will be made only when all procedural steps established by the Debt Collection Act have been taken.

M. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for PSA.

N. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure to consumer reporting agencies under subsection (b)(12) of the Privacy Act. Disclosure may be made from this system to consumer reporting agencies as defined in the Debt Collection Act of 1982 (31 U.S.C. 3701 (a)(3)) or the Fair Credit Reporting Act (15 U.S.C. 1681a(f)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is stored manually in individual folders.

RETRIEVABILITY:

Information is retrieved by the name or personal identifier of the individual.

SAFEGUARDS:

The information is maintained in a locked file cabinet.

RETENTION AND DISPOSAL:

Information is maintained and disposed of in accordance with General Records Schedule 2 and the Code of Federal Regulations. The period of retention will not exceed 6 years and 3 months.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

(1) Individuals who are current or former employees of the agency, and (2) Information obtained from current and former employers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA/PSA–5

SYSTEM NAME:

Time and Attendance Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of PSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Time and attendance reports, leave slips and audit reports which contain the name, social security number, grade, leave category, leave balances and organization code.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR part 630.

PURPOSE(S):

To provide control, reporting and accounting for employee leave and pay.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. To provide information to a congressional member from the record of an individual in response to an inquiry from that congressional member made at the request of the employee.

B. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the government is a party to the judicial or administrative proceeding.

C. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to a civil or criminal investigation.

D. Information may be disclosed to officials and employees of any Federal agency which requires information relevant to an agency decision concerning the hiring, appointment or retention of an employee; the issuance of a security clearance; the execution of a security or suitability investigation or the classification of a job.

E. Relevant information may be disclosed in a proceeding before an administrative forum, including Ad Hoc forums, which may or may not include an Administrative Law Judge, and which may or may not convene public hearings/proceedings, or to other established adjudicatory or regulatory agencies, e.g., the Merit Systems Protection Board, the Federal Labor Relations Authority, or other agencies with similar or related statutory responsibilities, where necessary to adjudicate decisions affecting individuals who are employed by PSA and who are covered by this system, including (but not limited to) decisions to effect any necessary remedial actions, e.g., debt collection activity, disciplinary and/or other appropriate personnel actions, and/or other law enforcement related actions, where appropriate.

F. To the appropriate Federal, state, local, foreign or other public authority responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order where PSA becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

G. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

H. To disclose information to the Department of Agriculture, National Finance Center to effect maintenance of pay and leave.

I. To disclose information to contractors, grantees, experts, consultants or volunteers performing or working on a contract, service or job for PSA.

J. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is stored manually in individual folders and electronically on a computer and computer disks.

RETRIEVABILITY:

Information can be retrieved by the name and/or social security number of the individual.

SAFEGUARDS:

Information is maintained in a locked file cabinet.

RETENTION AND DISPOSAL:

Information is maintained and disposed of in accordance with General Record Schedule 2 and the Code of Federal Regulations. The period of retention will not exceed 6 years and 3 months.

SYSTEM MANAGER(S) AND ADDRESS:

Human Resources Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

To locate a specific record, you must provide the name of the individual and provide at least two items of identification (date of birth, employee identification number, dates of employment or similar information). The address is the same as indicated in the Notification procedures.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification procedure above and reasonably identify the record and specify the information to be contested.

RECORD SOURCE CATEGORIES:

(1) Current or former employee; (2) current or former Time and Attendance personnel; (3) current or former employer; (4) National Finance Center staff.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CSOSA/PSA–6

SYSTEM NAME:

Pretrial, Probation and Parole Realtime Information Systems Manager (PRISM).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Court Services and Offender Supervision Agency (CSOSA), Pretrial Services Agency (PSA), 633 Indiana Avenue, NW., Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Defendants charged with federal and local misdemeanor and felony charges, municipal violations and traffic offenses in the District of Columbia and (2) Individuals charged with federal and local misdemeanor and felony charges, municipal violations and traffic offenses in the District of Columbia and on probation and parole for local offenses.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information includes defendants' personal, health and demographic information, criminal histories, substance abuse information to include assessments, testing and treatment, defendants' personal references and interview information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Capital Revitalization and Self-Government Improvement Act of 1997, Pub. L. 105–33, sections 11231–11234 and sections 11271–11260; 5 U.S.C. 301 and DC Code 23, sections 1301–1309.

PURPOSE(S):

Information is used to set bail, provide substance abuse treatment, monitor and supervise compliance with release conditions, report compliance with and violations of release conditions and assist with sentencing decisions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A. Disclosure may be made to a congressional office in response to an inquiry made at the request of a current and/or former offender/defendant under CSOSA/PSA supervision.

B. Information may be disclosed to any civil or criminal law enforcement agency, whether Federal, state, or local or foreign, which requires information relevant to disposition of a criminal justice matter in accordance with 42 CFR 2.35.

C. To provide information relating to D.C. defendants and offenders to Federal, local and state courts, court personnel, prosecutors, defense attorneys, corrections, probation, parole and other pretrial officials (except substance abuse and mental health treatment information).

D. To provide information source for contract or treatment facilities who provide services to defendants under PSA supervision (except substance abuse and mental health treatment information).

E. To provide information to the attorney on record for the defendant (except substance abuse and mental health treatment information).

F. A record may be disclosed to the National Archives and Records Administration and to the General Services Administration during a records management inspection conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The information is stored electronically. Only authorized personnel have access to the information.

RETRIEVABILITY:

Information can be retrieved by the name of the individual, aliases and PDID, temporary ID numbers, "A" number, Bail Agency ID (BAID) number, case docket number and Bail Agency Case Entry (BACE) number.

SAFEGUARDS:

The server room is locked; access to the server is restricted and end users must have a valid User ID and password before they can gain access.

RETENTION AND DISPOSAL:

Information will be retained for 20 years after disposition of charge(s).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pretrial Services Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

NOTIFICATION PROCEDURE:

Inquiries concerning this system should be directed to the Freedom of Information Act Office, Court Services and Offender Supervision Agency, 633 Indiana Avenue, NW., Washington, DC 20004.

RECORDS ACCESS PROCEDURES:

The major part of this system is exempt from this requirement under 5 U.S.C. 552a(j). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received.

CONTESTING RECORD PROCEDURES:

Same as records access procedures above.

RECORD SOURCE CATEGORIES:

(1) Defendants; (2) Federal, state and local law enforcement agencies; (3) local, state and Federal corrections; (4) Federal, state and local probation, parole and pretrial services; (5) relatives, friends, and other community individuals; and (6) evaluation, observations and findings of agency staff, treatment providers and other social services agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a (c)(3) and (4), (d), (e)(1), (2), (3), (4)(G) through (4)(I), (5), and (8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). In addition, the system has been exempted from subsections (c)(3), (d) and (e)(1) pursuant to subsections (k)(1) and (k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register.**

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4710–N–05]

Public Housing Assessment Systems (PHAS); Notice Adopting Interim Scoring Methodologies for PHAS Physical Condition and Financial Condition Indicators

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: This notice announces to Public Housing Agencies (PHAs) and the public that PHAs with fiscal years ending September 30, 2001, through and including September 30, 2002, will be assessed under the PHAS in accordance with interim scoring procedures described in notices published in the **Federal Register** on November 26, 2001. This notice also addresses public comments received in response to a request for comments in the November 26, 2001, notices. The Department considered all comments but has decided to make no changes to the interim scoring procedures in response to the public comments. This notice also advises that if the Department determines that the effective period of the interim scoring processes should be extended beyond September 30, 2002, the Department will notify PHAs and the public by notice published in **Federal Register**.

DATES: *Effective Date:* March 15, 2002.

FOR FURTHER INFORMATION CONTACT: For further information contact the Real Estate Assessment Center of the Office of Public and Indian Housing, Attention: Wanda Funk, U.S. Department of Housing and Urban Development, 1280 Maryland Avenue, SW., Suite 800, Washington, DC 20024, Telephone Technical Assistance Center as (888) 245–4860 (this is a toll free number) or Judy Wojciechowski, Director of PHAS Operations, U.S. Department of Housing and Urban Development, 1280 Maryland Avenue, SW., Suite 800, Washington, DC 20024, telephone (202) 708–4932 extension 3464. Persons with hearing or speech impairments may access these telephone numbers via TTY by calling the Federal Information Relay Service at (800) 887–8339. Additional information is available from the Real Estate Assessment Center Office of Public and Indian Housing Web site at *http://www.hud.gov/reac.*

SUPPLEMENTARY INFORMATION:

I. Background

On November 26, 2001, HUD published for public comment notices that proposed an interim PHAS scoring methodology that would be applicable to PHAs with fiscal years ending September 30, 2001, and continuing for up to one year to include PHAs with fiscal years ending September 30, 2002. For this interim assessment period, the Department advised that it proposed to make scoring changes to two of the four PHAS assessment indicators: the Financial Condition Indicator and the Physical Condition Indicator. Detailed information about these scoring changes was provided in the notices published on November 26, 2001. Essentially, the Department proposed that for physical condition scoring purposes during the interim assessment period, the inspectable areas will be reduced from five or two. The weights assigned to the three unscored inspectable areas will be redistributed over the two remaining inspectable areas. For financial condition scoring purposes, the Departmental proposed to remove the use of peer groupings from two of the financial components. The Physical Condition Indicator Scoring Process notice was published in the **Federal Register** at 66 FR 59084, and the Financial Condition Indicator Scoring Process notice was published in the **Federal Register** at 66 FR 59126.

The Department solicited public comment on the interim scoring procedures. Eight comments were received in response to the public comment solicitation. The Department carefully considered all comments and has decided to make no changes to the scoring methodologies as a result of the comments.

Accordingly, with the publication of this notice, the Department advises that the PHAS is effective beginning with PHAs having a fiscal year end of September 30, 2001, and PHAs will receive an overall PHAS score based on the four PHAS indicator scores. PHAs with fiscal years ending September 30, 2001, through and including September 30, 2002, will be scored for the Physical Condition Indicator and the Financial Condition Indicator in accordance with the scoring procedures described in the notices published on November 26, 2001. If the Department determines that the effective period of the interim scoring processes should be extended beyond September 30, 2002, the Department will notify PHAs and the public by notice published in the **Federal Register**.

II. Discussion of the Public Comments

Of the eight commenters on the November 26, 2001, notices, five of the commenters were PHAs and the three other commenters were representatives of PHAs. One PHA commenter supported the interim scoring methodologies and the changes to the Physical Condition and Financial Condition Indicators. The other commenters had comments that are discussed below.

Comment. PHAS should not be implemented at this time, except on an advisory basis.

One commenter stated that it is not understandable or acceptable to subject PHAs to scores and potential penalties using an assessment tool that is still under development. For the system to be credible, the system must not continuously redefine itself as public resources are being expended in PHAs' efforts to comply. HUD should continue to implement the PHAS on an advisory basis while HUD continues to work with PHAs, resident organizations and other interested parties to refine the system or find another one that will work. The commenter stated that even in advisory form, the PHAS is a valuable tool for identifying areas that may need improvement. This commenter also stated that the system was overly dependent on the subjectivity of the inspectors.

Another commenter stated that the notices do not improve the PHAS enough to warrant issuance of official scores to PHAs, and there should have been an additional year of advisory scores, under which inspections would have continued and, more importantly, exigent health and safety violations would have been identified and remediated.

Response. While HUD acknowledges that the assessment system can be enhanced, HUD believes that PHAS, as currently amended, is useable for an interim period. The Office of Inspector General (OIG) and the General Accounting Office (GAO) have both indicated that the Public Housing Management Assessment Program (PHMAP), on which the PHAS Management Operations Indicator is substantially based, is not a reliable means of assessing PHA performance. Further, both the OIG and GAO indicated that HUD, as required by statute, must determine the condition of public housing to ensure that funds provided by Congress are being used to provide decent, safe, and sanitary housing that is in good repair. This interim scoring methodology provides for technical reviews, database adjustments, and appeals of overall scores and designation.

Comment. In the Physical Condition Indicator, the reduction of the number of inspectable areas and redistribution of the weights results in unfairness.

Two commenters stated that the notice shifts an inordinate amount of weight to Dwelling Units. One commenter stated that under the interim physical condition scoring procedure, all five areas will be inspected, scored and the inspection data captured in the system, but for assessment purposes, a property's score, and the PHA's overall Physical Condition Indicator score, will be derived only from the deficiencies observed in Building Systems and Dwelling Units. The redistribution of the area weights from Site, Building Exterior, and Common Areas to Building Systems and Dwelling Units and the continued use of a 100 point scale for property scores means heavier weights will be applied to Dwelling Unit items such as a missing sink stopper and PHA's will be "further penalized."

Another commenter stated because the interim scoring process will base the score of the physical assessment on Dwelling Units (64%) and Building Systems (36%), ignoring the scores received for Site, Building Exterior and Common Areas, the "adjusted" normalized weight will shift most of the weight to Dwelling Units for properties that have limited Building Systems components. This PHA estimated that under the interim scoring assessment, the "adjusted" normalized weight for its family developments will shift to 73% for Dwelling Units and 27% for Building Systems.

The commenter further stated that to inspect an entire property and have the "official scores" be uniformly based on only two components, then regardless of the physical and structural considerations of each property, the official score will not provide an accurate reflection of each property's true condition. Under the new formula, this PHA commenter stated that its 2001 Physical Condition Indicator score could be reduced by 10 points—enough so that the exact physical considerations currently rated "standard" may become "at risk."

The commenter also stated that there appears to be a bias toward properties with building systems indicative of East Coast and Midwest housing. However, on the West Coast, the townhouse style properties are spread across acres of land and lack the expected level of building system components as other public housing properties. As a result, shifting the scoring to only Dwelling Units and Building Systems does a disservice to public housing in Southern California.

One commenter stated that PHAs should have the option of being scored on all five physical condition criteria. By only scoring two areas, the notice sends the disturbing message to managers that only those two areas are of importance and the other areas need not be accorded the same level of maintenance. By not according the agency the option to be scored on all five areas, human nature dictates that non-scored areas will experience a decline in attention.

Response. Both HUD and the public housing stakeholders realized that compromises would be necessary in order to proceed with the assessment of PHAs during the interim period. Most PHAs will fare better with the proposed scoring changes, although some will not fare as well.

During the effective period of the interim scoring process, inspectors will inspect all five inspectable areas and record all deficiencies observed. While PHAs will be provided with a complete inspection report reflecting all observed deficiencies, they will be scored only on Dwelling Units and Building Systems. This will enable PHAs to effectively plan short-term maintenance and long-term modernization needs. Accordingly, the inspection does not ignore or diminish the importance of any inspectable area or any deficiency. Both HUD and significant stakeholders believe that this compromise will best serve the interest of the PHAs, the residents, and HUD.

HUD appreciates the suggestion that PHAs be given the option of being scored on all five areas. However, the time, effort and cost to the government of providing this option would not be warranted given the interim nature of these scoring changes.

Comment. Certain health and safety violations should not be scored.

Two commenters asked that the notice specifically state that health and safety violations found in the three areas not scored (Site, Building Exterior, and Common Areas) will not be part of the physical score under the interim assessment process.

Response. In the November 26, 2001, Physical Condition Scoring Process notice (66 FR 59084), the Department stated, "[t]he inspector also will record and report all health and safety deficiencies in each of the five inspectable areas. However, the inspection score for each property will be based only on the information reported by the inspector for the two inspectable areas, Building Systems and Dwelling Units, after the redistribution of the areas' weights for the three non-included areas." Consequently, HUD believes that this issue was addressed in the November 26, 2001, Physical Condition Scoring Process notice.

Comment. Revisions should be made to the overall physical inspection process through confirmatory reviews of inspections, more use of proportionality, and rights to appeal.

Three commenters asked for revisions in the physical inspection process. One commenter argued that, aside from the requirement that PHAs inspect their units annually, there should be a confirmatory inspection by an outside agency chosen by the PHA from a list of firms "recognized" by HUD. Physical inspections should be limited to a set percentage of PHA units to validate the sample, and, when more than one unit is involved, should consider "proportionality with regard to issues such as fencing" (i.e., measuring the overall impact of a deficiency as a percentage, such as percentage of total surface area affected by a deficiency).

The commenters stated that scoring systems must be flexible so they meet the needs of large and small PHAs. Physical inspections should result in numeric scores with a right of appeal, and not a pass-fail grade. Two other commenters agreed with the idea of a confirmatory inspection, stating, "there is a definite need for a third party confirmation audit." These two commenters also stated that the frequency of inspections is not addressed and also not addressed are possible solutions for PHAs that fail inspections.

Response. HUD declines to accept the suggestion that there should be an outside agency to conduct a confirmatory inspection. The Department has several processes in place for inspection review. HUD has its own Quality Assurance inspectors that review the performance of contract inspectors. HUD also has engineers who review the inspection information when it is uploaded to HUD. The PHAS regulation provides for technical reviews, database adjustments and appeals of the overall PHAS scores and designation. As a result, HUD believes that there are adequate procedures available to PHAs to ensure the accuracy of their scores. Further, due to financial constraints, confirmatory reviews are not feasible.

At this time, HUD also declines to adopt the suggestion that units sampled should be limited to a set percentage of PHA units, and, when more than one unit is involved, should consider

2002
UMI

proportionality with regard to issues such as fencing.

HUD chose instead to use a statistically valid random sample method rather than such set percentages at the inception of the PHAS. Educational, scientific and private communities use this methodology when attempting to draw conclusions about a given subject matter. However, in future consultations with public housing stakeholders, HUD intends to consider alternative inspection methodology, which may include the further use of proportionality. With regard to the frequency of the inspections, the PHAS regulation provides for an annual assessment of a PHA, including the physical condition of the PHA's housing stock. The November 26, 2001, physical condition scoring notice provides that where a PHA's score is equal to or greater than 24 points out of the total of 30 points for the Physical Condition Indicator, the PHA will be inspected every other year. If the PHA's Physical Condition Indicator score is less than 24 points, the inspection frequency will be annually. The PHAS regulation does not provide for a failing score for individual inspections. Instead, the regulation assesses the overall condition of all of a PHA's properties. The regulation establishes a threshold of less than 18 points out of a total of 30 points before a PHA is designated as being in substandard physical condition.

It is not the intent of the Department either through its scoring notices or the PHAS regulation to offer possible solutions for PHAs that are designated to be in "substandard physical condition." Rather, it is the purpose of PHAS to provide a measuring tool so that HUD and PHAs can monitor the condition of housing stock and take appropriate action where necessary to ensure that residents are living in housing that is decent, safe, sanitary, and in good repair. The reasons for a PHA to receive a substandard designation vary from PHA to PHA. Once designated to be in "substandard physical condition," the PHA and HUD analyze the root causes for the designation and determine what corrective actions need to be taken which will then be embodied in a Memorandum of Agreement in accordance with the PHAS regulation.

Comment. Clarify the applicable physical inspection standard.

Three commenters stated that the notice does not adequately address physical inspection standards. One commenter stated that Housing Quality Standards (HQS) should be the minimum standard, unless there is a local code that has higher standards, in which case the local code should prevail. Two commenters stated "[i]n spite of the proposed rule change, we are still in a quandary on the inspection standards—HQS, UPCS, local codes, the "higher" of HQS than local codes."

Response. The scoring notice change does not alter the required inspections standard for PHAs. The UPCS regulation (codified at 24 CFR part 5), and the PHAS regulation (codified at 24 CFR part 902) clearly establish the UPCS as the HUD physical condition standard for public housing. HUD has long required PHAs to comply with federal standards as well as applicable local code in the development and modernization of public housing. The standard in the industry, when there are two codes at variance, is to use the more stringent standard. This was the case under the annual unit and system inspection component of PHMAP (24 CFR 901.30(d)), the predecessor to PHAS. HUD expects PHAs during this interim period to continue with this practice.

Comment. Allow PHAs time to remediate problems.

Two commenters "strongly recommended" that there should be a period of time for low scoring PHAs to remediate problems before HUD imposes consequences.

Response. The PHAS regulation requires that overall troubled PHAs (and troubled-substandard in a single indicator) be referred to the Troubled Agency Recovery Center (TARC). The TARC will enter into a Memorandum of Agreement with the troubled agencies outlining corrective actions to be taken within specified time frames. Further, the PHAS regulation permits the PHA to petition for removal of the troubled designation. A petition for removal can occur if the conditions that gave rise to the troubled designation have been cured. While HUD believes that these procedures provide adequate opportunities for remediation, this issue may be further considered as HUD continues to work with stakeholders in determining what long-term evaluation methodology will be adopted.

Comment. In the Physical Condition Indicator, certain items should not be scored

A commenter stated that only significant items that rise to the level of code violations should be scored. This commenter also stated that there should be no deductions for missing tub stoppers or non-functional defects. Tenant-caused defects should not result in point loss, but should be noted for correction or treated like smoke detectors when the batteries have been removed.

Three commenters stated that there should be no deductions for units undergoing modernization. Along similar lines, two other commenters stated that "mitigating circumstances (e.g., tenant damages) should be taken into account." Yet another commenter found the number of deficiencies, the severity of them and the weights and criticalities in the units and building systems to be problematic. This commenter stated, "[t]here are still too many tenant-caused damages and too many minor "problems" in units that are scored." As a result, the commenter questions whether the score is a fair and accurate representation of the housing stock.

Response. The U.S. Housing Act of 1937 requires that public housing be decent, safe and sanitary. The Act further requires that HUD determine the extent to which the PHA is providing basic acceptable housing conditions. HUD does not believe that the Act intended for HUD's determination to be limited to local housing code or functionality. Local codes vary throughout the nation. In some cases, local code is nonexistent or at an extremely low level. Functionality is a question of whether a particular inspectable item works or not. HUD does not believe that functionality alone is sufficient to meet either the statutory requirement or to assist PHAs and HUD in managing the inventory of approximately 14,000 public housing developments around the country. Accordingly, HUD established the federal standard, the UPCS, to determine compliance with this statutory requirement. HUD acknowledges that improvements can be made and will seek to make them in a permanent methodology. HUD appreciates the concern regarding resident-caused damage. However, the statutory requirements obligate HUD to determine the condition of the properties and do not exempt various causes of the deficiencies from decent, safe and sanitary housing that is in good repair. Reasons for the condition of a property and the attendant remedial actions should be the subject of further review and analysis by the PHA and HUD Field Offices. The PHAS regulation already exempts vacant units undergoing modernization from the inspection. However, where units are occupied, HUD has the obligation to determine if the resident is living in decent, safe and sanitary housing that is in good repair. The PHAS regulation does provide for a database adjustment for those elements when modernization is in progress.

Comment. The Notices fail to address problems with the PHAS appeals process.

Two commenters asked that HUD "codify * * * in writing" that, since HUD can no longer commit to confirmatory reviews as had been "agreed" because of lack of manpower, instead appeals would be reviewed broadly and a PHA can make its case to the Assistant Secretary for Public and Indian Housing. One commenter stated that it was "disappointed" that there would be no "common-sense" review, and suggested that was another reason the PHAS scores should remain advisory.

Response. Although confirmatory reviews and "common sense" appeals were discussed during the recent meetings with stakeholders, HUD subsequently found it to be impractical to implement these items during the interim assessment period. As a result, the Department will continue to accept and review requests for technical reviews, database adjustments and score and designation appeals per the PHAS regulation. Prior to responding to the PHA, the Assistant Secretary for the Office of Public and Indian Housing will ensure that all appeals will continue to be given due consideration. While the interim scoring procedures are in effect, the Department is willing to consider improvements to the evaluation methodology, including the appeal process.

Comment. Incentives for PHAs designated as high performers should be provided.

Four commenters stated that there should be some form of reward for high performers. One commenter stated that the scores must be tied to a system of rewards and there should be regulatory waivers granted to high performers in addition to capital assistance under section 9(j)(3)(C) of the U.S. Housing Act of 1937 (which provides for the reallocation of certain Capital Funds to high performing PHAs). Two commenters stated generally that the notice fails to address the concept of rewards for high performers, which they state was at the heart of changing the old assessment system. One commenter stated that the notice was silent as to whether high performer status would entitle PHAs to all the privileges defined by the Department, including additional Capital Funds, and that this entitlement should be stated in writing. This commenter urged that Capital Funds be distributed based on high performer status as soon as technically possible.

Response. The current PHAS regulation provides incentives for high performers and PHAs will be afforded those incentives. Further, the Capital Fund Program rule provides incentives for high performers. The interim scoring notice does not modify or change the implementation of incentives to high performers. Accordingly, PHAs that are designated as high performers during the period when the interim scoring notices are in effect will receive additional capital funds as a result of their performance, as provided by the Capital Fund Program rule. HUD will notify PHAs of the schedule upon which these funds will be provided, which depends in part on administrative considerations. The Department is willing to consider the issue of additional regulatory waivers during the long-term review of changes to the evaluation methodology.

Comment. The changes to the Financial Condition Indicator may change a PHA's designation.

One commenter stated that the constant change to the financial components, specifically Current Ratio (CR) and number of Months Expendable Fund Balance (MEFB), "may establish a perception that HUD is setting up housing authorities to fail." The commenter also stated that the changes to CR and MEFB under the interim scoring process may cause a PHA that was a "high performer" in 2001 to be designated as a "standard performer" or "troubled performer" in 2002, regardless of a change in actual performance.

Response. The Department disagrees that there have been substantial changes to the Financial Condition Indicator. The changes that have been made were either to improve the method of scoring based on industry discussions or update the thresholds based on current data.

Under the interim financial scoring process, the thresholds for the components are lowered so that a PHA with a CR or MEFB value equal to or greater than 1.0 will receive the full 9.0 points available for each component. As a result of this change, a PHA's performance designation improved in most cases, and in the remaining cases, the PHA's performance designation stayed the same.

Comment. Financial peer groupings should be eliminated.

Four commenters stated that peer groupings should be eliminated from the financial indicators and that HUD should use a more constructive measure to assess financial condition. One commenter further stated that all groupings should be abandoned and the focus should be on each PHA's individual performance given the measures by which the management assessment is based.

Response. HUD has conducted extensive research based on the total number of entity-wide units operated to validate the use of peer groups in assessing a PHA's financial condition. The research shows that PHAs of different sizes have statistically different values under the financial indicator components. In addition, financial rating services consider size and market-share as a measure of diversification, i.e., risk management. Based upon this information, HUD believes that it is appropriate to measure certain financial indicator components based on peer groups because it provides for a more accurate overall financial assessment of PHAs. However, this issue will be reconsidered as HUD works with stakeholders in determining what the long-term evaluation methodology will be.

Comment. Financial assessments should not be "entity-wide."

Three commenters stated that HUD should not assess a PHA's financial condition on an entity-wide basis. Two commenters stated "entity-wide" assessments for some PHAs with sizeable Section 8 programs result in a lower Occupancy Loss component score. The commenters went on to say "[t]he emphasis should be on a PHA's ability to manage its public housing dwelling units that it has control over, not the housing market in its jurisdiction." One commenter also noted that, "for these sub-indicators, there are (sic) no statutory authority for HUD to impose these conditions."

Response. HUD has considered whether a PHA should be financially evaluated on an entity-wide basis and has determined that the overall financial condition of a PHA provides a valid basis to assess its long-term viability and financial performance. The Department is concerned about a PHA's ability to manage non-public housing grant and subsidy programs, as well as other federal and non-federal sources of funding. However, other options may be explored as HUD considers permanent changes to the assessment system.

With reference to the statutory requirements, HUD has the authority to assess any factors it determines appropriate in accordance with section 6(j)(1)(K) of the U.S. Housing Act of 1937, as amended. The Single Audit Act and OMB Circular A–133 require entity-wide audits of the financial statements of PHAs receiving federal funds.

Comment. The financial review should be limited to the independent audit.

VOL
67
ISS
51
MR
15
2002
UMI

One commenter stated that the financial review should be "limited to the independent audit and the data that HUD draws from the Financial Data Schedule." There should be no other requirements included in the financial review.

Response. HUD understands this comment to mean that PHAs should only be required to submit an audited financial statement and not submit both an unaudited and an audited financial statement.

As required by the Single Audit Act and OMB Circular A–133, HUD requires PHAs to submit audited financial statements nine months following the close of the PHA's fiscal year-end. However, there may be information in the unaudited financial statement that would assist HUD in monitoring a PHA's financial health. Therefore, HUD will continue to require both submissions.

Comment. Business practice dictates that scores of less than one for CR and MEFB are unacceptable.

One commenter stated that "good business practice dictates that an authority has sufficient current assets to cover current liabilities and adequate reserves to operate independently of HUD, if circumstances should warrant." In addition, the commenter stated that "it might be considered harsh to penalize a housing authority zero points for scoring less than one on either current ratio or number of months expendable fund balance; however, sound business principles indicate a score of less than one is unacceptable."

Response. HUD agrees that sound business principles indicate a value of less than one on the CR or MEFB is unacceptable. As a result, under the interim scoring process, a value of less than one on the CR component would result in a CR score of zero. The CR component measures the cash liquidity of a PHA by dividing current assets by current liabilities. This component predicts whether or not the PHA can meet its current obligations, therefore a PHA with a CR value of less than one (i.e., when current liabilities are greater than current assets) would pose a financial risk because it may be unable to cover its current obligations and thus should merit a score of zero for the CR component.

Similarly, the MEFB is a viability measure of a PHA's ability to operate using primarily its net available, unrestricted resources without reliance on additional funding. This component compares the net available unrestricted resources to the average monthly operating expenses. The result of this calculation shows how many months of operating expenses and the repayment of operating debt principal can be covered with currently available, unrestricted resources. Therefore, a PHA with a MEFB value of less than one would pose a financial risk because it may be unable to cover its operating expenses using its reserves and thus should merit a score of zero for the MEFB component.

Comment. Concur with changes to interim scoring for the Financial Condition Indicator.

Four commenters concurred with the interim scoring changes for the Financial Indicator. In particular, they concurred with HUD's decision to use pass/fail when scoring the components CR and MEFB, rather than scoring these two components based on percentiles and peer grouping.

Response. The Department appreciates the commenters' agreement with these changes.

Comment. Indicate essential elements in the PHA evaluation system.

One commenter stated that the interim assessment processes should indicate which elements are essential in the public housing evaluation system.

Response. The Department believes that the four indicators that comprise the PHAS are the essential elements in an overall assessment of public housing. As stated in the November 26, 2001, Introduction Notice (66 FR 59080), these four essential elements are the: (1) Physical condition of properties; (2) financial condition; (3) management operations; and (4) resident's assessment through a survey. Since this information is in the current PHAS regulation, no change to these notices is required.

Comment. Reduce the management reporting requirements, in particular the drug elimination program information.

One commenter stated that the management assessment indicator should be retained but the reporting requirements lessened, and in particular, the information on the drug elimination program that Congress no longer funds.

Response. The Department is not considering changes to the Management Operations Indicator for the period when the interim scoring notices are in effect, but has committed to continue to meet with public housing stakeholders during this time to further discuss evaluation methodologies and the scoring processes. In these meetings, the Department is willing to consider the drug elimination reporting requirements under the Management Operations Indicator.

Comment. Modify the resident survey questions and include the property address with the responses.

One commenter suggested that the Department retain the current questions in the Customer Service and Satisfaction Survey and allow PHAs to insert five to ten additional questions about local issues. The commenter also stated that the resident responses should indicate the resident's address in order for the PHA to deal with the responses.

Response. While the Department is not making changes to the Resident Service and Satisfaction Indicator during the period when the interim scoring notices are in effect, the Department has committed to continue to meet with public housing stakeholders to further discuss the evaluation methodologies. In these meetings, changes to the resident survey will be discussed. In November 2001, the Department began reporting resident survey results to PHAs on the property level. This provides the PHA with the ability to more specifically respond to resident concerns while at the same time maintaining the residents' anonymity, which is important because of privacy concerns.

III. Adoption of Interim Physical Condition and Financial Condition Scoring Procedures Without Change

The Department appreciates the public comments submitted on the November 26, 2001, notices. For the reasons discussed above in Section II of this notice, the Department adopts the interim physical condition and financial condition scoring procedures without change.

Dated: March 8, 2002.

Michael Liu,

Assistant Secretary, Public and Indian Housing.

Risk-Based Capital; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Federal Housing Enterprise Oversight

12 CFR Part 1750

RIN 2550–AA23

Risk-Based Capital

AGENCY: Office of Federal Housing Enterprise Oversight, HUD.

ACTION: Final rule.

SUMMARY: The Office of Federal Housing Enterprise Oversight (OFHEO) is amending appendix A to subpart B of 12 CFR part 1750 Risk-Based Capital. These amendments modify provisions relating to counterparty haircuts, multifamily loans, and refunding and make several technical adjustments and corrections. These amendments are intended to refine the stress test model to tie capital more closely to risk.

DATES: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Leonard Reid, Associate Director, Office of Risk Analysis and Model Development, telephone (202) 414–3754 (not a toll-free number), or David Felt, Deputy General Counsel, telephone (202) 414–3750 (not a toll-free number), Office of Federal Housing Enterprise Oversight, Fourth Floor, 1700 G Street, NW., Washington, DC 20552. The telephone number for the Telecommunications Device for the Deaf is (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Background

OFHEO published a final regulation setting forth a risk-based capital stress test (Rule) on September 13, 2001, which formed the basis for determining the risk-based capital requirement for the Federally sponsored housing enterprises—Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively, the Enterprises).[1] The risk-based capital stress test set forth in the Rule simulates the performance of each Enterprise's assets, liabilities, and off-balance-sheet obligations under severe credit and interest rate stress for a period of ten years (stress period). The stress test projects rates of default and prepayment for the mortgages guaranteed by the Enterprises, as well as cash flows from these and other assets, liabilities, and off-balance-sheet obligations. Using these cash flows, the stress test produces monthly balance sheets for the 120 months of the stress period in order to determine the amount of starting capital that would be necessary to maintain positive capital during the stress period. Thirty percent of the amount of capital so determined is then added to that amount to protect against management and operations risk. By statute, the Rule becomes fully enforceable on September 13, 2002, one year after it was issued.[2]

On December 18, 2001, OFHEO published a notice proposing to amend certain provisions in the risk-based capital stress test (AmendNPR).[3] The proposed amendments related to counterparty haircuts, multifamily loans, and refunding and included several technical adjustments and corrections. The purpose of the proposed changes was to improve the Rule's measurements and formulas to tie capital more closely to risk and to ensure that the Rule supports the safety and soundness regime created by the 1992 Act. OFHEO stated that such a proposal is consistent with OFHEO's intention to review, on an ongoing basis, the operation of the stress test and its various components and to evaluate the need for revisions and improvements. Also, OFHEO committed to act expeditiously to remedy any technical and operational issues that arise during the one-year implementation period during which time the capital requirement under the Rule is not being enforced.

OFHEO received 48 comments on the AmendNPR. Commenters included Freddie Mac; Fannie Mae; housing and financial trade associations; financial services companies, including mortgage insurance companies; housing advocacy groups; State housing authorities; academics; consultants; and other interested parties. Many of the comments discussed aspects of the Rule that were not addressed specifically in the AmendNPR. In other instances, commenters approved of certain changes proposed, but suggested that OFHEO go farther or make additional changes in the same area. Numerous commenters, for instance, applauded OFHEO's changes to the multifamily model, which had the effect of lowering adjustable rate mortgage (ARM) defaults in the stress test, but urged OFHEO to take additional steps to lower ARM loss rates. The amended Rule reflects OFHEO's consideration of all of these comments. However, the need for OFHEO to establish a firm baseline for the stress test and apply it to the Enterprises prior to the end of the implementation period does not allow OFHEO to consider further changes or enhancements at this time. A description of the comments along with OFHEO's responses to them is set forth below.

A. Changes to Counterparty Haircuts

The Rule gives the Enterprises credit for cash payments that would be received during the stress period from securities and various counterparties, such as mortgage insurance companies and derivative counterparties. However, because Enterprise counterparties are themselves likely to be adversely affected by the economic conditions of the stress period and to default on some or all of their obligations, the stress test discounts the value of cash payments received during the stress period by a specified percentage, based on the public credit rating of the security or counterparty. The amount by which cash payments from a counterparty or security are discounted in each month of the stress period is the haircut. The specified haircut percentages increase as the credit rating declines—the lower that rating, the more severe the haircut. In the previous Rule, the haircuts were phased in over the first five years of the stress period, except for haircuts for below-investment-grade providers and instruments, which are applied fully in the first month of the stress period.

The Rule applies one set of haircuts for non-derivative counterparties and securities, based on analysis of historical bond default rates, and a different set of haircuts for derivative counterparties, reflecting lower expected loss severities associated with the use of strong collateral agreements.[4] To further refine the previous Rule's treatment of haircuts, OFHEO has improved the consistency between haircuts for derivative counterparties and securities and non-derivative counterparties and securities by specifying default and severity rates separately; extending the phase-in period for the haircuts from five to ten years; providing for netting of exposures to the same derivative counterparty; providing for certain technical amendments described herein; and providing for an exception to the BBB haircut for certain unrated multifamily seller/servicers, as described in the AmendNPR.

OFHEO proposed lowering the maximum haircuts for both non-derivative and derivative counterparties and securities. The specified default and severity rates were calculated separately. Their products are the maximum haircuts. Previously, no explicit allowance was made for recoveries after default (severities of less than 100 percent) for non-derivative losses.

Default Rates

The amended Rule adopts the former Rule's non-derivative maximum haircut levels as maximum default rates, except that the percentage for AA-rated firms and securities was lowered from 15 to 12.5. Many commenters argued that using data from the Great Depression as a basis for default rates was inappropriate because of the broad changes in the economy since then and because default rates should be consistent with mortgage losses applied elsewhere in the stress test. Others focused on the relationship between defaults in the AA and AAA categories. Most argued that the ratio embodied in the proposal (2.5:1), which is lower than in the former Rule, was still too high or that there should be no differential between the categories at all. Many suggested that the proposed difference would drive all or most mortgage insurance business to the two AAA-rated firms, lessening competition and creating concentration risk for the Enterprises.

One commenter, however, opposed the change in the ratio, arguing that the average ratio (3:1) over the longest period available, 1920–1999, should be the basis for the Rule. A few commenters argued that maintaining a substantial differential between AAA and AA categories was important in either the maximum default rates used or the phase-in of those rates. In their view, a large differential would promote capital accumulation by mortgage insurers, decreasing the risk of losses to the Enterprises, and reversing the trend toward smaller market shares of mortgage insurance at AAA-rated firms. These commenters also noted that defaults of AAA-rated firms generally have occurred later for any given cohort of mortgage loans than defaults of AA-rated firms. One commenter further pointed out that OFHEO's haircuts differ far less across rating categories than rating agency haircuts on reinsurance that is provided by lesser-rated insurance providers.

After reviewing the comments, OFHEO has decided to adopt the proposed default rates. No single set of data provides a clear guide to the determination of default rates for the stress test. OFHEO agrees that many changes have occurred since the Great Depression and, therefore, does not view it as the sole relevant period for determining appropriate haircuts during the stress period. Data from the past three decades, however, do not contain any periods of interest rate stress or credit stress on a national basis comparable to that during the stress period.[5] Furthermore, the implication of data raised by some commenters that AAA-rated firms are as risky or riskier than AA-rated firms is based on a very small number of actual defaults. The characteristics of AAA-rated and AA-rated firms, as described in rating agency analyses, suggest significantly better relative credit performance should be expected for AAA-rated firms in a future stressful environment.

OFHEO has examined the available data from a variety of sources with varying perspectives as described in the preambles to NPR2,[6] the September 13, 2001 Rule, and the AmendNPR. OFHEO has based its choices on the totality of the data, but also has taken into account treatment of credit supports by rating agencies, although OFHEO recognizes that the agencies' purposes and perspectives differ somewhat from OFHEO's. The Depression-era data are of particular interest because, unlike other data, they reflect a very stressful period. OFHEO notes, however, that cumulative defaults in Moody's data for 1929–31, as discussed in the proposal, are very close to those obtained by using Moody's 1920–1999 data and adding 2½ standard deviations to the average 10-year default rates. Data from Hickman's 1928 cohort and more recent time periods could suggest higher default rates for the AAA category relative to the other categories, but the relatively later timing of AAA defaults in much of the data is also relevant given that OFHEO has not imposed different phase-in patterns for different rating categories. OFHEO has similarly considered the earlier timing of historical defaults in the A category and especially in the BBB category. OFHEO also considered the fact that the stress test interest rate shocks and mortgage losses as specified in the 1992 Act are heavily front-loaded in comparison to historical periods.

OFHEO recognizes that relative haircut levels for the different rating categories can have competitive implications and, therefore, has focused great attention on differences in haircuts across rating categories, so that they reflect differences in risk to the Enterprises well, without adding undue complexity to the Rule.

Severity Rates

The amended Rule adopts the severity rates from the proposal, a 70 percent severity rate for all non-derivative defaults and a 10 percent rate for derivative defaults. Much of the comment with respect to non-derivative severity rates was positive, but some commenters suggested higher or lower rates. Those favoring lower rates objected to the use of Great Depression data and suggested focusing on severity rates for senior obligations. One commenter also suggested reflecting ultimate recovery rates (1 minus severity rates) in historical data rather than security prices at the time of default. Those favoring higher severity rates stressed the variability of recovery rates, not only across users and industries, but also over time. One of the commenters also recommended using data for recovery rates on financial issues, which tend to be lower. This commenter also noted that Moody's average recovery rate for even senior secured debt was only 31 percent (69 percent severity) during the 1970s. Finally, some commenters suggested special treatment for particular types of counterparties, such as mortgage insurers, or obligations, such as mortgage revenue bonds or other mortgage related securities.

OFHEO decided to adopt the proposed non-derivative severity rates. Severity data from the Great Depression, which show higher severities during stressful periods, are relevant for the same reasons as default data from the same period. As two commenters pointed out, more recent data also show higher severity during recessions. At the same time, however, OFHEO found the average experience of 10-year periods, such as the 1930s or the 1970s more

[2] Section 1364 of Title XIII of the Housing and Community Development Act of 1992, Pub. L. 102–550, known as the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (1992 Act), (12 U.S.C. 4614(d)).

[3] Risk-based Capital, Notice of proposed rulemaking 66 FR 65146 (December 18, 2001).

[4] The term "derivative" is used to refer to over-the-counter interest rate and foreign currency derivatives that are used by the Enterprises to hedge interest rate risk and foreign exchange risk. The term should not be read to encompass credit derivatives, which are currently not in use by the Enterprises and would be considered a "new activity" and dealt with under section 3.11 of the Rule, if the Enterprises began to use them.

[5] Some commenters argued that OFHEO should use the years, 1983–1984, of the benchmark loss experience. The benchmark loss experience, which is specified by the 1992 Act, includes only loans from a small area of the country and is intended only as a benchmark for credit losses on mortgage loans. It was never intended to be and would be entirely inappropriate as a benchmark for counterparty defaults for many reasons. Even more inappropriate would be use of the national data from those years without applying the requirement that they represent the highest default rates from an area of the country containing at least five percent of the population.

[6] The second notice of proposed rulemaking issued prior to the initial issuance of a final Rule on September 13, 2001. 64 FR 18084 (April 13, 1999).

relevant than subtracting standard deviations of annual data from long-term averages as one commenter suggested. Year-to-year variability does not imply that a string of ten consecutive poor results is a reasonable projection. Also, OFHEO has found data on security prices at default to be more relevant than ultimate recoveries, because prices at default take account the time value of money and uncertainties about actual future payments, which payments may even be lower during a continuing period of stress than otherwise expected.

OFHEO recognizes that the characteristics of specific exposures, such as collateral or line of business, may affect severity rates. However, taking account of such characteristics could add undue complexity to the Rule. At this time, OFHEO does not consider such additional complexity to be warranted, but may reevaluate that conclusion in the future, if appropriate.

Comments on the proposed severity of 10 percent for derivative defaults were mostly favorable. Some commenters recommended consideration of even lower severities, in the range of 1 percent to 2½ percent. They view the proposed severity rate as consistent only with a combination of very unlikely events; sudden failures and large, simultaneous, adverse changes in interest rates. A few commenters, however, voiced disapproval of OFHEO's reasoning, which relies heavily on the existence and implementation of collateral agreements. They argued that haircuts on derivative receipts should be unchanged or raised to the level of non-derivative receipts. They suggested that only actual collateral held by an Enterprise at the start of the stress period should be considered, not promises to provide collateral under certain circumstances. They questioned whether it would be feasible to unwind and replace the very large positions the Enterprises have with individual counterparties in a market that may have experienced a shock of some type.

OFHEO has decided to adopt the proposed severity rate for derivative defaults. OFHEO continues to have a high level of confidence in the successful operation of the Enterprises' collateral agreements, even in difficult times. The majority of the Enterprises' over-the-counter derivatives are simple interest rate swaps, which have been consistently very liquid, even in weak markets. Nonetheless, some caution is appropriate, given the high levels of stress contemplated in the stress test and potentially significant levels of correlation between the unlikely events considered in the proposal. While some derivatives are less liquid and could merit more cautious treatment, OFHEO judges that the added complexity is unwarranted at this time.

Haircuts

Under the amendment, haircuts will be determined by multiplying the default rate for each rating category by the severity rate. The resulting haircuts are set forth in Table 1 below.

TABLE 1—STRESS TEST HAIRCUT BY RATINGS CLASSIFICATION

Ratings Classification	Derivative Contract Counterparties [1]	Non-Derivative Contract Counterparties or Instruments
Cash	0%	0%
AAA	0.5%	3.5%
AA	1.25%	8.75%
A	2%	14%
BBB	4%	28%
Below BBB and Unrated	100%	100%

[1] Does not include interim rates prior to implementation of netting. *See* Table 2.

Phase-In

Under the former Rule, haircuts were phased in linearly over a 5-year period. OFHEO proposed lengthening the phase-in to the full 10 years of the stress period. Most of the comments supported the change. A few commenters suggested changing the pattern of the phase-in to reflect actual default timing during the 10-year period for the cohort for a specific year or the average of cohorts from a specific time period. This approach would have different phase-in patterns for different rating categories. A few other commenters urged OFHEO not to change the existing 5-year phase-in. They argued that it is particularly appropriate for AA-rated mortgage insurers, which could expect to experience their greatest losses during the middle years of the stress period.

OFHEO decided to adopt the proposed 10-year linear phase-in. Historical data indicate that defaults have not been concentrated in the first 5 years of the 10-year periods. OFHEO recognizes that defaults generally occur increasingly later within 10-year experiences as ratings increase. That is, not only have higher-rated firms (AAA versus AA, for example) shown lower default rates during periods of economic stress, those that have not survived tended to have sufficient capital to withstand the stress longer and, therefore, defaulted later than lower-rated firms. OFHEO considered timing differences across different rating categories in determining maximum default rates for those categories, as discussed above. Determining a special timing pattern of defaults for any specific type of counterparty, such as mortgage insurers, would be difficult and speculative. Even the timing of claims is uncertain during the stress period because, while the stress test does not incorporate new business of the Enterprises, no similar provision applies to mortgage insurers. In any event, OFHEO can not add the complexity involved with explicit consideration of specific types of counterparties in the time frame required for implementation of the Rule.

Netting of Derivative Counterparty Exposures

OFHEO adopts as proposed the treatment for netting of derivative counterparty exposures. Due to technical limitations, the previous Rule did not model the master netting agreements associated with derivative counterparty exposures. OFHEO will now recognize the risk mitigation effects of master netting agreements by reducing the haircuts for derivative contract counterparties as set forth in Table 2, under heading of Haircuts for Derivative Contract Counterparties prior to Implementation of Netting. Upon implementation of modeling of master netting agreements, maximum haircuts for derivative contract counterparties will be readjusted. (*See* Table 2, under heading of Haircuts for Derivative Contract Counterparties upon Implementation of Netting). The interim treatment will remain effective only for the period required to complete the technical software modifications necessary to model master netting agreements.

TABLE 2—STRESS TEST HAIRCUTS FOR DERIVATIVE CONTRACT COUNTERPARTIES

Ratings Classification	Haircuts for Derivative Counterparties Prior to Implementation of Netting	Haircuts for Derivative Counterparties Upon Implementation of Netting	Number of Phase-in Months
AAA	0.3%	0.5%	120
AA	0.75%	1.25%	120
A	1.2%	2.0%	120
BBB	2.4%	4.0%	120
Below BBB and Unrated	100%	100%	1

Commenters generally supported OFHEO's proposal to recognize the impact of derivative counterparty netting agreements and urged OFHEO to implement counterparty netting as soon as possible.

OFHEO has adopted the proposed treatments and will continue to work toward implementation of the technical changes required to model netting agreements.

Unrated Seller/Servicers

OFHEO adopted the change to the treatment of unrated seller-servicers as proposed in the AmendNPR, with the addition of language to clarify that the change applies only to unrated multifamily seller-servicers. The previous Rule provided that unrated seller-servicers will be treated as if they are BBB-rated counterparties, unlike other unrated counterparties, which are treated as below BBB. Consistent with OFHEO's commitment in the Rule to evaluate alternative approaches to determine risk distinctions among unrated seller-servicers, OFHEO is amending the Rule to permit a higher rating than BBB (but not to exceed AA) for certain unrated multifamily seller-servicers. These unrated multifamily seller-servicers must participate in a delegated underwriting and servicing program that requires a loss-sharing agreement collateralized by a fully funded reserve account pledged to the Enterprise and the reserve account must be in an amount that is equal or greater than an amount determined by OFHEO to be adequate to support the seller-servicer's loss-sharing obligation under the program. Each program will be evaluated on a case-by-case basis by the Director to determine whether the program qualifies the seller-servicer for the refined ratings treatment. The amendment only applies to multifamily seller-servicers and does not incorporate a similar treatment for single-family seller-servicers.

For example, if the loss-sharing obligation of a seller-servicer participating in Fannie Mae's Delegated Underwriting and Servicing (DUS) Program (which is a multifamily mortgage program) is collateralized by a fully funded reserve account that is equal to or greater than one percent of the seller-servicer's aggregate unpaid principal balance covered by the loss-sharing agreement at the start of the stress test, the rating of the issuer of the instrument backing the reserve account may be used, in lieu of BBB, as the rating of the unrated seller-servicer, not to exceed AA. Determinations of the required reserve amount and the rating equivalent permitted will be made on a program-by-program and Enterprise-by-Enterprise basis.

With a few exceptions, commenters generally viewed the proposed amendment to the Rule regarding unrated seller-servicers as a positive contribution that would tie capital more closely to risk. Indeed, commenters who supported the amendment largely suggested that OFHEO also consider other factors, such as the value of the servicing stream and the level of capital of unrated seller-servicers as support for an improved rating for these seller-servicers. Commenters who disagreed with the proposed amendment included some who objected to the use of a BBB rating for any unrated counterparty, and objected further to allowing a rating higher than BBB for unrated counterparties under any circumstances. One commenter indicated that OFHEO should have empirical data supporting the BBB rating for unrated seller-servicers. Others who objected cited the example given of the DUS program, questioning whether a one percent fully funded reserve account would be adequate to support the loss-sharing obligation under the DUS program, and objecting to the competitive advantage that a higher than BBB rating for unrated seller-servicers would impart to the Automated Underwriting (AU) systems of the Enterprises, thereby placing other AU systems at a disadvantage. Finally, one commenter recommended that OFHEO clarify its intent to limit this approach to unrated multifamily seller-servicers.

OFHEO believes that the amendment ties capital more closely to risk by allowing for an improved rating for specified unrated multifamily seller-servicers. OFHEO has relied upon its own specialized expertise in the mortgage business and its detailed understanding of the Enterprises' seller-servicer agreements in making its decision to treat unrated seller-servicers more favorably than other unrated counterparties of whom OFHEO may lack such specialized understanding. Beyond the BBB rating to which all unrated seller-servicers are elevated, the amendment allows a higher rating than BBB to be used for certain multifamily seller-servicers. The increased rating is available if OFHEO determines that their ongoing relationships with the

VOL 67 ISS 51 MR 15 2002 UMI

Enterprises and the contractual leverage available to the Enterprises in managing their exposure to counterparty risk from these seller-servicers is further enhanced by a fully funded reserve account—pledged to the Enterprise—of sufficient size to support the loss-sharing obligation adequately. With regard to the consideration of other factors as the basis for ratings above BBB, OFHEO will continue to evaluate alternative approaches for assessing the risk of unrated seller-servicers.

Finally, OFHEO notes that there appeared to be some confusion among commenters who objected to the amendment regarding the extent of the obligations of DUS lenders to share in multifamily credit losses. The one percent fully funded reserve account is not intended to be adequate to support all losses incurred on the covered loans. Rather it is determined to be adequate to support the much smaller loss-sharing obligations of the seller-servicer under the DUS program. In addition, there also appeared to be some confusion among commenters regarding the distinction between the multifamily DUS program and the single-family Automated Underwriting (AU) systems of the Enterprises. There is no connection between the two. The amendment does not apply to single-family programs.

B. Changes to Multifamily Model

OFHEO is adopting as proposed a number of changes to the multifamily default model, multifamily loss severity parameters, and multifamily prepayment speeds specified in the Rule. These changes and the comments regarding them are summarized below:

Underwater Debt Coverage Ratio Flag (UWDCRF)

As amended, the multifamily default model includes an Underwater Debt Coverage Ratio Flag (UWDCRF), which accounts for the additional default risk posed when the projected debt service coverage ratio (DCR)—net operating income (NOI) divided by mortgage payment—falls below 0.98 during the stress test. The stress test projects the DCR in each month of the stress period from the prior month's value by updating NOI, using rent growth rates and rental vacancy rates that reflect the economic conditions of the benchmark region and time period,[7] and adjusting mortgage payments over time according to the note terms and the stress test interest rate scenario. The UWDCRF adds value to the multifamily default model by capturing the additional risk of default when NOI is insufficient to cover mortgage payments.

OFHEO has re-specified the UWDCRF to turn the flag on when the projected DCR is less than 0.98 (that is, when net operating income (NOI) on the collateral property is more than two percentage points below the mortgage payment), altering the previous Rule, which turned the flag on when the projected DCR fell below one. The re-specified multifamily default model results in a slightly lower coefficient on UWDCRF, and the coefficients for the other explanatory variables do not change materially. Simulations using the revised UWDCRF definition result in lower predicted default rates for ARMs in the up-rate scenario and for FRMs with low initial DCR in both interest-rate scenarios, making the revised model less sensitive to the UWDCRF than the prior version. The revised model does not substantially affect the predicted default rates for most FRMs or for ARMs in the down-rate scenario.

All commenters that addressed this change recommended its adoption. These commenters included a number of seller-servicers of the Enterprises, State housing authorities, and both Enterprises. In view of these comments, together with OFHEO's concern, discussed in detail in the AmendNPR, that borrowers often have reasons to carry properties with slightly negative cash flows for a period of time, OFHEO decided to adopt the change as proposed.

ARM Flags

The amended Rule retains the same explanatory variables as the model in the earlier Rule, except that three dummy variables or flags, the New ARM flag (NAF), the New Balloon Loan Flag (NBLF), and the Ratio-Updated Flag (RUF) are removed, and a re-specified flag is introduced that captures both the distinction between ARMs and FRMs and the distinction between ratio-updated and not-ratio-updated loans. Specifically, the new variable OFHEO has adopted in its re-specified default model is a Not-Ratio-updated ARM Flag (NRAF) that is turned on if a loan is both an ARM and not-ratio-updated and is turned off otherwise. However, there were insufficient data on FRMs that were not-ratio-updated to include a flag similar to the NRAF for FRMs.[8] Instead, the revised Rule calculates the monthly conditional default rates for not-ratio-updated FRMs by applying a factor of 1.2 to the conditional monthly default rates for otherwise comparable ratio-updated FRMs.

The NRAF variable was introduced because OFHEO observed higher ARM default rates compared with FRM default rates even during historical periods of flat-to-declining interest rates, which should, other things being equal, have favored ARM performance. Additionally, when FRM and ARM data were combined, OFHEO found substantially higher Enterprise default rates for not-ratio-updated versus ratio-updated loans. This result was not surprising given that the ratio-updating process is intended to improve underwriting and the resultant performance of all loans. The factor of 1.2 that is applied to not-ratio-updated FRMs is based upon the multiplicative difference in simulated stress test default probabilities for the typical ratio-updated versus not-ratio-updated ARM loan, holding all other factors constant at their means. Given the definition of ratio-updating, OFHEO determined that it is reasonable to expect proportionate performance differentials for ratio-updated versus not-ratio-updated ARMs and FRMs when other factors are held constant.

All commenters to address this issue favored the elimination of the NAF, NBLF, and RUF variables and the introduction of the NRAF flag. However, several comments, including those of Fannie Mae, suggested that the 1.2 factor applied to FRMs should be eliminated, because it lacked statistical or factual basis. Some of those commenters may have confused the ratio-updating process with the Enterprises' receipt or lack of receipt of annual operating statement data and rent rolls on certain loans.[9]

OFHEO disagrees with the suggestion that the 1.2 factor be dropped and notes that, although there are insufficient data to incorporate an FRM counterpart to the NRAF into the multifamily default model, the decision to include a similar and proportionate adjustment to the default rates of not-ratio-updated FRMs was predicated on statistical analysis. Statistical evidence suggests that the ratio-update process, whereby loans originated using underwriting standards that may differ from those of the Enterprises are re-underwritten using the Enterprises' standards at the time of acquisition, reduces stress test default rates for a typical ARM by about 17 percent. Furthermore, Enterprise data confirm lower historical default rates of ratio-updated versus not-ratio-updated loans without regard to product type. At this time, OFHEO has no evidence that the ratio-update process should operate in a different fashion for one product than for another. Therefore, OFHEO believes the use of a multiplicative factor of 1.2 applied to the conditional monthly default rates of not-ratio-updated FRMs is a reasonable approach reflecting sound judgment based in fact and statistical evidence. If sufficient data become available to convince OFHEO that the use of the multiplicative factor of 1.2 is no longer appropriate, OFHEO will consider a change to the Rule.

One commenter questioned how the definition of the NRAF would be affected by any future changes in the underwriting standards of the Enterprises. For example, if as a result of ongoing experience, the standards of an Enterprise were to become tighter or looser, or simply emphasize different financial ratios, the commenter asked whether the entire current ARM portfolios of the two companies would be subject to this variable. In response to this comment, OFHEO notes that if an Enterprise were to stop updating the ratios of loans at acquisition, for example, the entire Enterprise multifamily portfolio would eventually be subject to the NRAF variable (or its FRM counterpart) as older ratio-updated loans terminated. As to the other part of the commenter's question, OFHEO continually examines the Enterprises' underwriting standards and processes and may modify variables or introduce new ones where the data indicates it is appropriate to do so.

Initial Vacancy Rate

OFHEO modified the Rule so that the change in vacancy rates between the period immediately prior to the stress test and month one of the stress test is based on the change in the benchmark region vacancy rate from the month prior to the benchmark period to the first month of the benchmark period. OFHEO views this change as a technical correction. The change sets the initial vacancy rate at ten percent, which is the estimated West South Central (WSC) Census division vacancy rate in 1983. Thus, the vacancy rate change in the initial month of the stress test will be increased from ten percent to 13.6 percent. All comments to discuss this change were favorable, although some suggested that OFHEO's technical correction should have reflected a higher initial vacancy rate. OFHEO did not find any convincing arguments from those who suggested the initial rate should have been higher and, therefore, OFHEO will adopt the rate as proposed.

Loss Severity

OFHEO has modified the multifamily severity parameters to take into consideration the performance of Fannie Mae multifamily REO[10] in the 1980s and both Enterprises' more recent multifamily REO. Loss severity parameters in the previous Rule were based upon the experience of 705 Freddie Mac multifamily REO properties from the 1980s. The multifamily loss severity calculations that use the severity parameters in the Rule have not changed. Specifically, OFHEO has decided to reduce net REO holding costs to seven percent from 13.33 percent and to increase REO sales proceeds from 58.88 percent to 63 percent of the unpaid principal balance as of the default date. Additionally, OFHEO is reducing the time from default to foreclosure completion from 18 to 9 months, while increasing the time from REO acquisition to REO disposition from 13 to 15 months. Changing these severity parameters yields a 44 percent "baseline" severity rate, as compared to the 55 percent "baseline" produced by the model in the Rule. "Baseline" severity is a simple way to compare one set of severity parameters with another.[11]

All comments received regarding this change were favorable.

Prepayment Penalties

OFHEO has modified the Rule to provide for no prepayments in the down-rate scenario inside prepayment penalty or yield maintenance periods. This approach is more consistent with OFHEO's preference to model contractual instruments according to their terms, but recognizes that modeling these penalties according to their terms would be immensely complicated, because those terms vary greatly from loan to loan. The change implicitly assumes that the prepayment penalty provisions either prevent prepayments or provide compensating economic benefit to the Enterprises.

All comments regarding this change were supportive.

Other Comments

Numerous comments were received suggesting that OFHEO should make further refinements to the multifamily model in the stress test. Many commenters stated that although the proposed changes had gone a long way to address what they viewed as inappropriately high loss rates associated with ARMs, the changes had not gone far enough and that the Rule might cause such loans to be disfavored by the Enterprises. OFHEO will consider these comments as it studies the impact of the current modifications to the Rule and will propose additional changes to the Rule when sufficient data indicates a need for them.

Among the refinements suggested by commenters was that OFHEO take into consideration the effects that low-income-housing tax credits (LIHTCs) have in reducing the likelihood of default on loans collateralized by properties with these credits. OFHEO agrees with experts in the housing finance industry that such loans are less likely to default than otherwise identical non-LIHTC loans. OFHEO has responded to this comment by clarifying the Risk-Based-Capital Report Instructions to provide that potential income from the holders of the tax credits is included in the calculation of current debt-service-coverage ratios on these loans. A rule change was unnecessary, because the existing Rule is sufficient to provide for consideration of the tax benefits to the equity investor from the tax credit.

Both Enterprises argued that the multifamily model should consider seasoning of loans that lack annual operating statements by accounting for the likely improvement in NOI and DCR prior to the stress period. OFHEO agreed. However, this comment also did not require a change to the Rule, which does not prohibit consideration of such improvements. To provide clarity to the Enterprises about how to report current NOI and DCR, OFHEO has added language to the Risk-Based Capital Report Instructions.

One Enterprise's comments suggest that the multifamily model does not account for rate caps and payment caps. In fact, the model does account explicitly for these features. However,

[7] The terms "benchmark region and time period" refer to the regional credit loss experience identified by OFHEO in compliance with the "Credit Loss" parameters outlined in 12 U.S.C. 4611, as described in additional detail in NPR2.

[8] OFHEO decided against using an FRM counterpart to the NRAF in the multifamily default model, despite the fact that a similar distinction between ratio-updated and not-ratio-updated FRMs was consistent with the data. The introduction of a flag to capture non-ratio-updated FRMs substantially altered the size of other variable coefficients and the significance of other model variables. Further examination of Enterprise data indicated that this result likely occurred because of insufficient data on not-ratio-updated FRMs, particularly in recent years. Therefore, OFHEO rejected the inclusion of a not-ratio-updated flag in the re-specified default model.

[9] As described in the AmeadNPR, ratio-updating refers to New Book loans for which the LTV and the DCR have been calculated by the Enterprise or its delagee at loan origination or for which the LTV and DCR have been recalculated by an Enterprise or its delagee upon acquisition according to current underwriting standards. New Book loans for which origination and/or acquisition LTV and DCR are unknown cannot be considered to be ratio-updated.

[10] REO is real estate owned as a result of loan default.

[11] The "baseline" consists of a simple adding up of the cost components of the rate, without considering discounting, credit enhancements, or passthrough interest on sold loans.

VOL 67 ISS 51 MR 15 2002 UMI

VOL 67 ISS 51 MR 15 2002 UMI

the Risk-Based Capital Report Instructions have been clarified to include specifically third party rate caps or swaps that may be required by loan documents and used to cap a multifamily loan.

C. Changes to Yields on Enterprise Debt

This amended Rule modifies the previous Rule by adding 10 basis points to the cost of debt for an Enterprise in the stress test vis-a-vis other borrowers in the debt markets. This amendment serves to reflect the reaction of the debt markets to the financial stress imposed upon the Enterprise.

Only five commenters addressed the issue of the cost of new Enterprise debt. Those commenters voiced significant disagreement among themselves about whether OFHEO should add a debt premium to the Enterprises' cost of debt compared to other lenders. Several commenters, including FM Watch, the Consumer Mortgage Coalition (CMC), and an individual investment advisor, stated that not only was a debt premium appropriate but that the debt premium should be significantly larger than proposed. They argued that 10 basis points might not realistically reflect changes in the Enterprises' debt financing costs. CMC stated that, in times of stress, GSE debt spreads could increase significantly and that a 50 basis point or greater spread increase is not unlikely. CMC continued that Agency spreads to Treasuries have varied by about 70 basis points since 1998 and that a small spread adjustment in effect allows the GSEs to assume that they have essentially unlimited access to capital markets at preferred rates even in periods of distress. They cited the experience of the Farm Credit System in the 1980s as historical evidence of the need for a debt premium when a government sponsored enterprise faces adverse credit and interest rate stress.

Another commenter noted that if the capital markets perceived the Enterprises to be in trouble, liquidity premiums and default premiums would both increase. That commenter noted that after both the Asian currency devaluations of 1997 and the Long Term Capital Management/Russian debt crisis of 1998, spreads between LIBOR and AA rated instruments increased five to 10 basis points. He concluded that an economic event that directly impacted the GSEs would likely cause the spread between their debt and LIBOR/COFI to increase by more than 10 basis points, especially as their perceived special status might be brought into question by poor performance.

Only Freddie Mac [12] and Fannie Mae opposed including a debt premium. The Enterprises claimed that there was no factual basis for the agency's decision and that it fails to tie capital to risk. Freddie Mac's consultants opined that historical evidence might instead support reducing Enterprise spreads relative to other issuers. Freddie Mac concluded that OFHEO added what it termed a costly premium on Enterprise debt yields based on a mere possibility, unsupported by evidence. Accordingly, the Enterprises recommended that OFHEO retain the methodology under the previous Rule, which projects yields on Enterprise debt based on historical spreads to Treasury, without a debt premium.

OFHEO has decided to adopt the proposed debt premium in which 10 basis points is added after the first year of the stress period. After one year of stress conditions, the Enterprises might appear strong based on accounting measures of earnings and net worth. However, market values of the Enterprises' assets, liabilities, and derivatives contracts would fully reflect the effects of the interest rate shock and some credit quality deterioration of the stress test. Investors would be aware of these changes in market value and adjust their evaluations of the Enterprises' financial health accordingly.

Notwithstanding the Enterprises' critique, historical evidence does exist to support OFHEO's decision to include a debt premium. The historical experiences of Fannie Mae in the early 1980s and the Farm Credit System in the mid-1980s were periods during which government sponsored enterprises faced financial stress, which indicated that borrowing costs would include some risk premium during economic conditions such as those in the stress test. In fact, in drafting the 1992 Act, legislators referenced the Farm Credit System bailout to support having the Enterprises subject to a rigorous risk-based capital test.[13] This historical experience is further illustrated by data reported in the General Accounting Office's 1990 report on government sponsored enterprises in which Fannie Mae's short-term borrowing costs during 1980 through 1982 were generally about 80 basis points in excess of yields of comparable maturity Treasury debt, and rising at one point to 200 basis points above Treasury yields. Spreads receded after sharp declines in interest rates greatly improved Fannie Mae's condition to a more normal range centered roughly at 20 basis points. Spreads were high again in the late 1980s for both Fannie Mae and the Farm Credit System, ranging from 40 to 100 basis points over a two-year period during the Farm Credit System's time of greatest difficulty.[14]

These episodes could support a stress test projection that spreads of Enterprise debt yields to Treasury yields widen by 50 to 60 basis points. However, the stressful circumstances likely would also cause yield spreads of other debt to widen. OFHEO has chosen not to project how each yield series in the stress period might be affected by the stresses incorporated in the test, but wider spreads for some indexes generally would benefit an Enterprise with more fixed-pay than floating-pay swaps or swaptions. Because, in recent years, both Enterprises generally have relied much more heavily on fixed-pay instruments, that benefit could easily offset more than half of the cost of wider spreads on the Enterprises' own debt issues. However, based on recent Enterprise asset-liability structures, a substantial portion of new debt that would be issued by each Enterprise in stress tests would not be matched by fixed-pay swaps. Also, the nature of the stresses (sharp changes in long-term yields and high mortgage credit losses) is designed to affect the Enterprises specifically, and short-term yield indexes typically used in swap contracts might be affected less than Enterprise yields. In view of these considerations, OFHEO has decided that an appropriate adjustment to Enterprise yields (in the absence of any adjustment to other yield indexes) should be significantly less than the sustained 50 to 60 basis point spread widenings of the 1980s, low enough to avoid potentially inappropriate adverse affects on the Enterprises, but high enough to be meaningful, pending further consideration.

The Enterprises suggest that the only rational stress test is one that presumes that spreads of Enterprise debt to

[12] Freddie Mac commissioned two consultants to file comments in support of its arguments.

[13] "Because of their Federal ties, GSEs emerged as a major public policy issue in the wake of the $4 billion Federal bailout of the Farm Credit System in 1987 * * *" H.R. Rep. No. 102–282 (1991) at 109; *see also* S. Rep. No. 102–282 (1992)0 at 10 ("While both GSEs are currently very prosperous, HUD estimated in a 1986 report to Congress, that Fannie Mae was insolvent on a marked-to-market basis at year-end 1978 and did not return to solvency until 1985. Its negative net worth reached a peak of more that (sic) $20 billion in 1981, which was roughly 20 percent of its outstanding liabilities.")

[14] U.S. General Accounting Office (1990), Government Sponsored Enterprises: The Government's Exposure to Risk. Washington, DC: U.S. General Accounting Office. (GAO/GGD–90–97) 87–88.

Treasuries widen no more than spreads on any other non-Treasury rate. Far from being irrational to presume a wider yield spread on the debt of a stressed Enterprise, OFHEO determined that it was the most prudent and responsible course from a regulatory perspective. To assume, as the failed risk-management strategies at Long Term Capital Management did, that yield spreads would never fall far outside recent experience, is to ignore the reasonable implications of out-of-sample events such as the interest rate and credit stresses that are imposed during the stress period.

D. Changes to New Debt Mix

The previous Rule provided for the funding of all cash deficits by the issuance of new long-or short-term debt, whichever was in shorter supply, until a 50/50 balance of short-to-long-term debt was reached in each Enterprise's portfolio. Thereafter, long- and short-term debt were to be issued in whatever ratio would best contribute to maintaining that balance. OFHEO chose this approach because it did not want to include an assumption about any particular behavioral preference by the Enterprises during the stress test. The previous Rule specified that the new short-term debt being issued as six-month discount notes with a discount rate at the six-month Enterprise Cost of Funds, and the new-long term debt being issued as callable five-year bonds not callable for the first year. The previous Rule also provided a 50 basis point call premium, which required that callable debt would be called when it was 50 basis points out-of-the-money. The Rule further specified an issuance cost of 2.5 basis points on new short-term debt and an issuance cost of 20 basis points on new long-term debt.

OFHEO has decided to adopt its proposal to change the target balance embodied in the previous Rule's approach. Specifically, the 50/50 debt mix has been replaced with the actual ratio of an Enterprise's debt obligations (as adjusted by interest rate swaps) at the start of the stress period. In addition, OFHEO has decided to modify the call rule for long-term debt so that no calls will be executed on new long-term debt in the up-rate scenario.

Fannie Mae, Freddie Mac, the Mortgage Bankers Association (MBA) and JP Morgan each commented on the new debt mix. All these comments favored the proposed approach over the 50/50 mix adopted in the Rule.

These commenters provided additional recommendations for OFHEO to further refine the new debt mix in the stress test. MBA suggested that OFHEO meet with professional portfolio risk management experts to devise additional funding rules for each interest rate scenario. MBA also stated, without elaboration, that the capital requirements resulting from this funding rule would cause the agencies to curtail their activities in the housing market at unpredictable times.

The Enterprises provided detailed comments on this issue. Freddie Mac expressed concern that, under the Rule, callable debt issued in the up-rate stress test after month 12 would always be called at the first opportunity, even though interest rates remain constant during the last nine years of the stress period and the Enterprises would incur issuance fees as a result of calling the debt. Freddie Mac requested that the cost of callable debt reflect the degree of prepayment risk in the mortgages being funded. Freddie Mac argued that the issuance fees were inappropriate because there would be no reason for the Enterprise, without more, to call the debt. Freddie Mac requested that the Rule include detailed refunding provisions, including that callable debt match the callability of the mortgages being funded and that the 50 basis point call premium for long term debt be reduced significantly. Specifically, Freddie Mac believed the call premium for 5-year callable debt should be reduced from an initial cost of 50 basis points to 5 basis points over the first 12 months of the up-rate scenario and from an initial cost of 50 basis points to minus 45 basis points over the first 12 months of the down-rate scenario.

Like Freddie Mac, Fannie Mae was particularly concerned about repeatedly calling new long-term debt at the end of one year and incurring the 20 basis point issuance fee for an identically yielding long-term debt instrument. Fannie Mae also supported Freddie Mac's recommendation for lower call premiums on new callable debt. In addition, Fannie Mae suggested that new long-term debt should be a mix of 5-year callable debt and seven year noncallable debt and that calls on newly issued callable debt should reflect the month-end cash position.

As noted above, OFHEO has decided to adopt the proposed change to the new debt mix to reflect an Enterprise's actual short-term/long-term proportions of corporate debt outstanding at the start of the stress test. As the commenters stated, this new approach provides a more typical debt structure than the 50/50 mix set forth in the Rule. In addition, OFHEO has decided to modify the specification for calling long-term debt so that the call option for new long-term debt will never be executed in the up-rate scenario. OFHEO determined that this modification is appropriate because the earlier requirement would have resulted in new long-term debt being called even though there would be cost but little benefit to an Enterprise in calling it.

OFHEO read with interest the more detailed alternative debt funding strategies suggested by the commenters. However, OFHEO has decided not to adopt any of the more detailed alternative recommendations, but will continue to analyze the issue. In addition, OFHEO is aware that the proposed treatment may place excessive significance on the quantity of an Enterprise's debt maturing early in the second year of the stress test. Such debt will contribute to the long-term (greater than one year) portion of its initial debt ratios, but will count as short-term debt in early months of the stress test when calculating whether new debt is issued as short-term or long-term debt. OFHEO will monitor the amounts of debt with these maturities closely and could decide to reclassify some debt if the amounts do not appear consistent with normal business practice.

E. Miscellaneous Technical Changes

Operating Expenses

OFHEO has decided to modify the stress test treatment of operating expenses by converting 75 percent of starting-position fixed-asset balances to cash over the ten-year stress period. The amended Rule retains 25 percent of the fixed assets on an Enterprise's books throughout the stress period to reflect the acquisition of some new fixed assets, such as computer equipment, which is likely even in a "wind-down" scenario. The effect of this change is to reduce the Enterprises' need for debt to carry nonearning fixed assets.

Only Fannie Mae and Freddie Mac commented on this aspect of the proposal. Each Enterprise stated that the proposal was superior to the treatment of operating expenses in the Rule, because the proposal provides a "more realistic" treatment of fixed assets. Nevertheless, each Enterprise stated that the stress test should use an accelerated rate of amortization of fixed assets, which they believed would be more economically realistic.

This amendment to the treatment of operating expenses adopts the approach proposed in the AmendNPR, without modification. OFHEO believes that the adopted change provides a straightforward and reasonable approach to the treatment of fixed assets.

Float Income

The Rule provides for the modeling of float income associated with passthrough payments on securities issued by the Enterprises. Float income can be positive or negative depending upon whether the Enterprise holds the funds for a period of time before remitting them to security holders or remits funds to security holders before they are actually received. When an Enterprise owns its own passthrough securities, the timing of payment to itself is not relevant. However, the previous Rule included these securities in the calculation of float income, resulting in an overstatement of float income. OFHEO corrected this overstatement by reducing the float income on passthrough securities issued by the reporting Enterprise by the percentage of the Enterprise's ownership interest.

Fannie Mae and Freddie Mac commented favorably about the proposed treatment of float income, provided that the stress test accurately accounts for such income. Freddie Mac provided an alternative equation which it believed more completely implements the proposal.

After reviewing this suggested alternative, OFHEO determined that the alternative, with slight further modification, is correct. Accordingly, OFHEO has adopted its proposal with the appropriate adjustment.

Currency Swaps

Regarding the treatment of Foreign Exchange Risk specified in the previous Rule, OFHEO stated that it would not apply haircuts to foreign currency swaps. However, in furtherance of its commitment to continue to refine the ability of the stress test to tie capital to risk more accurately, OFHEO indicated that it would continue to seek a suitable methodology for applying an appropriate haircut to foreign currency swaps. After additional analysis, including evaluation of the technical enhancements required for implementation, OFHEO has eliminated the simplifying assumption applied in the previous Rule and applied a haircut to foreign currency swap counterparties. Because the stress test does not project foreign currency values, the haircut is applied by adjusting the pay (dollar-denominated) side of the swap upward by the amount of the haircut percentage rather than haircutting the foreign-currency receive side of the swap.

Commenters agreed with OFHEO that the stress test should recognize the capital impact of foreign currency swaps, however, they criticized OFHEO's methodology. One commenter characterized OFHEO's approach as imprecise and conservative, suggesting that the amendment would result in the imposition of an excessive capital charge for foreign currency swaps. Another commenter opined that OFHEO's treatment would result in excessive capital charges for currency swaps and suggested establishing haircuts based on the net amount owed on the swap. Both Enterprises recommended that OFHEO reduce the haircuts applied to foreign currency swaps by 50 percent. They argued that the proposed approach, which bases the haircut on the amount paid by an Enterprise, rather than the net amount received, implicitly assumes that the U.S. dollar would depreciate by 100 percent. Historical data on dollar exchange rates with major currencies over the past three decades show that the largest sustained decline (average decline over a 10-year period, relative to the start of the 10-year period) in the dollar was slightly less than 50 percent—half the decline implicitly assumed in the proposed approach.

Although OFHEO has declined to project currency exchange rates during the stress period, the amended Rule produces the same result as an assumption that during the stress period the dollar will have depreciated 50 percent relative to the forward exchange values of all foreign currencies embodied in the currency swaps. (A 100 percent dollar depreciation would imply that the dollar value of net swap receipts would be infinite, as would any percentage haircut.) OFHEO agrees that the worst sustained dollar depreciation against a major currency in recent times was nearly 50 percent, which is consistent with the implied assumption about currency rates during the stress period. Accordingly, OFHEO has decided to adopt the proposed change to the Rule.

American Call Options

With respect to the modeling of nonmortgage instrument cash flows, the previous Rule did not attempt to provide a comprehensive explanation of the cash flows of all nonmortgage instruments utilized by the Enterprises. Consistent with this approach, OFHEO used a simplifying assumption in the previous Rule to model American call options. In the previous Rule, an American call option, which allows an issuer to exercise the call option at any time after a lockout period, was treated as a Bermudan call option. Bermudan options allow the owner to exercise the option only on certain specified dates before maturity, usually on coupon payment days. However, in the preamble to the previous Rule, OFHEO stated that it would be preferable to consider how options might be modeled more precisely.

Upon further evaluation, OFHEO has modified the stress test to evaluate American calls on the first option date in the exercise schedule and on subsequent monthly anniversaries of an instrument's first coupon date. This methodology will allow the stress test to model American call options according to their terms, resulting in a refinement that more closely ties capital to risk.

The comments supported OFHEO's proposed modifications to address American call options. Both Enterprises suggested additional improvements to the stress test could be achieved by incorporating changes designed specifically to model European call options.

Changes to the stress test treatment of European options may be appropriate. OFHEO will consider the desirability of implementing European call related recommendations in the future.

House Price Growth Factor Clarification

The Rule requires the use of OFHEO's most recent House Price Index as of the reporting date to determine the house price growth factor used to calculate current loan-to-value ratios. OFHEO has decided to expand the instructions in Section 3.6 to clarify, consistent with Section 3.7, that when a loan was originated since the publication of that report, a cumulative house price growth factor of one is used. No comments critical of this clarification were received.

Preferred Stock

In the Final Rule, OFHEO decided to include rules in the stress test to address share repurchases during the stress period. Although the Rule's effect was to treat the calling of preferred stock as a share repurchase, this result would not be clear to some readers. Accordingly, OFHEO is making a technical amendment to state in section 3.8.1[a]3 that "no preferred stock issued by the Enterprise will be called."

Technical Correction

OFHEO added a Prepayment Penalty Flag as an additional classification variable for multifamily loan groups. The Flag distinguishes loans with active prepayment penalties or yield maintenance provisions from those without in the calculation of prepayment penalty duration for loan groups.

F. Process Issues

Publication of Capital Numbers

Several commenters opined that OFHEO should have published results of model runs to demonstrate the impact of the proposed change on the Enterprises' capital requirements. One commenter stated that OFHEO should publish the capital requirements for the Enterprises under the previous version of the Rule and the modified Rule, so that the public can understand the impact of the changes.

In OFHEO's view, the comments received in response to the proposed changes demonstrate that the AmendNPR provided sufficient information for a full and informed discussion of the relevant issues. OFHEO considered each of the proposed changes on its own merits and those that were adopted were approved on the basis of sound theory, research and, where appropriate, statistical estimation, rather than simply the impact they might have on the capital of an Enterprise in a particular historical quarter. To the extent that OFHEO did runs to test the developmental computer code it had created for these changes, OFHEO did not rely upon those results as the rationale for its choices. Those runs were designed primarily to check for errors in the code or the algorithms on which the code was based. For these reasons, OFHEO has found the argument that results of runs are necessary to understand or evaluate the impact of the proposed changes to be unfounded.

OFHEO published a final Rule on September 13, 2001, which provided detailed specifications and working copies of the code to the Enterprises and other members of the public. As expected, when outside parties were able to examine the specifications in detail and begin to run portions of the code, OFHEO received numerous comments and requests for changes. Some of these changes OFHEO considered to be sufficiently significant that it was desirable to publish them for comment quickly in order to allow any of them found to be necessary to be finalized without delaying the implementation of the Rule and the September 2002 date when the Rule becomes enforceable. OFHEO expects that with the changes approved in this document, the Rule will better tie capital to risk. Accordingly, the risk-based capital numbers for the first quarter of 2002 will accurately portray the adequacy of the Enterprises' capital under the Rule that will be enforced. Earlier results would be based upon data that are now too old to indicate any useful information about the Enterprises' current condition.

Another important reason why OFHEO has delayed publishing risk-based capital numbers is that, in OFHEO's view, the 1992 Act intends that the Enterprises have a year to adjust their operations to the requirements of the Rule. These adjustments take a number of forms. First, the Enterprises have needed time to adjust their computer systems and data production systems to support the stress test. This has been a time-consuming and expensive process for them and for OFHEO, but is an essential part of making the entire capital scheme in the 1992 Act operational. Second, the one-year implementation period in the 1992 Act allows the Enterprises to adjust their businesses, including their lending and hedging strategies, to the stress test. Third, the implementation period allows the Enterprises to raise any additional capital that might be required by the Rule. Given the fact that the Enterprises are publicly traded companies, the economic condition of which could be affected greatly by premature disclosure of capital requirements, OFHEO will not disclose capital numbers until the Enterprises have had a reasonable opportunity to make at least a large portion of these adjustments and present to the public their plans to maintain capital compliance.

Use of Code by Parties Other Than OFHEO

Two commenters discussed the difficulties they have encountered in running the computer code released by OFHEO. They both expressed the view that OFHEO should not amend the Rule until they have had time to run the code and analyze the results or until OFHEO has published data regarding the capital impact of any proposed amendments. Instead they would have OFHEO enforce the previous Rule and continue to allow commenters to study the proposed changes. OFHEO disagrees with this approach. The changes that OFHEO adopted are each supportable on its own merits. OFHEO's goal is to have the best rule possible when the Rule becomes enforceable in September 2002. That goal would not be achieved if the changes were delayed until after that date. As a general matter, if OFHEO were to hold up any changes to the Rule until any parties who wished to run the model and test the impact of the changes were able to do so, the Rule would lose the flexibility it must have in order to be dynamic and meaningful. Although the good faith of these commenters in attempting to run the code is not questioned, their ability to do so, or the ability of any other interested party to do so, will not determine whether OFHEO proceeds with needed changes to the Rule.

Notwithstanding that OFHEO will not delay changes to the Rule to allow other parties (including the Enterprises) to be able to run the underlying computer code, OFHEO appreciates the extensive time and resources certain commenters have put into studying the code and attempting to run it. It is beneficial to OFHEO and to the regulatory process to obtain the well-informed and differing views that have resulted. OFHEO also appreciates the importance of the capital rules to parties other than the Enterprises and takes their views and the factual information they supply into consideration in determining the specifications for the stress test. As time and resources allow, OFHEO will continue to work with these parties to help them understand and run the models that underlie the stress test.

In order to assist interested parties with their continued efforts to replicate the model, and to maintain appropriate regulatory transparency, OFHEO intends to make the computer code associated with the Rule available to the public. The code will be available upon request after the Rule is published. OFHEO anticipates that the code will continue to evolve over time as additional efficiencies and technical adjustments are incorporated to enhance the functionality of the code. Consistent with OFHEO's need to address technical requirements or other contingencies that arise out of the operation of the code, the agency will continue to make code changes, without opportunity for public comment, as long as such changes are not inconsistent with the Rule. Any such changes to the code will be made available to the public.

Determination That the Amendments to the Rule Are Not "Economically Significant"

One commenter took issue with the determination by the Office of Information and Regulatory Affairs (OIRA) of the Office of Management and Budget (OMB) that the amendments to the Rule were not "economically significant" within the meaning of Executive Order 12866. OFHEO notes that this determination is entirely consistent with similar determinations made with regard to the capital rules of other federal financial regulatory agencies. As a practical matter, it is impossible to prove what economic impact a change in the Rule will have on the economy. However, OFHEO anticipates the effects on the Enterprises

VOL 67 ISS 51 MR 15 2002 UMI

and the economy as a whole will be small.

Cost/Benefit Analysis

The same commenter suggested that OFHEO should have undertaken a more extensive cost/benefit analysis than was included in the AmendNPR. OFHEO disagrees for much the same reasons that it disagreed that these amendments should be considered an economically significant rule in the previous paragraph.

A detailed cost/benefit analysis such as that suggested by the commenter would begin with an analysis of the marginal capital impact of each change on each of the Enterprises. It would then require judgments to be made about whether and to what extent these marginal impacts would alter the behavior of the Enterprises in the marketplace and the financial impact of those changes on other market participants. With risk-based capital rules, these types of predictions of future behavior are speculative, at best, and analysis is most useful after the change is implemented and its actual impact can be studied. That is why risk-based capital rules tend to be changed relatively frequently and incrementally, as additional information comes to light and the behavior of the regulated entities and the markets in which they operate can be studied.

Comment Period Extension

In the AmendNPR, OFHEO proposed a comment period of thirty days. Two commenters each requested that the comment period be extended to give the public more time to analyze and provide meaningful comment about the proposal.

OFHEO contacted the commenters before the close of the comment period and explained that it decided to deny any request to extend the comment period because, as discussed above, OFHEO has determined that the comment period provided sufficient time for a full and informed discussion of relevant issues. Another reason that the extension was denied is the tight statutory timeframe within which Congress intended that the Rule should become fully enforceable. Specifically, the 1992 Act provides that the Rule becomes fully enforceable one year after the Rule is initially issued. It would be impracticable for OFHEO to meet this statutory timeframe if it were to extend the comment period any further.

To meet the one-year timetable, OFHEO needs to establish a firm baseline set of specifications for the Rule, which can be applied to first quarter, 2002, data from the Enterprises. Any delay in the effective date of these amendments could have caused a one quarter delay in applying that set of specifications. Applying the new specifications to new data from the Enterprises before the risk-based capital rule becomes fully enforceable in September 2002 will allow the Enterprises to adjust to the revised Rule and for OFHEO to study its effects.

Regulatory Impact

Executive Order 12866, Regulatory Planning and Review

Today's final Rule amends OFHEO's risk-based capital rule, which was designated as a major rule by OMB. The amendment refines various aspects of that Rule to tie the capital more closely to risk. Although the impact of these refinements is not economically significant, OMB has reviewed the amendment to determine whether the changes may raise novel policy issues. OFHEO is not required to provide the type of regulatory impact analysis that is required for an economically significant rule. Nevertheless, in accordance with OMB's guidance that all regulatory actions should be consistent with the principles of E.O. 12866, OFHEO has determined, after review by agency economists, financial analysts, and attorneys, that the benefits of the changes to the Rule substantially outweigh any economic costs.

It is impossible to estimate precisely the particular benefits and costs associated with the risk-based capital requirement. Although OFHEO believes this group of enhancements and refinements to the stress test will not generally increase or decrease the amount of required capital for an Enterprise to any substantial degree, the effect in any particular quarter depends upon how well that Enterprise is hedged against the risks and conditions specified in the stress test. OFHEO cannot know whether or not hedges in place at an Enterprise at the beginning of any quarter would have been in place in the absence of specific provisions of the risk-based capital rule or were put in place because of the test. Speculating as to what the Enterprises would do in the absence of specific provisions in future quarters is even more difficult. Therefore, a detailed economic cost/benefit analysis is not practical.

Rather than trying to assess the costs and benefits of every change to the stress test, OFHEO looks to whether or not the changes make the Rule better reflect the risks faced by the Enterprises. Improving the Rule in this manner should reduce the potential for Enterprise insolvency by protecting better against interest rate, credit, and management and operations risk. By helping to ensure the safety and soundness of the Enterprises, the regulation allows them to continue to carry out their public purposes, which include providing stability in the secondary market for residential mortgages and providing access to mortgage credit in central cities, rural areas, and underserved areas.[15] In addition, the regulation helps ensure that the Enterprises will continue to provide benefits to the primary mortgage market, such as standardizing business practices.[16]

The amended Rule results in a capital requirement that corresponds more closely to capital levels that the marketplace would demand in the absence of the benefits afforded by the Government sponsorship of the Enterprises, leading to gains in overall economic efficiency. By improving the Rule's ability to reflect actual risks at the Enterprises, the amendment also may enhance investor confidence in the ability of the stress test to forewarn investors and regulators of financial weaknesses. This result would be consistent with a study by Standard & Poor's (S&P) that provided risk-to-the-government credit ratings for the Enterprises.[17] Although S&P had rated Fannie Mae A– and Freddie Mac A+ in 1991, the 1997 report upgraded the ratings of both Enterprises to AA–. S&P cited increased governmental oversight by OFHEO as an important factor in these higher ratings. It further noted that "OFHEO's regulatory oversight [of Freddie Mac] also gives comfort that appropriate interest rate risk mitigation steps would be taken as needed."[18]

OFHEO can identify no significant additional costs associated with implementing the amendments. No new reports are required, and net effects on required future capital likely will be very small. As explained above in response to comments, it is not practical to measure all the indirect impacts that each of these amendments might have on various sectors of the economy. OFHEO is convinced, however, that the amendments do improve, incrementally, the capital requirements applied to the Enterprises, as described in detail above and in the AmendNPR. In sum, the benefits to the public, including the Enterprises and other private-sector concerns, of improving the sensitivity of the stress test to risk far outweigh the already expended costs of implementing these improvements.

[18] Report to OFHEO, at 10.

Paperwork Reduction Act

This regulation does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires that a regulation that has a significant economic impact on a substantial number of small entities, small businesses, or small organizations must include an initial regulatory flexibility analysis describing the regulation's impact on small entities. Such an analysis need not be undertaken if the agency has certified that the regulation will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). OFHEO has considered the impact of the regulation under the Regulatory Flexibility Act. The General Counsel of OFHEO certifies that the regulation is not likely to have a significant economic impact on a substantial number of small business entities because the regulation is applicable only to the Enterprises, which are not small entities for purposes of the Regulatory Flexibility Act.

List of Subjects in 12 CFR Part 1750

Capital classification, Mortgages, Risk-based capital.

Accordingly, for the reasons stated in the preamble, OFHEO is amending 12 CFR part 1750 as follows:

PART 1750—RISK-BASED CAPITAL

1. The authority citation for part 1750 continues to read as follows:

Authority: 12 U.S.C. 4513, 4514, 4611, 4612, 4614, 4618.

2. Amend Appendix A to subpart B of part 1750 as follows:

a. Revise Table 3–1 in paragraph 3.1.1;

b. Revise Tables 3–2 through 3–4 in paragraph 3.1.2.1;

c. Revise Table 3–18 in paragraph 3.1.3.1 [c];

d. Revise paragraph 3.3.1 [b];

e. Revise paragraph 3.3.3 [a] 3.c.;

f. Revise Table 3–28 in paragraph 3.4.2;

g. Add new paragraph 3.5.3 [a] 2.d.;

h. Revise paragraph 3.5.3 [a] 3. and Table 3–31;

i. In sentence six of paragraph 3.6.1 [e], remove the comma after the words "Credit Losses", add the word "and" in its place; and remove the words "and the Float Income" after the words "Guarantee Fee";

j. Revise paragraph 3.6.3.4.3.1 [a] 2.a.;

k. Revise paragraph 3.6.3.4.3.1 [a] 3.a.;

l. Revise paragraph 3.6.3.5.1 [b];

m. Revise Table 3–38 in paragraph 3.6.3.5.2.;

n. Revise paragraph 3.6.3.5.3.1 [a] 2.;

o. In paragraph 3.6.3.5.3.1 [a] 4, remove the first equation: "$UWDCRF_m$ = 1 if $DCR_m < 1$ in month m" and add the equation "$UWDCRF_m = 1$ if $DCR_m < 0.98$ in month m" in its place;

p. Revise paragraph 3.6.3.5.3.2 [a] 1. and Table 3–39;

q. Revise paragraph 3.6.3.5.3.2 [a] 2.b.;

r. Revise paragraph 3.6.3.5.3.2 [a] 3.;

s. Revise Table 3–44 in paragraph 3.6.3.6.3.2;

t. In section 3.6.3.6.4.3, revise the four paragraphs: [a] 1., [a] 3.b., [a] 4.b. and [a] 5.;

u. Revise paragraph 3.6.3.7.3 [a] 9.b.;

v. Revise paragraph 3.7.3.1 [g] 1.;

w. In paragraphs 3.7.3.2 [a] 5. and 3.7.3.3 [a] 3., add the words ", as appropriate" at the end of the sentence in each paragraph;

x. In paragraph 3.7.4 [a] remove reference to "Table 3–55" and add "Table 3–61" in its place;

y. Redesignate Tables 3–65 through 3–70 as Tables 3–66 through 3–71;

z. After Table 3–64, add new paragraph 3.8.1 [f], new footnote 5, and new Table 3–65;

aa. In paragraphs 3.8.2 [a] and [b] remove references to "Table 3–65" and add "Table 3–66" in their place;

bb. Revise paragraphs 3.8.3.1 [a] 3.a. and 3.8.3.1 [a] 3.d.;

cc. Add new paragraph 3.8.3.1 [a] 3.e.;

dd. In paragraph 3.8.3.4 remove reference to "Table 3–66" and add "Table 3–67" in its place;

ee. In paragraphs 3.8.3.6.1 [e] 1. and [e] 2. remove both references to "Table 3–67" and add "Table 3–68" in their place;

ff. In paragraph 3.8.3.9, in redesignated Table 3–69 remove both references to "Table 3–65" and add "Table 3–66" in their place;

gg. Revise paragraphs 3.8.3.10 [a], [b] and [c];

hh. In paragraph 3.9.2 remove reference to "Table 3–69" and add "Table 3–70" in its place;

ii. In paragraph 3.10.2 [a] remove reference to "Table 3–70" and add "Table 3–71" in its place;

jj. Revise paragraphs 3.10.3.1 [b] 2. and [b] 3.;

kk. Revise paragraph 3.10.3.6.2 [a] 5.; and

ll. Revise the definition of *Enterprise Cost of Funds* in paragraph 4.0 Glossary.

The revisions and additions read as follows:

Appendix A to Subpart B of Part 1750—Risk-Based Capital Text Methodology and Specifications

6 MO Federal Agency COF	Six-month Federal Agency Cost of Funds, monthly simple average of daily rates, quoted as actual/360	Bloomberg Generic 6 Month Agency Discount Note Yield, Ticker: AGDN180Y (index)
1 YR Federal Agency COF	One-year Federal Agency Cost of Funds, monthly simple average of daily rates, quoted as actual/360	Bloomberg Generic 12 Month Agency Discount Note Yield, Ticker: AGDN360Y (index)
2 YR Federal Agency COF	Two-year Federal Agency Fair Market Yield, monthly simple average of daily rates	Bloomberg Generic 2 Year Agency Fair Market Yield, Ticker: AGAC02 (index)
3 YR Federal Agency COF	Three-year Federal Agency Fair Market Yield, monthly simple average of daily rates	Bloomberg Generic 3 Year Agency Fair Market Yield, Ticker: AGAC03 (index)
5 YR Federal Agency COF	Five-year Federal Agency Fair Market Yield, monthly simple average of daily rates	Bloomberg Generic 5 Year Agency Fair Market Yield, Ticker: AGAC05 (index)
10 YR Federal Agency COF	Ten-year Federal Agency Fair Market Yield, monthly simple average of daily rates	Bloomberg Generic 10 Year Agency Fair Market Yield, Ticker: AGAC10 (index)
30 YR Federal Agency COF	Thirty-year Federal Agency Fair Market Yield, monthly simple average of daily rates	Bloomberg Generic 30 Year Agency Fair Market Yield, Ticker: AGAC30 (index)

TABLE 3–18—INTEREST RATE AND INDEX INPUTS—Continued

Interest Rate Index	Description	Source
15 YR fixed-rate mortgage	FHLMC (Freddie Mac) contract interest rates for 15 YR fixed-rate mortgage commitments, monthly average of FHLMC (Freddie Mac) contract interest rates for 15 YR	Bloomberg FHLMC 15 YR, 10 day commitment rate Ticker: FHCR1510 (index)
7-year balloon mortgage rate	Seven-year balloon mortgage, equal to the Conventional Mortgage Rate less 50 basis points	Computed

* * * * *

3.3.1 * * *

[b] The process for determining interest rates is as follows: first, identify values for the necessary Interest Rates at time zero; second, project the ten-year CMT for each month of the Stress Period as specified in the 1992 Act; third, project the 1-month Treasury yield, the 3-month, 6-month, 1-, 2-, 3-, 5-, 20- and 30-year CMTs; fourth, project non-Treasury Interest Rates, including the Federal Agency Cost of Funds Index; and fifth, project the Enterprises Cost of Funds Index, which provides borrowing rates for the Enterprises during the Stress Period, by increasing the Agency Cost of Funds Index by 10 basis points for the last 108 months of the Stress Test.

* * * * *

3.3.3 * * *

[a] * * *

3. * * *

c. *Enterprise Borrowing Rates.* In the Stress Test, the Federal Agency Cost of Funds Index is the same as the Enterprise Cost of Funds Index during the Stress Period, except that the Stress Test adds a 10 basis-point credit spread to the Federal Agency Cost of Funds rates to project Enterprise Cost of Funds rates for the last 108 months of the Stress Period.

* * * * *

3.4.2 * * *

TABLE 3–28—PROPERTY VALUATION INPUTS

Variable	Description	Source
$CMT10_m$	10-year CMT yield for months m = 1...120 of the Stress Test	section 3.3, Interest Rates
$ACMT_o$	Unweighted nine-month average of the ten-year CMT yield for the nine months immediately preceding the Stress Test. (Monthly rates are unweighted monthly averages of daily rates, bond equivalent yield)	section 3.3, Interest Rates
$HHPGR_q^{HSP}$	Quarterly single family historical house price growth rates computed from the HPI series for the Benchmark region and time period, unadjusted for inflation. The specific series is the West South Central Census Division for the years 1984–1993, as reported in OFHEO's Third Quarter, 1996 HPI Report	Table 3–19 of section 3.1.3, Public Data
RG_m^{HSP}	Multifamily Rent Growth Rates for months m = 1...120 of the Benchmark region and time period, unadjusted for inflation	Table 3–20 of section 3.1.3, Public Data
RVR_m^{HSP}	Multifamily Rental Vacancy Rates for months m = 1...120 of the Benchmark region and time period	Table 3–20 of section 3.1.3, Public Data

* * * * *

3.5.3 * * *

[a] * * *

2. * * *

d. The Stress Test will permit a higher rating to be used for an unrated seller-servicer who participates in a multifamily delegated underwriting and servicing program that requires a loss-sharing agreement when: (1) The loss sharing agreement is collateralized by a fully funded reserve account pledged to the Enterprise; and (2) the reserve account is in an amount that is equal to or exceeds the amount that OFHEO has determined to be adequate to support the seller-servicer's loss-sharing obligation under the program. Determinations of the reserve requirement and of the rating that will be permitted will be made on a program-by-program and Enterprise-by-Enterprise basis by the Director.

3. *Determine Maximum Haircuts.* The Stress Test specifies the Maximum Haircut (i.e., the maximum reduction applied to cash flows during the Stress Test to reflect the risk of loss due to counterparty (including security) default) by rating category and counterparty type as shown in Table 3–31.

a. The Maximum Haircut for a rating category is the product of its default rate and its loss severity rate. For all counterparties, the default rates are 5 percent for AAA, 12.5 percent for AA, 20 percent for A, 40 percent for BBB and 100 percent for Below BBB and Unrated. For non-derivative counterparties, the loss severity rate is 70 percent; for derivative counterparties, it is 10 percent. For all Below BBB and Unrated counterparties, the loss severity rate is 100 percent.

b. For periods prior to the implementation of netting, a separate set of Maximum Haircuts (set forth in Table 3–31) will be applied to derivative contract cash flows to approximate the impact of the net exposures to derivative contract counterparties (see section 3.8.3, Nonmortgage Instrument Procedures). After the implementation of netting, exposures will be netted as described in section 3.8.3 before the haircut is applied.

c. With the exception of haircuts for the Below BBB and Unrated category, haircuts for all counterparty categories are phased-in linearly over the 120 months of the Stress Period. The Maximum Haircut is applied in month 120 of the Stress Period. Haircuts for the Below BBB and Unrated category are applied fully starting in the first month of the Stress Test.

TABLE 3–31—STRESS TEST MAXIMUM HAIRCUT BY RATINGS CLASSIFICATION

Ratings Classification	Derivative Contract Counterparties prior to Implementation of Netting	Derivative Contract Counterparties after Implementation of Netting	Non-Derivative Contract Counterparties or Instruments	Number of Phase-in Months
Cash	0%	0%	0%	N/A
AAA	0.3%	0.5%	3.5%	120
AA	0.75%	1.25%	8.75%	120

VOL 67 ISS 51 MR 15 2002 UMI

TABLE 3–31—STRESS TEST MAXIMUM HAIRCUT BY RATINGS CLASSIFICATION—Continued

Ratings Classification	Derivative Contract Counterparties prior to Implementation of Netting	Derivative Contract Counterparties after Implementation of Netting	Non-Derivative Contract Counterparties or Instruments	Number of Phase-in Months
A	1.2%	2%	14%	120
BBB	2.4%	4%	28%	120
Below BBB and Unrated	100%	100%	100%	1

* * * * *

3.6.3.4.3.1 * * *

[a] * * *

2. Calculate $PNEQ_q$, the Probability of Negative Equity in quarter q:

$$PNEQ_q = N\left(\frac{ln LTV_q}{\sigma_q}\right),$$

where:

N designates the cumulative normal distribution function.

a. LTV_q is evaluated for a quarter q as:

$$LTV_{ORIG} \times \frac{\left(\begin{array}{l}\text{Ratio of current}\\ \text{Loan Group UPB}\\ \text{to Original UPB}\end{array}\right)}{\left(\begin{array}{l}\text{Ratio of current property}\\ \text{value (based on HPI in}\\ \text{quarter q) to original}\\ \text{property value (based on}\\ \text{HPI at Origination)}\end{array}\right)}$$

The HPI at Origination is updated to the beginning of the Stress Test using actual historical experience as measured by the OFHEO HPI; and then updated within the Stress Test using House Price Growth Factors from the Benchmark region and time period:

$$LTV_q = LTV_{ORIG} \times \frac{\left(\frac{UPB_{m=3_q-3}}{UPB_{ORIG}}\right)}{\left[CHPGF_0^{LG} \times exp\left(\sum_{k=1}^{q} HPGR_k\right)\right]}$$

Where:

$UPB_{m=3q-3}$ = UPB for the month at the end of the quarter prior to quarter q

$CHPGF_0^{LG} = 1.0$ if the loan was originated in the same quarter as or after the most recently available HPI as of the reporting date

* * * * *

3. * * *

a. Compare mortgage rates for each quarter of the Stress Test and for the eight quarters prior to the start of the stress test (q = −7, −6, ... 0, 1, ... 40):

* * * * *

3.6.3.5.1 * * *

[b] *Explanatory Variables for Default Rates.* Eight explanatory variables are used as specified in the equations in section 3.6.3.5.3.1, of this Appendix, to determine Default rates for multifamily loans: Mortgage Age, Mortgage Age Squared, New Book indicator, Not Ratio-updated ARM indicator, current Debt-Service Coverage Ratio, Underwater Current Debt-Service Coverage indicator, Loan-To-Value Ratio at origination/acquisition, and a Balloon Maturity indicator. Regression coefficients (weights) are associated with each variable. All of this information is used to compute conditional annual Default rates throughout the Stress Test. The annualized Default rates are converted to monthly conditional Default rates and are used together with monthly conditional Prepayment rates to calculate Stress Test Whole Loan Cash Flows. (*See* section 3.6.3.7, Stress Test Whole Loan Cash Flows, of this appendix).

* * * * *

3.6.3.5.2 * * *

TABLE 3–38—LOAN GROUP INPUTS FOR MULTIFAMILY DEFAULT AND PREPAYMENT CALCULATIONS

Variable	Description	Source
	Mortgage Product Type	RBC Report
A_o	Age immediately prior to start of Stress Test, in months (weighted average for Loan Group)	RBC Report
NBF	New Book Flag	RBC Report
RUF	Ratio Update Flag	RBC Report
LTV_{ORIG}	Loan-to-Value ratio at loan Origination	RBC Report
DCR_o	Debt Service Coverage Ratio at the start of the Stress Test	RBC Report
PMT_o	Amount of the mortgage Payment (principal and interest) prior to the start of the Stress Test, or first Payment for new loans (aggregate for Loan Group)	RBC Report
PPEM	Prepayment Penalty End Month number in the Stress Test (weighted average for Loan Group)	RBC Report
RM	Remaining term to Maturity in months (i.e., number of contractual payments due between the start of the Stress Test and the contractual maturity date of the loan) (weighted average for Loan Group)	RBC Report
RGR_m	Benchmark Rent Growth for months m = 1...120 of the Stress Test	section 3.4.4, Property Valuation Outputs
RVR_m	Benchmark Vacancy Rates for months m = 1...120 of the Stress Test	section 3.4.4, Property Valuation Outputs
PMT_m	Scheduled Payment for months m = 1... RM	section 3.6.3.3.4, Mortgage Amortization Schedule Outputs
OE	Operating expenses as a share of gross potential rents (0.472)	fixed decimal from Benchmark region and time period
RVR_o	Initial rental vacancy rate	0.10

* * * * *

3.6.3.5.3.1 * * *

[a] * * *

2. Assign product and ratio update flags (NBF, NRAF). *Note:* these values do not change over time for a given Loan Group.

a. New Book Flag (NBF):

NBF = 1 for Fannie Mae loans acquired after 1987 and Freddie Mac loans acquired after 1992, *except* for loans that were refinanced to avoid a Default on a loan originated or acquired earlier.

NBF = 0 otherwise.

b. Not Ratio-updated Arm Flag (NRAF):

NRAF = 1 if both ARMF = 1 and RUF = 0,

NRAF = 0 otherwise.

Where:

ARMF = 1 for ARMs (including Balloon ARMs)

ARMF = 0 otherwise, and

RUF = 1 if the LTV and DCR were calculated or delegated to have been calculated at origination or recalculated or delegated to have been recalculated at Enterprise acquisition according to current Enterprise standards.

RUF = 0 otherwise

* * * * *

3.6.3.5.3.2 * * *

[a] * * *

1. Compute the logits for multifamily Default using inputs from Table 3–38 and coefficients from Table 3–39. For indexing purposes, the Default rate for a period m is the likelihood of missing the m_{th} payment; calculate its corresponding logit ($X\delta_m$) based on Loan Group characteristics as of the period *prior* to m, i.e. *prior* to making the mth payment.

$$X\delta_m = \delta_{AY}AY_{m-1} + \delta_{AY^2}AY_{m-1}^2 + \delta_{NBF}NBF + \delta_{NRAF}NRAF + \delta_{DCR}ln(DCR_{m-1}) + \delta_{UWDCRF}UWDCRF_{m-1} + \delta_{LTV}ln(LTV_{ORIG}) + \delta_{BMF}BMF_{m-1} + \delta_0$$

TABLE 3–39—EXPLANATORY VARIABLE COEFFICIENTS FOR MULTIFAMILY DEFAULT

Explanatory Variable (V)	Default Weight (δ_v)

2. * * *

b. For the down-rate scenario, $APR_m = 0$ percent during the Prepayment penalty period (i.e., when m ≤ PPEM)

APR_m = 25 percent after the Prepayment penalty period (i.e., when m > PPEM)

* * * * *

3. Convert annual Prepayment and Default rates to monthly rates (MPR and MDR) using the following formulas for simultaneous processes:

$$MPR_m = \frac{APR_m}{ADR_m + APR_m} \times \left[1 - (1 - ADR_m - APR_m)^{\frac{1}{12}}\right]$$

If both ARMF = 0 and RUF = 0, then

$$MDR_m = \left[\frac{ADR_m}{ADR_m + APR_m} \times \left[1 - (1 - ADR_m - APR_m)^{\frac{1}{12}}\right]\right] \times 1.2$$

otherwise,

$$MDR_m = \frac{ADR_m}{ADR_m + APR_m} \times \left[1 - (1 - ADR_m - APR_m)^{\frac{1}{12}}\right]$$

* * * * *

TABLE 3–44—LOAN GROUP INPUTS FOR MULTIFAMILY GROSS LOSS SEVERITY

Variable	Description	Value or Source
	Government Flag	RBC Report
DR_m	Discount Rate in month m (decimal per annum)	6-month Enterprise Cost of Funds from Section 3.3, Interest Rates
MQ	Time during which delinquent loan interest is passed-through to MBS holders	4 for sold loans 0 otherwise
PTR_m	Pass Through Rate applicable to payment due in month m (decimal per annum)	section 3.6.3.3.4, Mortgage Amortization Schedule Outputs
NYR_m	Net Yield Rate applicable to payment due in month m (decimal per annum)	section 3.6.3.3.4, Mortgage Amortization Schedule Outputs
RHC	Net REO holding costs as a decimal fraction of Defaulted UPB	0.07
MF	Time from Default to completion of foreclosure (REO acquisition)	9 months
MR	Months from REO acquisition to REO disposition	15 months
RP	REO proceeds as a decimal fraction of Defaulted UPB	0.63

* * * * * * * *

3.6.3.6.4.3 * * *

[a] * * *

1. Determine Mortgage Insurance Payment (MI_m) for single family loans in the DCC, or Loss Sharing Payment (LSA_m) for multifamily loans in the DCC, as a percentage of Defaulted UPB, applying appropriate counterparty Haircuts from section 3.5., of this Appendix:

$$MI_m^{DCC} = \left(1 - MIExp_m^{LG}\right) \times C^{MI,DCC} \times CLM_m^{MI,LG} \times \left[1 - \frac{m'}{120} \times MaxHct\left(R^{MI,DCC}\right)\right]$$

$$LSA_m^{DCC} = C^{LSA,DCC} \times CLM_m^{LSA,LG} \times \left[1 - \frac{m'}{120} \times MaxHct\left(R^{LSA,DCC}\right)\right]$$

Where:

m′ = m, except for counterparties rated below BBB, where m′ = 120

$$MIExp_m^{LG} = 1 \text{ if } \left(LTV_{ORIG} \times \frac{UPB_m^{LG}}{UPB_{ORIG}^{LG}}\right) < 0.78$$

$MIExp_m^{LG} = 0$ otherwise.

0.78 (78%) = the LTV at which MI is cancelled if payments are current

* * * * * * * *

3. * * *

b. Determine CE Payment in Dollars after application of Haircuts:

$$PD_m^{DCC,C1,H} = PD_m^{DCC,C1} \times \left[1 - \frac{m'}{120} \times MaxHct\left(R^{DCC,C1}\right)\right]$$

Where:

m′ = m, except for counterparties rated below BBB, where m′ = 120

* * * * * * * *

4. * * *

b. Determine CE Payment in Dollars after application of Haircuts:

$$PD_m^{DCC,C2,H} = PD_m^{DCC,C2} \times \left[1 - \frac{m'}{120} \times MaxHct\left(R^{DCC,C2}\right)\right]$$

Where:

m′ = m, except for counterparties rated below BBB, where m′ = 120

* * * * * * * *

5. Convert Aggregate Limit First and Second Priority Contract receipts in Dollars for each DCC in month m to a percentage of DCC Defaulted UPB:

$$ALPD_m^{DCC} = \frac{\left(PD_m^{DCC,C1,H} \times ELPI^{DCC,C1}\right) + \left(PD_m^{DCC,C2,H} \times ELPI^{DCC,C2}\right)}{DEF_m \times UPB_{m-1}^{LG} \times P^{DCC}}$$

Where:

$ELPI^{DCC,C} = 0$ if $ELPF^{DCC,C}$ = Y (Yes, indicating that Contract C is an Enterprise Loss Position)

$ELPI^{DCC,C} = 1$ otherwise

* * * * * * * *

3.6.3.7.3. * * *

[a] * * *

9. * * *

b. Float Income (FI) received in month m

$$FI_m = \left(\left[\left[\left[\left(SPR_m + NIR_m - GF_m\right) \times \frac{FDS}{365}\right] + \left[PPR_m \times \frac{FDP}{365}\right]\right) \times FER_m\right] - PIS_m\right) \times (1 - FREP)$$

where: Prepayment Interest Shortfall (PIS) in month m is:

$$PIS_m = UPB_{m-1} \times PRE_m \times \frac{PTR_m}{12}$$

if FDP ≥ 30

$$PIS_m = UPB_{m-1} \times PRE_m \times \frac{PTR_m}{24}$$

if 15 ≤ FDP < 30

* * * * *

3.7.3.1 * * *

[g] * * *

1. Compute:

$$HctFac_m = \frac{m'}{120} \times MaxHct\,(R)$$

Where:

m′ = m, except for MBS credit rating below BBB where m′=120

R = MBS credit rating

* * * * *

3.8.1 * * *

[f] In a currency swap, the Enterprise receives payments that are denominated in a foreign currency and it makes payments in U.S. dollars. The main difference between currency swaps and the type of swaps discussed above is that in a currency swap principal amounts are actually exchanged between the two counterparties. Currency swaps are divided into two classes, as shown in Table 3–65.[5]

[5] *Ibid.*

TABLE 3–65—CURRENCY SWAP CONTRACT CLASSIFICATION

Classification	Description of Contract
Fixed-for-Fixed Currency Swap	Enterprise receives fixed interest payments denominated in a foreign currency and makes fixed, US dollar-denominated payments
Fixed-for Floating Currency Swap	Enterprise receives fixed interest payments denominated in a foreign currency and makes payments in US dollar based on a floating interest rate

* * * * * * * *

3.8.3.1 * * *

[a] * * *

3. When applying the option exercise rule:

a. For zero coupon and discount securities, instruments with European options, and zero coupon swaps, evaluate option exercise only on dates listed in the instrument's option exercise schedule. For Bermudan options, evaluate option exercise on the first option date in the instrument's option exercise schedule and subsequent coupon dates (coupon dates on the fixed-rate leg for swaps). For American options, evaluate option exercise on the first option date in the instrument's option exercise schedule and subsequent monthly anniversaries of the instrument's first coupon date.

* * * * * * * *

d. If the remaining maturity is greater than 360 months, use the equivalent-maturity Enterprise Cost of Funds as if the remaining maturity is 360 months.

e. In the Stress Test, no preferred stock issued by the Enterprise will be called.

* * * * * * * *

3.8.3.10 * * *

[a] Finally, the interest and principal cash flows received by the Enterprises for non-mortgage instruments other than swaps and foreign currency-related instruments are Haircut (i.e., reduced) by a percentage to account for the risk of counterparty insolvency, if a counterparty obligation exists. The amount of the Haircut is calculated based on the public rating of the counterparty and time during the stress period in which the cash flow occurs, as specified in section 3.5, Counterparty Defaults, of this Appendix.

[b] An Enterprise may issue debt denominated in, or indexed to, foreign currencies, and eliminate the resulting foreign currency exposure by entering into currency swap agreements. The combination of the debt and the swap creates synthetic debt with principal and interest payments denominated in U.S. dollars. The Haircuts for currency swaps are applied to the pay (dollar-denominated) side of the currency swaps, or to the cash outflows of the synthetic debt instrument. Therefore, the payments made by the Enterprise on a foreign currency contract are increased by the haircut amount. The Haircuts and the Phase-in periods for currency swaps are detailed in Table 3–31, under Derivative Contracts.

[c] Haircuts for swaps that are not foreign currency related are applied to the Monthly Interest Accruals (as calculated in section 3.8.3.8, of this Appendix) on the receive leg minus the Monthly Interest Accruals on the pay leg when this difference is positive. Use the maximum haircut from Table 3–31 for periods before and after the implementation of netting, as appropriate. After the implementation of netting, net the swap proceeds for each counterparty before applying the haircuts. The following example applies to an Enterprise having two swaps with the same counterparty. On the first swap, the Enterprise pays fixed and receives floating and on the second swap it pays floating and receives fixed. If the counterparty is a net payer to the Enterprise, the haircuts will be applied to the sum of the two receive legs net of the sum of the two pay legs.

* * * * * * * *

3.10.3.1 * * *

[b] * * *

2. In any month in which the cash position is negative at the end of the month, the Stress Test issues a mix of new short-term and long-term debt on the 15th day of that month. New short-term debt issued is six-month discount notes with a discount rate at the six-month Enterprise Cost of Funds as specified in section 3.3, Interest Rates, of this Appendix, with interest accruing on a 30/360 basis. New long-term debt issued is five-year bonds not callable for the first year ("five-year-no call-one") with an American call at par after the end of the first year, semiannual coupons on a 30/360 basis with principal paid at maturity or call, and a coupon rate set at the five year Enterprise Cost of Funds as specified in section 3.3, Interest Rates, of this Appendix, plus a 50 basis point premium for the call option. During the Stress Test, the call option for new long-term debt issued is not executed in the up-rate scenario and in the down-rate scenario follows the same call exercise rule as other debt. An issuance cost of 2.5 basis points is assessed on new short-term debt at issue and an issuance cost of 20 basis points is assessed on new long-term debt at issue. New long-term debt is issued to target a total debt mix of short- to long-term debt that is the same as the short- to long-term debt mix at the beginning of the Stress Test. Issuance fees for new debt are amortized on a straight line basis to the maturity of the appropriate instrument.

3. Given the Net Cash Deficit (NCD_m) in month m, use the following constants and method to calculate the amount of short-term and long-term debt to issue in month m:

a. Set the Issuance Cost on new short-term debt at issue (ISCOST):
ISCOST = 0.00025

b. Set the Issuance Cost on new long-term debt at issue (ILCOST):
ILCOST = 0.002

c. Calculate Net Short-term Debt Outstanding ($NSDO_0$) and Total Debt Outstanding (TDO_0) at the start of the Stress Test (m = 0) using the following methodology:

1) For each month m and each debt and swap instrument i (each swap leg is considered a separate instrument), determine the Month of Next Repricing (MNR_m) defined as the first month greater than m in which the instrument matures or repricing can occur whether or not the coupon rate actually changes. Set the Principal Balance (PB_m) to be:

a) The principal (or notional principal) outstanding if the instrument cash flows are paid by the Enterprise,

b) Minus the principal (or notional principal) outstanding if the instrument cash flows are received by the Enterprise.

c) Zero if m is less than or equal to the issue month or the month in which an option exercised during the stress test would begin accruing cash flows to or from the Enterprise.

d) Zero if m is greater than or equal to the maturity month or the month in which an option exercised during the stress test would cease further cash flows to or from the Enterprise.

2) Calculate $NSDO_m$ by summing $PB_{m,i}$ for all instruments where $MNR_{m,i}$ is less than or equal to m plus 12.

3) Calculate TDO_m by summing $PB_{m,i}$ for instruments where $MNR_{m,i}$ is greater than m.

d. Set the Maximum Proportion of Total Debt (MPD):

$$MPD = \frac{TDO_0 - NSDO_0}{TDO_0}$$

e. Calculate Discount Rate Factor (DRF_m):

$$DRF_m = \left(1 + \frac{CF_m}{12}\right)^6$$

Where: CF_m = six month Enterprise Cost of Funds for month m

f. Calculate the Adjustment Factor for Short-Term Debt Issuance Fees ($AFSIF_m$):

$$AFSIF_m = \frac{DRF_m}{1 - ISCOST \times DRF_m}$$

g. Calculate the Adjustment Factor for Long-Term Debt Issuance Fees ($AFLIF_m$):

$$AFLIF_m = \frac{1}{1 - ILCOST}$$

h. Calculate the Maximum Long-Term Issuance ($MLTI_m$):

VOL 67 ISS 51 MR 15 2002 UMI

VOL
67
ISS
51
MR
15
2002
UMI

$$MLTI_m = NCD_m \times AFLIF_m$$

i. Calculate Net Short-Term Debt Outstanding ($NSDO_m$) and Total Debt Outstanding (TDO_m) for month m using the methodology described in paragraph 3.10.3.1.[b]3.c. of this appendix. *Note:* This calculation must reflect all new issuances, option exercises, and maturities between the beginning of the Stress Test and month m.

j. Calculate Interim Face Amount of Long-Term Debt to be issued this month ($IFALD_m$):

$$IFALD_m = \frac{((MPD - 1) \times TDO_m) + NSDO_m + (MPD \times AFSIF_m \times NCD_m)}{1 - MPD + \left(AFSIF_m \times \frac{MPD}{AFLIF_m}\right)}$$

k. Calculate Face Amount of Long-Term Debt to be issued ($FALD_m$):

$$FALD_m = min(MLTI_m, max(0, IFALD_m))$$

l. Calculate Face Amount of Short-Term Debt to be issued ($FASD_m$):

$$FASD_m = AFSIF_m \times max\left(0, NCD_m - \frac{FALD_m}{AFLIF_m}\right)$$

* * * * *

3.10.3.6.2 * * *

[a] * * *

5. *Fixed Assets.* 25 percent of fixed assets (net of accumulated depreciation) as of the beginning of the Stress Test remain constant over the Stress Test. The remaining 75 percent is converted to cash on a straight line basis over the ten-year Stress Period. Depreciation is included in the base on which operating expenses are calculated for each month during the Stress Period.

* * * * *

4.0 * * *

Enterprise Cost of Funds: Cost of funds used in computing the cost of new debt for the Enterprises during the Stress Test, as specified in section 3.3.3.[a]3.c., of this Appendix.

SMALL BUSINESS ADMINISTRATION

13 CFR Parts 121 and 123

RIN 3245–AE93

Small Business Size Standards; Travel Agencies; Economic Injury Disaster Loan Program

AGENCY: Small Business Administration (SBA).

ACTION: Interim final rule with request for comments.

SUMMARY: For purposes of eligibility for economic injury disaster loan assistance attributed to the September 11, 2001 terrorist attacks on the World Trade Center, New York, New York and the Pentagon, Arlington, VA, the SBA is increasing the size standard for Travel Agencies (North American Industry Classification System (NAICS) code 561510) to $3 million from $1 million. This action applies to small business Travel Agencies located in and outside of the declared areas for that disaster. This interim final rule is published in conjunction with SBA's proposed rule elsewhere in this issue of the **Federal Register** that recommends increasing the size standard for Travel Agencies from $1 million to $3 million for all Federal small business assistance programs. SBA believes that this action will better define the size of businesses in this industry that the SBA believes should be eligible for Federal small business assistance programs. This rule also changes the time at which size status is determined for economic injury disaster loan assistance in connection with the September 11, 2001 attacks.

DATES: Effective Date: This rule becomes effective March 15, 2002.

Comment Date: Comments must be received on or before April 15, 2002.

ADDRESSES: Send comments to Gary M. Jackson, Assistant Administrator for Size Standards, 409 3rd Street, SW., Mail Code 6530, Washington, DC 20416; or via e-mail to *SIZESTANDARDS@sba.gov*. Upon request, SBA will make all public comments available.

FOR FURTHER INFORMATION CONTACT: Diane Heal, Office of Size Standards, (202) 205–6618.

SUPPLEMENTARY INFORMATION:

I. Justification for Increasing the Size Standard

SBA has received requests from firms and trade associations in the travel industry to increase the $1 million size standard for Travel Agencies. These organizations believe that this action is warranted in light of the specialized equipment and systems required on Federal and corporate travel services contracts and the consolidated and regional approach by Federal agencies and large commercial clients in the performance of these contracts. They believe that the Federal government and corporate client travel markets have changed. These clients require specific equipment and systems, and have requirements on a regional or national basis. These requirements have raised the costs of doing business in this industry to the point that the pool of eligible small businesses performing government and corporate client travel services has seriously declined. Federal agencies also express concern regarding this trend. Specifically, agencies are concerned that the declining pool of eligible small businesses with the ability to perform these contracts will result in fewer contracts with small travel agencies.

SBA agrees that recent changes in the Travel Agencies industry warrant a review of the size standard. Below is a discussion of the SBA's size standards methodology and the analysis leading to the proposal to increase the size standard for Travel Agencies under NAICS code 561510 to $3 million.

Size Standards Methodology: Congress grants SBA discretion to establish detailed size standards. The Agency's Standard Operating Procedure (SOP) 90 01 3, "Size Determination Program" (available on SBA's Web site at *http:/www.sba.gov/library/soproom.html)* sets out four categories for establishing and evaluating size standards: (1) The structure of the industry and its various economic characteristics, (2) SBA program objectives and the impact of different size standards on these programs, (3) whether a size standard successfully excludes those businesses which are dominant in the industry, and (4) other factors if applicable. Other factors may come to the attention of SBA during the public comment period or from SBA's own research on the industry. No formula or weighting has been adopted so that the factors may be evaluated in the context of a specific industry. Below is a discussion of SBA's analysis of the economic characteristics of an industry, the impact of a size standard on SBA programs, and the evaluation of whether a firm at or below a size standard could be considered dominant in the industry under review.

Industry Analysis: The Small Business Act requires that size standards vary by industry to the extent necessary to reflect differing industry characteristics (Section 3(a)(3)). SBA has in place two "base or anchor size standards" that apply to most industries—500 employees for manufacturing industries and $6 million for nonmanufacturing industries. SBA established 500 employees as the anchor size standard for the manufacturing industries at SBA's inception in 1953 and shortly thereafter established a $1 million size standard for the nonmanufacturing industries. The receipts-based anchor size standard for the nonmanufacturing industries has been periodically adjusted for inflation so that, currently, the anchor size standard for the nonmanufacturing industries is $6 million. Anchor size standards are presumed to be appropriate for an industry unless its characteristics indicate that larger firms have a much greater significance within that industry than for the "typical industry."

The current size standard for Travel Agencies under NAICS code 561510 is $1 million, which is lower than the $6 million nonmanufacturing anchor. This size standard excludes funds received in trust for an unaffiliated third party, such as bookings or sales subject to commissions. The commissions received are included as revenue. In its review, SBA used the nonmanufacturing anchor for comparability purposes.

When evaluating a size standard, the characteristics of the specific industry under review are compared to the characteristics of a group of industries, referred to as a comparison group. A comparison group is a large number of industries grouped together to represent the typical industry. It can be comprised of all industries, all manufacturing industries, all industries with receipt-based size standards, or some other logical grouping. If the characteristics of a specific industry are similar to the average characteristics of the comparison group, then the anchor size standard is considered appropriate for the industry. If the specific industry's characteristics are significantly different from the characteristics of the comparison group, a size standard higher or, in rare cases, lower than the anchor size standard may be considered appropriate. The larger the differences between the specific industry's characteristics and the comparison group, the larger the difference between the appropriate industry size standard and the anchor size standard. Only when all or most of the industry characteristics are significantly smaller than the average characteristics of the comparison group, or other industry considerations strongly suggest the anchor size standard would be an unreasonably high size standard for the industry under review, will SBA adopt a size standard below the anchor size standard.

In 13 CFR 121.102 (a) and (b), evaluation factors are listed which are the primary factors describing the structural characteristics of an industry'average firm size, distribution of firms by size, start-up costs, and industry competition. The analysis also examines the possible impact of a size standard revision on SBA's programs. The SBA generally considers these five factors to be the most important evaluation factors in establishing or revising a size standard for an industry. However, it will also consider and evaluate other information that it believes relevant to the decision on a size standard as the situation warrants for a particular industry. Public comments submitted on proposed size standards are also an important source of additional information that SBA closely reviews before making a final decision on a size standard. Below is a brief description of each of the five evaluation factors.

1. *Average firm size* is simply total industry receipts (or number of employees) divided by the number of firms in the industry. If the average firm size of an industry were significantly higher than the average firm size of a comparison industry group, this fact would be viewed as supporting a size standard higher than the anchor size standard. Conversely, if the industry's average firm size is similar to or significantly lower than that of the comparison industry group, it would be a basis to adopt the anchor size standard or, in rare cases a lower size standard.

2. *The distribution of firms by size* examines the proportion of industry receipts, employment, or other economic activity accounted for by firms of different sizes in an industry. If the preponderance of an industry's economic activity is by smaller firms, this tends to support adopting the anchor size standard. The opposite is the case for an industry in which the distribution of firms indicates that economic activity is concentrated among the largest firms in an industry. In this rule, the SBA is comparing the size of firm within an industry to the size of firm in the comparison group at which predetermined percentages of total industry receipts are cumulatively generated by firms at that size and smaller. For example, for Travel Agencies, firms of $2.2 million in receipts and less generate 50% of total industry receipts. This contrasts with the comparison group (composed of industries with the nonmanufacturing anchor size standard of $6 million) in which firms of $5.8 million or less in receipts generated 50% of total industry receipts. Viewed in isolation, this significantly lower figure for the Travel Agencies suggests a size standard at or below the $6 million nonmanufacturing anchor size standard. Other size distribution comparisons in the industry analysis include 40%, 60%, and 70%, as well as the 50% comparison discussed above.

3. *Start-up costs* affect a firm's initial size because entrants into an industry must have sufficient capital to start and maintain a viable business. To the extent that firms entering into an industry have greater financial requirements than firms do in other industries, SBA is justified in considering a higher size standard. SBA collected start-up costs data from trade organizations. In addition, SBA is using a proxy measure to assess the financial burden for entry-level firms. SBA is using nonpayroll costs per establishment as a proxy measure for start-up costs. This is derived by first calculating the percent of receipts in an industry that are either retained or expended on costs other than payroll costs. (The figure comprising the numerator of this percentage is mostly composed of capitalization costs, overhead costs, materials costs, and the costs of goods sold or inventoried.) This percentage is then applied to average establishment receipts to arrive at nonpayroll costs per establishment (an establishment is a business entity operating at a single location). An industry with a significantly higher level of nonpayroll costs per establishment than that of the comparison group is likely to have higher start-up costs that would tend to support a size standard higher than the anchor size standard. Conversely, if the industry showed significantly lower nonpayroll costs per establishment when compared to the comparison group, the anchor size standard would be considered the appropriate size standard.

4. *Industry competition* is assessed by measuring the proportion or share of industry receipts obtained by firms that are among the largest firms in an industry. In this interim final rule, SBA compared the proportion of industry receipts generated by the four largest firms in the industry—generally referred to as the "four-firm concentration ratio"—with the average four-firm concentration ratio for industries in the comparison groups. If a significant proportion of economic activity within the industry is concentrated among a few relatively large producers, SBA tends to set a size standard relatively higher than the anchor size standard to assist firms in a broader size range compete with firms that are larger and more dominant in the industry. In general, however, SBA does not consider this to be an important factor in assessing a size standard if the four-firm concentration ratio falls below 40% for an industry under review.

5. *Competition for Federal procurements and SBA Financial Assistance.* SBA also evaluates the possible impact of a size standard on its programs to determine whether small businesses defined under the existing size standard are receiving a reasonable level of assistance. This assessment most often focuses on the proportion or share of Federal contract dollars awarded to small businesses in the industry. In general, the lower the share of Federal contract dollars awarded to small businesses in an industry which receives significant Federal procurement revenues, the greater the justification for a size standard higher than the existing one.

As another factor to evaluate the impact of a size standard on SBA programs, the volume of guaranteed loans within an industry and the size of firms obtaining those loans is assessed to determine whether the current size standard may restrict the level of financial assistance to firms in that industry. If small businesses receive ample assistance through these programs, or if the financial assistance is provided mainly to small businesses much lower than the size standard, a change to the size standard (especially, if it is already above the anchor size standard) may not be appropriate.

Evaluation of Industry Size Standard: The two tables below show the characteristics for Travel Agencies activities and of a comparison group. The primary comparison group is comprised of all industries with a $6 million receipt-based size standard (referred to as the nonmanufacturing anchor group). Since SBA's size standards analysis is assessing whether the Travel Agencies size standards should be higher as compared to the nonmanufacturing anchor size standard, this is the most logical set of industries to group together for the industry analysis. SBA examined economic data on these industries from the 1997 Economic Census prepared under contract by the U. S. Bureau of the Census. SBA also examined Federal contract award data for fiscal years 1998–2000 from the U. S. General Services Administration's (GSA) Federal Procurement Data Center, and GSA's award data and information on its Travel Management Centers.

VOL 67 ISS 51 MR 15 2002 UMI

Industry Structure Consideration: Table 1 below examines the size distribution of Travel Agencies. For this factor, SBA is evaluating the size of firms that account for predetermined percentages of total industry receipts (40%, 50%, 60%, and 70%). The table shows firms up to a specific size that, along with smaller firms, account for a specific percentage of total industry receipts. For example, Travel Agencies with $900 thousand or less in receipts obtained 40% of total industry receipts. Within the nonmanufacturing anchor group, firms of $3.2 million or less in receipts obtained 40% of total industry receipts in the average industry.

TABLE 1.—SIZE DISTRIBUTIONS OF FIRMS OF TRAVEL AGENCIES

[Data in Millions of Dollars]

Category	Size of firm at 40%	Size of firm at 50%	Size of firm at 60%	Size of firm at 70%
Travel agencies	$0.9	$2.2	$5.8	$27.1
Nonmanufacturing anchor group	3.2	5.8	11.9	28.0

These data show the prevalence of much smaller businesses in the Travel Agencies industry than for businesses in the nonmanufacturer anchor comparison group. Travel agencies accounting for between 40% to 60% of industry revenues are one-fourth to one-half of the size of businesses in the nonmanufacturing anchor group that capture a similar proportion of industry revenues. However, large firms at the 70% level are equivalent in size to those in the nonmanufacturer anchor group, which reflects the influence of large corporations offering travel services. The distribution of travel agencies revenues by size of business in relation to the nonmanufacturer anchor group indicate a size standard below the $6 million anchor size standard is appropriate. Also, that a size standard between $2 million to $3 million would represent a reasonable size standard for the Travel Agencies industry since these businesses capture approximately half of industry activity.

Table 2 lists the other three evaluation factors for Travel Agencies and the comparison groups. These include comparisons of average firm size, the measurement of start-up costs as measured by nonpayroll receipts per establishment, and the four-firm concentration ratio.

TABLE 2.—INDUSTRY CHARACTERISTICS OF TRAVEL AGENCIES

Category	Average firm size		Non payroll receipts per establishment (million $)	Four firm concentration ratio (in percent)
	Receipts (millions)	Employees		
Travel agencies	$0.44	8.1	$0.188	16.3
Nonmanufacturing anchor group	0.95	10.6	0.562	14.4

For Travel Agencies, the average firm size in receipts is lower than the nonmanufacturing anchor group's size. However, the average number of employees is about the same as the nonmanufacturer anchor group size. Based on this factor, a size standard of $2.5 to $3.5 million, or approximately half the nonmanufacturer anchor size standard, is supportable.

Nonpayroll receipts per establishment, a measure of capital requirements to enter an industry, comparatively, are much lower (a three-to-one ratio) for Travel Agencies as those of the nonmanufacturer anchor group. These data do not support a basis for a higher size standard. However, SBA collected additional information on start-up cost from the Society of Government Travel Professionals (SGTP). SBA's research has found that for travel agencies involved in arranging travel services for large corporate clients and the Federal Government, start-up costs are higher as compared with the firms involved in leisure travel services. Corporate clients and the Federal government require firms to have dedicated equipment, secure lines, and access to two or more airline ticketing reservation services. The Federal Government and the corporate world insist on seamless travel management and back-end systems. Firms must be able to link to corporate and Federal travel systems that links customer, travel agent, billing systems, credit card reconciliation systems, provide 24 hour and seven days a week service centers; train government and contractor personnel; and provide quality control and inspection plans. Start-up costs for these requirements amount up to $160,000 to $200,000 on an average contract of approximately $8.5 million in travel bookings. These clients also require that travel agencies prepare periodic reports on their travel activities. This reporting responsibility requires travel agencies to utilize management information systems to monitor their clients and represents a service activity beyond the arrangement of travel and related accommodations. Therefore, higher start-up costs associated with serving Federal and corporate clients support an increase in the size standard for the Travel Agencies industry of at least twice the current size standard. SBA welcomes public comment on start-up costs for Travel Agencies, in particular, how these costs are relevant to corporate and Federal government contracts. Comments supporting these costs should include information and costs associated with what type of specialized equipment, bonding, management information systems, security and training requirements are needed for corporate and Federal government clients, along with any other relevant requirements and information.

The Travel Agencies four-firm concentration ratio, however, is relatively low, indicating that the industry is not dominated by large businesses. This factor does not support a basis for a higher size standard for Travel Agencies.

SBA Program Considerations: SBA also reviews its size standards in relationship to its programs. This interim final rule gives more consideration to the pattern of Federal contract awards than to the level of financial assistance to small businesses to assess whether its size standard should be revised.

In fiscal year 2000, 45 loans for $4.5 million were guaranteed to Travel Agencies, with 78% of these loans going to firms with less than $545,000 in receipts. It's unlikely that an increase to the size standard will have much impact on the financial programs and, consequently, this factor is not part of the assessment of the size standard.

The Federal government spends approximately $7 billion on official travel per year. In addition, the Department of Defense awards contracts for leisure travel services, which are worth $5 billion per year (as reported to the House of Representatives, Small Business Committee on November 4, 1999 by the Society of Travel Agencies in Government (STAG)). Federal Procurement Data System (FPDS) statistics for the fiscal years 1998 through 2000 show that awards to small businesses averaged less than 1% of the total dollars awarded for Travel Agencies services. For Fiscal Year 2000, $206,000 out of $25 million was reportedly awarded to small businesses. However, Federal travel services are procured mostly through General Services Administration (GSA) Travel Management Centers (TMCs) and the Defense Travel System. Awards made through these contract vehicles are on a transaction fee basis and all travel costs that are purchased with a government credit card, are not recorded in the FPDS. In fiscal year 2002, the Department of Defense (DoD) hopes to set aside six of its 24 contracts to small business. Currently, GSA has awarded contracts to 49 firms for TMCs of which 20 firms are small businesses. Out of the 20 firms, 17 have task orders. GSA also provided SBA with its estimate for the fiscal year 2001 tickets, sales, revenues, and fees received by its TMCs.

TABLE 3.—GSA TMC SMALL BUSINESS CONTRACTOR'S SALES REVENUE

	Number of tickets	Sales ($)	Commissions	Transaction fees	Total revenue
Total TMCs	1,292,917	$518,966,320	$24,423,055	$12,630,279	$33,647,038
Percentage of Total to Small Business TMCs	3.8	3.5	3.4	6.7	3.5

These statistics reveal that small business, despite the fact that they are awarded 41% of the number of contracts, receive very little of the ticket orders, commissions, fees, and revenues. These statistics also support the Federal contracting officers concerns that the pool of small businesses capable of submitting viable proposals for their travel service contracts is dwindling because of the sophistication and significant investments required of these firms. New procurements for travel management services require firms to provide automation of the travel arrangements process through the use of on-line booking products; 24 hour and seven days a week service centers; interfaces with an agency's finance system; complex travel management information systems; secure or dedicated lines that meet privacy and security requirements; training for government and contractor personnel; compliance costs; and quality control and inspection plans. As mentioned earlier, the SGTP estimates these start-up costs to be $200,000 on an average contract of $8.5 million in travel bookings.

The FPDS statistics, plus other contract factors such as large start-up costs to implement a Federal travel service contract and the declining pool of small businesses submitting proposals suggest that a size standard significantly higher than $1 million may be appropriate for Travel Agencies.

Overview: Based on the analysis of each evaluation factor, SBA is proposing a $3 million size standard. Four out of the five factors support an increase to the current $1 million size standard for Travel Agencies. Two factors support a size standard approximately half of the nonmanufacturer anchor size standard—average firm size and distribution of travel agencies. Two factors support an increase at least twice the current $1 million. Start-up costs, especially for those firms that have corporate and Federal clients, have higher costs due to client requirements than for travel agencies offering primarily leisure travel. Travel agencies providing services to corporate and government clients tend to be larger in size than travel agencies offering leisure travel in order to finance needed investment in the equipment and personnel. Procurement statistics, increasingly sophisticated procurement requirements, and higher contract start-up costs have lead to the decline in the pool of viable small businesses that have the ability to compete on travel service contracts, as evidenced by the extremely low small business percentages for tickets, sales, commissions, fees, and total revenues. A size standard at least twice the nonmanufacturer size standard will increase the pool of small businesses that can meet the government's requirements.

Dominant in Field of Operation: Section 3(a) of the Small Business Act defines a small concern as one that is (1) independently owned and operated, (2) not dominant in its field of operation and (3) within detailed definitions or size standards established by the SBA Administrator. SBA considers as part of its evaluation of a size standard whether a business concern at or below an amended size standard would be considered dominant in its field of operation. This assessment generally considers the market share of firms at the proposed or final size standard or other factors that may show whether a firm can exercise a major controlling influence on a national basis in which significant numbers of business concerns are engaged.

The SBA has determined that no firm at or below the amended size standards for Travel Agencies would be of a sufficient size to dominate its field of operation. For Travel Agencies, a firm $3 million in size would generate an estimated .01% of the total industry receipts. This level of market share effectively precludes any ability for a firm at or below the amended size standard to exert a controlling effect on these industries.

Alternative Size Standards: SBA considered doubling the Travel Agencies size standard from $1 million to $2 million, but believed that this level would not fully capture the small business segment of the Travel Agencies industry. A survey of Travel Agencies showed that those with $1 million and less in revenues have declined by more than one-third while Travel Agencies with more than $2 million have almost doubled. This fact indicates that Travel Agencies have needed to expand their operations to remain competitive. In addition, SBA is very concerned about the capabilities of smaller Travel

VOL
67
ISS
51
MR
15
2002
UMI

Agencies to satisfy the requirements of government and corporate clients. The initial capital resources and recurring costs to obtain and maintain travel systems and to provide other travel related services also suggest a size standard greater than $2 million. These trends are reflected in the analysis of Travel Agencies' industry data. Two factors, distribution for receipts by firm size and average firm size, supported size standards of at least $2 million and as high as $3 million to $3.5 million. These considerations, along with the uncertainties with regard to compensation for travel services and the expanding use of internet technology for travel reservations, convinced SBA that a size standard higher than $2 million should be considered.

SBA also contemplated as an alternative size standard adopting the $6 million anchor size standard to the Travel Agencies industry. As discussed in the description of SBA's size standards methodology, SBA applies the $6 million anchor size standard to the nonmanufacturing industries unless the industry's characteristics are significantly different from the typical nonmanufacturing industry. The analysis of the various industry factors shows that the characteristics of Travel Agencies are significantly below those of the nonmanufacturing anchor group industries. Thus, a size standard below the anchor size standard is appropriate for this industry. As discussed above, SBA believes the characteristics of Travel Agencies support a size standard higher than the $1 million but lower than the anchor nonmanufacturing size standard.

II. Justification for Changing Date of Determination of Size Status

SBA is also changing the date as of which size status is determined for purposes of Economic Injury Disaster Loan (EIDL) applications related to the September 11, 2001, terrorist attacks. Existing sections 121.302(c), 123.300(b), and 123.601(b) require an applicant for an EIDL loan to be small as of the date the disaster commenced, as set forth in the disaster declaration. SBA is changing the date size status is determined for September 11 EIDL assistance to "the date SBA accepts the application for processing."

SBA believes that this change will have only a minimal impact on eligibility. Under the size regulations, the receipts size of a business is calculated as an average for the business' last three completed fiscal years.

For purposes of September 11 EIDL assistance, receipts after September 11 to the end of the business' fiscal year would influence its three-year average if it filed an application after the end of that fiscal year. Most businesses use the calendar year as their fiscal year. The short period of time between September 11 and December 31 would have a relatively minor impact on the number of new firms that could qualify as small as a result of changing the date of size status to the date of application. A worst case example using the proposed $3 million Travel Agencies size standard demonstrates why this would affect few businesses.

Example: A business that averages $3.33 million per year could become an eligible small business if it had no receipts for the period September 11 to December 31. For Year 3, $2.34 million represents $3.3 million in annualized receipts.

Year 1 $3.33 million
Year 2 $3.33 million
Year 3 + $2.34 million
Sum = $9.00 million
Average = $3.00 million

Based on SBA's analysis of the Travel Agencies' industry and discussions with members of the industry, SBA has concluded that this scenario is highly unlikely.

SBA also believes this change is necessary to assist Travel Agencies and other small businesses that should have been considered small for purposes of September 11, 2001 EIDL assistance.

On January 23, 2002, SBA increased its size standards to reflect the effects of inflation since 1994. Businesses recognized as small under that rule will be able to file applications for September 11, 2001 EIDL assistance. Moreover, of all the industries severely impacted by the September 11 attacks, the Travel Agencies industry is the only one that did not have its size standard adjusted on January 23, 2002, to reflect the effect of inflation. SBA did not increase the size standard for Travel Agencies at that time since SBA was already in the process of re-evaluating the Travel Agencies size standard to reflect changing industry conditions, as further described under "Justification for Increasing the Size Standard" in this preamble.

The combination of these unique circumstances necessitate changing the date of determination of size status for purposes of September 11 EIDL assistance only. SBA does not foresee the need to apply this approach in the future.

In addition, to avoid the burden of re-submitting an application, any previously submitted application which was pending or denied because of size status will be deemed to have been resubmitted on the effective date of this rule.

III. Justification for Publication as an Interim Final Rule

This interim final rule is specifically for EIDL assistance attributable to the September 11, 2001 terrorist attacks on the World Trade Center in New York, New York and the Pentagon in Arlington, Virginia. SBA is also publishing a separate proposed rule elsewhere in this issue of the **Federal Register** that addresses the Travel Agencies size standard for all other small business purposes.

In general, SBA publishes a rule for public comment before issuing a final rule, in accordance with the Administrative Procedure Act and SBA regulations. 5 U.S.C. 553 and 13 CFR 101.108. The Administrative Procedure Act provides an exception to this standard rulemaking process, however, where an agency finds good cause to adopt a rule without prior public participation. 5 U.S.C. 553(b)(3)(B). The good cause requirement is satisfied when prior public participation is impracticable, unnecessary, or contrary to the public interest. Under such circumstances, an agency may publish an interim final rule without soliciting public comment.

In enacting the good cause exception to standard rulemaking procedures, Congress recognized that emergency situations might arise where an agency must issue a rule without public participation. On September 16, 2001, the President declared a national emergency as a result of the events of September 11, 2001. The events of that day have directly impacted Travel Agencies. The traveling public cancelled and rescheduled existing travel arrangements and many postponed further travel. Consequently, airlines rescinded travel agencies' commissions on flights cancelled or rescheduled due to the terrorist attacks. Thus, many small travel agencies have seen their business decline precipitously by 20% to 50% due the events of September 11, 2001. On January 23, 2002, SBA issued an inflation adjustment as an interim final rule which increased revenue based size standards by 15.8%. The interim final rule had an applicability date of September 11, 2001, for this adjustment for the purposes of eligibility for economic injury disaster loans assistance as a result of the terrorist attacks on small businesses located in the declared disaster areas. The Travel Agencies $1 million size standard was not increased because the SBA decided to handle this industry by this separate rulemaking. A proposed adjustment to the Travel Agencies size standard under NAICS Code 561510 was already under development at SBA when the tragic events of September 11, 2001 occurred. SBA now believes that any delay in the adoption of this size standard adjustment could cause serious harm to those Travel Agencies.

Accordingly, SBA finds that good cause exists to publish this rule as an interim final rule in light of the urgent need to make disaster loans available to businesses that should be considered small, but that do not qualify under SBA's existing size standards. Advance solicitation of comments for this rulemaking would be impracticable and contrary to the public interest, as it would delay the delivery of critical assistance to these businesses by a minimum of three to six months. Any such delay would be extremely prejudicial to the affected businesses. It is likely that some would be forced to cease operations before a rule could be promulgated under standard notice and comment rulemaking procedures.

Furthermore, SBA has a statutory obligation to act in the public interest in determining eligibility for Federal assistance under the Small Business Act. 15 USC 633(d). Pursuant to that authority, SBA has determined that it is in the public interest to give immediate effect to SBA's current determination of small size status and that it would be impracticable to delay such implementation. SBA also notes the failure to adopt this rule immediately would work to the detriment of many small Travel Agencies.

By changing the date of determination of the small business size status for purposes of EIDL assistance attributable to the September 11, 2001 attacks, SBA will be able to assist these small businesses before the deadlines for application of September 11, 2001 EIDL assistance. The application deadline for expanded EIDL assistance (under 13 CFR Part 123, subpart G, §§ 123.600–.606) is April 22, 2002. The application deadline for EIDL assistance (under 13 CFR part 123, subpart D, §§ 123.300–.303) to the declared disaster areas of New York and Virginia is June 11, 2002.

Although this rule is being published as an interim final rule, comments are hereby solicited from interested members of the public. These comments must be received on or before April 15, 2002. SBA will consider these comments in making any necessary revisions to these regulations.

IV. Justification for Immediate Effective Date of Interim Final Rule

The APA requires that "publication or service of a substantive rule shall be made not less than 30 days before its effective date, except * * * as otherwise provided by the agency for good cause found and published with the rule," 5 U.S.C. 553(d)(3). SBA finds that good cause exists to make this final rule effective the same day it is published in the **Federal Register**.

The purpose of the APA provision is to provide interested and affected members of the public sufficient time to adjust their behavior before the rule takes effect. For the reasons set forth above in II, Justification For Publication As An Interim Final Rule, SBA finds that good cause exists for making this interim final rule effective immediately, instead of observing the 30-day period between publication and effective date. SBA believes that this action is both in the public interest and does not tend to adversely affect any interested parties. SBA also believes, based on its contacts with interested members of the public, that there is strong interest in immediate implementation of this rule.

Compliance With Executive Orders 12866, 12988, and 13132, and the Paperwork Reduction Act (44 U.S.C. Ch. 35)

The Office of Management and Budget (OMB) has determined that the interim final rule is a "significant" regulatory action for purposes of Executive Order 12866. Size standards determine which businesses are eligible for Federal small business programs. This is not a major rule under the Congressional Review Act, 5 U.S.C. 800.

Regulatory Impact Analysis

i. Is there a need for the regulatory action?

SBA is chartered to aid and assist small businesses through a variety of financial, procurement, business development, and advocacy programs. To effectively assist intended beneficiaries of these programs, SBA must establish distinct definitions of which businesses are deemed small businesses. The Small Business Act (15 U.S.C. 632(a)) delegates to the SBA Administrator the responsibility for establishing small business definitions. It also requires that small business definitions vary to reflect industry differences. The preamble of this rule explains the approach SBA follows when analyzing a size standard for a particular industry. Based on that analysis, SBA believes that a revision to the current size standard for Travel Agencies is needed to better define small businesses in this industry for purposes of EIDL resulting from the September 11, 2001 terrorist attacks.

ii. What are the potential benefits and costs of this regulatory action?

The most significant benefit to businesses obtaining small business status as a result of this rule is eligibility for EIDL assistance resulting from the September 11, 2001 attacks. Under this rule, 723 additional Travel Agencies may obtain small business status and become eligible for this assistance. SBA estimates that $1.3 to $2.8 million in additional EIDL assistance may result from increasing the size standard for Travel Agencies. SBA also estimates an additional $2.3 million to $2.7 million in EIDL assistance to businesses that became eligible small businesses as a result of the recent inflation adjustment to monetary size standards. These estimates are based on participation rates and EIDL loan amounts of Travel Agencies and small businesses in the industries covered by the size standard inflation adjustment.

The revision to current size standards for Travel Agencies is consistent with SBA's statutory mandate to assist small businesses. This regulatory action promotes the Administration's objectives. One of SBA's goals in support of the Administration's objectives is to help individual small businesses succeed through fair and equitable access to capital and credit, government contracts, and management and technical assistance. Reviewing and modifying size standards when appropriate ensures that intended beneficiaries have access to small business programs designed to assist them. Size standards do not interfere with state, local, and tribal governments in the exercise of their government functions. In a few cases, State and local governments have voluntarily adopted SBA's size standards for their programs to eliminate the need to establish an administrative mechanism for developing their own size standards.

For the purpose of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, the SBA has determined that this rule would not impose new reporting or record keeping requirements, other than those required of SBA. For purposes of Executive Order 13132, the SBA has determined that this rule does not have any federalism implications warranting the preparation of a Federalism Assessment. For purposes of Executive Order 12988, the SBA has determined that this rule is drafted, to the extent practicable, in accordance with the standards set forth in that order.

List of Subjects

13 CFR Part 121

Administrative practice and procedure, Government procurement, Government property, Grant programs—business, Loan programs—business, Small businesses.

13 CFR Part 123

Disaster assistance, Loan programs—business, Reporting and recordkeeping requirements, Small businesses.

Accordingly, for the reasons set forth in the preamble, amend parts 121 and 123 of title 13 of the Code of Federal Regulations as follows:

PART 121—SMALL BUSINESS SIZE REGULATIONS

1. The authority citation of part 121 continues to read as follows:

Authority: 15 U.S.C. 632(a), 634(b)(6), 637(a), 644(c) and 662(5) and Sec. 304, Pub. L. 103–403, 108 Stat. 4175, 4188.

2. In § 121.201, the table "Small Business Size Standards by NAICS Industry", under the heading NAICS Subsector 561—Administrative and Support Services, revise the entry for 561510 to read as follows:

§ 121.201 What size standards has SBA identified by North American Industry Classification System codes?

* * * * *

SMALL BUSINESS SIZE STANDARDS BY NAICS INDUSTRY

NAICS Code	Description (N.E.C.=Not Elsewhere Classified)	Size standards in number of employees or million of dollars
Subsector 561—Administrative and Support Services		
561510	Travel Agencies	[10] $1
EXCEPT	Travel Agencies applying for economic injury disaster loan assistance resulting from the September 11, 2001 Terrorist Attacks.	[10] $3

[10] NAICS codes 488510 (part), 531210, 541810, 561510 and 561920—As measured by total revenues, but excluding funds received in trust for an unaffiliated third party, such as bookings or sales subject to commissions. The commissions received are included as revenue.

* * * * *

3. In § 121.302(c), add a new sentence at the end of the paragraph to read as follows:

§ 121.302 When does SBA determine the size status of an applicant?

* * * * *

(c) * * * For economic injury disaster loan assistance under disaster declarations for the September 11, 2001 terrorist attacks or under subpart G of part 123 of this chapter, size status is determined as of the date SBA accepts the application for processing, and for applications submitted before March 15, 2002, whether denied because of size status or pending, such applications shall be deemed resubmitted on March 15, 2002.

* * * * *

PART 123—DISASTER LOAN PROGRAM

4. The authority citation of part 123 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6), 636(b), 636(c) and 636(f); Public Law 102–395, 106 Stat.1828, 1864; Public Law 103–75, 107 Stat. 739; and Public Law 106–50, 113 Stat. 245.

5. Revise § 123.300(b) to read as follow:

§ 123.300 Is my business eligible to apply for an economic injury disaster loan?

* * * * *

(b) Economic injury disaster loans are available only if you were a small business (as defined in part 121 of this chapter) when the declared disaster commenced (except disaster declarations for the September 11, 2001 terrorist attacks, for which size status is determined as of the date SBA accepts the application for processing and for applications submitted before March 15, 2002, whether denied or pending, such applications shall be deemed resubmitted on March 15, 2002), you and your affiliates and principal owners (20% or more ownership interest) have used all reasonably available funds, and you are unable to obtain credit elsewhere (see § 123.104).

* * * * *

6. Revise paragraph § 123.601(b) to read as follows:

§ 123.601 Is my business eligible to apply for an economic injury disaster loan under this subpart?

* * * * *

(b) Economic injury disaster loans are available under this subpart only if you were a small business (as defined in part 121 of this chapter) on the date SBA accepts your application for processing (and for applications submitted before March 15, 2002, whether denied or pending, such applications shall be deemed resubmitted on March 15, 2002, you and your affiliates and principal owners (20% or more ownership interest) have used all reasonable available funds, and you are unable to obtain credit elsewhere (see § 123.104).

* * * * *

Dated: March 8, 2002.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

RIN 3245–AE95

Small Business Size Standards; Travel Agencies

AGENCY: Small Business Administration (SBA).

ACTION: Proposed rule.

SUMMARY: The Small Business Administration (SBA) proposes to increase the size standard for Travel Agencies (North American Industry Classification System (NAICS) code 561510) to $3 million from $1 million. This action will better define the size of businesses in this industry that the SBA believes should be eligible for Federal small business assistance programs. This proposed rule is published in conjunction with an interim final rule elsewhere in this issue of the **Federal Register** which makes the size standard change effective the date of its publication for purposes of SBA's Economic Injury Disaster Loan (EIDL) program as a result of the September 11, 2001 attacks in New York and Arlington, Virginia.

DATES: Comments must be submitted on or before April 15, 2002.

ADDRESSES: Send comments to Gary M. Jackson, Assistant Administrator for Size Standards, 409 3rd Street, SW., Mail Code 6530, Washington, DC 20416; or via-email to *SIZESTANDARDS@sba.gov*. Upon request, SBA will make all public comments available.

FOR FURTHER INFORMATION CONTACT: Diane Heal, Office of Size Standards, (202) 205–6618.

SUPPLEMENTARY INFORMATION: This proposed rule covers all small business programs. SBA is publishing a separate interim final rule elsewhere in this issue of the **Federal Register** addressing the Travel Agencies size standard for purposes of economic injury disaster loan (EIDL) assistance attributed to the September 11 terrorist attacks.

SBA has received requests from firms and trade associations in the travel industry to increase the $1 million size standard for Travel Agencies. These organizations believe that this action is warranted in light of the specialized equipment and systems required on Federal and corporate travel services contracts and the consolidated and regional approach by Federal agencies and large commercial clients in the performance of these contracts. They believe that the Federal government and corporate client travel markets have changed. These clients require specific equipment and systems, and have requirements on a regional or national basis. These requirements have raised the costs of doing business in this industry to the point that the pool of eligible small businesses performing government and corporate client travel services has seriously declined. Federal agencies also express concern regarding this trend. Specifically, agencies are concerned that the pool of eligible small businesses with the ability to perform these contracts will result in fewer contracts with small travel agencies.

SBA agrees that recent changes in the Travel Agencies industry warrant a review of the size standard. Below is a discussion of the SBA's size standards methodology and the analysis leading to the proposal to increase the size standard for Travel Agencies under NAICS code 561510 to $3 million.

Size Standards Methodology: Congress grants SBA discretion to establish detailed size standards. The Agency's Standard Operating Procedure (SOP) 90 01 3, "Size Determination Program" (available on SBA's Web site at *http://www.sba.gov/library/soproom.html*) sets out four categories for establishing and evaluating size standards: (1) The structure of the industry and its various economic characteristics, (2) SBA program objectives and the impact of different size standards on these programs, (3) whether a size standard successfully excludes those businesses which are dominant in the industry, and (4) other factors if applicable. Other factors may come to the attention of SBA during the public comment period or from SBA's own research on the industry. No formula or weighting has been adopted so that the factors may be evaluated in the context of a specific industry. Below is a discussion of SBA's analysis of the economic characteristics of an industry, the impact of a size standard on SBA programs, and the evaluation of whether a firm at or below a size standard could be considered dominant in the industry under review.

Industry Analysis: The Small Business Act requires that size standards vary by industry to the extent necessary to reflect differing industry characteristics (Section 3(a)(3)). SBA has in place two "base or anchor size standards" that apply to most industries—500 employees for manufacturing industries and $6 million for nonmanufacturing industries. SBA established 500 employees as the anchor size standard for the manufacturing industries at SBA's inception in 1953 and shortly thereafter established a $1 million size standard for the nonmanufacturing industries. The receipts-based anchor size standard for the nonmanufacturing industries has been periodically adjusted for inflation so that, currently, the anchor size standard for the nonmanufacturing industries is $6 million. Anchor size standards are presumed to be appropriate for an industry unless its characteristics indicate that larger firms have a much greater significance within that industry than for the "typical industry."

The current size standard for Travel Agencies under NAICS code 561510 is $1 million, which is lower than the $6 million nonmanufacturing anchor. This size standard excludes funds received in trust for an unaffiliated third party, such as bookings or sales subject to commissions. The commissions received are included as revenue. In its review, SBA used the nonmanufacturing anchor for comparability purposes.

When evaluating a size standard, the characteristics of the specific industry under review are compared to the characteristics of a group of industries, referred to as a comparison group. A comparison group is a large number of industries grouped together to represent the typical industry. It can be comprised of all industries, all manufacturing industries, all industries with receipt-based size standards, or some other logical grouping. If the characteristics of a specific industry are similar to the average characteristics of the comparison group, then the anchor size standard is considered appropriate for the industry. If the specific industry's characteristics are significantly different from the characteristics of the comparison group, a size standard higher or, in rare cases, lower than the anchor size standard may be considered appropriate. The larger the differences between the specific industry's characteristics and the comparison group, the larger the difference between the appropriate industry size standard and the anchor size standard. Only when all or most of the industry characteristics are significantly smaller than the average characteristics of the comparison group, or other industry considerations strongly suggest the anchor size standard would be an unreasonably high size standard for the industry under review, will SBA adopt a size standard below the anchor size standard.

In 13 CFR 121.102 (a) and (b). evaluation factors are listed which are the primary factors describing the structural characteristics of an industry—average firm size, distribution of firms by size, start-up costs, and industry competition. The analysis also

VOL
67
ISS
51
MR

2002
UMI

examines the possible impact of a size standard revision on SBA's programs. The SBA generally considers these five factors to be the most important evaluation factors in establishing or revising a size standard for an industry. However, it will also consider and evaluate other information that it believes relevant to the decision on a size standard as the situation warrants for a particular industry. Public comments submitted on proposed size standards are also an important source of additional information that SBA closely reviews before making a final decision on a size standard. Below is a brief description of each of the five evaluation factors.

1. *Average firm size* is simply total industry receipts (or number of employees) divided by the number of firms in the industry. If the average firm size of an industry were significantly higher than the average firm size of a comparison industry group, this fact would be viewed as supporting a size standard higher than the anchor size standard. Conversely, if the industry's average firm size is similar to or significantly lower than that of the comparison industry group, it would be a basis to adopt the anchor size standard or, in rare cases a lower size standard.

2. *The distribution of firms by size* examines the proportion of industry receipts, employment, or other economic activity accounted for by firms of different sizes in an industry. If the preponderance of an industry's economic activity is by smaller firms, this tends to support adopting the anchor size standard. The opposite is the case for an industry in which the distribution of firms indicates that economic activity is concentrated among the largest firms in an industry. In this rule, the SBA is comparing the size of firm within an industry to the size of firm in the comparison group at which predetermined percentages of total industry receipts are cumulatively generated by firm at that size and smaller. For example, for Travel Agencies, firms of $2.2 million in receipts and less generate 50% of total industry receipts. This contrasts with the comparison group (composed of industries with the nonmanufacturing anchor size standard of $6 million) in which firms of $5.8 million or less in receipts generated 50% of total industry receipts. Viewed in isolation, this significantly lower figure for the Travel Agencies suggests a size standard at or below the $6 million nonmanufacturing anchor size standard. Other size distribution comparisons in the industry analysis include 40%, 60%, and 70%, as well as the 50% comparison discussed above.

3. *Start-up costs* affect a firm's initial size because entrants into an industry must have sufficient capital to start and maintain a viable business. To the extent that firms entering into an industry have greater financial requirements than firms do in other industries, SBA is justified in considering a higher size standard. SBA collected start-up costs data from trade organizations. In addition, SBA is using a proxy measure to assess the financial burden for entry-level firms. SBA is using nonpayroll costs per establishment as a proxy measure for start-up costs. This is derived by first calculating the percent of receipts in an industry that are either retained or expended on costs other than payroll costs. (The figure comprising the numerator of this percentage is mostly composed of capitalization costs, overhead costs, materials costs, and the costs of goods sold or inventoried.) This percentage is then applied to average establishment receipts to arrive at nonpayroll costs per establishment (an establishment is a business entity operating at a single location). An industry with a significantly higher level of nonpayroll costs per establishment than that of the comparison group is likely to have higher start-up costs that would tend to support a size standard higher than the anchor size standard. Conversely, if the industry showed significantly lower nonpayroll costs per establishment when compared to the comparison group, the anchor size standard would be considered the appropriate size standard.

4. *Industry competition* is assessed by measuring the proportion or share of industry receipts obtained by firms that are among the largest firms in an industry. In this proposed rule, SBA compared the proportion of industry receipts generated by the four largest firms in the industry—generally referred to as the "four-firm concentration ratio"—with the average four-firm concentration ratio for industries in the comparison groups. If a significant proportion of economic activity within the industry is concentrated among a few relatively large producers, SBA tends to set a size standard relatively higher than the anchor size standard to assist firms in a broader size range compete with firms that are larger and more dominant in the industry. In general, however, SBA does not consider this to be an important factor in assessing a size standard if the four-firm concentration ratio falls below 40% for an industry under review.

5. *Competition for Federal procurements and SBA Financial Assistance.* SBA also evaluates the possible impact of a size standard on its programs to determine whether small businesses defined under the existing size standard are receiving a reasonable level of assistance. This assessment most often focuses on the proportion or share of Federal contract dollars awarded to small businesses in the industry in question. In general, the lower the share of Federal contract dollars awarded to small businesses in an industry which receives significant Federal procurement revenues, the greater the justification for a size standard higher than the existing one.

As another factor to evaluate the impact of a proposed size standard on SBA programs, the volume of guaranteed loans within an industry and the size of firms obtaining those loans is assessed to determine whether the current size standard may restrict the level of financial assistance to firms in that industry. If small businesses receive ample assistance through these programs, or if the financial assistance is provided mainly to small businesses much lower than the size standard, a change to the size standard (especially, if it is already above the anchor size standard) may not be appropriate.

Evaluation of Industry Size Standard: The two tables below show the characteristics for Travel Agencies activities and of a comparison group. The primary comparison group is comprised of all industries with a $6 million receipt-based size standard (referred to as the nonmanufacturing anchor group). Since SBA's size standards analysis is assessing whether the Travel Agencies size standards should be higher as compared to the nonmanufacturing anchor size standard, this is the most logical set of industries to group together for the industry analysis. SBA examined economic data on these industries from the 1997 Economic Census prepared under contract by the U. S. Bureau of the Census. SBA also examined Federal contract award data for fiscal years 1998–2000 from the U. S. General Services Administration's (GSA) Federal Procurement Data Center, and GSA's award data and information on its Travel Management Centers.

Industry Structure Consideration: Table 1 below examines the size distribution of Travel Agencies. For this factor, SBA is evaluating the size of firms that account for predetermined percentages of total industry receipts (40%, 50%, 60%, and 70%). The table shows firms up to a specific size that, along with smaller firms, account for a specific percentage of total industry receipts. For example, Travel Agencies with $900 thousand or less in receipts obtained 40% of total industry receipts. Within the nonmanufacturing anchor group, firms of $3.2 million or less in receipts obtained 40% of total industry receipts in the average industry.

TABLE 1.—SIZE DISTRIBUTIONS OF FIRMS OF TRAVEL AGENCIES

[Data in millions of dollars]

Category	Size of firm at 40%	Size of firm at 50%	Size of firm at 60%	Size of firm at 70%
Travel Agencies	$0.9	$2.2	$5.8	$27.1
Nonmanufacturing Anchor Group	3.2	5.8	11.9	28.0

These data show the prevalence of much smaller businesses in the Travel Agencies industry than for businesses in the nonmanufacturer anchor comparison group. Travel agencies accounting for between 40% to 60% of industry revenues are one-fourth to one-half of the size of businesses in the nonmanufacturing anchor group that capture a similar proportion of industry revenues. However, large firms at the 70% level are equivalent in size to those in the nonmanufacturer anchor group, which reflects the influence of large corporations offering travel services. The distribution of travel agencies revenues by size of business in relation to the nonmanufacturer anchor group indicate a size standard below the $6 million anchor size standard is appropriate. Also, that a size standard between $2 million to $3 million would represent a reasonable size standard for the Travel Agencies industry since these businesses capture approximately half of industry activity.

Table 2 lists the other three evaluation factors for Travel Agencies and the comparison groups. These include comparisons of average firm size, the measurement of start-up costs as measured by nonpayroll receipts per establishment, and the four-firm concentration ratio.

TABLE 2.—INDUSTRY CHARACTERISTICS OF TRAVEL AGENCIES

Category	Average firm size		Non payroll receipts per establishment (million $)	Four firm concentration ratio (in percent)
	Receipts (millions)	Employees		
Travel Agencies	$0.44	8.1	$0.188	16.3
Nonmanufacturing Anchor Group	0.95	10.6	0.562	14.4

For Travel Agencies, the average firm size in receipts is lower than the nonmanufacturing anchor group's size. However, the average number of employees is about the same as the nonmanufacturer anchor group size. Based on this factor, a size standard of $2.5 to $3.5 million, or approximately half the nonmanufacturer anchor size standard, is supportable.

Nonpayroll receipts per establishment, a measure of capital requirements to enter an industry, comparatively, are much lower (a three-to-one ratio) for Travel Agencies as those of the nonmanufacturer anchor group. These data do not support a basis for a higher size standard. However, SBA collected additional information on start up cost from the Society of Government Travel Professionals (SGTP). SBA's research has found that for travel agencies involved in arranging travel services for large corporate clients and the Federal Government, start-up costs are higher as compared with the firms leisure travel services. Corporate clients and the Federal government require firms to have dedicated equipment, secure lines, and access to two or more airline ticketing reservation services. The Federal Government and the corporate world insist on seamless travel management and back-end systems. Firms must be able to link to corporate and Federal travel systems that links customer, travel agent, billing systems, credit card reconciliation systems, provide 24 hour and seven days a week service centers; train government and contractor personnel; and provide quality control and inspection plans. Start-up costs for these requirements amount up to $160,000 to $200,000 on an average contract of approximately $8.5 million in travel bookings. These clients also require that travel agencies prepare periodic reports on their travel activities. This reporting responsibility requires travel agencies to utilize management information systems to monitor their clients and represents a service activity beyond the arrangement of travel and related accommodations. Therefore, higher start-up costs associated with serving Federal and corporate clients support an increase in the size standard for the Travel Agencies industry of at least twice the current size standard. SBA welcomes public comment on start-up costs for Travel Agencies, in particular, how these costs are relevant to corporate and Federal government contracts. Comments supporting these costs should include information and costs associated with what type of specialized equipment, bonding, management information systems, security and training requirements are needed for corporate and Federal government clients, along with any other relevant requirements and information.

The Travel Agencies four-firm concentration ratio, however, is relatively low, indicating that the industry is not dominated by large businesses. This factor does not support a basis for a higher size standard for Travel Agencies.

SBA Program Considerations: SBA also reviews its size standards in relationship to its programs. This proposed rule gives more consideration to the pattern of Federal contract awards than to the level of financial assistance to small businesses to assess whether its size standard should be revised.

In fiscal year 2000, 45 loans for $4.5 million were guaranteed to Travel Agencies, with 78% of these loans going to firms with less than $545,000 in receipts. It's unlikely that an increase to

VOL

2002
UMI

the size standard will have much impact on the financial programs and, consequently, this factor is not part of the assessment of the size standard.

The Federal government spends approximately $7 billion on official travel per year. In addition, the Department of Defense awards contracts for leisure travel services, which are worth $5 billion per year (as reported to the House of Representatives, Small Business Committee on November 4, 1999 by the Society of Travel Agents in Government (STAG)). Federal Procurement Data System (FPDS) statistics for the fiscal years 1998 through 2000 show that awards to small businesses averaged less than 1% of the total dollars awarded for Travel Agencies Services. For Fiscal Year 2000, $206,000 out of $25 million was reportedly awarded to small businesses. However, Federal travel services are procured mostly through the General Services Administration's (GSA) Travel Management Centers (TMCs) and the Defense Travel System. Awards made through these contract vehicles are on a transaction fee basis and all travel costs that are purchased with a government credit card, are not recorded in the FPDS. In fiscal year 2002, the Department of Defense (DoD) hopes to set aside six of its 24 contracts to small business. Currently, GSA has awarded contracts to 49 firms for TMCs of which 20 firms are small businesses. Out of the 20 firms, 17 have task orders. GSA also provided SBA with its estimate for the fiscal year 2001 tickets, sales, revenues, and fees received by its TMCs.

TABLE 3.—GSA TMC SMALL BUSINESS CONTRACTOR'S SALES REVENUE

	Number of Tickets	Sales ($)	Commissions	Transaction fees	Total revenue
Total TMCs	1,292,917	$518,966,320	$24,423,055	$12,630,279	$33,647,038
Percent of total to small business TMCs	3.8	3.5	3.4	6.7	3.5

These statistics reveal that small business, despite the fact that they are awarded 41% of the number of contracts, receive very little of the ticket orders, commissions, fees, and revenues. These statistics also support the Federal contracting officers concerns that the pool of small businesses capable of submitting viable proposals for their travel service contracts is dwindling because of the sophistication and significant investments required of these firms. New procurements for travel management services require firms provide automation of the travel arrangements process through the use of on-line booking products; 24 hour and seven days a week service centers; interfaces with an agency's finance system; complex travel management information systems; secure or dedicated lines that meet privacy and security requirements; training for government and contractor personnel; compliance costs; and quality control and inspection plans. As mentioned earlier, the SGTP estimates these start-up costs to be $200,000 on an average contract of $8.5 million in travel bookings.

The FPDS statistics, plus other contract factors such as large start-up costs to implement a Federal travel service contract and the declining pool of small businesses submitting proposals suggest that a size standard significantly higher than $1 million may be appropriate for Travel Agencies.

Overview: Based on the analysis of each evaluation factor, SBA is proposing a $3 million size standard. Four out of the five factors support an increase to the $3 million size standard for Travel Agencies. Two factors support a size standard approximately half of the nonmanufacturer anchor size standard—average firm size and distribution of travel agencies. Two factors support an increase at least twice the current $1 million. Start-up costs, especially for those firms that have corporate and Federal clients, have higher costs due to client requirements than for travel agencies offering primarily leisure travel. Travel agencies providing services to corporate and government clients tend to be larger in size than travel agencies offering leisure travel in order to finance needed investment in the equipment and personnel. Procurement statistics, increasingly sophisticated procurement requirements, and higher contract start-up costs have lead to the decline in the pool of viable small businesses that have the ability to compete on travel service contracts, as evidenced by the extremely low small business percentages for tickets, sales, commissions, fees, and total revenues. A size standard at least twice the nonmanufacturer size standard will increase the pool of small businesses that can meet the government's requirements.

Dominant in Field of Operation: Section 3(a) of the Small Business Act defines a small concern as one that is (1) independently owned and operated, (2) not dominant in its field of operation and (3) within detailed definitions or size standards established by the SBA Administrator. SBA considers as part of its evaluation of a size standard whether a business concern at or below a proposed size standard would be considered dominant in its field of operation. This assessment generally considers the market share of firms at the proposed or final size standard or other factors that may show whether a firm can exercise a major controlling influence on a national basis in which significant numbers of business concerns are engaged.

The SBA has determined that no firm at or below the proposed size standards for Travel Agencies would be of a sufficient size to dominate its field of operation. For Travel Agencies, a firm $3 million in size would generate an estimated .01% of the total industry receipts. This level of market share effectively precludes any ability for a firm at or below the proposed size standard to exert a controlling effect on these industries.

Alternative Size Standards: SBA considered doubling the Travel Agencies size standard from $1 million to $2 million, but believed that this level would not fully capture the small business segment of the Travel Agencies industry. A survey of Travel Agencies showed that those with $1 million and less in revenues have declined by more than one-third while Travel Agencies with more than $2 million have almost doubled. This fact indicates that Travel Agencies have needed to expand their operations to remain competitive. In addition, SBA is very concerned about the capabilities of smaller Travel Agencies to satisfy the requirements of government and corporate clients. The initial capital resources and recurring costs to obtain and maintain travel systems and to provide other travel related services also suggest a size standard greater than $2 million. These trends are reflected in the analysis of Travel Agencies' industry data. Two factors, distribution for receipts by firm size and average firm size, supported size standards of at least $2 million and as high as $3 million to $3.5 million. These considerations, along with the uncertainties with regard to compensation for travel services and the expanding use of internet technology for travel reservations, convinced SBA that a size standard higher than $2 million should be considered.

SBA also contemplated as an alternative size standard adopting the $6 million anchor size standard to the Travel Agencies industry. As discussed in the description of SBA's size standards methodology, SBA applies the $6 million anchor size standard to the nonmanufacturing industries unless the industry's characteristics are significantly different from the typical nonmanufacturing industry. The analysis of the various industry factors shows that the characteristics Travel Agencies are significantly below those of the nonmanufacturing anchor group industries. Thus, a size standard below the anchor size standard is appropriate for this industry. As discussed above, SBA believes the characteristics of Travel Agencies support a size standard higher than the $1 million but lower than anchor the nonmanufacturing size standard.

SBA welcomes public comments on its proposed size standard for the Travel Agencies industry. Comments supporting an alternative to the proposal, including the option of retaining the size standard at $1 million, should explain why the alternative would be preferable to the proposed size standard, how it would impact current small businesses, and how it would effectively assist small businesses. SBA also welcomes comments and additional information on start-up costs of travel agencies serving corporate and government clients.

Compliance With Executive Orders 12866, 12988, and 13132, the Paperwork Reduction Act (44 U.S.C. Ch. 35) and the Regulatory Flexibility Act (5 U.S.C. 601–612).

The Office of Management and Budget (OMB) has determined that the proposed rule is a "significant" regulatory action for purposes of Executive Order 12866. Size standards determine which businesses are eligible for Federal small business programs. This is not a major rule under the Congressional Review Act, 5 U.S.C. 800.

Regulatory Impact Analysis

i. Is There a Need for the Regulatory Action?

SBA is chartered to aid and assist small businesses through a variety of financial, procurement, business development, and advocacy programs. To effectively assist intended beneficiaries of these programs, SBA must establish distinct definitions of which businesses are deemed small businesses. The Small Business Act (15 U.S.C. 632(a)) delegates to the SBA Administrator the responsibility for establishing small business definitions. It also requires that small business definitions vary to reflect industry differences. The preamble of this rule explains the approach SBA follows when analyzing a size standard for a particular industry. Based on that analysis, SBA believes that a revision to the current size standard for Travel Agencies is needed to better define small businesses in this industry.

ii. What Are the Potential Benefits and Costs of This Regulatory Action?

The most significant benefit to businesses obtaining small business status as a result of this rule is eligibility for Federal small business assistance programs. Under this rule, 723 additional firms may obtain small business status and become eligible for these programs. These include SBA's financial assistance programs and Federal procurement preference programs for small businesses, 8(a) firms, small disadvantaged businesses, small businesses located in Historically Underutilized Business Zones (HUBZone), as well as those awarded through full and open competition after application of the HUBZone or small disadvantaged business price evaluation adjustment. Other Federal agencies use SBA size standards for a variety of regulatory and program purposes. SBA does not have information on each of these uses to evaluate the impact of size standards changes. In researching the Travel Agencies industry, SBA contacted representatives of the GSA and the DoD. These two agencies account for the largest proportion of Federal contracting for travel services. However, in cases where SBA size standards are not appropriate, an agency may establish its own size standards with the approval of the SBA Administrator (see 13 CFR 121.801). Through the assistance of these programs, small businesses may benefit by becoming more knowledgeable, stable, and competitive businesses.

The benefits of a size standard increase to a more appropriate level would affect three groups. First, businesses that benefit by gaining small business status from the proposed size standards and use small business assistance programs. Second, growing small businesses that may exceed the current size standards in the near future and who will retain small business status from the proposed size standards. Third, Federal agencies that award contracts under procurement programs that require small business status.

Newly defined small businesses would benefit from the SBA's 7(a) Guaranteed Loan Program. SBA estimates that approximately $450,000 in new Federal loan guarantees could be made to these newly defined small businesses. This represents 10% of the $4.5 million in loans that were guaranteed by the SBA under this financial program to Travel Agencies in FY 2000. Because of the size of the loan guarantees, most loans are made to small businesses well below the size standard. Thus increasing the size standard will likely result in only a small increase in small business guaranteed loans to Travel Agencies, and the $450,000 estimated figure may overstate the actual impact.

The newly defined small businesses would also benefit from SBA's economic injury disaster loan program. Since this program is contingent upon the occurrence and severity of a disaster, no meaningful estimate of benefits can be projected.

SBA estimates that firms gaining small business status could potentially obtain Federal contracts worth $347 million in sales out of approximately $9 billion in total Federal travel expenditures under the small business set-aside program, the 8(a), Small Disadvantaged Business, and HUBZone programs, or unrestricted contracts. Since most of these travel dollars will pass through to airlines, hotels, and automobile rental companies, SBA estimates actual revenues to Travel Agencies will range between $25 million and $42 million (7% to 12% of the estimated $347 million in sales). This also represents approximately $36 million of additional Federal contracts that may be awarded to businesses becoming newly designated small businesses. These estimates reflect a 10% increase in the awards to small businesses that the Federal government expends for travel services.

Federal agencies may benefit from the higher size standards if the newly defined and expanding small businesses compete for more set-aside procurements. The larger base of small businesses would likely increase competition and would lower the prices on set-aside procurements. A large base of small businesses may create an incentive for Federal agencies to set aside more procurements creating greater opportunities for all small businesses. Small business opportunities will be enhanced in open

VOL 67 ISS 51 MR 15 2002 UMI

procurements as they gain experience in Federal contracting through the set-aside and other small business procurement preference programs. Large businesses with small business subcontracting goals may also benefit from a larger pool of small businesses by enabling them to better achieve their subcontracting goals and at lower prices. No estimate of cost savings from these contracting decisions can be made since data are not available to directly measure price or competitive trends on Federal contracts.

To the extent that 732 additional firms become active in Government programs, this may entail some additional administrative costs to the Federal government associated with additional bidders for Federal small business SBA's procurement programs, additional firms seeking SBA guaranteed lending programs, and additional firms eligible for enrollment in SBA's PRO-Net data base program. Among businesses in this group seeking SBA assistance, there will be some additional costs associated with compliance and verification associated with certification of small business status and protests of small business status. These costs are likely to generate minimal incremental costs since mechanisms are currently in place to handle these administrative requirements.

The costs to the Federal government may be higher on some Federal contracts. With greater number of businesses defined as small, Federal agencies may choose to set-aside more contracts for competition among small businesses rather than using full and open competition. The movement from unrestricted to set-aside is likely to result in competition among fewer bidders for a contract. Also, higher costs may result if additional full and open contracts are awarded to HUBZone and SDB businesses as a result of a price evaluation preference. The additional costs associated with fewer bidders, however, are likely to be minor since, as a matter of policy, procurements may be set-aside for small businesses or reserved for the 8(a), HUBZone Programs only if awards are expected to be made at fair and reasonable prices.

The proposed size standard may have distributional effects among large and small businesses. Although the actual outcome of the gains and loses among small and large businesses cannot be estimated with certainty, several trends are likely to emerge. First, a transfer of some Federal contracts to small businesses from large businesses. Large businesses may have fewer Federal contract opportunities as Federal agencies decide to set-aside more Federal procurements for small businesses. Also, some Federal contracts may be awarded to HUZone or small disadvantaged businesses instead of large businesses since those two categories of small business are eligible for price evaluation adjustment for contracts competed on a full and open basis. Similarly, currently defined small businesses may obtain fewer Federal contacts due to the increased competition from more businesses defined as small. This transfer may be offset by a greater number of Federal procurements set-aside for all small businesses. The number of newly defined and expanding small businesses that were willing and able to sell to the Federal Government would limit the potential transfer of contracts away from large and currently defined small businesses. The potential distributional impacts of these transfers may not be estimated with any degree of precision since the data on the size of business receiving a Federal contract are limited to identifying small or other-than-small businesses.

The revision to current size standards for Travel Agencies is consistent with SBA's statutory mandate to assist small businesses. This regulatory action promotes the Administration's objectives. One of SBA's goals in support of the Administration's objectives is to help individual small businesses succeed through fair and equitable access to capital and credit, government contracts, and management and technical assistance. Reviewing and modifying size standards when appropriate ensures that intended beneficiaries have access to small business programs designed to assist them. Size standards do not interfere with state, local, and tribal governments in the exercise of their government functions. In a few cases, State and local governments have voluntarily adopted SBA's size standards for their programs to eliminate the need to establish an administrative mechanism for developing their own size standards.

Initial Regulatory Flexibility Analysis

Under the Regulatory Flexibility Act (RFA), this rule may have a significant impact on a substantial number of small entities. As described above in the Regulatory Impact Analysis, this rule may impact small entities in two ways. First, small businesses in the Travel Agencies industry competing for Federal Government procurements reserved for small business, and small disadvantaged businesses and HUBZone businesses eligible for price adjustment, may face greater competition from newly eligible small businesses. Second, additional Federal procurements for Travel Agencies may be set-aside for small business as the pool of eligible small businesses expands.

The proposed size standard may affect small businesses participating in programs of other agencies that use SBA size standards. As a practical matter, SBA cannot estimate the impact of a size standard change on each and every Federal program that uses its size standards. For this particular proposed rule, SBA did consult with GSA and DoD regarding a possible increase to the Travel Agencies size standard. In cases where an SBA's size standard is not appropriate, the Small Business Act and SBA's regulations allow Federal agencies to develop different size standards with the approval of the SBA Administrator (13 CFR 121.902). For purposes of a regulatory flexibility analysis, agencies must consult with SBA's Office of Advocacy when developing different size standards for their programs.

Immediately below, SBA sets forth an initial regulatory flexibility analysis (IRFA) of this proposed rule addressing the following questions: (1) What is the need for and objective of the rule, (2) what is SBA's description and estimate of the number of small entities to which the rule will apply, (3) what is the projected reporting, record keeping, and other compliance requirements of the rule, (4) what are the relevant Federal rules which may duplicate, overlap or conflict with the proposed rule, and (5) what alternatives will allow the Agency to accomplish its regulatory objectives while minimizing the impact on small entities?

(1) What Is the Need for and Objective of the Rule?

The revision to the size standards NAICS code 561510 more appropriately defines the size of businesses in these industries that SBA believes should be eligible for Federal small business assistance programs. A review of the latest available industry data supports a change to the size standard.

(2) What is SBA's Description and Estimate of the Number of Small Entities to Which the Rule Will Apply?

Within the Travel Agencies industry, 21,496 out of 22,687 businesses are small. Only a small proportion of businesses in this industry utilizes SBA programs. In SBA's PRO-Net (a SBA database of small businesses interested in contracting with the Federal Government) 166 Travel Agencies are currently registered. In fiscal year 2000, 54 small business Travel Agencies received 7(a) or 504 guaranteed loans. Thus, the likely impact of this rule would be limited to 732 small businesses, based on the U.S. Census Bureau's special tabulation of the 1997 Economic Census for SBA's Office of Size Standards. The following table shows these data for the Travel Agencies Industry.

TRAVEL AGENCIES INDUSTRY DATA

Category	Travel agencies
Total businesses	22,687
Small businesses	21,946
Small businesses registered in PRO-Net	166
Small businesses with 7(a) loans	54

SBA estimates 732 additional businesses out of 22,687 firms in the Travel Agencies activity would be considered small as a result of this rule, if adopted. These businesses would be eligible to seek available SBA assistance provided that they meet other program requirements. Businesses becoming eligible for SBA assistance as a result of this rule, if finalized, cumulatively generate approximately $1.0 billion out of a total of $10 billion in revenues. The small business coverage in the Travel Agencies would increase by 10% of total receipts.

(3) What are the Projected Reporting, Record Keeping, and Other Compliance Requirements of the Rule and an Estimate of the Classes of Small Entities That Will Be Subject to the Requirements?

A new size standard does not impose any additional reporting, record keeping or compliance requirements on small entities. Increasing size standards expands access to SBA programs that assist small businesses, but does not impose a regulatory burden as they neither regulate nor control business behavior.

(4) What are the Relevant Federal Rules Which May Duplicate, Overlap or Conflict With the Proposed Rule?

This proposed rule overlaps other Federal rules that use SBA's size standards to define a small business. Under section 632(a)(2)(C) of the Small Business Act, unless specifically authorized by statute, Federal agencies must use SBA's size standards to define a small business. In 1995, SBA published in the **Federal Register** a list of statutory and regulatory size standards that identified the application of SBA's size standards as well as other size standards used by Federal agencies (60 FR 57988–57991, dated November 24, 1995). SBA is not aware of any Federal rule that would duplicate or conflict with establishing size standards.

SBA cannot estimate the impact of a size standard change on each and every Federal program that uses its size standards. In cases where an SBA's size standard is not appropriate, the Small Business Act and SBA's regulations allow Federal agencies to develop different size standards with the approval of the SBA Administrator (13 CFR 121.902). For purposes of a regulatory flexibility analysis, agencies must consult with SBA's Office of Advocacy when developing different size standards for their programs.

(5) What Alternatives Will Allow the Agency to Accomplish its Regulatory Objectives While Minimizing the Impact on Small Entities?

SBA considered as an alternative size standard adopting the $6 million anchor size standard to the Travel Agencies industry. As discussed in the description of SBA's size standards methodology, SBA applies the $6 million anchor size standard to the nonmanufacturing industries unless the industry's characteristics are significantly different from the typical nonmanufacturing industry. The analysis of the various industry factors show that the characteristics of Travel Agencies are significantly below those of the nonmanufacturing anchor group industries. Thus, a size standard below the anchor size standard is appropriate for this industry. As discussed, above, SBA believes the Travel Agencies characteristics support a size standard higher than the $1 million but lower than the nonmanufacturing size standard.

For the purpose of the Paperwork Reduction Act, 44 U.S.C. Ch.35, the SBA has determined that this rule would not impose new reporting or record keeping requirements, other than those required of SBA. For purposes of Executive Order 13132, the SBA has determined that this rule does not have any federalism implications warranting the preparation of a Federalism Assessment. For purposes of Executive Order 12988, the SBA has determined that this rule is drafted, to the extent practicable, in accordance with the standards set forth in that order.

List of Subjects in 13 CFR Part 121

Administrative practice and procedure, Government procurement, Government property, Grant programs—business, Loan programs—business, Small businesses.

For reasons set forth in the preamble, SBA proposes to amend part 121 of title 13 of the Code of Federal Regulations as follows:

PART 121—SMALL BUSINESS SIZE REGULATIONS

1. The authority citation of part 121 continues to read as follows:

Authority: 15 U.S.C. 632(a), 634(b)(6), 637(a), 644(c) and 662(5) and Sec. 304, Pub. L. 103–403, 108 Stat. 4175, 4188.

2. In § 121.201, the table "Small Business Size Standards by NAICS Industry", under the heading NAICS Subsector 561—Administrative and Support Services, revise the entry for 561510 to read as follows:

§ 121.201 What size standards has SBA identified by North American Industry Classification System codes?

* * * * *

SMALL BUSINESS SIZE STANDARDS BY NAICS INDUSTRY

NAICS Codes	Description (N.E.C.=Not Elsewhere Classified)	Size standards in number of employees or million of dollars
. . . . .	. . . . .	.
Subsector 561—Administrative and Support Services		

SMALL BUSINESS SIZE STANDARDS BY NAICS INDUSTRY—Continued

NAICS Codes	Description (N.E.C.=Not Elsewhere Classified)	Size standards in number of employees or million of dollars
561510	Travel Agencies	[10] $3

Footnotes

10. NAICS codes 488510 (part), 531210, 541810, 561510 and 561920—As measured by total revenues, but excluding funds received in trust for an unaffiliated third party, such as bookings or sales subject to commissions. The commissions received are included as revenue.

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **http://www.access.gpo.gov/nara**

Federal Register information and research tools, including Public Inspection List, indexes, and links to GPO Access are located at: **http://www.nara.gov/fedreg**

E-mail

FEDREGTOC-L (Federal Register Table of Contents LISTSERV) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **http://listserv.access.gpo.gov** and select *Online mailing list archives, FEDREGTOC-L, Join or leave the list (or change settings);* then follow the instructions.

PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://hydra.gsa.gov/archives/publaws-l.html** and select *Join or leave the list* (or change settings); then follow the instructions.

FEDREGTOC-L and **PENS** are mailing lists only. We cannot respond to specific inquiries.

Reference questions. Send questions and comments about the Federal Register system to: **info@fedreg.nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html.*

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html.* Some laws may not yet be available.

S. 1206/P.L. 107–149

Appalachian Regional Development Act Amendments of 2002 (Mar. 12, 2002; 116 Stat. 66)

H.R. 1892/P.L. 107–150

Family Sponsor Immigration Act of 2002 (Mar. 13, 2002; 116 Stat. 74)

H.R. 3699/P.L. 107–151

To revise certain grants for continuum of care assistance for homeless individual and families. (Mar. 13, 2002; 116 Stat. 76)

Last List March 13, 2002

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

Public Laws

107th Congress, 1st Session, 2001

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 107th Congress, 1st Session, 2001.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara005.html

The United States Government Manual 2001/2002

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix B, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512–1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 67 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 67, No. 52
Monday, March 18, 2002

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. NM214, Special Conditions No. 25–198–SC]

Special Conditions: Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 Airplanes; High Intensity Radiated Fields (HIRF)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services. These airplanes will have novel and unusual design features when compared to the state of technology envisioned in the airworthiness standards for transport category airplanes. The modification incorporates the installation of dual Electronic Primary Flight Display systems and dual Electronic Primary Attitude Source systems that perform critical functions. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that provided by the existing airworthiness standards.

DATES: The effective date of these special conditions is March 6, 2002. Comments must be received on or before April 17, 2002.

ADDRESSES: Comments on these special conditions may be mailed in duplicate to: Federal Aviation Administration, Transport Airplane Directorate, Attn: Rules Docket (ANM–113), Docket No. NM214 1601 Lind Avenue SW., Renton, Washington, 98055–4056; or delivered in duplicate to the Transport Airplane Directorate at the above address. All comments must be marked: Docket No. NM214. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Meghan Gordon, FAA, Standardization Branch, ANM–113, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington, 98055–4056; telephone (425) 227–2138; facsimile (425) 227–1149.

SUPPLEMENTARY INFORMATION: The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay certification of the airplane and thus delivery of the affected airplanes. The FAA therefore finds that good cause exists for making these special conditions effective upon issuance.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning these special conditions. The docket is available for public inspection before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions in light of the comments we receive.

If you want the FAA to acknowledge receipt of your comments on this final action, include with your comments a pre-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it to you.

Background

On January 10, 2002, Garrett Aviation Services, 1200 North Airport Drive—Capital Airport, Springfield, IL 62707, applied for a supplemental type certificate (STC) to modify Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes approved under Type Certificate No. A7EU. The Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 are small transport category airplanes powered by two turbofan engines, with a maximum takeoff weight of 29,000 pounds. These airplanes operate with a 2-pilot crew and can hold up to 10 passengers. The modification incorporates the installation of a Rockwell Collins ProLine 21 Display System, consisting of dual Electronic Primary Flight Display systems which replace the existing Primary Flight Display systems, and a Rockwell Collins Attitude Heading Reference System, consisting of dual Electronic Primary Attitude Source systems. These systems have the potential to be vulnerable to high-intensity radiated fields (HIRF) external to the airplane.

Type Certification Basis

Under the provisions of 14 CFR 21.101, Garrett Aviation Services must show that the Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes, as changed, continue to meet the applicable provisions of the regulations incorporated by reference in Type Certificate No. A7EU, or the applicable regulations in effect on the date of application for the change. The regulations incorporated by reference in the type certificate are commonly referred to as the "original type certification basis." The certification basis for the modified Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes includes CAR 4b, dated December 1953, through Amendment 4b–12 and SR422B; and 14 CFR part 25, dated

VOL
67
ISS
52
MR
18
2002
UMI

February 1, 1965, through Amendment 25–41, except for special conditions and exceptions noted in Type Certificate Data Sheet (TCDS) A7EU.

If the Administrator finds that the applicable airworthiness regulations (i.e., CAR 4b and 14 CFR part 25, as amended) do not contain adequate or appropriate safety standards for the Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes because of novel or unusual design features, special conditions are prescribed under the provisions of § 21.16.

Special conditions, as defined in § 11.19, are issued in accordance with § 11.38, and become part of the type certification basis in accordance with § 21.101(b)(2).

Special conditions are initially applicable to the model for which they are issued. Should Garrett Aviation Services apply at a later date for design change approval to modify any other model already included on the same type certificate to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under the provisions of § 21.101(a)(1).

Novel or Unusual Design Features

As noted earlier, the Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services will incorporate dual Electronic Primary Flight Display systems and dual Electronic Primary Attitude Source systems that will perform critical functions. The existing airworthiness standards of part 25 do not contain adequate or appropriate safety standards for the protection of this equipment from the adverse effects of HIRF. Accordingly, these systems are considered to be novel or unusual design features.

Discussion

There is no specific regulation that addresses protection requirements for electrical and electronic systems from HIRF. Increased power levels from ground-based radio transmitters and the growing use of sensitive avionics/electronics and electrical systems to command and control airplanes have made it necessary to provide adequate protection.

To ensure that a level of safety is achieved equivalent to that intended by the regulations incorporated by reference, special conditions are needed for the Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services. These special conditions require that new avionics/electronics and electrical systems that perform critical functions be designed and installed to preclude component damage and interruption of function due to both the direct and indirect effects of HIRF.

High-Intensity Radiated Fields (HIRF)

With the trend toward increased power levels from ground-based transmitters, plus the advent of space and satellite communications, coupled with electronic command and control of the airplane, the immunity of critical digital avionics/electronics and electrical systems to HIRF must be established.

It is not possible to precisely define the HIRF to which the airplane will be exposed in service. There is also uncertainty concerning the effectiveness of airframe shielding for HIRF. Furthermore, coupling of electromagnetic energy to cockpit-installed equipment through the cockpit window apertures is undefined. Based on surveys and analysis of existing HIRF emitters, an adequate level of protection exists when compliance with the HIRF protection special condition is shown with either paragraph 1 or 2 below:

1. A minimum threat of 100 volts rms (root-mean-square) per meter electric field strength from 10 KHz to 18 GHz.

a. The threat must be applied to the system elements and their associated wiring harnesses without the benefit of airframe shielding.

b. Demonstration of this level of protection is established through system tests and analysis.

2. A threat external to the airframe of the field strengths indicated in the following table for the frequency ranges indicated. Both peak and average field strength components from the table are to be demonstrated.

Frequency	Field strength (volts per meter)	
	Peak	Average
10 kHz-100 kHz	50	50
100 kHz-500 kHz	50	50
500 kHz-2 MHz	50	50
2 MHz-30 MHz	100	100
30 MHz-70 MHz	50	50
70 MHz-100 MHz	50	50
100 MHz-200 MHz	100	100
200 MHz-400 MHz	100	100
400 MHz-700 MHz	700	50
700 MHz-1 GHz	700	100
1 GHz-2 GHz	2000	200
2 GHz-4 GHz	3000	200
4 GHz-6 GHz	3000	200
6 GHz-8 GHz	1000	200
8 GHz-12 GHz	3000	300
12 GHz-18 GHz	2000	200
18 GHz-40 GHz	600	200

The field strengths are expressed in terms of peak of the root-mean-square (rms) over the complete modulation period.

The threat levels identified above are the result of an FAA review of existing studies on the subject of HIRF, in light of the ongoing work of the Electromagnetic Effects Harmonization Working Group of the Aviation Rulemaking Advisory Committee.

Applicability

As discussed above, these special conditions are applicable to Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services. Should Garrett Aviation Services apply at a later date for design change approval to modify any other model included on the same type certificate to incorporate the same novel or unusual design feature, these special conditions would apply to that model as well under the provisions of § 21.101(a)(1).

Conclusion

This action affects only certain design features on Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of these features on the airplane.

The substance of the special conditions for these airplanes has been subjected to the notice and comment procedure in several prior instances and has been derived without substantive change from those previously issued. Because a delay would significantly affect the certification of the airplane, which is imminent, the FAA has determined that prior public notice and comment are unnecessary and impracticable, and good cause exists for adopting these special conditions immediately. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and record keeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Dassault Aviation Fan Jet Falcon, Fan Jet Falcon Series C, D, E, and F, and Mystere-Falcon 20–C5, 20–D5, 20–E5, and 20–F5 airplanes modified by Garrett Aviation Services.

1. *Protection from Unwanted Effects of High-Intensity Radiated Fields (HIRF).* Each electrical and electronic system that performs critical functions must be designed and installed to ensure that the operation and operational capability of these systems to perform critical functions are not adversely affected when the airplane is exposed to high intensity radiated fields.

2. For the purpose of these special conditions, the following definition applies: *Critical Functions:* Functions whose failure would contribute to or cause a failure condition that would prevent the continued safe flight and landing of the airplane.

Issued in Renton, Washington, on March 6, 2002.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 02–6365 Filed 3–15–02; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–NM–21–AD; Amendment 39–12675; AD 2002–05–07]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 737–100, –200, –200C, –300, –400, and –500 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. For certain airplanes, this action requires repetitive inspections for discrepancies of the rear spar attachments and cracks in the upper flange of the inboard track at the rear spar attachment of each outboard flap, and eventual rework of the flap track assembly and rear spar attachments, including replacement of the flap track with a new track, if necessary. For all airplanes, this action requires repetitive inspections for cracks in the upper flange of the inboard flap tracks at the rear spar attachments, and corrective action, if necessary. The actions specified by this AD are intended to find and fix discrepancies of the inboard tracks of the outboard flaps, which could result in loss of the outboard trailing edge flaps and consequent reduced controllability of the airplane. These actions are intended to address the identified unsafe condition.

DATES: Effective April 22, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 22, 2002.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: James Blilie, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2131; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes was published as a supplemental notice of proposed rulemaking (NPRM) in the **Federal Register** on August 2, 2001 (66 FR 40162). That action proposed to expand the applicability and remove the optional terminating action of the proposed AD. For certain airplanes, that action proposed to require new repetitive inspections for discrepancies of the rear spar attachments and cracks in the upper flange of the inboard track at the rear spar attachment of each outboard flap, and eventual rework of the flap track assembly and rear spar attachments, including replacement of the flap track with a new track, if necessary. For all airplanes, that action proposed to require repetitive inspections for cracks in the upper flange of the inboard flap tracks at the rear spar attachments, and corrective action, if necessary.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Request to Clarify Compliance Time

Several commenters note that in paragraphs (a) and (c)(1) of the Supplemental NPRM, the phrase "whichever occurs later," is used when only one compliance time is given. They ask that the compliance time be clarified.

The FAA concurs that clarification is required and, accordingly, has deleted the phrase "whichever occurs later" from paragraphs (a) and (c)(1) of this final rule.

Request to Clarify Which Airplanes Are Subject to Paragraph (a) of the Supplemental NPRM

One commenter points out that paragraph (a) of the Supplemental NPRM is applicable to all Model 737 series airplanes with line numbers 1 through 1585, whereas the service bulletin cited is effective only for the Model 737–100, –200, and –200C series airplanes. The commenter requests clarification as to the applicability of paragraph (a) of the AD.

The FAA concurs that clarification is necessary. Our intent was to have paragraph (a) of this AD apply only to the Model 737–100, –200, and –200C series airplanes. Accordingly, we have inserted the phrase "[for] Model 737–100, –200, and –200C series [airplanes]" in paragraph (a) of this final rule to specify the correct applicability.

Another commenter suggests that the part of paragraph (a) of the Supplemental NPRM which reads "* * * and airplanes with [line numbers] L/N 870 through 1585 on which the original flap tracks have been replaced with certain tracks as specified in Boeing Service Bulletin 737–57A1249, Revision 1 * * *" could be interpreted in two different ways. The commenter requests clarification.

The FAA agrees that the sentence could be misunderstood and, accordingly, has revised the language in paragraph (a) of this final rule to read

VOL
67
ISS
52
MR
18
2002
UMI

"* * * and those airplanes with L/Ns 870 through 1585 inclusive, which either still have their original flap tracks or which have had the original flap tracks replaced with certain tracks as specified in Boeing Service Bulletin 737–57A1249, Revision 1 * * *"

Request to Clarify Which Flap Tracks Are Affected

One commenter states that the Supplemental NPRM does not specify which flap tracks are affected by paragraph (a) of the AD. The commenter requests that specific part numbers and dash numbers be listed in the final rule.

The FAA does not concur. The intent of paragraph (a) of this AD is to include all flap tracks for Model 737–100, –200, and –200C series airplanes with L/Ns 1 through 1585, except for certain flap tracks which are specifically excluded in the effectivity of the service bulletin. Accordingly, no change has been made to the final rule in this regard.

Request to Correct Reference to Part of Accomplishment Instructions

One commenter indicates that paragraph (d) of the Supplemental NPRM, which requires repetitive inspections for cracking in the upper flange of the inboard track of each outboard flap at the rear spar attachments, should refer to Part I of the Accomplishment Instructions rather than Part II of those instructions.

The FAA concurs. The original reference in the Supplemental NPRM to Part II was an error. The language in paragraph (d) of this final rule has been changed accordingly.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

There are approximately 2,890 Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,100 airplanes of U.S. registry will be affected by this AD.

It will take approximately 4 work hours per airplane to accomplish the required inspections at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the required inspections on U.S. operators is estimated to be $264,000, or $240 per airplane.

It will take approximately 12 work hours per airplane to accomplish the required rework at an average labor rate of $60 per work hour. Required parts will cost approximately $532. Based on these figures, the cost impact of the required rework on U.S. operators is estimated to be $1,377,200, or $1,252 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2002–05–07 Boeing: Amendment 39–12675. Docket 99–NM–21–AD.

Applicability: Model 737–100, –200, –200C, –300, –400, and –500 series airplanes; certificated in any category; EXCEPT airplanes on which any replacement flap tracks were installed according to Boeing Service Bulletin 737–57–1203, dated November 15, 1990, or production equivalent.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

Note 2: Airplanes modified according to Boeing Service Bulletin 737–57–1065 are subject to additional work as described in this AD and in Boeing Service Bulletin 737–57A1249, Revision 1, dated June 1, 2000.

To find and fix discrepancies of the inboard tracks of the outboard flaps, which could result in loss of the outboard trailing edge flaps and consequent reduced controllability of the airplane, accomplish the following:

Initial Inspections

(a) For Model 737–100, –200, and –200C series airplanes with line numbers (L/N) 1 through 869 inclusive, and those airplanes with L/Ns 870 through 1585 inclusive, which either still have their original flap tracks or which have had the original flap tracks replaced with certain tracks as specified in Boeing Service Bulletin 737–57A1249, Revision 1, including Appendix A, dated June 1, 2000: Within 6 months after the effective date of this AD, accomplish the requirements of paragraphs (a)(1) and (a)(2) of this AD, according to Boeing Service Bulletin 737–57A1249, Revision 1, including Appendix A, dated June 1, 2000.

(1) Perform a detailed visual inspection for discrepancies (e.g., corrosion, or missing, damaged, or migrated anti-fret strips and tapered shims) of the rear spar attachments of the flap tracks.

(2) Perform detailed visual, high frequency eddy current (HFEC), and ultrasonic inspections for cracking in the upper flange of the inboard track of each outboard flap at the rear spar attachments.

Note 3: Inspections and rework accomplished according to Boeing Alert Service Bulletin 737–57A1249, including Appendix A, dated December 16, 1999, is considered acceptable for compliance with the applicable action specified in this AD.

Note 4: For the purposes of this AD, a detailed visual inspection is defined as: "An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required."

Repetitive Inspections

(b) For airplanes subject to paragraph (a) of this AD: If no discrepancy is found during any inspection required by paragraph (a) of this AD, thereafter, repeat the inspections specified in paragraph (a) of this AD at intervals not to exceed 9 months, until the actions required by paragraph (c) of this AD have been accomplished.

Rework

(c) For airplanes subject to paragraph (a) of this AD: At the applicable time specified in paragraph (c)(1) or (c)(2) of this AD, accomplish rework of the flap track assembly and aft flap track attachments (including removal of the flap track; a detailed visual inspection for a missing, damaged, or migrated anti-fret strip and tapered shim of the rear spar attachments of the flap track; replacement of the anti-fret strip with a new aluminum anti-fret strip (or installation of an aluminum strip if no strip is installed), as applicable; replacement of the tapered shim with a new shim (or installation of a shim if no shim is installed); eddy current and ultrasonic inspections for fatigue cracking of the flap tracks; a detailed visual inspection for corrosion of the flap tracks; and rework of attachment holes), including replacement of the flap tracks, as applicable, by accomplishing all actions specified in Part II of the Accomplishment Instructions of Boeing Service Bulletin 737–57A1249, Revision 1, including Appendix A, dated June 1, 2000. Do these actions according to that service bulletin, except as provided by paragraph (e) of this AD. Accomplishment of the actions required by this paragraph constitutes terminating action for the repetitive inspections required by paragraph (b) of this AD.

(1) If no discrepancy is found during any inspection required by paragraph (a) or (b) of this AD: Do the rework within 24 months after the effective date of this AD.

(2) If any discrepancy is found during any inspection required by paragraph (a) or (b) of this AD: Do the rework prior to further flight.

Repetitive Inspections

(d) *For all airplanes:* At the applicable time specified in paragraph (d)(1) or (d)(2) of this AD, and thereafter at least every 24 months, perform detailed visual, HFEC, and ultrasonic inspections for cracking in the upper flange of the inboard track of each outboard flap at the rear spar attachments according to Part I of the Accomplishment Instructions of Boeing Service Bulletin 737–57A1249, Revision 1, including Appendix A, dated June 1, 2000.

(1) For airplanes subject to paragraph (c) of this AD, do the inspections within 10 years after accomplishment of the rework according to paragraph (c) of this AD.

(2) For airplanes other than those identified in paragraph (d)(1) of this AD, do the inspections within 10 years since the airplane's date of manufacture, or within 6 months after the effective date of this AD, whichever occurs later.

Repair Instructions and Exception to Procedures in Service Information

(e) If any discrepancy is found during any action required by paragraphs (a), (b), or (c) of this AD, and the service bulletin specifies to contact Boeing for appropriate action; OR if any discrepancy is found during inspections according to paragraph (d) of this AD: Prior to further flight, repair according to a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA; or according to data meeting the type certification basis of the airplane approved by a Boeing Company Designated Engineering Representative (DER) who has been authorized by the Manager, Seattle ACO, to make such findings. For a repair method to be approved by the Manager, Seattle ACO, as required by this paragraph, the approval letter must specifically reference this AD.

Alternative Methods of Compliance

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 5: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(h) Except as provided by paragraph (e) of this AD, the actions shall be done in accordance with Boeing Service Bulletin 737–57A1249, Revision 1, including Appendix A, dated June 1, 2000. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(i) This amendment becomes effective on April 22, 2002.

Issued in Renton, Washington, on March 8, 2002.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–SW–46–AD; Amendment 39–12674; AD 2002–05–06]

RIN 2120–AA64

Airworthiness Directives; Sikorsky Aircraft Corporation Model S–76A Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD) for Sikorsky Aircraft Corporation Model S–76A helicopters that currently requires a service life limit on certain landing gear parts based on hours time-in-service (TIS). This amendment adds another method of calculating the life limit for certain landing gear parts based on cycles and requires the operator to choose and record the method of calculating the service life of each part in the rotorcraft history or equivalent record. This amendment also requires replacing the part based upon either the maximum hours TIS or the maximum cycles but not both. This amendment is prompted by the need to add flight cycles as a method of calculating the life limit for certain landing gear parts based on fatigue analyses. The actions specified by this AD are intended to add or revise the retirement life for certain landing gear parts to prevent fatigue failure of the landing gear and subsequent loss of control of the helicopter.

DATES: Effective April 22, 2002.

FOR FURTHER INFORMATION CONTACT: Richard Noll, Aviation Safety Engineer,

VOL 67 ISS 52 MR 18 2002 UMI

Boston Aircraft Certification Office, 12 New England Executive Park, Burlington, MA 01803, telephone (781) 238–7160, fax (781) 238–7199.

SUPPLEMENTARY INFORMATION: A proposal to amend 14 CFR part 39 by superseding AD 86–09–11, Amendment 39–5298 (51 FR 17009, May 8, 1986), for Sikorsky Model S76A helicopters, was published in the **Federal Register** on October 12, 2001 (66 FR 52073). That action proposed retaining a life limit based on hours TIS but also allowing the life limit to be based on cycles for certain landing gear parts. That action also proposed selecting a method for calculating the life limit of the landing gear parts, recording that method in the rotorcraft history or equivalent records, and using only that method throughout the life of the part. A cycle is defined as one takeoff to a hover or other mode of flight and one landing.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comment received.

The manufacturer suggests removing all references to specific dates and pages in the maintenance manual because those references could change in future revisions and lead to confusion for the operators. The FAA agrees; however, that information was only included in the NPRM as part of the discussion and was not included in the regulatory text and is not included in the final rule.

That commenter also states that in Table 1 the correct part number for the main landing gear axle is 1945E85 and not 195E85, and the life limit for the main landing gear retraction actuator piston is 33,000 and not 33,300 hours TIS. The FAA agrees and has corrected this AD accordingly.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes described previously. The FAA has determined that these changes are minor corrections and will only minimally increase the economic burden on operators and will not increase the scope of the AD.

The FAA estimates that 87 helicopters of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per helicopter to accomplish the required actions, and that the average labor rate is $60 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $10,440.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39–5298 (51 FR 17009, May 8, 1986), and by adding a new airworthiness directive (AD), to read as follows:

2002–05–06 Sikorsky Aircraft Corporation: Amendment 39–12674. Docket No. 2000–SW–46–AD. Supersedes AD 86–09–11, Amendment 39–5298, Docket No. 86–ASW–12.

Applicability: Model S–76A helicopters, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent fatigue failures of the main and nose landing gear parts and subsequent loss of control of the helicopter, accomplish the following:

(a) Within 50 hours time-in-service (TIS), determine either the hours TIS or cycles accumulated on each part listed in Table 1 or Table 2 of this AD, as applicable. A cycle is a takeoff to a hover or other mode of flight and a landing.

(1) If neither the hours TIS nor cycles are known for an affected part, assume the rotorcraft's total hours TIS are the hours TIS for that part.

(2) If only one history is known for the part (either hours TIS or cycles), use that method for tracking the remaining life of that part.

(3) Thereafter, record in the rotorcraft history or equivalent record the selected method of calculating the life limit for each landing gear part, and record either the accumulated hours TIS or cycles for the selected method.

(b) Before further flight, remove from service each part listed in the following Table 1 of this AD on or before reaching the applicable life limit:

TABLE 1

Component	Part No.	Life limit hours TIS	Life limit cycles
(1) Main Landing Gear:			
(i) Cylinder	1945E2	30,300	136,350
(ii) Axle Support Fitting	1945C12	9,600	43,200
(iii) Pin, Universal to Cylinder	1945C29	23,800	107,100
(iv) Drag Brace Rod End	1945E35	38,200	171,900
(v) Upper Torque Arm	1945E46	37,900	170,550
(vi) Lower Torque Arm	1945C47	16,200	72,900

TABLE 1—Continued

Component	Part No.	Life limit hours TIS	Life limit cycles
(vii) Axle	1945E85	23,380	105,210
(viii) Rod End, Positioning Rod	1945E235	19,100	85,950
(ix) Retraction Actuator:			
(A) Outer Cylinder	1945E302,1945F302	7,100	31,950
(B) Piston	1945E314	33,000	148,500
(C) Piston Rod End	01–747–061	8,000	36,000
(2) Nose Landing Gear:			
(i) Fork	1944E60	42,500	191,250
(ii) Cylinder	1944C2,1944E2	18,500	83,250
(iii) Drag Brace Actuator:			
(A) Cylinder Terminal	1944D201	28,800	129,600
(B) Piston Rod	1944E204	22,000	99,000

(c) For helicopters modified by Supplemental Type Certificate (STC) SH568NE, before further flight, remove from service each part listed in the following Table 2 of this AD on or before reaching the applicable life limit:

TABLE 2

Component	Part No.	Life limit hours TIS	Life limit cycles
(1) Main Landing Gear:			
(i) Cylinder	1945E2, 2071–2	24,000	108,000
(ii) Piston	1945E4, 2071–4	28,600	128,700
(iii) Axle Support Fitting	1945C12, 2071–12	7,400	33,300
(iv) Pin, Universal to Cylinder	1945C29, 2071–29	16,000	72,000
(v) Pin, Positioning Rod to Upper Torque Arm	1945A32, 2071–32	25,000	112,500
(vi) Drag Brace Rod End	1945E35, 2071–35	23,864	107,388
(vii) Upper Torque Arm	1945E46, 2071–46	26,829	120,730
(viii) Lower Torque Arm	1945C47, 2071–47	11,928	53,676
(ix) Lower Drag Brace	1945E74, 2071–74	46,000	207,000
(x) Retraction Brace	1945E76A11, 1945E76A12 2071–76–11, 2071–76–12	41,000	184,500
(xi) Axle	1945E85, 2071–85	23,380	105,210
(xii) Rod End, Positioning Rod	1945E235, 2071–235	13,600	61,200
(xiii) Retraction Actuator:			
(A) Outer Cylinder	1945E302, 1945F302	7,100	31,950
(B) Piston	1945E314	33,000	148,500
(C) Piston Rod End	01–747–061	8,000	36,000
(2) Nose Landing Gear:			
(i) Axle	1944B85, 2070–85	49,833	224,248
(ii) Fork	1944E60, 2070–60	32,000	144,000
(iii) Piston	1944E4, 2070–4	35,878	161,451
(iv) Cylinder	1944C2, 1944E2, 2070–2	13,500	60,750
(v) Drag Brace Actuator:			
(A) Cylinder Terminal	1944D201, 2070–201	23,000	103,500
(B) Piston Terminal	1944E212B, 2070–212	40,000	180,000
(C) Piston Rod	1944E204	22,000	99,000

(d) This AD revises the Limitations section of the maintenance manual by establishing or revising the retirement lives for the affected parts shown in Tables 1 and 2 of this AD and establishing cycle counting as an additional method to determine retirement for the affected parts. Installing STC SH568NE affects the retirement life of certain parts.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Boston Aircraft Certification Office, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Boston Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Boston Aircraft Certification Office.

(f) Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the helicopter to a location where the requirements of this AD can be accomplished.

(g) This amendment becomes effective on April 2, 2002.

Issued in Fort Worth, Texas, on March 5, 2002.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

Correction to Rule Entitled: Implementation of the Wassenaar Arrangement List of Dual-Use Items Revisions: Computers; and Revisions to License Exception CTP

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: On March 8, 2002 the Bureau of Export Administration (BXA) published a final rule revising the Commerce Control List to implement certain agreed changes in Category 4 (Computers) of the Wassenaar List of Dual-Use Goods and Technologies, specifically in the area of computers. This rule corrects an error in the rulemaking requirements section to indicate that this rule was determined by the Office of Management and Budget to be significant for purposes of Executive Order 12866.

DATES: This rule is effective March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Sharron Cook in the Office of Exporter Services, Bureau of Export Administration, at (202) 482–2440.

SUPPLEMENTARY INFORMATION: In rule FR Doc. 02–5563 published on March 8, 2002, (67 FR 10611), BXA makes the following correction. On page 10613, in the first column, under Rulemaking Requirements #1, revise the phrase "not significant" to read "significant."

Dated: March 12, 2002.

Eileen M. Albanese,

Director, Office of Exporter Services, Export Administration.

Corrections to Rule Entitled: Revisions to License Exception CTP: Implementation of Presidential Announcement of January 2, 2002

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: On March 8, 2002 the Bureau of Export Administration (BXA) published a final rule revising License Exception CTP. This rule corrects errors in the rulemaking requirements section (to indicate that this rule was determined by the Office of Management and Budget to be significant for purposes of Executive Order 12866), authorities section, list of subjects, part listings, and an instruction to add a missing paragraph reference.

DATES: This rule is effective March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Sharron Cook in the Office of Exporter Services, Bureau of Export Administration, at (202) 482–2440.

SUPPLEMENTARY INFORMATION: In rule FR Doc. 02–5562 published on March 8, 2002, (67 FR 10608), BXA makes the following corrections.

—On page 10608, in the third column, add 743 to the listing of 15 CFR parts.

—On page 10610, in the first column, under Rulemaking Requirements #1, revise the phrase "not significant" to read "significant."

—On page 10610, in the second column, in the List of Subjects, revise "15 CFR Part 740" to read "15 CFR Parts 740 and 743."

—On page 10610, in the second column, under the List of Subjects, revise the phrase "Accordingly, parts 734, 740, 742, and 774" to read "Accordingly, parts 734, 740, 742, 743, and 774."

—On page 10610, in the second column, under the authority citation listings, following paragraph 4 insert a new paragraph 4a reading as follows:

4a. The authority citation for part 743 continues to read as follows:

Authority: 50 U.S.C. app. 2401 *et seq;* Pub. L. 106–508; 50 U.S.C. 1701 *et seq;* E.O. 13206, 66 FR 18397, April 9, 2001.

—On page 10610, in the third column, under part 742, revise "§ 740.12" to read "§ 742.12".

—On page 10610, in the third column, under part 742, in instruction 9, revise the phrase "in paragraph (b)(3)(iv)(A)" to read "in paragraphs (b)(3)(i)(B) and (b)(3)(iv)(A)."

Dated: March 12, 2002.

Eileen M. Albanese,

Director, Office of Exporter Services, Export Administration.

Revisions and Clarifications to the Export Administration Regulations: Czech Republic, Hungary and Poland

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration maintains the Export Administration Regulations (EAR). This rule amends the EAR by removing the license requirements for certain regional stability items and for certain crime control items destined to the Czech Republic, Hungary and Poland to correctly reflect the status of those countries as NATO members.

DATES: This rule is effective: March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Joan Roberts, Acting Director, Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Telephone: (202) 482–0171, E-mail: *jroberts@bxa.doc.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Bureau of Export Administration (BXA) maintains controls on certain military related items, such as military vehicles and certain specially designed commodities to be used to manufacture military equipment. These controls ensure regional stability in support of foreign policy. BXA also maintains controls on certain crime control and detection instruments and equipment, and related technology and software as a matter of foreign policy, to promote the observance of human rights throughout the world. Countries to which exports and reexports of these items are controlled are identified in Supplement No.1 to part 738 of the EAR, the Commerce Country Chart, by an X in the regional stability (RS) column identifier RS 2; and crime control (CC) column identifiers: CC 1, CC 2, or CC 3. This rule amends the license requirements for certain crime control items destined to the Czech Republic, Hungary and Poland because these countries were recently admitted to NATO. The EAR is amended to correctly reflect the status of these countries as NATO members.

Rulemaking Requirements

1. This final rule has been determined to be not significant for purposes of E.O. 12866.

2. Notwithstanding any other provision of law, no person is required to respond nor shall any person be subject to a penalty for failure to comply with, a collection of information, subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number. This rule involves a collection of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This collection has been approved by the Office of Management and Budget under control number 0694–0088, "Multi-Purpose Application," which carries a burden hour estimate of 45 minutes for a manual submission and 40 minutes for an electronic submission.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military and foreign affairs function of the United States (See 5 U.S.C. 553(a)(1)). Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this final rule. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule under 5 U.S.C. 553 or by any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis. Comments should be submitted to Sheila Quarterman, Regulatory Policy Division, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Parts 738 and 742 Exports, Foreign trade.

Accordingly, Parts 738 and 742 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

1. The authority citation for 15 CFR Part 738 is revised to read as follows:

Authority: 50 U.S.C. app. 2401 *et seq.*; 50 U.S.C. 1701 *et seq.*; 10 U.S.C. 7420; 10 U.S.C. 7430(e); 18 U.S.C. 2510 *et seq.*; 22 U.S.C. 287c; 22 U.S.C. 3201 *et seq.*; 22 U.S.C. 6004; 30 U.S.C. 185(s), 185(u); 42 U.S.C. 2139a; 42 U.S.C. 6212; 43 U.S.C. 1354; 46 U.S.C. app. 466c; 50 U.S.C. app. 5; Sec. 901–911, Publ. L. 106–387; Sec. 221, Publ. L. 107–56; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, August 22, 2001.

2. The authority citation for 15 CFR 742 is revised to read as follows:

Authority: 50 U.S.C. app. 2401 *et seq.*; 50 U.S.C. 1701 *et seq.*; 18 U.S.C. 2510 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; Sec. 901–911, Publ. L. 106–387; Sec. 221, Publ. FEDERAL TRADE COMMISSION

16 CFR Parts 801 and 802

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission is amending the premerger notification rules, which require the parties to certain mergers or acquisitions to file reports with the Commission and with the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice and to wait a specified period of time before consummating such transactions, pursuant to section 7A of the Clayton Act. The filing and waiting period requirements enable these enforcement agencies to determine whether a proposed merger or acquisition may violate the antitrust laws if consummated and, when appropriate, to seek a preliminary injunction in Federal court to prevent consummation. The rule amendments are necessary to address public comments regarding the proposed rules published February 1, 2001, and will increase the clarity and improve the effectiveness of the rules.

DATES: These final rules are effective on April 17, 2002.

FOR FURTHER INFORMATION CONTACT: Marian R. Bruno, Assistant Director, Karen E. Berg, Attorney, or B. Michael Verne, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 303, Federal Trade Commission, 600 Pennsylvania Avenue, NW., Washington, DC 20580. Telephone: (202) 326–3100.

SUPPLEMENTARY INFORMATION: On February 1, 2001, the Commission published in the **Federal Register** interim and proposed rules amending the Hart-Scott-Rodino rules ("HSR rules") contained in 16 CFR parts 801, 802 and 803. The interim rules took effect upon publication in the **Federal Register** and implemented amendments to section 7A of the Clayton Act enacted on December 21, 2000 ("2000 Amendments"). The proposed rules recommended other changes improving and updating the HSR rules and did not take effect upon publication. Both sets of rules invited public comments.

The Commission, with the concurrence of the Assistant Attorney General, is adopting the proposed rules, previously published on February 1, 2001, as final with certain further changes in response to the public comments, as described below. The Commission received eighteen public comments addressing either or both the interim rules (66 FR 8679–8721) and the proposed rules (66 FR 8723–8729). Fifteen of the eighteen public comments received pertained to the proposed rules.

The following provided public comments on the proposed rules to the Commission:

1. Baker & McKenzie (3/19/01)
2. Dockstader, Robert A. (3/19/01)
3. Ford Motor Company (Bolerjack, Stephen D.) (3/19/01)
4. Fulbright & Jaworski LLP (Wellington, Daniel L.) (3/19/01)
5. Jones, Day, Reavis & Pogue (Smith, Tom D.) (3/19/01)
6. McDermott, Will & Emery (Bloch, Ronald A.) (3/19/01)
8. National Association of Manufacturers (NAM) (3/29/01)
10. Otis, Steve (2/14/01)
11. Paul, Weiss, Rifkind, Wharton & Garrison (Malaquin, Didier) (3/1/01)
12. Gibson, Dunn & Crutcher (Pfunder, Malcolm R.) (3/19/01)
13. Section of Antitrust Law of the American Bar Association (3/19/01)
14. Shearman & Sterling (Prince, Kenneth S.) (3/19/01)
15. Skadden, Arps, Slate, Meagher & Flom, LLP (Stoll, Neal R. Esq., et al) (3/19/01)
16. Kirkland & Ellis (Sonda, James and Jachino, Dani) (3/19/01)
17. Willkie, Farr & Gallagher (Gartner, Steven J.) (3/19/01)

PART 801—COVERAGE RULES

No public comments were received concerning Part 801 of the proposed rules. These proposed changes include updating examples in §§ 801.4, 801.14 and 801.90; and amending § 801.15 to reflect the $50 million nexus with U.S. commerce threshold for foreign transactions and give proper reference to other rules sections. The Commission is adopting those proposed rules as final without change.

PART 802—EXEMPTION RULES

Section 802.2 Certain acquisitions of real property assets.

The proposed rules would amend § 802.2(g), mainly by removing "associated agricultural assets" from the agricultural real property exemption. Under the current rules, such assets are defined as assets that are integral to the agricultural business activities conducted on the property, including inventory (e.g., livestock, poultry, crops, fruit, vegetables, milk, eggs), structures that house livestock raised on the real property, fertilizer, and animal feed.

Comment 12 questioned the justification for removing the associated agricultural assets—particularly structures and inventories of crops, animal feed or fertilizer—from the exemption. The comment suggested that acquisitions of these assets would not potentially be of substantive antitrust interest.

The Commission has concluded that it is appropriate to remove associated agricultural assets from this real property exemption, as proposed. As the Statement of Basis and Purpose ("SBP") to the Proposed Rules states, doing so will eliminate whatever ambiguity may arguably exist in the definition of "associated agricultural assets." It also refocuses the rule on agricultural *real* property which was the initial intent of the exemption when promulgated. The more-than-threefold increase in the statutory size-of-transaction test to $50 million will continue to exempt acquisitions of agricultural property unless the additional assets being acquired—whether within or beyond the definition of "associated agricultural assets"—are valued in excess of $50 million. The Commission believes that the elimination of "associated agricultural assets" from the agricultural property exemption simplifies the rule without significantly limiting the applicability of that exemption. If a significant number of agricultural property transactions are reported under HSR because of the "associated agricultural assets" conveyed in the transaction, the Commission can revisit the language of § 802.2(g).

Section 802.6 Federal agency approval.

Proposed § 802.6(b) was revised to state a general rule regarding mixed transactions rather than one that is industry specific. No comments were received regarding this rule revision, therefore the Commission is adopting this Proposed Rule as final without change.

Section 802.8 Certain supervisory acquisitions.

Proposed § 802.8 corrected a typographical error. No comments were received regarding this rule revision, therefore the Commission is adopting this Proposed Rule as final without change.

Sections 802.50 and 802.51 Foreign acquisitions.

The Proposed Rules would restructure and amend the exemptions contained in §§ 802.50 and 802.51. The Commission received fifteen comments regarding these proposed rules. One proposed amendment to these rules increases the thresholds for measuring nexus with U.S. commerce to $50 million from $15 million and $25 million. No comments were received concerning the increase to $50 million of the $15 million and $25 million nexus with U.S. commerce

thresholds contained in these exemptions. Consequently, these increased thresholds will be implemented without change from the Proposed Rules.

The comments focused on five other aspects of the proposed rules: (1) The period used to determine sales in or into the U.S.; (2) the method of valuation used for assets located in the U.S.; (3) the elimination of the $110 million aggregate U.S. sales and assets exemption for transactions valued in excess of $200 million; (4) the elimination of the absolute exemption for acquisitions of assets located outside of the U.S. by a foreign person; and (5) the applicability of aggregation of the sales and assets of multiple foreign issuers from the same acquired person to both U.S. and foreign acquiring persons.

The Commission is adopting Proposed §§ 802.50 and 802.51 as final, with two changes in response to these public comments. First, the measure of sales in or into the U.S. will be sales of the most recent fiscal year, rather than the sum of the most recent fiscal year's sales and sales year-to-date, as proposed. The Commission believes that the burden on the parties of determining any measure of sales in or into the U.S. beyond the most recent fiscal year of the parties may well outweigh the benefit to the agencies in capturing transactions involving a recent upswing in U.S. sales. Second, § 802.51 will be amended to correct a drafting error which resulted in aggregation of sales in or into the U.S. and assets located in the U.S. being applicable only to foreign persons acquiring multiple foreign issuers from the same acquired person. This error was discovered shortly after publication and will be corrected with additional language in paragraph (a) of the rule. This correction makes it clear that this aspect of the rule is intended to apply to acquisitions by both U.S. and foreign acquiring persons. These provisions, as well as others addressed by the comments, are discussed below. Finally, in a technical correction, the reference to § 801.40(c)(2) in paragraphs 802.50(b)(3), 802.51(a)(1), 802.51(b)(1), and 802.51(c)(3), has been changed to § 801.40(d)(2) to reflect the renumbering of that section.

(1) The Measure of Sales in or Into the United States

Comments 1–6 and 10–17 criticized the proposed requirement that sales in or into the U.S. be calculated by adding those sales from the last fiscal year to such sales generated to date since the end of that fiscal year, calculated no more than sixty days prior to the filing of notification or if notification is not required, within sixty days prior to the consummation of the acquisition. This proposed change reflected the recognition that sales figures based on a party's most recent fiscal year may be several months out of date and was intended to ensure that where U.S. sales generated by foreign assets and voting securities trend steeply upward prior to the acquisition, a filing would be required if that trend resulted in over $50 million in U.S. sales. The comments expressed a variety of concerns and offered several alternatives.

Comment 1 stated that this proposed method of calculating combined sales would, in many transactions, remove all benefit of the increased $50 million threshold for U.S. sales. It further noted that the requirement to combine sales could result in a filing obligation even where U.S. sales have been stagnating or even declining. The comment suggested that the requirement would produce widely disparate results based solely on when the transaction closes (*i.e.*, transactions that propose to close later in the year will be less likely to be able to claim the exemption than those that close early in the year). The comment proposed that the agencies' goal could be accomplished by requiring the comparison of U.S. sales over a two year period, and determining the applicability of an exemption based on the greater of U.S. sales for a single year in that period.

Comments 2, 3, 13 and 15 addressed the same concerns and suggested an alternative approach of using the higher of the most recent fiscal year's sales or estimated sales for the current year-to-date. Comment 13 further predicted that the proposed change would substantially narrow the exemption previously available and increase the number of transactions that are reportable.

Comment 4 suggested that a more equitable method would be to determine sales in the twelve months prior to filing or closing the transaction, calculated within sixty calendar days prior to filing notification or, if no filing is required, within sixty calender days of closing.

Comment 5 stated that determining the value of sales in or into the U.S. is often extraordinarily complex and time-consuming and that the proposed revisions do not reduce that burden. It further noted that while corporations have methods for analyzing such data, these methods are generally geared toward quarterly and annual assessments and are virtually never performed on an *ad hoc* basis. Outside of the audit procedures currently in place, it suggested that it is not practical, and perhaps not even possible, to take a meaningful snapshot of current revenues. The comment recommended deleting the requirement that current year sales be analyzed.

Comment 6 observed that throughout the rules, the determination of sales is always on an annual basis and is found in the reporting person's last year-end, consolidated statement of operations. It further opined that there is no suggestion that anti-competitive mergers have escaped review because of sharp upward trends in U.S. sales.

Comment 10 questioned why the rules for a foreign exemption should be particularly concerned about changes to sales since the end of the last fiscal year, when § 801.11 (measuring net sales for the size-of-person test) is not. Comment 12 similarly questioned why the change seeks to address an issue (a recent increase in U.S. sales) which arises in both foreign and domestic transactions, and no similar change is proposed for dealing with domestic transactions. It also suggested the possible approach of using the greater of the previous year's sales or sales year-to-date, but noted that the approach would still suffer from inconsistency with other provisions in the rules and further observed that current information is often difficult to obtain from foreign entities.

Comments 11, 14, and 16 noted that requiring the aggregation of sales since the end of the preceding fiscal year will lead in certain cases to uncertainty as to whether or not a transaction is reportable and places on the parties to a transaction the added burden of monitoring the sales of a foreign target while negotiations are in progress. Comment 14 suggested two alternative methods of calculation. One method was to determine a twelve month average of sales by adding the last fiscal year to the sales year-to-date, dividing the total by the number of months included, and multiplying this figure by twelve. The second suggested method was to use the most recent twelve months calculated within sixty days of filing or closing.

Finally, Comment 17 asserted that the proposed change, setting forth the time in which the calculation must be made, is unclear and imposes undue burden upon the parties that could generate delays in transactions. It proposed an alternative test of considering the greater of sales in the most recent fiscal year or sales over the last four available fiscal quarterly periods. It further stated that the parties should be entitled to a consistent cut-off date for calculating sales in or into the U.S., regardless of whether the transaction proves to be subject to notification. The comment

UMI

recommended that the parties measure these sales as of the end of the most recent quarterly period available as of the date the parties enter into an agreement, so long as no more than 135 days have elapsed since the end of that quarterly period. It suggested that this approach would provide the parties certainty; allow sufficient time to gather information that is not always readily available; minimize the burden imposed by requiring sales for a fiscal year that has not yet ended; properly take into account sales trends; and allow most parties to rely upon their existing reporting practices.

The Commission recognizes the burden on the parties in determining sales in or into the U.S. for any period of time other than the filing person's most recent fiscal year. The Commission also agrees with the observation that aggregating sales from the most recent fiscal year with those year-to-date may have the undesirable result of making acquisitions reportable where sales in or into the U.S. in the current year may be steady or even declining. The Commission considered the many alternative methods suggested in the comments (e.g., most recent four quarters, most recent twelve months, greater of two years, greater of year-to-date or last fiscal year, twelve-month average) but was unable to discern how any of these methods would be significantly less burdensome than the approach put forth in the Proposed Rules. All of these approaches would also require compilation of data that is not captured in the ordinary course of business by many persons filing notification. Consequently, in the Final Rules, the measure of sales in or into the U.S. for purposes of §§ 802.50 and 802.51 will be those of the most recently completed fiscal year.

(2) Valuation of Assets Located in the United States

Comments 1, 3, 6 and 13 objected to the proposed change from book value to fair market value for measuring assets located in the U.S. The Commission believes that this change is appropriate in order to reflect more accurately a foreign person's nexus with U.S. commerce, to harmonize these sections with the rest of the rules, and to address questions frequently asked of the PNO concerning the use of book value to make this determination. Specifically, intangible assets such as U.S. patents and other intellectual property were often not carried on the books of a foreign person, and the question has frequently arisen as to what value should be attributed to these intangible assets and what method should be used to determine their book value. In these instances, the PNO advised parties to use fair market value.

Comment 1 asserted that the Commission's proposal is inconsistent with the rest of the rules and that the implementation of a fair market value test would impose a new, substantial burden upon parties in voting securities transactions. It argued that the size-of-person test is based on an existing balance sheet, not on a market valuation, and that it is only for assets that are being acquired that the rules require a fair market valuation. The comment suggested that in a stock deal, the market value of assets is not easily determinable, and any excess over the book value of the assets of the acquired company is reflected as goodwill on the balance sheet of the acquired company, precisely in recognition of the difficulties of a market value appraisal. It further maintained that the competitive significance and impact on U.S. commerce of a proposed acquisition will likely not turn upon whether the value of the acquired company's assets located in the U.S. has increased since its last book value calculation.

Comment 3 also argued that an additional burden is placed on the parties to extract the specific U.S. assets and determine their fair market value. It states that fair market valuation may be subject to dispute by the agencies, thus subjecting the parties to possible penalties, while book value is a simple, readily available value and provides certainty to parties seeking to determine whether the exemption is available. Comment 13 agreed that an additional burden is imposed by fair market valuation and also complained that some measure of certainty is lost since the agencies could dispute that valuation.

Lastly, Comment 6 claimed that the Commission's stated justification for the proposed rule change appeared to lack a factual foundation, arguing that consistency throughout the rules requires that book value be retained as the measure of value. It further submitted that book value is readily available and that requiring the acquiring person to determine the fair market value of the acquired person's, and in some cases its own, U.S. property imposes an unreasonable new burden. The comment concluded that, absent compelling evidence that a significant number of anticompetitive transactions will escape premerger review without this change, the book value of U.S. assets should continue to govern.

The Commission recognizes that in some instances the requirement to calculate the fair market value of assets located in the U.S. may impose additional burden on the acquiring person. However, in the vast majority of cases it will be readily apparent that the value of the assets clearly is above or below the $50 million threshold, and determination of whether or not the exemption is applicable will require a minimal amount of effort by the acquiring person.

As to the alleged inconsistency with the methodology used in determining the size-of-person of a party, the Commission notes that the $50 million threshold in §§ 802.50 and 802.51 is not a size-of-person test, but rather a "size-of-nexus with the U.S." test. The fair market value of assets located in the U.S. is a far more accurate assessment of the true nexus with U.S. commerce at the present time. The book value may be out of date and may not reflect the true value, especially in the case of assets which constitute an ongoing business, since a portion of the value of those assets may be carried on the books as goodwill. Also, assets may be carried on the books showing significant depreciation that does not reflect their actual value.

For these reasons, the Commission believes that the potential burden on a small number of transactions is outweighed by the benefit to the agencies in requiring a current and meaningful measure of a transaction's nexus with U.S. commerce. Therefore, the Commission will adopt the proposed change to fair market value for calculating the value of assets located in the U.S.

(3) Elimination of the $110 Million Aggregate U.S. Sales and Assets Exemption for Transactions Valued in Excess of $200 Million

Comments 1 and 13 asserted that the elimination of this exemption for transactions valued in excess of $200 million is inappropriate. Comment 1 contended that there is no discussion in the 1978 SBP of the import now apparently attributed by the Commission to the overall value of a transaction in determining whether a transaction may have an anticompetitive impact on U.S. commerce. It argued that the result of this proposed change is not consistent with the original rationale for creating this exemption, and that the value of a transaction outside of the U.S. does not indicate in any way the transaction's potential anticompetitive effects in the U.S. Comment 13 states that the elimination of this portion of the exemption will greatly narrow its reach.

While this change may marginally narrow the exemptions, the general increase in the reporting threshold to over $50 million, together with the increase in the $15 million and $25 million nexus tests to $50 million, will significantly expand the number of exempt foreign transactions.

In the SBP for the Proposed Rules, the Commission referenced the 1978 SBP which explains that the $110 million threshold was adopted to approximate the size-of-person criteria of Section 7A(a)(2), as it seemed appropriate and consistent with congressional intent not to exempt a transaction involving two foreign persons with a U.S. presence similar in size to the general criteria of the act for all persons. 43 FR 33498 (July 31, 1978). Since the new legislation removes the size-of-person test for acquisitions valued at over $200 million, the Commission likewise believes that it is appropriate and consistent to require filings from foreign persons, regardless of the size of their U.S. presence, where the transaction is valued at over $200 million and the $50 million nexus test of these exemption rules is satisfied.

(4) Elimination of the Absolute Exemption for Acquisitions of Assets Located Outside of the U.S. by a Foreign Person

Comment 13 claimed that the Commission sets forth no explanation as to why such transactions are likely to raise competitive issues in the U.S. in order to justify removing the exemption. The Commission clearly stated in the SBP to the Proposed Rules that experience at both agencies has shown that foreign asset acquisitions can and do have a direct impact on the U.S. economy and that this is more likely to be true where the assets generate over $50 million in sales in or into the U.S. Thus, the Commission continues to believe that it is appropriate to require that their acquisition be reported where there is a substantial nexus to U.S. commerce. This approach makes the rule consistent with the treatment of U.S. acquiring persons.

(5) Applicability of Aggregation of the Sales and Assets of Multiple Foreign Issuers From the Same Acquired Person to Both U.S. and Foreign Acquiring Persons

Comments 11 and 17 correctly noted a section numbering error in § 802.51. The intent was to require the aggregation of sales and assets of multiple foreign issuers, which are being acquired from the same acquired person, by both foreign and U.S. acquiring persons. This numbering error was discovered shortly after publication of the Proposed Rules and is corrected by adding paragraph (a)(3) which reads: "If interests in multiple foreign issuers are being acquired from the same acquired person, the assets located in the United States and sales in or into the United States of all the issuers must be aggregated to determine whether the $50 million thresholds are exceeded." This revision will make the intent of the rule clear. An example has been added to illustrate the aggregation requirement.

Section 802.52 Acquisitions by or from Foreign Governmental Corporations

The example in Section 802.52 has been amended to reflect the new $50 million threshold for measuring nexus with U.S. commerce.

Other Comments

In addition to the above noted comments, Comment 8 opposed all proposed changes to the foreign exemptions on the grounds that they narrowed the scope of the exemptions. It recommended broadening the exemptions instead, but offered no suggestions as to how this should be accomplished. This comment, as well as Comments 1 and 3, based its recommendation on the International Competition Policy Advisory Committee ("ICPAC") (Report to the Attorney General of the International Competiton Policy Advisory Committee (February 2000)) finding that there were far too many filings in fiscal year 1999 involving foreign transactions. The ICPAC report dealt with filings subject to the prior $15 million size-of-transaction threshold and does not take into consideration changes in the level of filings as a result of the 2001 Amendments to the statute. Despite the marginal narrowing of the exemption in the areas discussed above, the Commission believes that the increase in the statutory size-of-transaction threshold to $50 million and the increase in the dollar thresholds in §§ 802.50 and 802.51 will dramatically reduce the number of foreign transaction filings overall.

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that the agency conduct an initial and final regulatory analysis of the anticipated economic impact of the proposed amendments on small businesses, except where the agency head certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605.

Because of the size of the transactions necessary to invoke a Hart-Scott-Rodino filing, the premerger notification rules rarely, if ever, affect small businesses. Indeed, the recent amendments to Section 7A of the Clayton Act, which these rule amendments implement, were intended to reduce the burden of the premerger notification program by exempting all transactions valued at $50 million or less. Further, none of the rule amendments expands the coverage of the premerger notification rules in a way that would affect small business. Accordingly, the Commission certifies that these rules will not have a significant economic impact on a substantial number of small entities. This document serves as the required notice of this certification to the Small Business Administration.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 ("PRA"), 44 U.S.C. 3501–3518, requires agencies to submit requirements for "collections of information" to the Office of Management and Budget ("OMB") and obtain clearance prior to instituting them. Such collections of information include reporting, recordkeeping, or disclosure requirements contained in regulations. The HSR premerger notification rules and Form contain information collection requirements as defined by the PRA that have been reviewed and approved by OMB under OMB Control No. 3084–0005 (preceding the latest HSR amendments). Because the Final Rules would not affect the information collection requirements of the premerger notification program beyond those of the proposed rules, they are not being resubmitted to OMB for review pursuant to the PRA. The Supporting Statement accompanying the Request for OMB Review states that the total burden imposed on the members of the public subject to the requirements of the Act, including the final rules, is estimated to be 192,089 hours per year (based on fiscal year 2000 filings). This constitutes approximately a 47% reduction from what the burden estimate would be absent the final rules and based on the number of fiscal year 2000 filings. The Commission is seeking 3-year clearance with the requisite submissions to OMB.

List of Subjects in 16 CFR Parts 801 and 802

Antitrust, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, the Federal Trade Commission amends 16 CFR Parts 801 and 802 as follows:

VOL 67 ISS 52 MR 18 2002 UMI

PART 801—COVERAGE RULES

1. The authority citation for Part 801 continues to read as follows:

Authority: 15 U.S.C. 18a(d).

2. Amend § 801.4 by revising Example 5 in paragraph (b) to read as follows:

§ 801.4 Secondary acquisitions.

* * * * *

(b) * * *

Examples: * * *

5. In example 4 above, suppose the consideration paid by "A" for the acquisition of B is $60 million worth of the voting securities of "A." By virtue of § 801.2(d)(2), "A" is both an acquiring and acquired person; B is an acquired person and B's shareholders are acquiring persons. A will still be deemed to have acquired control of B, and therefore the resulting acquisition of the voting securities of X is a secondary acquisition. Although B's shareholders are now also acquiring persons, unless one of them gains control of "A" in the transaction, no B shareholder makes a secondary acquisition of stock held by "A." If the consideration paid by "A" is the voting securities of one of "A"s subsidiaries and a shareholder of B thereby gains control of that subsidiary, the shareholder will make secondary acquisitions of any minority holdings of that subsidiary.

* * * * *

3. Amend § 801.14 by revising Example 2 in paragraph (b) to read as follows:

§ 801.14 Aggregate total amount of voting securities and assets.

* * * * *

(b) * * *

Examples: * * *

2. In the previous example, assume that the assets acquisition occurred first, and that the acquisition of the voting securities is to occur within 180 days of the first acquisition. "A" now looks to § 801.13(b)(2) and determines that the previously acquired assets are not treated "as part of the present acquisition" because the second acquisition is of voting securities and not assets; thus, the asset and voting securities acquisitions are not treated as one transaction. Therefore, the second acquisition would not be subject to the requirements of the act since the value of the securities to be acquired does not exceed the $50 million size-of-transaction test.

4. Amend § 801.15 by revising the introductory text, paragraphs (a)(2) and (b), and Examples 1, 4, 5, 7, and 8 in paragraph (c), to read as follows:

§ 801.15 Aggregation of voting securities and assets the acquisition of which was exempt.

Notwithstanding § 801.13, for purposes of determining the aggregate total amount of voting securities and assets of the acquired person held by the acquiring person under Section 7A(a)(2) and § 801.1(h), none of the following will be held as a result of an acquisition:

(a) * * *

(2) Sections 802.1, 802.2, 802.5, 802.6(b)(1), 802.8, 802.31, 802.35, 802.52, 802.53, 802.63, and 802.70 of this chapter;

(b) Assets or voting securities the acquisition of which was exempt at the time of acquisition (or would have been exempt, had the act and these rules been in effect), or the present acquisition of which is exempt, under Section 7A(c)(9) and §§ 802.3, 802.4, 802.50(a), 802.51(a), 802.51(b) and 802.64 of this chapter unless the limitations contained in Section 7A(c)(9) or those sections do not apply or as a result of the acquisition would be exceeded, in which case the assets or voting securities so acquired will be held; and

(c) * * *

Examples: 1. Assume that acquiring person "A" is simultaneously to acquire $51 million of the convertible voting securities of X and $12 million of the voting common stock of X. Since the overall value of the voting securities to be acquired (§ 801.1 defines convertible voting securities as "voting securities") is greater than $50 million, "A" must determine whether it is obliged to file notification and observe a waiting period before acquiring the securities. However, because § 802.31 of this chapter is one of the exemptions listed in paragraph (a)(2) of this section, "A" would not hold the convertible voting securities as a result of this acquisition. Therefore, since as a result of the acquisition "A" would hold only the $12 million of common stock, the size-of-transaction tests of Section 7A(a)(2) would not be satisfied, and "A" need not observe the requirements of the act before acquiring the common stock. (Note, however, that the $51 million of convertible voting securities would be reflected in "A"'s next regularly prepared balance sheet, for purposes of § 801.11.)

* * * * *

4. Assume that acquiring person "B," a United States person, acquired from corporation "X" two manufacturing plants located abroad, and assume that the acquisition price was $160 million. In the most recent fiscal year, sales into the United States attributable to the plants were $40 million, and thus the acquisition was exempt under § 802.50(a) of this chapter. Within 180 days of that acquisition, "B" seeks to acquire a third plant from "X," to which United States sales of $12 million were attributable in the most recent fiscal year. Since under § 801.13(b)(2), as a result of the acquisition, "B" would hold all three plants of "X," and the $50 million limitation in § 802.50(a) of this chapter would be exceeded, under paragraph (b) of this rule, "B" would hold the previously acquired assets for purposes of the second acquisition. Therefore, as a result of the second acquisition, "B" would hold assets of "X" exceeding $50 million in sales in or into the United States, would not qualify for the exemption in § 802.50(a) of this chapter, and must observe the requirements of the act and file notification for the acquisition of all three plants before acquiring the third plant.

5. "A" acquires producing oil reserves valued at $400 million from "B." Two months later, "A" agrees to acquire oil and gas rights valued at $75 million from "B." Paragraph (b) of this section and § 801.13(b)(2) require aggregating the previously exempt acquisition of oil reserves with the second acquisition. If the two acquisitions, when aggregated, exceed the $500 million limitation on the exemption for oil and gas reserves in § 802.3(a), "A" and "B" will be required to file notification for the latter acquisition, including within the filings the earlier acquisition. Since, in this example, the total value of the assets in the two acquisitions, when aggregated, is less than $500 million, both acquisitions are exempt from the notification requirements. In determining whether the value of the assets in the two acquisitions exceeds $500 million, "A" need not determine the current fair market value of the oil reserves acquired in the first transaction, since these assets are now within the person of "A." Instead, "A" is directed by § 801.13(b)(2)(ii) to use the value of the oil reserves at the time of their prior acquisition in accordance with § 801.10(b).

* * * * *

7. In Example 6, above, assume that "X" acquired 30 percent of the voting securities of M and proposes to acquire 40 percent of the voting securities of N, another entity controlled by "Z." Assume also that M's assets at the time of "X's" acquisition of M's voting securities consisted of $90 million worth of producing coal reserves and non-exempt assets with a fair market value of $39 million, and that N's assets currently consist of $60 million worth of producing coal reserves and non-exempt assets with a fair market value of $28 million. Since "X" acquired a minority interest in M and intends to acquire a minority interest in N, and since M and N are controlled by "Z," the assets of M and N must be aggregated, pursuant to §§ 801.15(b) and 801.13, to determine whether the acquisition of N's voting securities is exempt or whether it is reportable pursuant to the terms of § 802.4(c) of this chapter. "X" is required to determine the current fair market value of M's assets. If the fair market value of M's coal reserves is unchanged, the aggregated exempt assets do not exceed the limitation for coal reserves under § 802.3(b) of this chapter. However, if the present fair market value of N's non-exempt assets also is unchanged, the present fair market value of the non-exempt assets of M and N when aggregated is greater than $50 million. Thus the acquisition of the voting securities of N is not exempt under § 802.4 of this chapter. If "X" proposed to acquire 50 percent or more of the voting securities of both M and N in the same acquisition, the assets of M and N must be aggregated to determine if the acquisition of the voting securities of both issuers is exempt. Since the fair market value of the aggregated non-exempt assets exceeds $50 million, the acquisition would not be exempt.

8. "A" acquired 49 percent of the voting securities of M and 45 percent of the voting securities of N. Both M and N are controlled by "B." At the time of the acquisition, M held rights to producing coal reserves worth $90 million and N held a producing coal mine worth $90 million. This acquisition was exempt since the aggregated holdings fell below the $200 million limitation for coal in § 802.3(b) of this chapter. A year later, "A" proposes to acquire an additional 10 percent of the voting securities of both M and N. In the intervening year, M has acquired coal reserves so that its holdings are now valued at $140 million, and the value of N's assets remained unchanged. "A's" second acquisition would not be exempt. "A" is required to determine the value of the exempt assets and any non-exempt assets held by any issuer whose voting securities it intends to acquire before each proposed acquisition (unless "A" already owns 50 percent or more of the voting securities of the issuer) to determine if the value of those holdings of the issuer falls below the limitation of the applicable exemption. Here, the holdings of M and N now exceed the $200 million exemption for acquisitions of coal reserves in § 802.3 of this chapter, and thus do not qualify for the exemption of voting securities provided by § 802.4(a) of this chapter.

5. Amend § 801.90 by revising Example 1 to read as follows:

§ 801.90 Transactions or devices for avoidance.

* * * * *

Examples: 1. Suppose corporations "A" and "B" wish to form a joint venture. "A" and "B" contemplate a total investment of over $100 million in the joint venture; persons "A" and "B" each has total assets in excess of $100 million. Instead of filing notification pursuant to § 801.40, "A" creates a new subsidiary, A1, which issues half of its authorized shares to "A." Assume that A1 has total assets of $3000. "A" then sells 50 percent of its A1 stock to "B" for $1500. Thereafter, "A" and "B" each contribute $53 million to A1 in exchange for the remaining authorized A1 stock (one-fourth each to "A" and "B"). "A"'s creation of A1 was exempt under § 802.30 of this chapter; its $1500 sale of A1 stock to "B" did not meet the size-of-transaction filing threshold in Section 7A(a)(2)(B); and the second acquisitions of stock in A1 by "A" and "B" were exempt under Sections 7A(c)(3) and (10), because "A" and "B" each already controlled A1, based on their holdings of 50 percent of A1's then-outstanding shares. Since this scheme appears to be for the purpose of avoiding the requirements of the act, the sequence of transactions will be disregarded. The transactions will be viewed as the formation of a joint venture corporation by "A" and "B" having over $10 million in assets. Such a transaction would be covered by § 801.40, and "A" and "B" must file notification and observe the waiting period.

* * * * *

PART 802—EXEMPTION RULES

6. The authority citation for Part 802 continues to read as follows:

Authority: 15 U.S.C. 18a(d).

7. Revise § 802.2(g) to read as follows:

§ 802.2 Certain acquisitions of real property assets.

* * * * *

(g) *Agricultural property.* An acquisition of agricultural property and assets incidental to the ownership of such property shall be exempt from the requirements of the act. Agricultural property is real property that primarily generates revenues from the production of crops, fruits, vegetables, livestock, poultry, milk and eggs (activities within NAICS sector 11).

(1) Agricultural property does not include either:

(i) Processing facilities such as poultry and livestock slaughtering, processing and packing facilities; or

(ii) Any real property and assets either adjacent to or used in conjunction with processing facilities that are included in the acquisition.

(2) In an acquisition that includes agricultural property, the transfer of any assets that are not agricultural property or assets incidental to the ownership of such property (cash, prepaid taxes or insurance, rentals receivable and the like) shall be subject to the requirements of the act and these rules as if such assets were being transferred in a separate acquisition.

* * * * *

8. Amend § 802.6 by revising paragraph (b) and its Example to read as follows:

§ 802.6 Federal agency approval.

* * * * *

(b)(1) A mixed transaction is one that has some portion that is exempt under Section 7A (c)(6), (c)(7) or (c)(8) because it requires regulatory agency premerger competitive review and approval, and another portion that does not require such review.

(2) The portion of a mixed transaction that does not require advance competitive review and approval by a regulatory agency is subject to the act and these rules as if it were being acquired in a separate acquisition.

Example: Bank "A" acquires Bank "B", which owns a financial subsidiary engaged in securities underwriting. "A"'s acquisition of "B" requires agency approval by the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System or Federal Deposit Insurance Corporation (depending on whether "A" is a national bank, state member bank, or state non-member bank under section 18(c) of the FDI Act), and therefore is exempt from filing under Section 7A (c)(7). However, the acquisition of the financial subsidiary is subject to HSR reporting requirements, and "A" and "B" each must make a filing for that portion of the transaction and observe the waiting period if the act's thresholds are met.

9. Revise § 802.8(a) to read as follows:

§ 802.8 Certain supervisory acquisitions.

(a) A merger, consolidation, purchase of assets, or acquisition requiring agency approval under sections 403 or 408(e) of the National Housing Act, 12 U.S.C. 1726, 1730a(e), or under section 5 of the Home Owners' Loan Act of 1933, 12 U.S.C. 1464, shall be exempt from the requirements of the act, including specifically the filing requirement of Section 7A(c)(8), if the agency whose approval is required finds that approval of such merger, consolidation, purchase of assets, or acquisition is necessary to prevent the probable failure of one of the institutions involved.

* * * * *

10. Revise § 802.50 to read as follows:

§ 802.50 Acquisitions of foreign assets.

(a) The acquisition of assets located outside the United States shall be exempt from the requirements of the act unless the foreign assets the acquiring person would hold as a result of the acquisition generated sales in or into the U.S. exceeding $50 million during the acquired person's most recent fiscal year.

(b) Where the foreign assets being acquired exceed the threshold in paragraph (a) of this section, the acquisition nevertheless shall be exempt where:

(1) Both acquiring and acquired persons are foreign;

(2) The aggregate sales of the acquiring and acquired persons in or into the United States are less than $110 million in their respective most recent fiscal years;

(3) The aggregate total assets of the acquiring and acquired persons located in the United States (other than investment assets, voting or nonvoting securities of another person, and assets included pursuant to § 801.40(d)(2) of this chapter) are less than $110 million; and

(4) The transaction does not meet the criteria of Section 7A(a)(2)(A).

Example to §802.50:

1. Assume that "A" and "B" are both U.S. persons. "A" proposes selling to "B" a manufacturing plant located abroad. Sales in or into the United States attributable to the plant totaled $13 million in the most recent fiscal year. The transaction is exempt under this paragraph (a) of this section.

2. Sixty days after the transaction in example 1, "A" proposes to sell to "B" a second manufacturing plant located abroad; sales in or into the United States attributable to this plant totaled $38 million in the most recent fiscal year. Since "B" would be acquiring the second plant within 180 days

VOL 67 ISS 52 MR 18 2002 UMI

of the first plant, both plants would be considered assets of "A" held by "B" as a result of the second acquisition (see § 801.13(b)(2) of this chapter). Since the total sales in or into the United States exceed $50 million, the acquisition of the second plant would not be exempt under this paragraph (a) of this section.

3. Assume that "A" and "B" are foreign persons with aggregate sales in or into the United States of $200 million. If "A" acquires only foreign assets of "B," and if those assets generated $50 million or less in sales in or into the United States, the transaction is exempt.

4. Assume that "A" and "B" are foreign persons with aggregate sales in or into the United States and assets located in the United Sates of less than $100 million. If "A" acquires only foreign assets of "B", and those assets generated in excess of $50 million in sales in or into the United States during the most recent fiscal year, the transaction is exempt from reporting if the assets are valued at $200 million or less, but is reportable if valued at greater than $200 million.

11. Revise § 802.51 to read as follows:

§ 802.51 Acquisitions of voting securities of a foreign issuer.

(a) *By U.S. persons.* (1) The acquisition of voting securities of a foreign issuer by a U.S. person shall be exempt from the requirements of the act unless the issuer (including all entities controlled by the issuer) either: holds assets located in the United States (other than investment assets, voting or nonvoting securities of another person, and assets included pursuant to § 801.40(d)(2) of this chapter) having an aggregate total value of over $50 million; or made aggregate sales in or into the United States of over $50 million in its most recent fiscal year.

(2) If interests in multiple foreign issuers are being acquired from the same acquired person, the assets located in the United States and sales in or into the United States of all the issuers must be aggregated to determine whether either $50 million threshold is exceeded.

(b) *By foreign persons.* (1) The acquisition of voting securities of a foreign issuer by a foreign person shall be exempt from the requirements of the act unless the acquisition will confer control of the issuer and the issuer (including all entities controlled by the issuer) either: holds assets located in the United States (other than investment assets, voting or nonvoting securities of another person, and assets included pursuant to § 801.40(d)(2) of this chapter) having an aggregate total value of over $50 million; or made aggregate sales in or into the United States of over $50 million in its most recent fiscal year.

(2) If controlling interests in multiple foreign issuers are being acquired from the same acquired person, the assets located in the United States and sales in or into the United States of all the issuers must be aggregated to determine whether either $50 million threshold is exceeded.

(c) Where a foreign issuer whose securities are being acquired exceeds the threshold in paragraph (b)(1) of this section, the acquisition nevertheless shall be exempt where:

(1) Both acquiring and acquired persons are foreign;

(2) The aggregate sales of the acquiring and acquired persons in or into the United States are less than $110 million in their respective most recent fiscal years;

(3) The aggregate total assets of the acquiring and acquired persons located in the United States (other than investment assets, voting or nonvoting securities of another person, and assets included pursuant to § 801.40(d)(2) of this chapter) are less than $110 million; and

(4) The transaction does not meet the criteria of Section 7A(a)(2)(A).

Example to § 802.51 1. "A," a U.S. person, is to acquire the voting securities of C, a foreign issuer. C has no assets in the United States, but made aggregate sales into the United States of $77 million in the most recent fiscal year. The transaction is not exempt under this section.

2. Assume that "A" and "B" are foreign persons with aggregate sales in or into the United States of $200 million, and that "A" is acquiring 100% of the voting securities of "B." Included within "B" is U.S. issuer C, whose total U.S. assets are valued at $161 million. Since "A" will be acquiring control of an issuer, C, with total U.S. assets of more than $50 million, and the parties' aggregate sales in or into the U.S. in the relevant time period exceed $110 million, the acquisition is not exempt under this section.

3. "A," a foreign person, intends to acquire 100 percent of the voting securities of two wholly owned subsidiaries of "B" for a total of $65 million. BSUB1 is a foreign issuer with $10 million in sales into the U.S. in its most recent fiscal year and with assets of $10 million located in the U.S. $20 million of the acquisition price has been allocated to BSUB1. BSUB2 is a U.S. issuer with $60 million in U.S. sales and $60 million in assets located in the U.S. The remaining $45 million of the acquisition price is allocated to BSUB2. Since BSUB1 does not exceed the $50 million limitation for U.S. sales or assets in § 802.51(b), its voting securities are not held as a result of the acquisition (see § 801.15(b) of this chapter). Since the acquisition price for BSUB2 alone would not result in "A" holding in excess of $50 million of voting securities of the acquired person, the transaction is non-reportable in its entirety. Note that the U.S. sales and assets of BSUB1 are not aggregated with those of BSUB2 for purposes of determining whether the limitations in paragraph (b) of this section are exceeded. If BSUB2 were also a foreign issuer, such aggregation would be required under paragraph (b)(3) of this section, and the transaction in its entirety would be reportable.

12. Amend § 802.52 by revising the Example to read as follows:

§ 802.52 Acquisitions by or from foreign governmental agencies.

* * * * *

Example: The government of foreign country X has decided to sell assets of its wholly owned corporation, B, all of which are located in foreign country X. The buyer is "A," a U.S. person. Regardless of the aggregate sales in or into the United States attributable to the assets of B, the transaction is exempt under this section. (If such aggregate sales were $50 million or less, the transaction would also be exempt under § 802.50.)

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–P

FEDERAL TRADE COMMISSION

16 CFR Part 802

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission is amending the premerger notification rules, which require the parties to certain mergers or acquisitions to file reports with the Commission and with the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice and to wait a specified period of time before consummating such transactions, pursuant to section 7A of the Clayton Act. The filing and waiting period requirements enable these enforcement agencies to determine whether a proposed merger or acquisition may violate the antitrust laws if consummated and, when appropriate, to seek a preliminary injunction in federal court to prevent consummation. This rule amendment is necessary to address public comments regarding a previously published interim rule provision, and will increase the clarity and improve the effectiveness of the rule.

EFFECTIVE DATES: This final rule is effective on March 18, 2002 and will be applied retroactively to February 2, 2002, as explained in **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Marian R. Bruno, Assistant Director, Karen E. Berg, Attorney, or B. Michael Verne, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 303, Federal Trade Commission, 600 Pennsylvania Avenue, NW., Washington, DC 20580. Telephone: (202) 326–3100.

SUPPLEMENTARY INFORMATION: On February 1, 2001, the Commission published in the **Federal Register** and sought comment on Interim and Proposed Rules to amend the Hart-Scott-Rodino rules ("HSR rules") contained in 16 CFR parts 801, 802 and 803. *See* 66 FR 8679–8721. The Interim Rules took effect upon publication and implemented amendments to Section 7A of the Clayton Act enacted on December 21, 2000 ("2000 Amendments"). The Commission has decided that it needs more time to consider whether to make the Interim Rules final. A primary focus of this analysis is whether the Commission should make final the dollar-based reporting thresholds that were newly introduced by the Interim Rules. In light of the public comments, however, the Commission has determined to make final at this time an amendment to interim § 802.21(b), containing a transitional filing rule that was scheduled to expire on February 1, 2002, as explained below.

Background

Interim § 802.21 (Acquisitions of voting securities not meeting or exceeding greater notification threshold) contained paragraph (b), which addressed acquisitions of voting securities up to the next notification threshold by "transitional" filers, i.e., acquiring persons who filed using the 1978 notification thresholds and who have met or crossed the threshold for which they filed within a year of the waiting period's expiration, but whose five-year period for making additional acquisitions under § 802.21(a) had not expired as of February 1, 2001 (the effective date of the 2000 Amendments).

Section 802.21(b), as published in the Interim Rules, allowed these transitional filers until February 1, 2002 (one year from the effective date of the 2000 Amendments) to acquire up to what was the next reporting threshold at the time that they filed, and permitted them to do so without filing another notification, even though they might cross a new 2001 threshold. Thereafter, these acquiring persons, along with any other acquiring persons filing on or after February 1, 2001, were required to observe the 2001 thresholds contained in § 801.1(h). Interim § 802.21(b) was an effort to strike a balance between the reliance of transitional filers on rules that were in effect when they filed, and minimizing the agency's burden of administering two different sets of notification thresholds after February 1, 2001.

The Commission received five comments on this transition rule.[1] Comment 3 stated that any burden imposed on the Commission in maintaining two sets of thresholds is vastly outweighed by the burden on the parties who are required to prepare filings and pay additional filing fees, and the burden on the agencies in reviewing these additional filings, which were previously exempt for up to an additional four years. Comment 8 similarly claimed that the burden to the parties would outweigh the burden on the Commission and also expressed concern that the short notice prior to effecting the rule was unfair to parties who had filed recently with the good faith expectation that they would have five years to acquire additional securities. Comment 9 suggested that the transition rule remain unchanged, but that the full five-year period should be extended to acquisitions where a filing was made for an acquisition valued in excess of a 2001 threshold and the subsequent acquisition would not cross another 2001 threshold. For example, if "A" acquired $60 million of B's voting securities and filed indicating the $15 million notification threshold, "A" should be able to acquire up to $100 million of B's voting securities during the five-year period without a new filing. Comments 13 and 15 recommended elimination of the transition rule as an adjunct to restoring intermediate percentage notification thresholds.

The Commission agrees that any burden in administering two sets of notification thresholds for five years may well be outweighed by the burden to transitional filers. Therefore, the final rule restores to parties who filed prior to February 1, 2001, the full five-year period following expiration of the waiting period to acquire up to the next notification threshold that was in effect at the time of filing. With this modification, the change suggested by Comment 9 becomes unnecessary.

Administrative Procedure Act

The Commission has previously solicited public comment on this rule provision. Since the Commission believes that this final rule adequately addresses the commenters' concerns, the Commission finds that further public comment is unnecessary. *See* 5 U.S.C. 552(b)(3). Although the Commission believes this rule is strictly procedural in nature, to the extent, if any, that it is substantive, the Commission believes it grants or recognizes an exemption and relieves a restriction that would have taken effect upon expiration of the time period that was set forth in interim § 802.21(b). *See* 5 U.S.C. 553(b)(B). Accordingly, the Commission is adopting this rule as final and effective upon publication and will apply it retroactively to February 2, 2002, in order to ensure the continuity and clarity of the filing procedures that apply to transitional filers, as explained above.

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that the agency conduct an initial and final regulatory analysis of the anticipated economic impact of the proposed amendments on small businesses, except where the agency head certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605.

Because of the size of the transactions necessary to invoke a Hart-Scott-Rodino filing, the premerger notification rules rarely, if ever, affect small businesses. Further, this rule amendment does not expand the coverage of the premerger notification rules in a way that would affect small business. Accordingly, the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities. This document serves as the required notice of this certification to the Small Business Administration.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 ("PRA"), 44 U.S.C. 3501–3518, requires agencies to submit requirements for "collections of information" to the Office of Management and Budget ("OMB") and obtain clearance prior to instituting them. Such collections of information include reporting, recordkeeping, or disclosure requirements contained in regulations. The HSR premerger notification rules and Form contain information collection requirements as defined by the PRA that have been reviewed and approved by OMB under OMB Control No. 3084–0005. This final rule implements amendments to sction 7A of the Clayton Act, which reduces the burden of the premerger reporting

[1] Ford Motor Company (Bolerjack, Stephen D.) (Comments 3, 3/19/01); National Association of Manufacturers (NAM) (Comment 8, 3/29/01); O'Melveny and Myers (Beddow, David T.) (Comment 9, 3/19/01); Section of Antitrust Law of the American Bar Association (Comment 13, 3/19/01); Skadden, Arps, Slate, Meagher & Flom, LLP (Stoll, Neal R., Esq., et al.) (Comment 15, 3/19/01).

program by exempting all transactions valued at $50 million or less. Because this final rule does not affect the information collection requirements of the premerger notification program as implemented by the interim rules, it has not been resubmitted to OMB under the PRA for review.

List of Subjects in 16 CFR Part 802

Antitrust, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, the Federal Trade Commission amends 16 CFR part 802 as follows:

PART 802—EXEMPTION RULES

1. The authority citation for part 802 continues to read:

Authority: 15 U.S.C. 18a(d).

2. Amend § 802.21 by revising the text of paragraph (b) preceding the examples; by removing example 2; by redesignating examples 3 and 4 as examples 2 and 3 respectively; and by revising examples 1 and newly redesignated examples 2 and 3 to read as follows:

§ 802.21 Acquisitions of voting securities not meeting or exceeding greater notification threshold.

* * * * *

(b) *Year 2001 transition.* For transactions filed using the 1978 thresholds where the waiting period expired after February 1, 1996, an acquiring person may, during the five-year period following expiration of the waiting period, acquire up to what was the next percentage threshold at the time it made its filing without filing another notification, even if in doing so it crosses a 2001 notification threshold in § 801.1(h) of this chapter. However, after the end of that period, any additional acquisition will be the subject of a new notification if it meets or exceeds a 2001 threshold in § 801.1(h) of this chapter.

Examples: 1. Corporation A filed to acquire 20 percent of the voting securities of corporation B and indicated the 15 percent threshold. The waiting period expired on October 3, 1999. "A" acquired the 20 percent within the year following expiration of the waiting period. "A" has until October 3, 2004, to acquire additional securities up to 25 percent of "B"'s voting securities, and need not make another filing before doing so, even though such acquisition by "A" may cross the $50 million, $100 million or $500 million notification threshold in § 801.1(h) of this chapter. After October 3, 2004, "A" and "B" must observe the 2001 notification thresholds set forth in § 801.1(h) of this chapter.

2. Prior to February 1, 2001, "A" filed to acquire 12 percent of the voting securities of corporation B, valued at $120 million, and indicated the $15 million notification threshold. After February 1, 2001, "A" determines that it will make an additional acquisition which will result in its holding 16 percent of the voting securities of B, valued at $160 million. "A" is required to file notification at the $100 million notification threshold prior to making the acquisition since it is now crossing the next higher 1978 threshold (15 percent).

3. Prior to February 1, 2001, "A" filed to acquire 26 percent of the voting securities of "B" and indicated the 25 percent notification threshold. After the end of the five-year period following expiration of the waiting period, "A" will acquire additional shares of "B" which will result in its holding 30 percent of the voting securities of "B", valued at $125 million. "A" is required to file notification at the $100 million notification threshold prior to making the acquisition. "A" could, however, have reached this level (30 percent valued at $125 million) prior to the end of the five-year period without making an additional filing since it would not have crossed the next higher threshold at the time it filed (50 percent) and the acquisition would have been exempted by this § 802.21(b).

* * * * *

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 284

[Docket No. RM96–1–019; Order No. 587–N]

Standards for Business Practices of Interstate Natural Gas Pipelines

Issued March 11, 2002.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is amending its regulations governing standards for interstate pipeline business operations and communications to require that pipelines permit releasing shippers, as a condition of a capacity release, to recall released capacity and renominate such recalled capacity at each nomination opportunity. Recalls of released capacity will not be permitted to reduce (bump) already scheduled volumes for replacement shippers unless the replacement shippers are provided with at least one opportunity to rescheduled any bumped volumes, which is similar to the protection afforded interruptible shippers. This rule creates greater flexibility for firm capacity holders on interstate pipelines by synchronizing the Commission's regulation of recalled capacity with its standards for intra-day nominations. The rule also will enhance competition by freeing up capacity that otherwise would not be released and creating greater parity between scheduling of capacity release transactions and pipeline interruptible service.

DATES: 1. The rule becomes effective April 17, 2002.

2. Pipelines must make tariff filings by May 1, 2002, to become effective by July 1, 2002, to provide shippers with the ability to recall scheduled and unscheduled capacity at the Timely and Evening Nomination cycles and to recall unscheduled capacity at the two other standard nomination times.

3. Comments are to be filed by the North American Energy Standards Board and others by October 1, 2002, regarding standards for implementing partial day or flowing day recalls. Reply comments must be filed by October 15, 2002.

ADDRESSES: Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

[Docket No. RM96–1–019; Order No. 587–N]

Standards for Business Practices of Interstate Natural Gas Pipelines; Final Rule

Issued March 11, 2002.

1. The Federal Energy Regulatory Commission (Commission) is amending § 284.12(c)(1)(ii) of its open access regulations to require that interstate pipelines permit releasing shippers to recall released capacity and renominate that recalled capacity at any of the scheduling opportunities provided by interstate pipelines. Recalls of released capacity will not be permitted to reduce (bump) already scheduled volumes for replacement shippers unless the replacement shippers are provided with at least one opportunity to rescheduled any bumped volumes, which is similar to the protection afforded interruptible shippers. This rule creates greater flexibility for firm capacity holders on interstate pipelines by synchronizing the Commission's regulation of recalled capacity with its standards for intra-day nominations. The rule also will enhance competition by freeing up capacity that otherwise would not be released and creating greater parity between scheduling of capacity release transactions and pipeline interruptible service.

2. Background

3. In Order No. 636, the Commission adopted regulations permitting shippers (releasing shippers) to release their capacity to other shippers (replacement shippers).[1] Under these regulations, releasing shippers were permitted to "release their capacity in whole or in part, on a permanent or short-term basis, without restriction on the terms and conditions of the release."[2] The regulation permits releasing shippers to impose terms for a release transaction under which the releasing shipper reserves the right to recall that capacity to use the capacity itself. As an example, a shipper might include a recall condition in the event that temperature drops below a pre-determined level.[3]

4. In July 1996, in Order No. 587,[4] the Commission incorporated by reference consensus standards approved by the Gas Industry Standards Board (now the North American Energy Standards Board (NAESB))[5] designed to standardize business practices and communication protocols of interstate pipelines in order to create a more integrated and efficient pipeline grid. NAESB is a private, consensus standards developer whose wholesale natural gas standards are developed by representatives from all segments of the natural gas industry.

5. One aspect of NAESB's standards adopted in Order No. 587 covered capacity release transactions. Of relevance here, two standards, 5.3.6 and 5.3.7, apply to recalls of capacity release transactions.

Standard 5.3.6: If the releasing shipper wishes to recall capacity to be effective for a gas day, the notice should be provided to the transportation service provider and the acquiring shipper no later than 8 a.m. Central Clock Time on nomination day.[6]

Standard 5.3.7: There should be no partial day recalls of capacity. Transportation service providers should support the function of reputting by releasing shippers.[7]

In this context, a partial day recall (also referred to as a flowing gas recalls)[8] refers to a recall condition that applies only to part of gas day, rather than the full gas day.[9]

6. In 1996, when NAESB first adopted these standards, NAESB's standards provided for one nomination, at 11:30 a.m. CCT[10] for the next gas day and only one intra-day nomination at an indeterminate time. In order to create a more standardized intra-day nomination schedule,[11] NAESB amended its standards to provide for three standardized intra-day nomination opportunities: an Evening nomination at 6 p.m. CCT to take effect at 9 a.m. CCT the next gas day, an Intra-Day 1 nomination at 10 a.m. CCT to take effect at 5 p.m. CCT on the same gas day, and an Intra-Day 2 nomination at 5 p.m. CCT to take effect at 9 p.m. CCT on the same gas day.[12]

	Nomination deadline	Effective time
Timely Nomination	11:30 a.m	9 a.m. next gas day.
Evening Nomination	6 p.m	9 a.m. next gas day.
Intra-Day 1	10 a.m	5 p.m. same gas day.
Intra-Day 2	5 p.m	9 p.m. same gas day.

[3] Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation Under Part 284 of the Commission's Regulations, Order No. 636, 57 FR 13267 (Apr. 16, 1992), FERC Stats. & Regs. Regulations Preambles [Jan. 1991–June 1996] ¶ 30,939, at 30,418 (Apr. 8, 1992).

[4] Standards For Business Practices Of Interstate Natural Gas Pipelines, Order No. 587, 61 FR 39053 (Jul. 26, 1996), FERC Stats. & Regs. Regulations Preambles [July 1996–December 2000] ¶ 31,038 (Jul. 17, 1996).

[5] The Commission is revising § 284.12 to reflect the name change. The Commission finds good cause for making such a change without notice and comment since the change is purely administrative. *See* 5 U.S.C. § 553(b)(A)&(B).

[6] 18 CFR 284.12(b)(1)(v) (2001), Capacity Release Related Standard 5.3.6.

[7] 18 CFR 284.12(b)(1)(v) (2001), Capacity Release Related Standard 5.3.7.

[8] Gulf South, in its comments, contends that the term "partial day recall" is somewhat of a misnomer, and that the more apt term is "flowing day recall." It states that the term partial day recall suggests the recall is for a specified portion of gas day when, in fact, the standard refers only to whether the recall occurs after gas has begun to flow. In this rule, the terms "partial day recall" and "flowing day recall" are used interchangeably to refer to recalls occurring during a gas day after gas has begun to flow, not to recalls between specified times.

[9] Under the NAESB standards, a gas day runs from 9 a.m. central clock time (CCT) on Day 1 to 9 a.m. CCT the next day (Day 2). 18 CFR 284.12(b)(1)(i), Nominations Related Standards 1.3.1.

[10] CCT refers to Central Clock Time, which includes an adjustment for day light savings time. *See* 18 CFR § 284.12(b)(1)(i), Nominations Related Standards 1.3.1.

UMI

NAESB, however, has not amended its capacity release recall standards to take into account its adoption of these standardized intra-day nomination opportunities.

7. In Order No. 637, the Commission adopted § 284.12(c)(1)(ii) of its regulations which requires interstate pipelines to "permit shippers acquiring released capacity to submit a nomination at the earliest available nomination opportunity after the acquisition of capacity." [13] The purpose of this regulatory change was to permit capacity release transactions to take place on an intra-day basis so that released capacity can compete with pipeline capacity on a comparable basis.[14] The adoption of § 284.12(c)(1)(ii) permits shippers to acquire released capacity and nominate using that capacity at any of the four intra-day nomination opportunities.[15]

8. On February 1, 2001, NAESB filed a report with the Commission, in Docket No. RM98–10–000, concerning its development of standards regarding partial day recalls of capacity. According to NAESB, some members believed that partial day recalls fell within the purview of the scheduling equality requirements of Order No. 637, while others did not. Some members, NAESB asserts, believed that partial day recalls are a valid business practice, irrespective of whether this practice is required by Order No. 637. Due to these disagreements, NAESB reports it has been unable to reach consensus on how to proceed.

9. On March 16, 2001, AGA filed a "Reply to February 1, 2001, Gas Industry Standards Board Report and Petition for Clarification and Directive from FERC Regarding Requirement for Capacity Release Scheduling Equality." AGA argued that the Commission should require pipelines to allow partial day recalls as part of their compliance with § 284.12(c)(1)(ii).

10. On October 12, 2001, the Commission issued a Notice of Proposed Rulemaking (NOPR) [16] proposing to require pipelines to afford releasing shippers enhanced ability to recall released capacity by permitting them to use partial day recalls at any of the four nomination opportunities established by the NAESB standards.

11. Comments

12. Twenty-eight comments on the NOPR were filed.[17] The comments can roughly be divided into three categories: those that supported the proposal, those that either supported or did not object to the proposal, but sought clarifications principally regarding implementation details, and those opposing the proposal. The majority of comments support the proposal.[18] They contend it would provide greater flexibility to releasing shippers, enhance competition by freeing up capacity that otherwise would not be released, and better accommodate retail unbundling programs at the state level.[19] The local distribution companies (LDCs) maintain that under state unbundling mechanisms, they are frequently the suppliers of last resort and, therefore, need to recall capacity in the event marketers fail to deliver.

13. Those opposing the proposal [20] contend it would decrease the reliability of the pipeline grid by reducing (bumping) volumes of already scheduled gas and thereby reduce liquidity. They maintain that partial day recalls will reduce reliability because bumping a replacement shipper's scheduled volumes may affect scheduling on a number of pipelines, and bumped replacement shippers will be forced to try and reschedule their gas. Those opposing the proposal also are concerned partial day recalls will reduce the value of released capacity and create less competition between pipeline firm capacity and capacity release. NiSource maintains that partial day recalls may decrease reliability for LDCs that permit marketers (using other LDCs' released capacity) to bring capacity to their city-gates by permitting a diversion of gas from one LDC market to another.

14. A number of comments raise operational issues relating principally to partial or flowing day recalls occurring during the gas day after capacity has begun to flow. These include: the need for advance notice to pipelines and replacement shippers of capacity to be recalled, and whether the pipeline or releasing shipper should provide the notice; [21] allocating capacity as well as imbalances and penalties between releasing and replacement shippers when recalls take place during the gas day; [22] and ensuring that total volumes delivered do not exceed original contract MDQ.[23] Some comments suggest the Commission convene a technical conference to address these issues.[24]

15. Discussion

16. Overview

17. The Commission is revising § 284.12(c)(1)(ii) of its regulations to require pipelines to permit recalls of capacity at each nomination opportunity. Specifically, the Commission is requiring pipelines to permit releasing shippers, as a condition of a capacity release, to recall released capacity and renominate such recalled capacity at each nomination opportunity according to the notice and bumping provisions applicable to interruptible shippers.[25] Recalls of

[13] 18 CFR 284.12(c)(1)(ii) (2001).

[14] Regulation of Short-Term Natural Gas Transportation Services, Order No. 637, 65 FR 10156, 101–58–60 (Feb. 25, 2000), FERC Stats. & Regs. Regulations Preambles [July 1996–December 2000] ¶ 31,091, at 31,297 (Feb. 9, 2000).

[15] Prior to Order No. 637, NAESB's capacity release nomination standards had not been amended to reflect the intra-day nomination standards. Thus, prior to Order No. 637, a replacement shipper acquiring released capacity had to acquire the capacity and notify the pipeline by 9 a.m. CCT in order to nominate at the Timely Nomination cycle (11:30 a.m. CCT) for the next gas day and could not make use of any intra-day nomination opportunities for the current gas day. With the changes made in § 284.12(c)(1)(ii), shippers will be able to acquire released capacity and submit a nomination at each intra-day nomination opportunity.

[16] Standards For Business Practices Of Interstate Natural Gas Pipelines, 66 FR 53134 (Oct. 19, 2001), IV FERC Stats. & Regs. Proposed Regulations ¶ 32,556 (Oct. 12, 2001).

[17] The commenters and the abbreviations used in this order are listed on the Appendix.

[18] *E.g.*, AGA, APGA, APS/PWEC, Con Edison, Dominion LDCs, ENA, Kentucky, Keyspan, MLGW, PSCNY, PA OCA, Xcel.

[19] Xcel provides a succinct summary of the position:

The proposed rules would provide firm capacity holders, including the Xcel Energy utility operating companies, with increased flexibility in structuring capacity release transactions to best fit their business needs. The Xcel Energy utility operating companies could benefit from the potential increase in value of non-recallable capacity release and from the greater flexibility when a recall is necessary.

Comment at 2.

[20] *E.g.*, DETM, Dynegy, EIP, EPSA, NGSA, NiSource, Williston.

[21] See Comments by Algonquin/Texas Eastern; Dominion; Dynegy; ENA; Gulf South; INGAA; Kinder-Morgan; NiSource; Williston; Industrials.

[22] See Comments by Algonquin/Texas Eastern; Dynegy; Gulf South; ENA; INGAA; Kinder-Morgan; NiSource; Williston. As an example, a replacement shipper with capacity of 2400 Dth/day could nominate the entire 2400 Dth for the full gas day, but take 1200 Dth in the first five hours of the day, leaving only 1200 Dth remaining for the remainder of the gas day. If a releasing shipper sought to recall the full 2400 Dth at the Intra-Day 1 cycle taking, which would take effect at 5 p.m., the issue raised by the comments are how to allocate the 2400 Dth between the releasing and replacement shippers and how to determine imbalances and potential penalties. Williston also raises the issue of how to perform such an allocation when there are multiple capacity releases: e.g., a releasing shipper releases capacity to a single replacement shipper who re-releases that capacity to three other replacement shippers. If the initial releasing shipper recalls, the capacity, Williston requests clarification as to how the remaining daily quantity should be allocated among the three final replacement shippers.

[23] Williston.

[24] Comments by EPPG; ENA.

[25] The Commission is rescinding the incorporation by reference of NAESB standard 5.3.6 (which requires notice of capacity release recalls by 8 a.m. CCT) and the first sentence of NAESB Standard 5.3.7 (which prohibits partial day recalls of capacity). The Commission is retaining the portion of Standard 5.3.7 that requires transportation service providers to "support the function of reputting by releasing shippers." Reputting refers to the ability of a releasing shipper to include a condition in a release under which it can recall capacity when needed and, after the recall has ended, the capacity will revert (be reputted) to the replacement shipper, without the need for a new release.

[26] The use of partial day recall rights is voluntary. As with any other recall condition, releasing shippers are free to offer their capacity without partial day recall rights. Whether partial day recall rights are permitted depends on the terms of the releasing shipper's offer.

released capacity will not be permitted to reduce (bump) already scheduled volumes for replacement shippers unless the replacement shippers are provided with at least one opportunity to reschedule any bumped volumes.[26]

18. The regulations adopted in this rule will be implemented in two phases. This two-phase approach will ensure an expeditious implementation of partial day recalls for recalls that do not raise the operational details addressed in the comments, while at the same time providing time for NAESB to further consider standards to address the operational issues raised. By May 1, 2002, each pipeline will be required to make a compliance filing, to be effective July 1, 2002, that will permit shippers to recall capacity at both the Timely Nomination cycle and the Evening Nomination Cycle and to recall capacity at any nomination time if the capacity has not been previously scheduled by the replacement shipper. To ease the compliance and review process, the Commission is establishing a standard tariff provision providing a notification schedule for these recalls.

19. Second, the Commission will provide NAESB six months in which to develop standards to apply to the operational details involved in allowing partial or flowing day recalls. NAESB should file a report with the Commission by October 1, 2002, detailing the standards it has adopted (or those it has considered) and all other material relevant to its consideration of such standards. Other industry members can also submit comments by October 1, 2002, and will have an additional 15 days from the filing of the NAESB information to file additional comments on the NAESB report. Upon the receipt of these comments, the Commission will issue a further order regarding implementation of Intra-Day 1 recalls.

20. Regulatory Changes

21. The regulations adopted in this rule will ensure consistency with the original intent of the Commission's capacity release regulations by providing releasing shippers with the flexibility to structure capacity release transactions that best fit their business needs, by providing greater incentives for releasing shippers to release capacity, and by fostering greater competition for pipeline capacity by creating parity between scheduling of capacity release transactions and pipeline interruptible service. At the same time, the regulations will afford replacement shippers whose capacity is recalled the same advance notice and protection from bumping as provided to interruptible shippers under the Commission's regulations.

22. In Order No. 636, the Commission established the capacity release mechanism to create competition with pipeline firm and interruptible transportation. [27] One of the fundamental tenets of the Commission's capacity release regulations is that releasing shippers have the opportunity to establish any recall conditions for their capacity.

23. When NAESB first considered recall standards, it established one notification time for all recalls (8 a.m. CCT) and did not permit partial or flowing day recalls. When NAESB adopted this standard, however, the standards provided for only one nomination a day, at 11:30 a.m. CCT and a single non-standardized intra-day nomination. But the circumstances under which the recall standards were developed have markedly changed as the number of nomination opportunities have now expanded to four nomination opportunities. At the same time, it is apparent from the comments in this rulemaking that the consensus supporting NAESB's existing recall standards no longer exists, and NAESB itself has recognized that it can no longer make progress in resolving this issue. Although the Commission places great reliance on NAESB's development of consensus standards,[28] the Commission has found it necessary to resolve disputes between industry segments when NAESB has been unable to reach consensus on issues concerning Commission policy, so that the standards development process can proceed in line with Commission policies.[29] In these circumstances (where consensus no longer exists on recall standards), the Commission must resolve the policy issue over whether to permit greater recall flexibility.

24. An examination of both past and current Commission policy supports allowing releasing shippers to recall capacity more frequently than currently permitted under NAESB's standards.

25. The Commission's general policy adopted in Order No. 636 would permit more extensive recall rights than those permitted by the NAESB standards. Section 284.8(b) of the Commission's regulations (adopted in Order No. 636) expressly permits shippers to "release their capacity in whole or in part, on a permanent or short-term basis, *without restriction on the terms and conditions of the release.*" [30] In Order No. 636–A, the Commission recognized that "a releasing shipper may include terms and conditions, such as recall rights, that will ensure it has adequate peak day capacity." [31] In *Texas Eastern Transmission Corporation*, for example, the Commission rejected a pipeline's proposed restriction on recall rights, stating "any provision relating to recall rights must not operate to impede the ability of releasing shippers to employ recall provisions as terms and conditions of their releases."[32] Thus, all recall conditions, including partial day recalls are consistent with the Commission's regulations.

26. Moreover, in Order No. 637, the Commission sought to create greater scheduling parity between capacity release transactions and pipeline services by enabling capacity release transactions to take place on an intra-day basis at each of the four scheduling opportunities.[33] While this regulatory change will enable shippers to release capacity at any nomination opportunity, the existing NAESB recall standards do not permit releasing shippers to take full advantage of the intra-day nomination opportunities by recalling the capacity and renominating that capacity at each of the four scheduling opportunities. Allowing partial day recalls is, therefore, consistent with the overall regulatory changes promulgated in Order Nos. 636 and 637.

[27] Order No. 636–A, 57 FR 36128 (Aug. 12, 1992), FERC Stats. & Regs. Regulations Preambles [Jan. 1991–June 1996] ¶ 30,950, at 30,556 (Aug. 3, 1992) ("competition between pipeline capacity and released capacity helps ensure that customers pay only the competitive price for the available capacity").

[28] Order No. 587, 61 FR at 39057 (Jul. 26, 1996), FERC Stats. & Regs. Regulations Preambles [July 1996–December 2000] ¶ 31,038, at 30,059.

VOL 67 ISS 52 MR 18 2002 UMI

27. Policy considerations further support enhanced recall rights. Permitting enhanced recall rights will provide firm shippers with added flexibility and will better enable releasing shippers to offer released capacity that competes with the pipelines' interruptible service. The current NAESB standards inhibit the ability of shippers to release capacity because releasing shippers cannot quickly reclaim capacity when they require it for their own use. For example, under the current NAESB standards, in order to recall capacity for the next gas day, a shipper must notify the pipeline by 8 a.m. the day before the recall can take effect and cannot use partial or flowing day recalls. By establishing an 8 a.m. deadline for recall notifications, the standard effectively precludes a releasing shipper from recalling capacity at the Evening Nomination cycle. In fact, a shipper that misses the 8:00 a.m. CCT recall notification time will miss four nomination opportunities and will be unable to have its volume flow until 48 hours after it submits the recall notification.[34]

28. As a result of such lengthy delays, releasing shippers may not be able to use their recall rights as effectively as possible to ensure that they can retain adequate peak day capacity for their own needs. The delay in rescheduling recalled capacity also can have an adverse competitive impact on the market by reducing the amount of capacity available for release. As AGA points out, if an LDC is a provider of last resort under a state unbundling initiative and is given notice that insufficient supply is being delivered to its city-gate, the LDC will need to recall released capacity for later in the same day or, at least, for the next day. Without the ability to recall capacity more frequently, a releasing shipper with supplier-of-last-resort obligations will be reluctant to release capacity at all since it will not be able to recall that capacity when it is needed. In that event, replacement shippers will have less capacity from which to choose and will have fewer alternatives to purchasing pipeline interruptible service.

29. Replacement shippers benefit from having a more open and competitive capacity market, with more capacity available to compete with pipeline interruptible transportation. As APS/PWEC states, "as a captive shipper on a fully subscribed pipeline, APS/PWEC supports any initiative that would free up excess capacity (even in the short run)."[35] Replacement shippers will not be required to purchase released capacity with partial day recalls, but will be able to choose the capacity with terms that best fits their needs. Releasing shippers will be able to release capacity without a partial day recall condition and will have an incentive to do so, because a release not subject to recall will be more valuable (and higher priced) than a release subject to recall. Replacement shippers will know the terms of releases upfront and can determine whether to purchase recallable capacity or seek more reliable capacity, and can take the recall conditions into account in determining how much the capacity is worth.

30. Under the regulations adopted in this rule, the releasing shipper will be able to recall unscheduled capacity at any of the four nomination cycles and can recall scheduled capacity so long as the replacement shipper has an opportunity to reschedule its gas. The replacement shipper will receive protection against loss of service similar to that interruptible shippers currently receive.

31. In Order No. 587–G, the Commission adopted a regulation stating that when an interruptible shipper's volumes are to be reduced as a result of a nomination by a firm shipper, the interruptible shipper must be provided with advanced notice of such reduction and must be notified whether penalties will apply on the day its volumes are reduced.[36] The Commission further determined that interruptible shippers could be bumped by firm intra-day nominations at the first three nomination opportunities, but could not be bumped at the third intra-day nomination opportunity (5 p.m. CCT) since they would not have an opportunity to reschedule their gas for that gas day. The Commission provided this protection against bumping to provide stability in the nomination system, so that shippers can be confident by late afternoon that they will receive their scheduled flows.[37]

32. This rationale applies equally to replacement shippers, which, under the regulations adopted in this rule, must be given advance notification of any recall and cannot have scheduled volumes reduced unless they have been given an opportunity to reschedule their gas. In addition, the Commission required pipelines to waive certain non-critical penalties for bumped interruptible shippers, and the same penalty waiver will be applied to bumped replacement shippers.[38]

33. The Commission recognizes that implementation of recalls at the Intra-Day 1 and 2 cycles can affect flowing gas and, as the comments point out, result in the need to allocate daily nominations (and potentially penalties) between releasing and replacement shippers. But these issues are not insurmountable and should not prevent implementation of partial day recalls. Some pipelines already have implemented partial day recalls on their systems.[39] Rather than having pipelines implement partial day recalls based on their own distinct processes for handling allocation and other operational issues, the Commission is providing an opportunity for NAESB to reach consensus on a set of standards that can be applied to all partial day recalls. Therefore, the Commission will postpone implementation of partial or flowing day recalls of scheduled gas at the Intra-Day 1 and Intra-Day 2 cycles, and provide NAESB with six months to develop standards governing recalls at these cycles that affect flowing gas. At the end of this period, NAESB should file with the Commission the standards it has developed or, if it is unable to reach consensus, a report outlining the standards considered, the voting records with regard to these standards, and the reasons for its inability to reach consensus. Other industry members can also submit comments and will have an additional 15 days from the filing of the NAESB information to file additional comments on the NAESB report. Since NAESB has already been working on the partial day recall issue, six months should provide a sufficient time period for developing standards. Once the Commission receives the report from NAESB and the comments, it will issue an order establishing the requirements for partial day recalls.

34. The Commission, however, sees no reason for delaying implementation of partial day recalls for the Evening Cycle and for recalls of unscheduled capacity. Recalls in these situations will not present allocation or other operational difficulties for the pipelines. Such recalls do not affect flowing volumes and, therefore, do not result in the need to allocate daily gas supplies between releasing and replacement shippers. In order to provide shippers more flexibility in their use of capacity, the Commission will require pipelines by May 1, 2002, to file tariff sheets, as discussed below, to implement partial day recalls for the Evening Cycle and for unscheduled capacity. These tariff sheets are to become effective by July 1, 2002.

[34] A releasing shipper that misses the 8 a.m. CCT notification time cannot renominate that capacity until 11:30 a.m. CCT the next day, a nomination under which gas will not flow until 9:00 a.m. CCT the day after.

[39] Dominion Transmission, Inc., 95 FERC ¶ 61,316, at 62,080 (2001); National Fuel Gas Supply Corporation, 96 FERC ¶ 61,182, at 61,804 (2001).

35. Schedule for Implementation of Recalls for Evening Nomination Cycle and Unscheduled Capacity

36. The NOPR proposed that no advance notice of recalls would be provided, so that the recall and a renomination of the releasing shipper would be provided at each of the standard nomination cycles. For example, under the proposal in the NOPR, the releasing shipper would notify the pipeline at 6 p.m. CCT (Evening Nomination) that capacity is being recalled and would simultaneously submit a nomination at the same time. The replacement shipper would not be notified of the bump, under this proposal, until the deadline for reporting of scheduled volumes (10 p.m. CCT).

37. A number of comments, however, maintain that recall notices and nominations should not be simultaneous and that pipelines and replacement shippers need advance notice of recalls. Whether to establish an advance notification requirement for recalls, and how that notice should be provided, are issues NAESB needs to consider during its deliberations. The treatment of advance notification can determine whether recalls at the Intra-Day 2 cycle can bump scheduled volumes. If NAESB provides for advance notice of recalls to pipelines and replacement shippers, releasing shippers could be permitted to bump scheduled gas at the Intra-Day 2 cycle, since replacement shippers will have sufficient advance notice to reschedule bumped gas at the Intra-Day 2 cycle.[40] On the other hand, if advance notice is not provided, then, under this rule, recalls would not be permitted at the Intra-Day 2 cycle since the replacement shipper would not have an opportunity to reschedule its gas.

38. Since the Commission is implementing recalls of scheduled gas at the Evening Nomination cycle and recalls of unscheduled gas at the Intra-Day 1 and Intra-Day 2 cycles, pipelines will need to implement an interim schedule for implementing recalls for these cycles. In order to assure expeditious compliance with these requirements, the Commission is establishing, as discussed below, an interim timeline for recalls and will require each pipeline to include standard tariff language in its tariff providing for such recalls.

39. The fundamental precept of the interim schedule being adopted by the Commission is that releasing shippers must be provided with sufficient time after receipt of scheduled quantities to inform the pipeline of a recall. Releasing shippers, such as LDCs, need to be aware of the scheduled volumes for their systems prior to determining whether they will need to recall capacity. Thus, the advance notification period should give releasing shippers the time to evaluate the scheduled quantities information before having to submit the recall notice.[41] Further, although the Commission is not convinced that the existing 3 ½ hour advance notice requirement for the Timely Nomination cycle[42] is necessary, the Commission will permit pipelines to continue to use this notification period for notification of recalls for the Timely Nomination cycle while NAESB considers the schedule for recalls.

40. Based on these precepts, the Commission is establishing the following interim schedule for notification to pipelines and replacement shippers of recalls of capacity at the Evening Nomination cycle and for recalls of unscheduled capacity.

Nomination cycle (all times in CCT)	Receipt of scheduled volumes (from prior nomination cycle)	Recall notification to pipeline	Pipeline notification to replacement shipper of recall	Nomination time (same day)
Timely	NA	8 a.m	9 a.m	11:30 a.m.
Evening	4:30 p.m. same day	5 p.m	6 p.m	6 p.m.
Intra-Day 1	10 p.m. CCT prior day	8 a.m	9 a.m	10 a.m.
Intra-Day 2	2 p.m. same day	3 p.m	4 p.m	5 p.m.

41. To ease the compliance and review burden on both pipelines and shippers, each pipeline is required to file standard tariff language to implement such recalls stating the following:

Releasing shippers may, to the extent permitted as a condition of the capacity release, recall released capacity (scheduled or unscheduled) at the Timely Nomination cycle and the Evening Nomination cycle, and recall unscheduled released capacity at the Intra-Day 1 and Intra-Day 2 Nomination cycles by providing notice to the Transporter by the following times for each cycle: 8 a.m. CCT for the Timely Nomination cycle; 5:00 p.m. CCT for the Evening Nomination Cycle; 8 a.m. CCT for the Intra-Day 1 Nomination cycle, and 3:00 p.m. for the Intra-Day 2 Nomination cycle. Notification to replacement shippers provided by Transporter within one hour of receipt of recall notification.

The Commission will revisit this schedule after NAESB has had an opportunity to develop standardized timelines for partial day recalls.

42. The Commission will address below those comments opposing or suggesting changes in the regulation or requesting clarification. Comments addressing procedural issues will not be addressed since NAESB will be considering those issues.

[40] If advance notice of recalls is provided, the bumping rules for recalled capacity may not need to be identical to those for interruptible shippers. Interruptible shippers cannot be bumped at the Intra-Day 2 cycle because, under current NAESB standards, they are not provided with advance notice of the bump and so cannot renominate at the Intra-Day 2 cycle. 18 CFR 284.12(b)(1)(1), Nominations Related Standards 1.3.2 (Intra-Day 2 nomination is received at 5 p.m. CCT with no advance notice to interruptible shippers of volumes to be bumped). In contrast, if advance notice of recalls is provided to replacement shippers, their scheduled capacity can be recalled at the Intra-Day 2 cycle because the replacement shipper will have sufficient notice to renominate at the Intra-Day 2 cycle.

[41] For example, under the Timely Nomination cycle, scheduled volumes are provided at 4:30 p.m. Releasing shippers need sufficient time to evaluate this information before determining whether to recall capacity for the 6 p.m. Evening Nomination cycle.

[42] Capacity Release Related Standards 5.3.6 (notice must be given by 8 a.m. CCT for recall effective at the 11:30 a.m. Timely Nomination cycle).

43. Comments on Adoption of Partial Day Recall Requirement

44. Those opposing adoption of a regulation permitting partial day recalls contend that permitting any partial day recalls will operate to diminish the attractiveness of released capacity, and will, therefore, result in limiting competition between pipeline firm and released capacity. They further maintain that allowing partial day recalls will be harmful to replacement shippers, because replacement shippers will be unable to reschedule gas bumped by the partial day recall. DETM contends that, for better or worse, all gas transactions occur for a full gas day, and that this will create difficulties for replacement shippers trying to reschedule gas subject to partial day recalls. DETM further maintains that no data supports the proposition that the availability of partial day recalls will have any measurable impact on the availability of released capacity.

45. Since Order No. 636, the Commission's regulation of released capacity has proceeded from the presumption that the best way to improve access to capacity is to provide both releasing and replacement shippers as much flexibility as possible in structuring their capacity release transactions. In Order No. 637, for instance, the Commission required pipelines to permit releasing and replacement shippers to consummate capacity release transactions at each of the four intra-day nomination opportunities to ensure that replacement shippers could obtain capacity when they need it.[43] Similarly, allowing partial day recalls will provide releasing shippers with similar flexibility to structure capacity releases that fit their requirements. Indeed, as the gas market has been developing, shippers want more flexibility, not less, to adjust nominations on an intra-day basis.[44] Allowing partial day recalls is a step towards the Commission's, as well as the industry's, goal of providing shippers with enhanced scheduling opportunities so that they can adjust their gas nominations to accord with their market needs.[45]

46. Moreover, it is not clear that prohibiting partial day recalls would benefit replacement shippers in the long run. DETM and Dynegy appear to be assuming that without partial day recalls, firm shippers will release the same amount of capacity on a full day's basis as they would if partial day recalls are available. However, many of the comments point out that firm shippers that need capacity on short notice are reluctant to release their capacity at all if they are unable to recall that capacity in the event of changed circumstances, such as dropping temperatures or the failure of a marketer to deliver gas.[46] According to the comments, this is particularly true for LDCs with supplier-of-last-resort obligations that need to be able to recall capacity quickly if marketers fail to provide gas to the LDCs city-gate.[47] Allowing partial day recalls will remove this disincentive to release capacity, thereby making incremental capacity available and benefitting replacement shippers by providing them with more options, particularly on fully subscribed pipelines.[48]

47. Dynegy, DETM, and EPSA further assert that allowing partial day recalls may make capacity releases subject to such recalls less valuable to replacement shippers. In the first place, as noted above, the commenters are assuming such capacity will be available for release if partial day recall rights were not available to the releasing shipper, an assumption that other comments show is not necessarily correct. Released capacity available subject to partial day recall is certainly more valuable to replacement shippers than not having that capacity available at all.

48. Moreover, if replacement shippers find that released capacity with partial day recalls is too unreliable, they need not purchase that released capacity and can negotiate with the releasing shippers for conditions providing more reliable service. Under the regulations adopted here, releasing shippers are not required to include partial day recalls in their releases. Releasing shippers can release capacity on a full day basis (not subject to partial day recalls) and will have an incentive to do so, because a full day release will be more valuable (and higher priced) than a partial day recall release. The replacement shippers will know the terms of releases upfront and can determine whether to purchase that capacity, negotiate other terms with the releasing shipper, or seek more reliable capacity, and can take the recall conditions into account in determining how much the capacity is worth. In a fully functioning market, buyers and sellers negotiate over the terms of their deals so that the price and other components reflect terms that are mutually agreeable to both parties. Imposing artificial regulatory limits on the negotiating position of one party to the transaction, as proposed by those opposing partial day recalls, is the antithesis of fully functioning markets, and can only create a less efficient marketplace.

49. DETM and Dynegy also contend that permitting partial day recalls will reduce the reliability of the pipeline grid because replacement shippers are subject to losing their capacity and may be unable to reschedule capacity. These arguments are reminiscent of the arguments made in 1998 against allowing firm intra-day nominations to bump interruptible transportation on the grounds that interruptible shippers would have difficulty rescheduling their gas.[49] In that case, the Commission rejected such claims, finding that:

> Firm shippers are paying reservation charges for priority rights and those rights should include the right to have a nomination become effective as early as possible on the gas day following the nomination. Interruptible shippers voluntarily take the risk that their service will be interrupted and while they are entitled to advance notice of such interruption, they should not be able to prevent firm shippers from having their nominations take effect at the earliest possible time. Gas flows on the interstate grid 24-hours a day, and is consumed throughout the day, so interruptible shippers need to be prepared to adjust gas volumes even during non-business hours.[50]

50. In this instance, firm shippers paying reservation charges should similarly have the ability to control the use of their capacity by employing partial day recalls. Shippers purchasing released capacity subject to partial day recalls, like those purchasing interruptible transportation, are taking the risk that their scheduled quantities may be disrupted. As gas markets continue to develop, such adjustments will be increasingly necessary to provide those shippers holding firm capacity with the utmost flexibility in their use of the capacity for which they pay.

51. Moreover, like interruptible shippers, replacement shippers are protected, because bumping of scheduled volumes is only permitted if the replacement shipper has at least one opportunity to reschedule its gas. Replacement shippers also have tools available, such as pooling, gas package identifiers, and ranking, that they can use to manage their gas supplies in the event of a bump.[51]

52. WDG maintains that the Commission should not exempt the Intra-Day 2 nomination from a partial day recall. It argues that the replacement shippers have fair notice that their capacity is recallable, and therefore are not prejudiced by having a recall at the Intra-Day 2 cycle.

53. The regulation adopted in this rule does not prohibit all recalls at the Intra-Day 2 cycle. Recalls of unscheduled capacity can be made at the Intra-Day 2 cycle. As discussed earlier, NAESB is to consider establishing a notification schedule by which pipelines and replacement shippers are to be notified of recalls. Bumping at the Intra-Day 2 cycle may be permitted depending on whether the replacement shipper is given sufficient time to renominate any bumped gas at the Intra-Day 2 cycle.

54. DETM maintains that the partial day recall issue is not a policy dispute, but a business issue that should be left to NAESB to resolve. It argues that the Commission has historically deferred to the determinations of NAESB on business issues and, therefore, should not overturn the business decision by NAESB to prohibit partial day recalls.

55. The dispute here is not simply a question of business practices, but a question of regulatory policy regarding the relative rights of releasing and replacement shippers under the Commission's capacity release mechanism. Here, the Commission has determined that, under its regulations, releasing shippers should be given full rights to use their capacity flexibly by recalling that capacity on an intra-day basis, and that the contrary NAESB standards should no longer be incorporated by reference.

56. It is true that the Commission gives great weight to the standards adopted by NAESB, because these standards represent a consensus of the industry. In fact, the Commission initially adopted NAESB's consensus standards limiting capacity release recalls, even though the Commission's regulations (§ 284.8 (b)) would have permitted partial day recalls. Now, however, it is clear from the record of deliberations at NAESB, and the comments filed in this proceeding, that the existing NAESB standards on partial day recalls no longer command a consensus of the industry.[52] At this point, NAESB is stalemated, without being able to achieve a consensus in either direction. Since consensus no longer obtains, the Commission needs to resolve the policy dispute and has determined that allowing partial day recalls is consistent with the Commission's regulations, will provide incentives to release additional capacity, and will foster enhanced competition.

57. Requests for Clarification

58. A number of the comments ask for clarification of aspects of the regulations and the way in which partial day recalls will operate.

59. Applicability of Recall Conditions

60. NiSource maintains the Commission's regulation is vague and seems to imply that all released capacity is subject to partial day recalls. Williams and ENA similarly seek clarification that parties retain the flexibility to decide whether capacity is recallable on an intra-day basis. Williams further seeks clarification that the proposed rule is prospective only and does not affect previous capacity release contracts.

61. The Commission has revised its proposed regulation to make clear that pipelines need only provide releasing shippers with the opportunity to include partial day recalls as a condition in capacity release offers. Whether a partial day recall applies to a capacity release will depend upon the terms of the agreement between the releasing and replacement shipper. Because the terms of the agreement govern, the Commission agrees with Williams that implementation of this regulation is prospective only and will not change the terms of already negotiated capacity release transactions.

62. Schedule for Notification of Recalls for Timely Nomination Cycle and Reputs

63. The Industrials maintain that the Commission should not eliminate NAESB standard 5.3.6 which establishes 8 a.m. CCT as the deadline for notification of a recall applicable to the Timely Nomination cycle (11:30 a.m.). The Industrials are concerned that the elimination of this provision will force all recalls into the intra-day cycles or will mean that recall timing will be left either to the contract between the releasing and replacement shipper or to individual tariff provisions. The Industrials further request that the Commission consider a timeline for notification of reputs (in which recalled capacity reverts to the replacement shipper after a recall ends), or request NAESB to consider this issue.

64. The Commission recognizes that a standard timeline for recall notification is needed and is referring this issue to NAESB for consideration of a new standard. In the interim while NAESB is considering a new standard, the Commission is permitting pipelines to continue to use the notification period in current standard 5.3.6 for the Timely Nomination cycle, and, as described earlier, has established an interim notification schedule for the other nomination cycles. NAESB also should consider whether a schedule or timeline for reput notification is necessary.

65. Penalty Exposure

66. Dynegy and NGSA maintain that partial day recalls should not result in greater penalty exposure for shippers whose capacity has been recalled. As discussed earlier, the Commission in Order No. 587–G required pipelines to waive non-critical penalties for bumped interruptible shippers. Pipelines should apply the same waivers for gas bumped through partial day recalls.

67. Effect on Alternate Points

68. NiSource seeks clarification that partial day recalls will not permit the releasing shipper recalling capacity to change to an alternate point and bump firm capacity that is already scheduled (by a third party) at that point. The recall only permits the releasing shipper to displace gas scheduled by the replacement shipper. The Commission agrees that partial day recalls will not give the recalling shipper any greater scheduling rights vis a vis third parties.

69. Pipelines Offering Non-Standard Nomination Opportunities

70. Dominion requests clarification that pipelines offering more nomination opportunities than the four standard

[43] 18 CFR 284.12(c)(1)(ii).

[44] *See* Reliant Energy Gas Transmission Company, 93 FERC ¶ 61,141 (2000) (proposal for hourly nominations to meet customer needs for quick adjustment due,to demand changes).

[45] NAESB's standards recognize that the current nomination scheduling is merely "an interim step to continuous and contiguous scheduling." Nominations Related Standards 1.1.2.

[46] *See* Comments of Dominion LDCs, at 4 (partial day recalls "will free up capacity that would otherwise be held by LDCs and other shippers that cannot risk releasing it for an extended period"); Kentucky ("the inability to reschedule recalled capacity will result in the reduction of the amount of capacity available, thereby adversely impacting competition").

[47] *See* Comments of AGA, Dominion LDCs, APGA, Con Edison, Kentucky, KeySpan, PSCNY (partial day recalls crucial to retail access programs where recall is needed to ensure reliability).

[48] *See* Comment of APS/PWEC, at 3 (supporting partial day recalls as making incremental capacity available on fully subscribed pipelines).

[49] *See* Order No. 587–G, 63 FR at 20077–78, FERC Stats. & Regs. Regulations Preambles [July 1996–December 2000] ¶ 31,062, at 30,669–30,672.

[50] Order No. 587–G, 63 FR at 20078, FERC Stats. & Regs. Regulations Preambles [July 1996–December 2000] ¶ 31,062, at 30,671.

[51] 18 CFR § 284.12 (b)(1)(i), Nominations Related Standards 1.3.18, 1.3.23, 1.3.24. Pooling together with ranking permit shippers to designate which supplies or markets should be cut first in the event scheduled volumes are reduced.

[52] Under NAESB's procedures, a consensus is required to approve standards, but equally a consensus is needed to change or remove a standard. For example, if NAESB's current partial day recall standards (5.3.6 and 5.3.7) were resubmitted for a vote today, the comments make clear that these standards would not command a consensus at NAESB.

VOL 67 ISS 52 MR 18 2002 UMI

times provided in the NAESB standards, need not offer partial day recall at non-standard nomination times. Dominion maintains that it provides additional nomination times early in the morning (7:45 a.m. CCT) and late in the evening (8:45 p.m.), and states that its staffing, and that of shippers, at these times does not permit processing of recalls. In addition, Dominion contends that other pipelines are not equipped to coordinate recalls at those hours.

71. Pipelines are certainly free to provide for recalls at non-standard nomination periods. However, in implementing recalls during the interim period in which NAESB is considering standards, the Commission will require recalls to be processed only at the standard nomination periods; pipelines need not permit recalls at any non-standard nomination times. In considering standards for partial day recalls, NAESB should consider whether standards should be developed to permit recalls at certain non-standard nomination opportunities.

72. Effect on Already Accepted Partial Day Recall Programs

73. Dominion requests clarification that the final rule does not affect Dominion's settlement in its Order No. 637 proceeding in which it provides partial day recalls at certain nomination opportunities. For example, Dominion states that it currently does not permit recalls at the Intra-Day 1 cycle, although it does not object to permitting such recalls if required by the Commission.

74. All pipelines will be required to conform to the requirements of the Commission regulation, regardless of the terms of previous approved tariffs. The Commission is acting under section 5 of the Natural Gas Act in requiring pipelines to permit releasing shippers to use partial day recalls and is seeking to establish standards to apply to such recalls across the interstate grid. Accordingly, all pipelines with tariffs inconsistent with the Commission's regulation must comply with that regulation. Dominion, for instance, is required, as are the other pipelines, to permit recalls at the Intra-Day 1 cycle (to which it has no objection). Similarly, Dominion is required to permit recalls under the schedule established by the Commission in this rule for the interim period while NAESB is considering standards for partial day recalls, and will be required to comply with subsequent timeline NAESB develops and the Commission adopts.

75. Pipeline Capacity

76. EIP is concerned that partial day recalls are at odds with the NAESB standards requiring that all nominations be for daily quantities. EIP maintains that if partial day recalls are permitted for released capacity, pipelines should be permitted to sell their capacity for less than a full day as well.

77. EIP appears to be suggesting that a partial day recall refers to a sale of capacity for a time period of less than one day, whereas pipelines under the NAESB standards can only sell capacity for a full day's quantity. The Commission is not establishing different standards for pipeline capacity as compared to released capacity. As Gulf South explains in its comments, a partial day recall should not be viewed as a recall for a specific portion (number of hours) of a gas day. Rather, the recall is for a proportionate share of the total contract quantity. For example, if a capacity release is for a contract quantity of 2400 Dth, and the replacement shipper flowed 800 Dth during the first eight hours prior to recall, the releasing shipper would still have a contract quantity of 1600 Dth remaining on the contract for the remainder of the gas day. In the same way, pipelines can sell capacity at each of the intra-day nomination opportunities whenever capacity is available.[53]

[53] Indeed, Commission policy requires pipelines to sell capacity at the maximum tariff rate whenever that capacity is available, including on an intra-day basis. Tennessee Gas Pipeline Company, 91 FERC ¶ 61,053, at 61,190 (2000); 18 CFR 284.7 & 284.9 (must sell services without regard to duration of the service).

78. Notice of Use of Voluntary Consensus Standards

Office of Management and Budget Circular A–119 (§ 11) (February 10, 1998) provides that when a federal agency issues or revises a regulation containing a standard, the agency should publish a statement in the final rule identifying whether a voluntary consensus standard or a government-unique standard is being adopted. In this rulemaking, the Commission is issuing its own regulation and rescinding the incorporation by reference of NAESB standard 5.3.6 and part of 5.3.7, because the existing NAESB standard has not been revised to take into account changed circumstances, there is no longer consensus supporting this standard, and the existing standard fails to reflect Commission policy.

79. Information Collection Statement

80. The Office of Management and Budget's (OMB) regulations in 5 CFR 1320.11 require that it approve certain reporting and recordkeeping requirements (collections of information) imposed by an agency. Upon approval of a collection of information, OMB will assign an OMB control number and an expiration date. Respondents subject to the filing requirements of this Rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

81. The final rule will affect one existing data collection, FERC–545 "Gas Pipeline Rates: Rate Change (Non-Formal)" (OMB Control No. 1902–0154). The following burden estimates are related only to this rule and include the costs of complying with the tariff filing requirement. Since this final rule will be implemented in two phases, the number of responses per respondent has been increased from one, as proposed in the NOPR, to two because each respondent will need to make two tariff filings, one for phase one and one for phase two.

Data collection	Number of respondents	Number of responses per respondent	Hours per response	Total annual hours
FERC–545	93	2	38	7,068

	FERC–545
Annualized Capital/Startup Costs	$397,714
Annualized Costs (Operations & Maintenance)	0
Total Annualized Costs	397,714

The cost per respondent is $4,276.00 (rounded off).

82. The Commission sought comments to comply with these requirements. Comments were received from twenty-eight entities. No comments addressed the reporting burden imposed by these requirements. The substantive issues raised by the commenters are addressed within the rule.

83. The Commission's regulations adopted in this rule are necessary to further the process begun in Order No. 587 of creating a more efficient and integrated pipeline grid by standardizing the business practices and electronic communication of interstate pipelines. Adoption of these regulations will update the Commission's regulations relating to business practices and provide greater flexibility for capacity holders on interstate pipelines by synchronizing the Commission's regulation of recalled capacity with its standards for intra-day nominations. The public also benefits by having greater competition across the pipeline grid as a result of firm capacity holders having increased flexibility in structuring their capacity release transactions.

84. The Commission has assured itself, by means of its internal review, that there is specific, objective support for the burden estimates associated with the information requirements. The information required in the Final Rule will help the Commission carry out its responsibilities under the Natural Gas Act and conforms to the Commission's plan for efficient information collection, communication, and management within the natural gas industry.

85. Interested persons may obtain information on the reporting requirements by contacting the following: Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426 [Attention: Michael Miller, Office of the Chief Information Officer, CI–1, (202) 208–1415, or mike.miller@ferc.fed.gov] or the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for the Federal Energy Regulatory Commission, 725 17th Street, NW., Washington, DC 20503. The Desk Officer can also be reached at (202) 395–7318, or fax: (202) 395–7285.

86. Environmental Analysis

87. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment. [54] The Commission has categorically excluded certain actions from these requirements as not having a significant effect on the human environment.[55] The regulations adopted in this rule fall within categorical exclusions in the Commission's regulations for rules that are clarifying, corrective, or procedural, for information gathering, analysis, and dissemination, and for sales, exchange, and transportation of natural gas that requires no construction of facilities.[56] Therefore, an environmental assessment is unnecessary and has not been prepared.

88. Regulatory Flexibility Act Certification

89. The Regulatory Flexibility Act of 1980 (RFA)[57] generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities. The regulations proposed here impose requirements only on interstate pipelines, which are not small businesses, and, these requirements are, in fact, designed to benefit all customers, including small businesses. Accordingly, pursuant to § 605(b) of the RFA, the Commission hereby certifies that the regulations adopted herein will not have a significant adverse impact on a substantial number of small entities.

90. Document Availability

91. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (*http://www.ferc.gov*) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5 p.m. Eastern time) at 888 First Street, NE., Room 2A, Washington, DC 20426.

92. From FERC's Home Page on the Internet, this information is available in both the Commission Issuance Posting System (CIPS) and the Records and Information Management System (RIMS).

—CIPS provides access to the texts of formal documents issued by the Commission since November 14, 1994.

—CIPS can be accessed using the CIPS link or the Documents & Filing link. The full text of this document is available on CIPS in ASCII and WordPerfect 8.0 format for viewing, printing, and/or downloading.

—RIMS contains images of documents submitted to and issued by the Commission after November 16, 1981. Documents from November 1995 to the present can be viewed and printed from FERC's Home Page using the RIMS link or the Documents & Filing link. Descriptions of documents back to November 16, 1981, are also available from RIMS-on-the-Web; requests for copies of these and other older documents should be submitted to the Public Reference Room.

93. User assistance is available for RIMS, CIPS, and the Website during normal business hours from our Help line at (202) 208–2222 (E-Mail to WebMaster@ferc.fed.us) or the Public Reference at (202) 208–1371 (E-Mail to *public.referenceroom@ferc.fed.us*).

94. During normal business hours, documents can also be viewed and/or printed in FERC's Public Reference Room, where RIMS, CIPS, and the FERC Website are available. User assistance is also available.

95. Implementation Dates

96. As discussed herein, interstate pipelines are required, by May 1, 2002, to make tariff filings, to become effective by July 1, 2002, to comply with the requirement to implement recalls of scheduled and unscheduled capacity for the Timely and Evening Nomination cycles and for recalls of unscheduled capacity. Each tariff filing must include the tariff language set forth at P. 41.

97. By October 1, 2002, NAESB should file comments with the Commission detailing the standards NAESB has adopted relating to partial day recalls or, if none has been adopted, those that were considered, as well as all other material relevant to NAESB's consideration of the standards. Other industry members also can submit comments by October 1, 2002, and will have until October 15, 2002 to file additional comments on the NAESB report.

98. Effective Date

99. These regulations are effective April 17, 2002. The Commission has determined, with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of OMB, that this rule is not a "major rule" as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996.

List of Subjects in 18 CFR Part 284

Continental shelf, Incorporation by reference, Natural gas, Reporting and recordkeeping requirements.

By the Commission.

Magalie R. Salas,

Secretary.

In consideration of the foregoing, the Commission amends Part 284, Chapter I, Title 18, *Code of Federal Regulations*, as follows.

PART 284—CERTAIN SALES AND TRANSPORTATION OF NATURAL GAS UNDER THE NATURAL GAS POLICY ACT OF 1978 AND RELATED AUTHORITIES

1. The authority citation for part 284 continues to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7532; 43 U.S.C. 1331–1356.

2. Section 284.12 is amended as follows:

a. The heading of paragraph (b) is revised by removing the word "GISB" and adding, in its place, the word "NAESB."

b. Paragraphs (b)(1) and (b)(2) are amended by removing the words "Gas Industry Standards Board" and adding, in their place, the words "North American Energy Standards Board."

b. Paragraph (b)(1)(v) is revised.

c. The heading of paragraph (c)(1)(ii) is revised, and the text of paragraph of (c)(1)(ii) is designated as (c)(1)(ii)(A).

d. Paragraph (c)(1)(ii)(B) is added.

The revised and added text reads as follows:

§ 284.12 Standards for pipeline business operations and communications.

* * * * *

(b) * * *

(1) * * *

(v) Capacity Release Related Standards (Version 1.4, August 31, 1999), with the exception of Standard 5.3.6 and the first sentence of Standard 5.3.7.

* * * * *

(c) * * *

(1) * * *

(ii) Capacity release scheduling.

(A) * * *

(B) A pipeline must permit releasing shippers, as a condition of a capacity release, to recall released capacity and renominate such recalled capacity at each nomination opportunity. Each replacement shipper must be provided with advance notice of such recall and must be notified whether penalties will apply on the day its volumes are reduced.

BILLING CODE 6717–01–P

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[T.D. ATF–475; Ref. Notice No. 924]

RIN: 1512–AC29

Addition of New Grape Variety Names for American Wines (2000R–322P)

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Treasury decision, final rule.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is adding four new names to the list of prime grape variety names for use in designating American wines: Albariño, Alvarinho, Black Corinth, and Fiano.

EFFECTIVE DATE: Effective May 17, 2002.

FOR FURTHER INFORMATION CONTACT: Jennifer Berry, Bureau of Alcohol, Tobacco and Firearms, Regulations Division, 111 W. Huron Street, Room 219, Buffalo, NY 14202–2301; telephone (716) 434–8039.

SUPPLEMENTARY INFORMATION:

Background

Under the Federal Alcohol Administration Act (27 U.S.C. 201 *et seq.*) (FAA Act), wine labels must provide the consumer with adequate information as to the identity of the product. The FAA Act also requires that the information appearing on wine labels not mislead the consumer.

To help carry out these statutory requirements, ATF has issued regulations, including those that designate grape varieties. Under 27 CFR 4.23(b) and (c), a wine bottler may use a grape variety name as the designation of a wine if at least 75 percent of the wine (51 percent in the case of wine made from *Vitis labrusca* grapes) is derived from that grape variety. Under § 4.23(d), a bottler may use two or more grape variety names as the designation of a wine if all of the grapes used to make the wine are of the labeled varieties, and the percentage of the wine derived from each variety is shown on the label.

Treasury Decision ATF–370 (61 FR 522), January 8, 1996, adopted a list of grape variety names that ATF determined to be appropriate for use in designating American wines. The list of prime grape names and their synonyms appears at § 4.91, while alternative grape names temporarily authorized for use are listed at § 4.92. We believe the listing of approved grape variety names for American wines will help standardize wine label terminology and prevent consumer confusion.

How May New Varieties Be Added to the List of Prime Grape Names?

Under § 4.93, any interested person may petition ATF to add additional grape varieties to the list of prime grape names. The petitioner should provide evidence of the following:

- Acceptance of the grape variety;
- The validity of the name for identifying the grape variety;
- That the variety is used or will be used in winemaking; and
- That the variety is grown and used in the United States.

Documentation submitted with the petition may include:

- A reference to the publication of the variety's name in a scientific or professional journal of horticulture or a published report by a professional, scientific or winegrowers' organization;
- A reference to a plant patent, if patented; and
- Information about the commercial potential of the variety, such as the acreage planted and its location or market studies.

Section 4.93 also places certain eligibility restrictions on the approval of grape names. We will not approve a name:

- If it has previously been used for a different grape variety;
- If it contains a term or name found to be misleading under § 4.39; or
- If a name of a new grape variety contains the term "Riesling."

The Director will not approve the name of a new grape variety developed in the United States if the name contains words of geographical significance, place names, or foreign words which are misleading under § 4.39.

Notice 924

In Notice 924, published on July 19, 2001, ATF proposed to add the names Albariño, Alvarinho, Black Corinth, and Fiano to the list of approved grape variety names in § 4.91. We based the proposal on the petitions and evidence described below. We received no comments to the notice. Because the petitioners provided sufficient evidence to support the requirements of § 4.93, we are adding the new names to the approved list.

Petitions

Petition for Albariño/Alvarinho

Havens Wine Cellars of Napa, California, petitioned ATF to add "Albariño" to the list of prime grape names approved for the designation of American wines. Grown for centuries in Spain and Portugal, Albariño, a white *Vitis vinifera* grape, is relatively new to the United States. In Portugal the grape is called "Alvarinho."

The petitioners stated that Albariño has long been recognized in Europe and in academic communities. As evidence of this, the petitioners submitted the following supporting documents provided by Professor Carole Meredith of the Viticulture and Enology Department at the University of California at Davis (UC Davis):

- European Union Regulation 3201/90: This regulation permits the use of the name "Albariño" on labels of Spanish wines, and the name "Alvarinho" on labels of Portuguese wines.
- Two scientific papers published in the American Journal of Enology and Viticulture: "Effects of Grapevine Leafroll-Associated Virus 3 on the Physiology and Must of Vitis vinifera L. cv. Albariño Following Contamination in the Field," (Vol. 50, 1999) which discusses a study conducted on Albariño grape vines, and "Contribution of Saccharomyces and Non-Saccharomyces Populations to the Production of Some Components of Albariño Wine Aroma," (Vol. 47, 1996) which describes a study conducted on Albariño musts.
- "The Genetic Resources of Vitis": This listing of international grape variety names and synonyms, published in 1988 by the German Federal Grape Breeding Institute, lists Alvarinho as the

VOL
67
ISS
52
MR
18
2002
UMI

prime name for the grape varietal with Albariño as a synonym.

• An abstract of an article from the Journal of the American Society for Horticultural Science: "Molecular marker analysis of Vitis vinifera 'Albariño' and some similar grapevine cultivars," published September 1998, describing a DNA analysis conducted on Albariño grapevines.

The petitioner also submitted several wine literature articles from sources such as Wine Spectator and Wine Today, which mention Albariño/Alvarinho wine.

ATF contacted Professor Meredith and asked her if the name "Alvarinho" should be added to the list as a synonym of Albariño. She replied that both names are well established in Europe and are equally valid names for the grape. She stated that because the grape is relatively new to the U.S., she didn't know which name is most commonly used by U.S. winemakers. She noted that UC Davis has an example of the grapevine in its collection and uses the name "Alvarinho", most likely because the plant originally came from Portugal.

Havens Wine Cellar reported that it has 2½ acres of Albariño in production, with the first crop picked in 1999. We also know of two other California wineries and a Virginia winery that are growing Albariño. Since the evidence submitted satisfies the requirements of § 4.93, we are adding Albariño and Alvarinho to the list of prime grape names in § 4.91.

Petition for Black Corinth

Hallcrest Vineyards of Felton, California, petitioned ATF to add the grape variety Black Corinth to the list of prime grape names approved for the designation of American wines. Black Corinth grapes are widely grown in California, where the vast majority of them are dried into raisins and marketed under the name "Zante Currant."

As evidence of the grape's acceptance and use in California, Hallcrest Vineyards submitted the following statistical reports issued by the State of California:

• Final Grape Crush Report for the 1999 crop, issued by the California Department of Food and Agriculture.

• California Grape Acreage report for 1999, issued by the California Agricultural Statistics Service, in cooperation with the U.S. Department of Agriculture.

Both reports include statistical tables with the data broken down by grape varietal. Black Corinth is one of the listed varietals. The petitioner stated that this is clear evidence that the grape is grown in California and is recognized by the California Department of Food and Agriculture.

Other documentation included The Oxford Companion to Wine (Jancis Robinson, Oxford University Press, 1999), which states that Black Corinth is one of the most commonly used grape varieties in the world raisin industry, and is occasionally used in winemaking.

Hallcrest Vineyards stated it has made a fruity, blush dessert wine from the Black Corinth grape. We are aware of at least one other winery using the grape to produce a table wine. Because the evidence satisfies the requirements of § 4.93, we are adding Black Corinth to the list of prime grape names in § 4.91. Because we believe the name "Zante Currant" could mislead consumers into thinking the wine is made from currants and not grapes, we did not propose that name as a synonym.

Petition for Fiano

United Distillers and Vintners North America, Inc. (UDV) petitioned ATF to add the name "Fiano" to the list of prime grape names approved for the designation of American wines. UDV owns three wineries in California—Beaulieu Vineyards, Glenn Ellen Carneros Winery, and Blossom Hill.

Fiano is a white varietal, long grown in the Campania region of Italy where it is used to produce the *Denominazione di Origine Controllata* wine Fiano di Avellino. According to information submitted by the petitioner, Fiano is an old grape with a history dating back to the ancient Romans. Records show that Holy Roman Emperor Frederick II (1215–1250) placed an order for Fiano wine and that Charles d'Anjou (1227–1285) planted 16,000 Fiano vines. Modern reference sources referring to the Fiano grape include The New Sotheby's Wine Encyclopedia (Tom Stevenson, DK Publishing, Inc., 1997) and The Oxford Companion to Wine (Jancis Robinson, Oxford University Press, 1999).

As evidence of the grape's use in the United States, UDV submitted a price list from Herrick Grapevines in St. Helena, California, listing Fiano in its grapevine inventory. According to this inventory, the Fiano was planted in 1997 and was obtained from Duarte Nursery in Modesto, California. UDV further stated that Beaulieu Vineyard has produced two vintages of Fiano wine, and submitted evidence that at least three other California vineyards and one New York vineyard are also growing Fiano. The petitioner submitted a letter from Monterey Pacific, one of the California growers, stating that they have five years of experience with Fiano and find it to be a grape with distinctive varietal character.

Based on the evidence presented in the petition, we are adding the Fiano grape to the list of approved prime names in § 4.91.

Regulatory Analyses and Notices

Does the Paperwork Reduction Act Apply to This Final Rule?

The provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this rule. This rule does not require winemakers to collect any additional information.

How Does the Regulatory Flexibility Act Apply to This Final Rule?

We certify that this final regulation will not have a significant economic impact on a substantial number of small entities. This regulation will permit the use of new grape varietal names. We do not expect any negative impact on small entities. We are not imposing new requirements. Accordingly, the act does not require a regulatory flexibility analysis.

Is This a Significant Regulatory Action as Defined by Executive Order 12866?

This is not a significant regulatory action as defined by Executive Order 12866. Therefore, the order does not require a regulatory assessment.

Drafting Information

The principal author of this document is Jennifer Berry, Regulations Division, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 4

Advertising, Consumer protection, Customs duties and inspections, Imports, Labeling, Packaging and containers, Wine.

Authority and Issuance

Accordingly, 27 CFR part 4, Labeling and Advertising of Wine, is amended as follows:

PART 4—LABELING AND ADVERTISING OF WINE

Paragraph 1. The authority citation for part 4 continues to read as follows:

Authority: 27 U.S.C. 205.

Para. 2. Section 4.91 is amended by adding the names "Albariño", "Alvarinho", "Black Corinth", and "Fiano" in alphabetical order, to the list of prime grape names, to read as follows:

§ 4.91 List of approved prime names.

* * * * *

Albariño (Alvarinho)

* * * * *

Alvarinho (Albariño)

* * * * *

Black Corinth

* * * * *

Fiano

BILLING CODE 4810–31–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD05–02–006]

Drawbridge Operation Regulations; Great Egg Harbor Bay, New Jersey

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Fifth Coast Guard District, has approved a temporary deviation from the regulations governing the operation of the Route 9/Beesleys Point Bridge across Great Egg Harbor Bay, mile 3.5, between Somers Point and Beesleys Point, in New Jersey. From March 11, 2002, through April 5, 2002, the bridge may remain in the closed position Monday through Friday from 7 a.m. to 5 p.m. However, on Saturday and Sunday the bridge will open on signal for marine traffic. This closure is necessary to conduct the emergency structural repairs to the bascule span.

DATES: This deviation is effective from 7 a.m. on March 11, 2002, until 5 p.m. on April 5, 2002.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, at (757) 398–6222.

SUPPLEMENTARY INFORMATION: The Coast Guard received a letter from the bridge manager, requesting a temporary deviation from the current operating schedule of the Route 9/Beesleys Point Bridge to undertake repairs. The draw currently is required to open on signal at all times. This requirement is included in the general operating regulations at 33 CFR 117.5. The work involves ironwork repairs to the bascule span of the bridge. To facilitate the repairs, the bascule span will be locked in the closed position so that concrete can undergo the curing process. This work requires completely immobilizing the operation of the bascule span. In the event of an emergency, openings of the span will be provided as quickly as possible, but may take up to 48 hours to accomplish. Requests for emergency openings can be made by calling the bridge manager at (609) 390–3190 or (609) 624–0949.

In accordance with 33 CFR 117.35, the District Commander approved the contractor's request for a temporary deviation from the governing regulations in a letter dated February 22, 2002.

The Coast Guard has informed the known commercial users of the waterway of the bridge closure so that these vessels can arrange their transits to minimize any impact caused by the temporary deviation.

The temporary deviation allows the Route 9/Beesleys Point Bridge across Great Egg Harbor, mile 3.5, between Somers Point and Beesleys Point, New Jersey to remain closed Monday through Friday from 7 a.m. on March 11, 2002, until 5 p.m. on April 5, 2002.

Dated: March 6, 2002.

Ann B. Deaton,

Chief, Bridge Administration Section, Fifth Coast Guard District.

[FR Doc. 02–6358 Filed 3–15–02; 8:45 am]

BILLING CODE 4910–15–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD07–02–009]

Drawbridge Operation Regulations: Commercial Boulevard Bridge (SR 870), Atlantic Intracoastal Waterway, Mile 1059.0, Lauderdale-by-the-Sea, Broward County, FL

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations, request for comments.

SUMMARY: The Commander, Seventh Coast Guard District, has approved a test deviation from the regulations governing the operation of the Commercial Boulevard (SR 870) bridge at Lauderdale-by-the-Sea across the Atlantic Intracoastal Waterway, mile 1059.0 in Lauderdale-by-the-Sea, Florida. This deviation allows the drawbridge to open on the hour, 20 minutes after the hour, and 40 minutes after the hour from 7 a.m. to 6 p.m. This action is intended to improve the movement of vehicular traffic while not unreasonably interfering with the movement of vessel traffic. Comments on this test deviation are encouraged.

DATES: This rule is effective from April 17, 2002, until July 16, 2002.

ADDRESSES: You may mail comments and related material to Commander (obr), Seventh Coast Guard District, 909 S.E. 1st Avenue, Room 432, Miami, FL 33131. Comments and material received from the public, as well as comments indicated in this preamble as being available in the docket, are part of docket [CGD07–02–009] and are available for inspection or copying at Commander (obr), Seventh Coast Guard District, 909 S.E. 1st Avenue, Room 432, Miami, FL 33131 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Barry Dragon, Chief, Operations Section, Seventh Coast Guard District, Bridge Branch at (305) 415–6743.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to comment on this test schedule by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this notice [CGD07–02–009], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to the Seventh Coast Guard District Bridge Branch at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid in the Discussion of the Test Schedule, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Discussion of the Test Schedule

The existing regulations of the Commercial Boulevard bridge (SR 870), mile 1059.0, at Lauderdale-by-the-Sea allow the draw to open on signal, except that, from November 1 through May 15

VOL
67
ISS
52
MR
18
2002
UMI

from 8 a.m. to 6 p.m., Monday through Friday, the draw need open only on the hour, quarter-hour, half-hour, and three-quarter-hour, and from 8 a.m. to 6 p.m. on Saturdays, Sundays, and federal holidays, the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour.

The City of Fort Lauderdale requested on January 3, 2002, that the Coast Guard review the existing regulation of the Commercial Boulevard bridge as they believe the existing regulations are not meeting the needs of vehicle and vessel traffic. This test deviation will allow the draw to open only on the hour, 20 minutes after the hour, and 40 minutes after the hour. We will utilize the data collected from this test deviation to determine if new operating regulations need to be created for this bridge to facilitate vehicle and vessel traffic movement.

The District Commander has granted a test deviation from the operating requirements listed in 33 CFR 117.261(ee) to evaluate the effect of this new schedule on vehicle and vessel traffic. Under this deviation, the Commercial Boulevard Bridge need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour from April 17, 2002, until July 16, 2002.

Dated: March 7, 2002.

Greg Shapley,

Chief, Bridge Administration, Seventh Coast Guard District.

[FR Doc. 02–6360 Filed 3–15–02; 8:45 am]

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD08–02–005]

Drawbridge Operating Regulation; Pascagoula River, Mississippi

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation governing the operation of the CSX Transportation railroad bascule span drawbridge across the Pascagoula River, mile 1.5 at Pascagoula, Mississippi. This deviation allows the draw of the railroad bascule span bridge to remain closed to navigation from 8 a.m. until 5 p.m. on March 18, 2002. This temporary deviation will allow for rewiring the electrical components of the operating mechanism.

DATES: This deviation is effective from 8 a.m. until 5 p.m. on Monday, March 18, 2002.

ADDRESSES: Unless otherwise indicated, documents referred to in this notice are available for inspection or copying at the office of the Eighth Coast Guard District, Bridge Administration Branch, Commander (obc), 501 Magazine Street, New Orleans, Louisiana, 70130–3396. The Bridge Administration Branch maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: Phil Johnson, Bridge Administration Branch, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: The CSX Transportation railroad bascule span drawbridge across the Pascagoula River, mile 1.5 at Pascagoula, Mississippi has a vertical clearance in the closed-to-navigation position of 0.8 feet above mean high water and 2.4 feet above mean low water. The bridge provides unlimited vertical clearance in the open-to-navigation position. Navigation on the waterway consists of small cargo ships, tugs with tows, fishing vessels and recreational craft including sailboats and power boats. Presently, the draw opens on signal.

CSX Transportation requested a temporary deviation for the operation of the drawbridge to accommodate maintenance work. The work involves replacement of the deficient wiring in the electrical system of the operating mechanism. This work is essential for continued operation of the draw span of the bridge and is expected to eliminate frequent breakdowns resulting in emergency bridge closures.

This deviation allows the draw of the CSX Transportation railroad bascule span drawbridge to remain closed to navigation from 8 a.m. until 5 p.m. on March 18, 2002.

Dated: March 8, 2002.

J.R. Whitehead,

Captain, U.S. Coast Guard, Commander, 8th Coast Guard Dist., Acting.

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Corpus Christi 02–001]

RIN 2115–AA97

Security Zone; Corpus Christi Inner Harbor, Corpus Christi, TX

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary security zone to ensure the security within the Corpus Christi Inner Harbor, Corpus Christi, TX, from the Inner Harbor Bridge to the Viola Turning Basin and all waters in between. The security zone is needed to protect personnel, vessels, waterfront facilities, and national security interests in this harbor from any and all subversive actions by any groups or individuals whose objective it is to destroy or disrupt maritime activities. Entry of recreational vessels, passenger vessels, or commercial fishing vessels into this zone is prohibited unless specifically authorized by the Captain of the Port Corpus Christi.

DATES: This rule is effective from 8 a.m. on February 20, 2002 through 8 a.m. on June 15, 2002.

ADDRESSES: Documents indicated in this preamble as being available in the docket, are part of docket [COTP Corpus Christi 02–001] and are available for inspection or copying at U.S. Coast Guard Marine Safety Office Corpus Christi, 555 N. Carancahua Street, Suite 500, Corpus Christi, Texas, 78478 between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LTJG C. J. Bright, Chief, Waterways Section, Coast Guard Captain of the Port Corpus Christi, 555 N. Carancahua St. Suite 500, Corpus Christi, Texas, 78478, (361) 888–3162.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553 (b) (B), the Coast Guard finds that good cause exists for not publishing an NPRM, and under 5 U.S.C. 553 (d)(3), good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Publishing a NPRM and delaying its effective date would be contrary to public interest since immediate action is needed to respond to the security risks associated with recreational, passenger, or commercial fishing vessels entering the Corpus Christi Inner Harbor.

Background and Purpose

On September 11, 2001, both towers of the World Trade Center and the Pentagon were attacked by terrorists. In response to these terrorist acts, heightened awareness and security of our ports and harbors is necessary therefore, the Captain of the Port, Corpus Christi is establishing a temporary security zone within the Corpus Christi Inner Harbor.

The Port of Corpus Christi is the fourth largest petro-chemical port within the United States. A large number of these petro-chemical waterfront facilities are located within the Inner Harbor that serves as a major industrial channel. These petro-chemical waterfront facilities conduct business with both United States and foreign deep draft vessels. The Port of Corpus Christi is also designated as an alternate military strategic load-out port with docks and facilities located within the Inner Harbor. These docks and facilities are vital to the national security interest of the United States.

The Inner Harbor channel is approximately 8 miles long and 300-to-800 feet wide, and has a controlling depth of 45 feet. Restricting the access of recreational, passenger and commercial fishing vessels reduces potential methods of attack on a vessel or waterfront facility within the zone. This security zone is designed to limit the access of vessels that do not have business to conduct with facilities or structures within the Corpus Christi Inner Harbor. Entry of recreational vessels, passenger vessels, or commercial fishing vessels into this zone is prohibited unless specifically authorized by the Captain of the Port Corpus Christi.

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. Recreational vessels, passenger vessels, and commercial fishing vessels do not frequent the Corpus Christi Inner Harbor. The Inner Harbor is an industrial area primarily used for bulk material transfers. Should a recreational vessel, passenger vessel, or commercial fishing vessel need to enter the Inner Harbor to conduct business with a small entity, such as a ship yard facility, there is no cost and little burden associated with obtaining permission from the Captain of the Port prior to entry.

If you are a small business entity and are significantly affected by this regulation please contact LTJG C. J. Bright, Chief Waterways Section, Coast Guard Captain of the Port Corpus Christi at (361) 888–3162.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effect

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this rule and concluded that under figure 2–1, paragraph 34(g), of Commandant Instruction M16475.1D, this rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available for inspection or copying where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. A new temporary § 165.T08–016 is added to read as follows:

§ 165.T08–016 Security Zone; Corpus Christi Inner Harbor, Corpus Christi, Texas.

(a) *Location.* The following area is a security zone: Corpus Christi Inner Harbor from the Inner Harbor Bridge to the Viola Turning Basin and all waters in between.

(b) *Effective dates.* This section is effective from 8 a.m. on February 20, 2002 through 8 a.m. on June 15, 2002.

(c) *Authority.* The authority for this section is 33 U.S.C. 1226, 33 U.S.C. 1231, 33 CFR 1.05–1(g), and 49 CFR 1.46.

(d) *Regulations.* (1) No recreational vessels, passenger vessels, or commercial fishing vessels may enter this security zone unless specifically authorized by the Captain of the Port Corpus Christi, or his designated representative.

(2) Recreational vessels, passenger vessels and commercial fishing vessels requiring entry into this security zone must request permission from the Captain of the Port Corpus Christi, or his designated representative. They may be contacted via VHF Channel 16 or via telephone at (361) 888–3162.

(3) All persons and vessels shall comply with the instructions of the Captain of the Port, Corpus Christi and designated on-scene U.S. Coast Guard patrol personnel. On-scene U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the U.S. Coast Guard.

Dated: February 20, 2002.

William J. Wagner III,

Captain, U.S. Coast Guard, Captain of the Port Corpus Christi.

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Western Alaska 02–003]

RIN 2115–AA97

Safety Zone; Ouzinkie Harbor, Ouzinkie, AK

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing two temporary safety zones in Ouzinkie Harbor, Ouzinkie, Alaska. One safety zone will surround the barge SWINOMOSH which will be conducting dredging and blasting operations in the navigable waters of Ouzinkie Harbor. The second safety zone will close all of Ouzinkie Harbor when the barge SWINOMOSH conducts blasting operations. The safety zones are necessary to protect vessels transiting the area from the potential hazards associated with the dredging and blasting operations conducted by the barge SWINOMOSH.

DATES: This rule is effective from 12:01 a.m. Alaska Standard Time (AST) March 13, 2002, until 9 p.m. AST April 30, 2002.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket (COTP Western Alaska 02–003) and are available for inspection or copying at Coast Guard Marine Safety Office Anchorage, Alaska between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Lieutenant Matt Jones, USCG Marine Safety Detachment Kodiak, at (907) 486–5918 or Lieutenant Commander Chris Woodley, USCG Marine Safety Office Anchorage, at (907) 271–6700.

SUPPLEMENTARY INFORMATION:

Regulatory Information

On January 31, 2002 we published a notice of proposed rulemaking (NPRM) entitled "Safety Zone; Ouzinkie Harbor, Ouzinkie, Alaska" in the **Federal Register** (67 FR 4692). We did not receive any comments from the public. No public hearing was requested, and none was held.

Because we received the request late, we find that good cause exists, under 5 U.S.C. 553(d)(3), for making this rule effective less than 30 days after publication in the **Federal Register.**

Background and Purpose

The U.S. Army Corps of Engineers, through its contractor Western Marine Construction, Inc., will be conducting dredging and blasting operations on portions of Ouzinkie Harbor (Army Corps Of Engineers project number DACW85–01–C–0010). This dredging project will help maintain safe navigation within Ouzinkie Harbor. A 500-yard safety zone around the barge SWINOMOSH and a safety zone closing the harbor and evacuating all vessels from the harbor during blasting operations, is necessary to ensure the safety of the maritime community from the potential hazards associated with dredging and blasting operations.

Discussion of Comments and Changes

We did not receive any comments but we made a few technical and clarification changes to the rule. In paragraph (a) of section 165.T17–002, we changed the phrase "dredging and blasting operations" to "dredging or blasting operations," to clarify that the barge zone will be enforced when the barge SWINOMOSH was engaged in dredging alone. We changed the start date for the effective period in paragraph (b) to reflect a delay in the start of the dredging operations, and clarified that blasting and dredging operations will only occur in daylight hours. We also added the time zone in which this safety zone will occur. In paragraph(c) we added wording to clarify how the tug WALDO will notify vessels of blasting operations about to occur.

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12886, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

We expect the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary. This finding is based on the fact that the safety zone around the barge SWINOMOSH will not restrict vessels from transiting through the harbor. Also, the safety zone closing Ouzinkie Harbor during blasting operations will be announced well in advance so as to allow vessels ample time to plan ahead, and the actual blasting operations will be short in duration. The areas will not affect maritime vessel traffic transiting the shipping channel at Ouzinkie Narrows. Vessel traffic at this time of the year is minimal.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to transit or anchor in the vicinity of Ouzinkie Harbor during the time this zone is activated.

These safety zones will not have a significant economic impact on a substantial number of small entities for the following reasons. The safety zone area around the barge SWINOMOSH will not restrict vessels from transiting through Ouzinkie Harbor and vessels could pass safely around it. Also, the safety zone closing Ouzinkie Harbor during blasting operations will be announced well in advance so as to allow vessels ample time to plan ahead, and the actual blasting operations will be short in duration. Limited vessel traffic occurs in this area during these months. Before and during the effective period, we will issue a broadcast notice to mariners to warn maritime vessel traffic of the safety zones and operations occurring within the safety zones.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Consultation and Coordination with Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this rule and concluded that under figure 2–1, paragraph 34(g), of Commandant Instruction M16475.1D, this rule is categorically excluded from further environmental documentation. This rule fits paragraph 34(g) as it establishes a safety zone. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. Add § 165.T17–002 to read as follows:

§ 165.T17–002 Safety Zone: Ouzinkie Harbor Dredging and Blasting Operations, Ouzinkie, Alaska.

(a) *Location.* The following areas are temporary safety zones:

(1) *SWINOMOSH Barge safety zone:* All navigable waters within a 500-yard radius of the barge SWINOMOSH while it is engaged in dredging or blasting operations.

(2) *Ouzinkie Harbor safety zone:* All waters in Ouzinkie Harbor, excluding the SWINOMOSH Barge safety zone,

VOL 67 ISS 52 MR 18 2002 UMI

VOL

shoreward from a line drawn from 57°54′58″ N, 152°29′35″ W to 57°55′04″ N, 152°30′00″ W and ending at 57°55′12″ N, 152°30′10″ W.

(b) *Effective period.* This section is effective from 12:01 a.m. Alaska Standard Time (AST) March 13, 2002, until 9 p.m. AST April 30, 2002. Blasting and dredging operations will occur in daylight hours only during this effective period.

(c) *Regulations.* The general regulations contained in 33 CFR 165.23 apply. The attending tug WALDO will broadcast a SECURITE message on VHF–FM channels 16 and 13 prior to each blasting operation and will be standing by on these channels for traffic advisory. All vessels must have permission of the Captain of the Port to enter the safety zones in this section and must monitor broadcasts by the tug WALDO while in the zones. All vessel traffic must be clear of Ouzinkie Harbor before blasting operations may occur.

Dated: February 27, 2002.

W.J. Hutmacher,

Captain, U.S. Coast Guard, Captain of the Port, Western Alaska.

[FRL–7159–8]

National Ambient Air Quality Standards for Ozone; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: The purpose of this document is to announce that EPA has scheduled a public meeting to solicit comments on various options to implement the 8-hour ozone national ambient air quality standard (NAAQS). The options contain EPA's preliminary views and are intended to initiate a dialogue with the public on approaches for implementing the 8-hour ozone NAAQS. The EPA is interested in hearing the views from interested stakeholders on the options that we've developed and their ideas on how to best implement the 8-hour ozone NAAQS consistent with the Supreme Court's decision in *Whitman* v. *American Trucking Association.* An overarching issue that EPA would like public input on is how EPA should address the Supreme Court's holding that subpart 2 of part D of title I of the Clean Air Act (CAA) applies for purposes of classifying areas under a revised ozone NAAQS.

DATES: The one-day meeting will be held from 9:00 a.m. to 5:00 p.m. (MST) on Wednesday, April 3, 2002, in Tempe, Arizona.

ADDRESSES: The meeting will be held at: Fiesta Inn Resort, 2100 S. Priest Drive, Tempe, Arizona 85282–1192.

FOR FURTHER INFORMATION CONTACT: For general information on the meeting, contact: Denise M. Gerth, U.S. EPA, Office of Air Quality Planning and Standards, C539–02, Research Triangle Park, NC 27711, phone (919) 541–5550, or e-mail: *gerth.denise@epa.gov.* To register for the meeting, please contact: Barbara Bauer, E. H. Pechan and Associates, Durham, NC, phone (919) 493–3144, extension 188, or e-mail: *barbara.bauer@pechan.com.*

SUPPLEMENTARY INFORMATION: On July 18, 1997, EPA revised the ozone NAAQS (62 FR 38856). At that time, EPA indicated it would implement the 8-hour ozone NAAQS under the less detailed requirements of subpart 1 of part D of title I of the CAA rather than more detailed requirements of subpart 2 requirements. Various industry groups and States challenged EPA's final rule promulgating the 8-hour ozone NAAQS in the U.S. Court of Appeals for the District of Columbia Circuit.[1] In May 1999, the Appeals Court remanded the ozone standard to EPA on the basis that EPA's interpretation of its authority under the standard-setting provisions of the CAA resulted in an unconstitutional delegation of authority. *American Trucking Assns., Inc.* v. *EPA,* 175 F.3d 1027, *aff'd,* 195 F.3d 4 (D.C. Cir. 1999). In addition, the Court held that EPA improperly interpreted the statute to provide for implementation of the 8-hour standard under subpart 1, but also determined that EPA could not implement a revised ozone standard under subpart 2. The EPA sought review of these two issues by the U.S. Supreme Court. In February 2001, the Supreme Court upheld the constitutionality of the air quality standard setting. *Whitman* v. *American Trucking Assoc.,* 121 S. Ct. 903. In addition, the Supreme Court held that EPA has authority to implement a revised ozone standard but that EPA could not ignore subpart 2 when implementing the 8-hour standard. Specifically, the Court noted EPA could not ignore the provisions of subpart 2 that "eliminate[s] regulatory discretion" allowed by subpart 1. After determining that EPA could not ignore the provisions of subpart 2, the Court went on to identify several portions of the classification scheme that are "ill-fitted" to the revised standard, but left it to EPA to develop a reasonable approach for implementation. Any implementation approach that EPA develops must address the requirements of the CAA, as interpreted by the Supreme Court.

The EPA has initiated a process to obtain stakeholder feedback on options the Agency is developing for implementation of the 8-hour ozone NAAQS. The EPA plans to issue a final rule on the implementation strategy prior to designating areas for the 8-hour ozone NAAQS. The implementation rule will provide specific requirements for State and local air pollution control agencies and tribes to prepare implementation plans to attain and maintain the 8-hour NAAQS. States with areas that are not attaining the 8-hour ozone NAAQS will have to develop—as part of its State implementation plan (SIP)—emission limits and other requirements to attain the NAAQS within the time frames set forth in the CAA.[2] Tribal lands that are not attaining the 8-hour ozone standard may be affected, and could voluntarily submit a tribal implementation plan (TIP), but would not be required to submit a TIP. However, in cases where a TIP is not submitted, EPA would have the responsibility for planning in those areas.

The EPA is holding this meeting in order to obtain stakeholder feedback regarding the options that EPA has developed as well as to listen to any new or different ideas that stakeholders may be interested in presenting. The following topics will be covered at the meeting: (1) Classifications and attainment dates; (2) designations and transport; (3) attainment demonstration issues and transportation planning; and (4) other general SIP issues. New Source Review (NSR) programs that accompany nonattainment designations will not be the subject of this meeting since the EPA is currently considering whether and how to change the NSR program regulations in other contexts. The EPA has placed a variety of materials regarding implementation options, and which will be the focus of the meeting, on the website: *www.epa.gov/ttn/rto/ozonetech/o3imp8hr/o3imp8hr.htm.* Additional material will be placed on the website as they are developed.

[1] On July 18, 1997, EPA also promulgated a revised particulate matter (PM) standard (62 FR 38652). Litigation on the PM standard paralleled the litigation on the ozone standard and the court issued one opinion addressing both challenges.

[2] The CAA requires EPA to set ambient air quality standards and requires States to submit SIPs to implement those standards.

Anyone interested in attending the meeting should check the website for new material on a regular basis prior to the meetings.

The materials that are available on the website are also available at: Air and Radiation Docket and Information Center, Docket Number A–2001–31, U.S. EPA, 401 M Street, SW., Room M–1500 (Mail Code 6102), Washington, DC 20460. The docket is available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday, excluding legal holidays. A reasonable fee may be charged for copying.

Henry C. Thomas,

Acting Director, Office of Air Quality Planning and Standards.

[CA073–FON; FRL–7157–9]

Finding of Failure To Submit a Required State Implementation Plan for Particulate Matter, California—San Joaquin Valley

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to find that California failed to make a particulate matter (PM–10) nonattainment area state implementation plan (SIP) submittal required for the San Joaquin Valley Planning Area under the Clean Air Act (CAA or Act). The San Joaquin Planning Area is a serious PM–10 nonattainment area. Under the Act, states are required to submit SIPs providing for, among other things, reasonable further progress and attainment of the PM–10 national ambient air quality standards (NAAQS) in areas classified as serious. The State of California submitted a serious area plan for the San Joaquin Valley in 1997. On February 26, 2002, prior to action on the plan by EPA, the State withdrew the submittal from the Agency's consideration. As a result of that withdrawal, EPA is today finding that California failed to make the PM–10 nonattainment area SIP submittal required for the San Joaquin Valley Planning Area under the Act.

This action triggers the 18-month time clock for mandatory application of sanctions and 2-year time clock for a federal implementation plan (FIP) under the Act. This action is consistent with the CAA mechanism for assuring SIP submissions.

EFFECTIVE DATE: This action is effective as of February 28, 2002.

FOR FURTHER INFORMATION CONTACT: Celia Bloomfield, U. S. Environmental Protection Agency, Region 9, Air Division (AIR–2), 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 947–4148.

SUPPLEMENTARY INFORMATION:

I. Background

A. CAA Planning Requirements

In 1990, Congress amended the Clean Air Act to address, among other things, continued nonattainment of the PM–10 NAAQS.[1] Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q (1991). On the date of enactment of the 1990 Clean Air Act Amendments, PM–10 areas, including the San Joaquin Valley planning area, meeting the qualifications of section 107(d)(4)(B) of the amended Act, were designated nonattainment by operation of law. See 56 FR 11101 (March 15, 1991). EPA codified the boundaries of the San Joaquin Valley PM–10 nonattainment area at 40 CFR 81.305.

Once an area is designated nonattainment for PM–10, section 188 of the CAA outlines the process for classifying the area and establishing the area's attainment deadline. In accordance with section 188(a), at the time of designation, all PM–10 nonattainment areas, including the San Joaquin Valley, were initially classified as moderate.

Section 188(b)(1) of the Act provides that moderate areas can subsequently be reclassified as serious before the applicable moderate area attainment date if at any time EPA determines that the area cannot "practicably" attain the PM–10 NAAQS by the moderate area attainment deadline, December 31, 1994. On January 8, 1993 (58 FR 3334, 3337), EPA made such a determination and reclassified the San Joaquin Valley nonattainment area as serious.

In accordance with section 189(b)(2) of the Act, SIP revisions for the San Joaquin Valley addressing the requirements for serious PM–10 nonattainment areas in section 189(b) and (c) of the Act were required to be submitted by August 8, 1994 and 1994 and February 8, 1997.

The serious area PM–10 requirements, as they pertain to the San Joaquin Valley nonattainment area, include: [2]

(a) A comprehensive, accurate, and current inventory of actual emissions from all sources of the relevant pollutant, here, PM–10 and its precursors (CAA section 172(c)(3));

(b) A demonstration (including air quality modeling) that the plan will provide for attainment as expeditiously as practicable but no later than December 31, 2001, or an alternative demonstration that attainment by that date would be impracticable and that the plan provides for attainment by the most expeditious alternative date practicable (CAA section 189(b)(1)(A)(i) and (ii));

(c) Quantitative milestones that are to be achieved every 3 years and that demonstrate reasonable further progress toward attainment by December 31, 2001 (CAA section 189(c)); and

(d) Provisions to assure that the best available control measures (BACM), including best available control technology (BACT), shall be implemented no later than four years after the reclassification of the area to a serious nonattainment area (CAA section 189(b)(1)(B).

B. California's Serious Area PM–10 SIP Submittals for the San Joaquin Valley

The State of California submitted on October 12, 1994 the "San Joaquin Valley PM–10 BACM SIP Submittal" to EPA as a proposed revision to the California PM–10 SIP. On July 17, 1997, CARB submitted to EPA the serious area "PM–10 Attainment Demonstration Plan" (Serious PM–10 Plan). The 1997 Plan incorporated and superseded the 1994 San Joaquin Valley PM–10 BACM SIP (1997 Plan, p. 1–1).

II. EPA Actions Relating to the San Joaquin Valley PM–10 Nonattainment Area

As discussed further in section III below, EPA intended to propose to

[1] EPA revised the NAAQS for PM–10 on July 1, 1987 (52 FR 24672), replacing standards for total suspended particulates with new standards applying only to particulate matter up to 10 microns in diameter (PM–10). At that time, EPA established two PM–10 standards. The annual PM–10 standard is attained when the expected annual arithmetic average of the 24-hour samples for a period of one year does not exceed 50 micrograms per cubic meter (ug/m^3). The 24-hour PM–10 standard of 150 ug/m^3 is attained if samples taken for 24-hour periods have no more than one expected exceedance per year, averaged over 3 years. See 40 CFR 50.6 and 40 CFR part 50, appendix K.

Breathing particulate matter can cause significant health effects, including an increase in respiratory illness and premature death.

[2] EPA has concluded that certain moderate area PM–10 requirements continue to apply after an area has been reclassified to serious. For a more detailed discussion of the planning requirements applicable to the San Joaquin Valley and the relationship between the moderate area and serious area requirements after reclassification of the area to serious, see, e.g., 65 FR 37324 (June 14, 2000).

VOL

2002
UMI

disapprove the Serious PM–10 Plan for the San Joaquin Valley by March 1, 2002. However, just as the Agency was preparing the proposed disapproval notice for signature by the Regional Administrator and publication in the **Federal Register**, the State notified EPA that it had withdrawn the Plan from consideration by the Agency. See letter (with enclosures) from Michael Kenny, Executive Officer, California Air Resources Board, to Wayne Nastri, Regional Administrator, EPA Region 9, faxed to EPA on February 26, 2002. As a result, EPA is unable to move forward with its proposed plan disapproval.

The CAA establishes specific consequences if EPA finds that a State has failed to meet certain requirements of the CAA. Of particular relevance here is CAA section 179(a)(1), the mandatory sanctions provision. Section 179(a) sets forth four findings that form the basis for application of a sanction. The first finding, that a State has failed to submit a plan required under the CAA, is the finding relevant to this rulemaking because withdrawal of a plan is tantamount to failing to submit it.

If California has not made the required complete submittal (in this case resubmittal) within 18 months of the effective date of today's rulemaking, pursuant to CAA section 179(a) and 40 CFR 52.31, the offset sanction identified in CAA section 179(b) will be applied in the affected area. If the State has still not made a complete submission 6 months after the offset sanction is imposed, then the highway funding sanction will apply in the affected area, in accordance with 40 CFR 52.31.[3] The 18-month clock will stop and the sanctions will not take effect if, within 18 months after the date of the finding, EPA finds that the State has made a complete submittal of a plan addressing the applicable serious area PM–10 requirements for the San Joaquin Valley.

In addition, CAA section 110(c)(1) provides that EPA must promulgate a federal implementation plan (FIP) no later than 2 years after a finding under section 179(a) unless EPA takes final action to approve the submittal within 2 years of EPA's finding.

In a separate action, EPA is today also proposing to find that the San Joaquin Valley failed to attain the PM–10 NAAQS by the statutory deadline, December 31, 2001. EPA has the responsibility, pursuant to sections 179(c) and 188(b)(2) of the Act, of determining within 6 months of the applicable attainment date (i.e., June 30, 2002), whether the area has attained the annual and 24-hour NAAQS. Section 179(c)(1) of the Act provides that these determinations are to be based upon an area's "air quality as of the attainment date," and section 188(b)(2) is consistent with this requirement. Under CAA section 189(d), serious PM–10 nonattainment areas that fail to attain are required to submit within 12 months of the applicable attainment date, "plan revisions which provide for attainment of the PM–10 air quality standards and, from the date of such submission until attainment, for an annual reduction in PM–10 or PM–10 precursor emissions within the area of not less than 5 percent of the amount of such emissions as reported in the most recent inventory prepared for such area."

III. Ongoing Planning Efforts in the San Joaquin Valley

As noted above, California now has an obligation to develop and submit a new PM–10 attainment plan for the San Joaquin Valley. In order to assist in these efforts, we outline below some of the bases on which we intended to disapprove the Serious PM–10 Plan:[4]

(a) The emissions inventory is neither accurate nor comprehensive because, among other reasons, it contains no emissions for ammonia, a PM–10 precursor that contributes to PM–10 exceedances; the inventory combines together in one category a number of sources that constitute 83% of the total primary PM–10 inventory; the inventory is not representative of a number of areas in the Valley; and there is no supporting documentation for the motor vehicle emissions;

(b) The Plan does not provide for attainment of the annual standard by December 31, 2001 as evidenced by NAAQS exceedances cited in our proposed finding of failure to attain. For the 24-hour standard, the State in the Plan sought an extension of the attainment deadline to December 31, 2006 pursuant to CAA section 188(e), but did not provide the supporting documentation required by that section;

(c) The Plan does not meet the requirements of CAA section 189(b)(1)(B) and EPA guidance for best available control measures (BACM): the Plan does not provide for BACM for each significant source category; it does not document the State's selection of BACM; and the Plan's BACM commitments are not being met; and

(d) The Plan does not provide for quantitative milestones to be achieved every three years until the area is redesignated attainment and does not demonstrate reasonable further progress (RFP) toward attainment by December 31, 2001.

Efforts are underway by the State and local air district to develop a plan that will bring clean air to Valley residents as quickly as possible. EPA is committed to working closely with the State and local regulators, the regulated community, and the public to ensure that such plan is technically sound and protective of public health.

IV. Final Action

A. Rule

EPA is today making a finding that the State of California failed to submit a SIP revision addressing the CAA's serious area PM–10 requirements to attain the 24-hour and annual PM–10 NAAQS for the San Joaquin Valley PM–10 nonattainment area.

B. Effective Date Under the Administrative Procedures Act

Today's action will be effective on February 28, 2002. Under the Administrative Procedures Act (APA), 5 U.S.C. 553(d)(3), an agency rulemaking may take effect before 30 days after the date of publication in the **Federal Register** if an agency has good cause to mandate an earlier effective date. Today's action concerns a SIP submission that is already overdue and the State has been aware of applicable provisions of the CAA relating to overdue SIPs. In addition, today's action simply starts a "clock" that will not result in sanctions for 18 months, and that the State may "turn off" through the submission of a complete SIP submittal. These reasons support an effective date prior to 30 days after the date of publication.

[3] In a 1994 rulemaking, EPA established the Agency's selection of the sequence of these two sanctions: the offset sanction under section 179(b)(2) shall apply at 18 months, followed 6 months later by the highway sanction under section 179(b)(1) of the Act. EPA does not choose to deviate from this presumptive sequence in this instance. For more details on the timing and implementation of the sanctions, see 59 FR 39832 (August 4, 1994), promulgating 40 CFR 52.31, "Selection of sequence of mandatory sanctions for findings made pursuant to section 179 of the Clean Air Act."

[4] EPA's review of the 1997 Plan is based on section 189 of the CAA; EPA guidance, known as the "General Preamble," which describes EPA's preliminary views on how the Agency intends to review SIPs and SIP revisions submitted under title I of the Act, and an Addendum to the General Preamble ("Addendum") describing the Agency's preliminary views on how it intends to review SIPs and SIP revisions containing serious area PM–10 plan provisions. See "State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990," 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992) and "State Implementation Plans for Serious PM–10 Nonattainment Areas, and Attainment Date Waivers for PM–10 Nonattainment Areas Generally; Addendum to the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990," 59 FR 41998 (August 16, 1994).

C. Notice-and-Comment Under the Administrative Procedures Act

This final agency action is not subject to the notice-and-comment requirements of the APA, 5 U.S.C. 533(b). EPA believes that because of the limited time provided to make findings of failure to submit regarding SIP submissions, Congress did not intend such findings to be subject to notice-and-comment rulemaking. However, to the extent such findings are subject to notice-and-comment rulemaking, EPA invokes the good cause exception pursuant to the APA, 5 U.S.C. 553(d)(3). Notice and comment are unnecessary because no EPA judgment is involved in making a nonsubstantive finding of failure to submit SIPs required by the CAA. Furthermore, providing notice and comment would be impracticable because of the limited time provided under the statute for making such determinations. Finally, notice and comment would be contrary to the public interest because it would divert Agency resources from the critical substantive review of submitted SIPs. See 58 FR 51270, 51272, note 17 (October 1, 1993); 59 FR 39832, 39853 (August 4, 1994).

V. Administrative Requirements

A. Executive Order 12866

The Office of Management and Budget has exempted this regulatory action from Executive Order 12866, entitled "Regulatory Planning and Review."

B. Executive Order 13211

This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 Fed. Reg. 28355 (May 22, 2001)) because it is not a significant regulatory action under Executive Order 12866.

C. Executive Order 13045

Executive Order 13045, entitled Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to Executive Order 13045 because it does not involve decisions intended to mitigate environmental health or safety risks.

D. Executive Order 13132

Executive Order 13132, entitled Federalism (64 FR 43255, August 10, 1999) revokes and replaces Executive Orders 12612, Federalism and 12875, Enhancing the Intergovernmental Partnership. Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. Thus, the requirements of section 6 of the Executive Order do not apply to this rule.

E. Executive Order 13175

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

This final rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions.

This final rule will not have a significant impact on a substantial number of small entities because findings of failure to submit required SIP revisions do not by themselves create any new requirements. Therefore, I certify that this action will not have a significant economic impact on a substantial number of small entities.

G. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to private sector, of $100 million or more. Under section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that today's action does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the

VOL
67
ISS
52
MR
18
2002
UMI

aggregate, or to the private sector. The CAA provision discussed in this notice requires states to submit SIPs. This notice merely provides a finding that California has not met that requirement. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

H. National Technology Transfer and Advancement Act

Section 12 of the National Technology Transfer and Advancement Act (NTTAA) of 1995 requires Federal agencies to evaluate existing technical standards when developing a new regulation. To comply with NTTAA, EPA must consider and use "voluntary consensus standards" (VCS) if available and applicable when developing programs and policies unless doing so would be inconsistent with applicable law or otherwise impractical.

EPA believes that VCS are inapplicable to today's action because it does not require the public to perform activities conducive to the use of VCS.

I. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This rule is not a "major" rule as defined by 5 U.S.C. 804(2).

J. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 17, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Medicare and Federal Health Care Programs: Fraud and Abuse; Revisions and Technical Corrections

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Final rule.

SUMMARY: This final rule sets forth several revisions and technical corrections to the OIG regulations pertaining to fraud and abuse in Federal health care programs. This rule contains revisions and clarifications with respect to the definition of the term "item or service," the reinstatement procedures relating to exclusions resulting from a default on health education or scholarship obligations, the factors considered in determining civil money penalty amounts for patient dumping violations, and several other matters. In addition, this rule makes a number of minor technical corrections to the current regulations in order to clarify various issues and inadvertent errors appearing in the OIG's existing regulatory authorities.

EFFECTIVE DATE: These regulations are effective on April 17, 2002.

FOR FURTHER INFORMATION CONTACT: Joel J. Schaer, Office of Counsel to the Inspector General, (202) 619-0089.

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Inspector General's (OIG's) exclusion authorities are intended to protect the Federal health care programs and their beneficiaries from untrustworthy health care providers, i.e., individuals and entities whose behavior has demonstrated that they pose a risk to program beneficiaries or to the integrity of these programs. These authorities encompass both mandatory exclusions (section 1128(a) of the Social Security Act (the Act)) and permissive exclusions (section 1128(b) of the Act). The *mandatory* exclusion authorities require the OIG to exclude from program participation any individual or entity convicted of a "program-related" crime; patient abuse or neglect; or certain felonies related to health care delivery, governmental health care programs or controlled substances. Mandatory exclusions must be imposed for a minimum 5-year period. The *permissive* authorities do not require the imposition of an exclusion, and may either be (1) "derivative" exclusions that are based on actions previously taken by a court or other law enforcement or regulatory agencies, or (2) "non-derivative" exclusions that are based on OIG-initiated determinations of misconduct, e.g., poor quality care or submission of false claims for Medicare or Medicaid payment. With certain exceptions, there are no specified minimum periods of exclusion under these permissive authorities.

In addition, as an administrative remedy to remedy health care fraud and abuse, section 1128A of the Act allows the OIG to seek civil money penalties (CMPs), assessments and exclusions against those engaged in filing false claims (and certain other offenses) against the Department's programs and beneficiaries. Since enactment in 1981, the CMP provisions have been expanded to apply to numerous types of fraud and abuse activities related to Medicare and other Federal health care programs. Providers who may be subject to any of the OIG's administrative sanctions have full due process rights, including administrative hearings and appeals to the Federal courts.

On October 20, 2000, the OIG published a proposed rule in the **Federal Register** (65 FR 63035) that proposed several revisions and technical corrections to the OIG regulations codified in 42 CFR chapter V.

II. Summary of the Proposed Rule, Response to Public Comments and Provisions of the Final Rule

In response to the proposed rule, the OIG received a total of 6 timely-filed public comments from organizations, associations and other interested parties. Set forth below is a brief explanation of the intended revisions set forth in the proposed rule, a summary of the comments received and a response to those concerns, and a description of the final changes and

clarifications being made to 42 CFR chapter V as a result of this final rule.

A. Limitations Period for Exclusions

Proposed change: In response to questions raised as to whether a limitations period is applicable to the imposition of OIG program exclusions, the OIG proposed to clarify § 1001.1 to clarify that there is no time limitation on the imposition of a program exclusion. *In Wesley J. Hammer* v. *IG*, DAB 1693 (1999), the Departmental Appeals Board ruled that exclusion under section 1128(b)(7) of the Act, where such exclusion is based on an act which is described in section 1128A of the Act, is subject to the 6 year statute of limitations contained in section 1128A.

Comment/Response: The proposed rule stated that there would be no time limitation on the OIG's imposition of a program exclusion since no statute of limitations is specified in the Act with respect to exclusions under section 1128, and program exclusions are remedial in nature. Two commenters questioned this interpretation. The commenters suggested that if a program exclusion is based on the Secretary's determination that there has been a violation of another statute, the program exclusion action should be subject to the same limitations period that would apply to an action taken under the other statute. If not, the commenters believed that an individual or entity could be excluded for activities that occurred years before and that do not bear on their current trustworthiness or integrity. In addition, the commenters expressed concern that after the passage of significant time, evidence becomes difficult or impossible to gather and thus there is a need for a statute of limitations with respect to the imposition of program exclusions.

The comments raise concerns about exclusions under section 1128(b)(7) of the Act, the only exclusion authority that is based upon the Secretary's determination that there was an act committed that is a violation of another statute.[1] Based on the concerns raised by the commenters, the OIG has chosen not to finalize the proposed revision, but to leave the current regulation unchanged.

B. Actual Versus Reasonably Expected Loss

Proposed change: With regard to financial loss and threshold amounts with respect to exclusion actions, we proposed to revise §§ 1001.102(b)(1) and 1001.201(b)(2)(i) to increase the financial loss considered to be an aggravating factor from $1,500 to $5,000 to more properly reflect the current health care economy and establish a more reasonable threshold amount as a basis for lengthening a period of exclusion, and to reflect as an aggravating factor both the actual and intended loss to the programs associated with the conduct of the sanctioned individual or entity. The OIG received two public comments on this proposed revision.

Comment: Commenters objected to allowing "intended loss" to be considered as an aggravating factor, asserting that the concept of intent is subjective and allows for speculation and difficulty in questions of proof and defense. They indicated that while an objective approach is used to determine whether an actual loss has occurred, it is subjective to determine whether an individual or entity intended to cause a loss when no actual loss has occurred. One commenter indicated that an internal OIG decision should not carry the same weight as a decision that was adjudicated by a third party. Because the OIG would be able to consider "intended losses" based on "similar acts not adjudicated," commenters believed the OIG would have significant latitude to give weight to "unsubstantiated allegations, charges supported by inadmissible evidence, statements that have not been subject to cross-examination * * *" that would not be supported by the judicial process.

Response: We have clarified and amended the proposed change to this section to provide that the OIG will consider acts "that caused, or reasonably could have been expected to cause, a financial loss. * * *" The purpose of this provision is to consider the magnitude of the individual or entity's conduct when determining the appropriate length of exclusion. The trustworthiness of an individual or entity relates to the amount of loss their conduct reasonably could have been expected to cause, regardless of whether the conduct was discovered before or after the payment was made. For example, the fact that a Medicare contractor detected a false claim prior to payment, and therefore no loss was incurred by the program, does not reduce the culpability and untrustworthiness of those responsible for the submission of the false claim.

The OIG intends to consider "reasonably expected loss" only in those situations where there is adequate reliable evidence to discern the amounts that would have been paid as a result of the individual's or entity's false claim or other improper conduct had the conduct not been detected prior to the payment of the claims.

Comment: Regarding the proposed increase of the threshold amount for an aggravating factor to $5,000 (from $1,500), one commenter asked whether the $5,000 amount would also apply to intended loss as well as to actual loss. The commenter also questioned whether the higher threshold amount would mean that prosecution would not be pursued if the loss is less than $5,000.

Response: We will consider the total reasonably expected loss in assessing whether this $5,000 threshold has been met for the purpose of determining the length of exclusion. This threshold is only relevant to determine the length of exclusion and has no relationship with a prosecutor's decision or whether to pursue certain cases.

Final rule revision: We are revising the language in §§ 1001.102(b)(1) and 1001.201(b)(2)(i) to indicate that among the factors that may be considered to be aggravating and a basis for lengthening the period of exclusion are acts resulting in the conviction, or similar acts, "that caused, or reasonably could have been expected to cause, a financial loss" to a Government program or to one or more entities of $5,000 or more.

C. Expansion of the Scope of Exclusion to "all Federal Health Care Programs"

Proposed change: Section 4331(c) of the Balanced Budget Act (BBA) of 1997 extended the scope of all OIG exclusions beyond Medicare and State health care programs to all Federal health care programs. While several revisions to implement this expansion were made to the OIG exclusion regulations in the final rulemaking addressing BBA (July 22,1999; 64 FR 39420), conforming revisions were not made in §§ 1001.102(c), 1001.951 and 1001.952. We proposed to amend these regulatory sections to accurately reflect this expanded authority. The OIG received no public comments on this proposed change.

Final rule revision: We are revising §§ 1001.102(c), 1001.951 and 1001.952 to accurately reflect the scope of an OIG exclusion beyond the Medicare and State health care programs to all other Federal health care programs.

D. Clarification on Length of Exclusion in § 1001.102(b)(9)

Proposed change: The OIG proposed a minor technical change in § 1001.102 that would have involved inserting the word "even" before the limiting clause "if the adverse action is based on the

[1] Section 1128(b)(7) provides the authority to permissively exclude an individual or entity for fraud, kickbacks or other prohibited activities.

VOL
67
ISS
52
MR
18
2002
UMI

same " * * * " in existing paragraph (b)(9) of this section.

Comment: One commenter believed that the effect of this change would be that the exclusion period could be lengthened based on an adverse action, whether or not the action served as the basis of the imposition of the exclusion.

Response: Upon further review, the OIG has decided not to make this change to § 1001.102(b)(9).

E. Discount Safe Harbor

Proposed change: We proposed several clarifying wording changes in the safe harbor discount provision, set forth in § 1001.952(h), to be consistent with similar context language used in the same paragraph, and clarifying the definition of the term "rebate" in paragraph (h)(4) of this section to make clear that a rebate is a price reduction after the time of sale.

Comment/Response: We received several comments regarding these proposed revisions and clarifications to § 1001.952(h) and other technical corrections to our other safe harbor regulations. The OIG is continuing to evaluate these comments and plans to address specific changes to § 1001.952 at a future date through separate rulemaking.

Final rule revision: As indicated above in section II.C., at this time we are only revising those portions of § 1001.952 to correct technical errors appearing in the regulations text to extend the scope of any OIG exclusion beyond the Medicare and State health care programs to all other Federal health care programs.

F. Reinstatement of Individuals as a Result of an Exclusion Based on Default of Health Education Loan or Scholarship Obligations

Proposed change: The current regulation at § 1001.1501 provides that an individual will be excluded until the Public Health Service (PHS) notifies the OIG that the obligations have been resolved to the PHS's satisfaction. Because the regulatory language is unclear as to exactly when a determination may be made that a default is cured or that the financial obligations have been adequately resolved, the proposed rule provided for exclusion "until such time as PHS notifies the OIG that . . . there is no longer an outstanding debt." Specifically, we proposed to revise paragraph (b) of this section to clarify that once an individual is excluded, he or she will be reinstated only (1) after the debt is repaid by the individual, or (2) where there is no longer an outstanding debt as determined by the PHS (e.g., the debt has been written off).

Comment: One commenter believed it was unclear what effect the changing of "right to request reinstatement" in the current rule to "right to apply for reinstatement" in the proposed rule will be. The commenter requested that any revision should minimize the administrative delay in reinstating such individuals once the PHS has concluded that there is no longer an outstanding debt.

Response: This is a minor revision concerning internal communications between PHS and the OIG that will cause no administrative delays in allowing individuals eligible to apply for reinstatement. All individuals who have been excluded under this authority must formally apply for such reinstatement in accordance with the procedures that are set forth in their exclusion letter and the applicable regulations.

Final rule revision: We are clarifying and revising § 1001.1501 to indicate that, with respect to an exclusion resulting from the default of a health education loan or scholarship obligations, an individual will be excluded until such time as PHS notifies the OIG that the default has been cured or that there is no longer an outstanding debt, and upon such notice, the OIG will inform the individual of his or her right to apply for reinstatement.

G. Waivers of Exclusions

Proposed change: We proposed to amend § 1001.1801 to permit any Federal health care program to request the waiver of an exclusion. This amendment was designed to conform the waiver provisions of section 1128 of the Act to statutory amendments that broadened the scope of an OIG program exclusion to all Federal health care programs.

Response: While the OIG received no public comments on this proposed change, we have determined that this revision would be more appropriately addressed through the legislative process. Although Congress expanded the OIG's exclusion authority in the Health Insurance Portability and Accountability Act (Pub. L. 104–191) to all "Federal health care programs," it did not make a corresponding change to the statutory waiver for exclusions (sections 1128(c)(3)(B) and 1128(d)(3)(B) of the Act), *i.e.*, only States are authorized to request such waivers. We now believe that legislative action, rather than a regulatory change, is necessary to address this issue.

H. Collateral Estoppel and Appeal of Exclusions

Proposed change: Section 1001.2007 has contained a provision that precludes the relitigation of the underlying determination in the administrative appeal of exclusions. We proposed to clarify in this section that a civil judgment rendered by a Federal, State or local court is an additional type of prior determination that may be given collateral estoppel effect in an exclusion action, and may not be relitigated in the exclusion proceeding. The OIG received no public comments on this proposed change.

Final rule revision: We are revising § 1001.2007(d) consistent with the language set forth in the earlier proposed rule.

I. Reversed or Vacated Decisions

Proposed change: With respect to appeals of exclusions, § 1001.3005 does not specify at what point in the appeal process reinstatement will occur where an OIG action is reversed or vacated on appeal. We proposed to amend this section to provide that when an exclusion action is reversed or vacated at any stage of an administrative appeal process, the OIG will reinstate the individual or entity at that time retroactive to the effective date of the underlying exclusion. The OIG received no public comments on this proposed change.

Final rule revision: We are amending § 1001.3005, Reversed or vacated decisions, by revising paragraph (a) and adding a new paragraph (e) to specify at what point in the appeal process retroactive reinstatement will occur.

J. Definition for "Item or Service"

Proposed change: To reflect the varying reimbursement systems and mechanisms in place, we proposed to modify the definition of the term "item or service" in § 1003.101 to clarify that, in addition to itemized claims or cost reports, the term also includes any item or service that is reimbursed through any health care payment mechanism, such as a prospective payment system. The OIG received no public comments on this revised definition.

Final rule revision: The OIG is adopting the change as proposed.

K. Calculation of Penalty Amount for Patient Dumping Violations

Proposed change: The existing language in § 1003.106(a)(4) allows the OIG to take into account a "prior history of offenses" with respect to patient dumping in determining the amount of CMP imposed for a patient dumping violation. We proposed an amendment to § 1003.106(a)(4)(iii) that would allow the OIG and the administrative law judge (ALJ) to consider other "instances"—and not just "offenses"—regardless of when they occurred, that is, not just "prior to" the matter conduct upon which the CMP action is based.

Comment: Commenters expressed the view that CMP amounts in patient dumping cases should be based only on judgments and other actions which have been adjudicated, such as convictions or administrative sanctions. The commenters believed that allowing the OIG the authority to "bypass" courts and the administrative appeals process would penalize physicians for alleged behavior that has not been ruled upon by a court or an ALJ. One commenter stated that in determining CMP amounts under this provision, the OIG should only be allowed to cite subsequent offenses to the same extent that the OIG now considers prior offenses. Without such limitation, the commenter believed that physicians' due process rights would be violated since they would not be able to contest the underlying alleged behavior.

Response: In assessing the appropriate CMP amount in a dumping case, we continue to believe that it is appropriate to include matters which occurred after the events that resulted in the OIG's issuance of a letter to a provider proposing a CMP. Specifically, with respect to the provider's "prior history," we have found instances, which may occur several years later between the time of the initial event and the initiation of litigation, where a provider has committed other acts similar in nature to the violation that is the basis for the proposed CMP. The OIG believes that those other similar acts should be considered so that an appropriate CMP can be determined and assessed. By considering not just "prior history" as a factor, an appropriate penalty may be higher, for example, for a party with multiple instances of problematic conduct, as compared to a party who has only one such instance.

With respect to amending the current reference of "offenses" to "instances," we believe that the current term restricts consideration of incidents that are relevant to the provider's culpability but have not resulted in convictions, or judicial or administrative decisions. Because these prior similar incidents generally become known during the administrative appeals process, we believe that the term "offenses" is too limiting, and that the revision in the regulations will allow the OIG and the ALJs a broader range of conduct and options to consider in their determinations. The primary concerns expressed by the commenter do not apply because the ALJ will be able to fully evaluate all evidence in the record in deciding the amount of a CMP and give appropriate weight to such evidence. When the OIG is able to consider subsequent instances of conduct by the provider, the ALJ, Departmental Appeals Board and the courts will still remain free to accept or reject this additional information and evidence in determining an appropriate CMP amount.

Final rule revision: We are amending § 1003.106 by adding a new paragraph (a)(4)(iii) to include as a factor in determining the amount of penalty for patient dumping violations any other instances where the respondent failed to provide appropriate emergency medical screening, stabilization and treatment of individuals coming to a hospital's emergency department, or to effect an appropriate transfer.

L. Time Frames Governing the Discovery Process

Proposed change: To ensure that the hearing process proceeds in an orderly and timely manner, and to allow parties a reasonable period of time to produce requested documents or object to a request, we proposed to expand the specified time frames set forth in § 1005.7(e)(1) from the current 15 days to 30 days. The OIG received no public comments on this proposed change.

Final rule revision: We are revising § 1005.7(e)(1) to expand the specified time frames governing the discovery process to 30 days.

M. Written Testimony of Experts

Proposed change: We proposed to amend § 1005.16 to give the ALJs discretion to admit prior written sworn expert testimony that has been subject to cross-examination. The OIG received no public comments on this proposed revision.

Final rule revision: We are revising paragraph (b) of § 1005.16, Witnesses, to specifically state that the ALJ may, at his or her discretion, admit prior sworn testimony of experts which has been subject to adverse examination, such as a deposition or trial testimony.

N. Admissibility of Evidence in Administrative Proceedings

Proposed change: In order to protect the credibility of witnesses from being inappropriately attacked through the introduction of evidence regarding bad character, we proposed to amend § 1005.17, Evidence, to require adherence to Rule 608 of the Federal Rules of Evidence (FRE) in administrative proceedings.

Response: While the OIG received no public comments on this proposed change, there is a concern that requiring ALJs to apply specific evidentiary rules in an administrative hearing would unnecessarily restrict the evidence the ALJ may consider. The OIG will continue to evaluate the scope of this amendment, and has chosen not to finalize the proposed revision to § 1005.17 at this time.

O. Additional Technical Revisions

Proposed changes: Minor technical errors in §§ 1003.100 and 1008.37 were also proposed for correction in the proposed rule. The OIG received no public comments on this proposed change.

Final rule revisions: We are making technical revisions to § 1003.100(b) to properly reflect the basis and purpose of the OIG's CMP and assessment authorities that were set forth in two different OIG rulemakings. Specifically, we are amending § 1003.100 by revising paragraphs (b)(1)(iv), (b)(1)(xii) and (b)(1)(xiii), and by adding paragraphs (b)(1)(xiv) and (b)(1)(xv) to accurate reflect the range of existing CMP and assessment authorities delegated to the OIG . In addition, we are correcting a typographical error appearing for a United States Code citation which appears in § 1008.37, as indicated in the proposed rule.

III. Regulatory Impact Statement

We have examined the impacts of this rule as required by Executive Order 12866 September 1993, Regulatory Planning and Review) and the Regulatory Flexibility Act (RFA) (September 19, 1980; Public Law 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Public Law 104–4), and Executive Order 13132. Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any given year).

This is not a major rule as defined at 5 U.S.C. 804 (2), and it is not economically significant since it will not have a significant effect on program expenditures and there are no additional substantive costs to implement the resulting provisions. The revisions in this rule are either technical in nature or are designed to further

VOL
67
ISS
52
MR

2002
UMI

clarify OIG statutory requirements. Specifically, these provisions are intended to clarify the scope of the OIG's existing authorities to exclude individuals and entities from Medicare, Medicaid and all other Federal health care programs, and to strengthen current legal authorities pertaining to the imposition of CMPs against individuals and entities engaged in prohibited actions and activities. We believe that any aggregate economic effect of these revised regulatory provisions will be minimal and will impact only those limited few who engage in prohibited behavior in violation of the statute. As such, we believe that the aggregate economic impact of these final regulations is minimal and would have no appreciable effect on the economy or on Federal or State expenditures.

The RFA, and the Small Business Regulatory Enforcement and Fairness Act of 1996 which amended the RFA, requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and Government agencies. Most hospitals (and most other providers) are considered to be small entities, either by nonprofit status or by having revenues of $5 million to $25 million or less in any 1 year. Individuals and States are not included in the definition of a small entity.

In addition, section 1102(b) of the Social Security Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural providers. This analysis must conform to the provisions of section 604 of the RFA. While these provisions may have some impact on small entities and rural providers, we believe that the aggregate economic impact of this rulemaking will be minimal since it is the nature of the conduct and not the size or type of the entity that will result in a violation of the statute and the regulations. As a result, this rule should not have a significant impact on a substantial number of small entities, or a significant impact on the operations of a substantial number of small rural providers.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditure in any 1 year by State, local or tribal Governments, in the aggregate, or by the private sector, of $110 million. We believe that there are no significant costs associated with these revisions that would impose any mandates on State, local or tribal governments, or the private sector that will result in an expenditure of $110 million or more (adjusted for inflation) in any given year.

Executive Order 13132, Federalism, establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct requirements costs on State and local Governments, preempts State law, or otherwise has Federalism implications. In reviewing this rule under the threshold criteria of Executive Order 13132, we have determined that this rule will not significantly effect the rights, roles and responsibilities of States or local Governments. The Office of Management and Budget has reviewed this rule in accordance with Executive Order 12866. In *Paperwork Reduction Act*—The provisions of these regulations impose no new reporting or recordkeeping requirements necessitating clearance by OMB.

List of Subjects

42 CFR Part 1001

Administrative practice and procedure, Fraud, Health facilities, Health professions, Medicaid, Medicare.

42 CFR Part 1003

Administrative practice and procedure, Fraud, Grant programs-health, Health facilities, Health professions, Maternal and child health, Medicaid, Medicare, Penalties.

42 CFR Part 1005

Administrative practice and procedure, Fraud, Penalties.

42 CFR Part 1008

Administrative practice and procedure, Fraud, Grant programs-health, Health facilities, Health professions, Medicaid, Medicare, Penalties.

Accordingly, 42 CFR chapter V is amended as set forth below:

PART 1001—[AMENDED]

1. The authority citation for part 1001 continues to read as follows:

Authority: 42 U.S.C. 1302, 1320a–7, 1320a–7b, 1395u(h), 1395u(j), 1395u(k), 1395y(d), 1395y(e), 1395cc(b)(2)(D), (E) and (F), and 1395hh; and sec. 2455, Pub. L. 103–355, 108 Stat. 3327 (31 U.S.C. 6101 note).

2. Section 1001.101 is amended by republishing the introductory text and by revising paragraph (c), introductory text, to read as follows:

§ 1001.101 Basis for liability.

The OIG will exclude any individual or entity that—

* * * * *

(c) Has been convicted, under Federal or State law, of a felony that occurred after August 21, 1996, relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct—

* * * * *

3. Section 1001.102 is amended by republishing the introductory text for paragraph (b) and revising paragraph (b)(1), and by republishing the introductory text for paragraph (c) and revising paragraph (c)(1) to read as follows:

§ 1001.102 Length of exclusion.

* * * * *

(b) Any of the following factors may be considered to be aggravating and a basis for lengthening the period of exclusion—

(1) The acts resulting in the conviction, or similar acts, that caused, or were intended to cause, a financial loss to a Government program or to one or more entities of $5,000 or more. (The entire amount of financial loss to such programs or entities, including any amounts resulting from similar acts not adjudicated, will be considered regardless of whether full or partial restitution has been made);

* * * * *

(c) Only if any of the aggravating factors set forth in paragraph (b) of this section justifies an exclusion longer than 5 years, may mitigating factors be considered as a basis for reducing the period of exclusion to no less than 5 years. Only the following factors may be considered mitigating—

(1) The individual or entity was convicted of 3 or fewer misdemeanor offenses, and the entire amount of financial loss (both actual loss and intended loss) to Medicare or any other Federal, State or local governmental health care program due to the acts that resulted in the conviction, and similar acts, is less than $1,500;

* * * * *

4. Section 1001.201 is amended by republishing the introductory text for paragraphs (b) and (b)(2) and revising paragraph (b)(2)(i), and by republishing the introductory text for paragraph (b)(3) and revising paragraph (b)(3)(i) to read as follows:

§ 1001.201 Conviction relating to program or health care fraud.

* * * * *

(b) *Length of exclusion.* * * *

(2) Any of the following factors may be considered to be aggravating and a basis for lengthening the period of exclusion—

(i) The acts resulting in the conviction, or similar acts that caused,

or reasonably could have been expected to cause, a financial loss of $5,000 or more to a Government program or to one or more other entities, or had a significant financial impact on program beneficiaries or other individuals. (The total amount of financial loss will be considered, including any amounts resulting from similar acts not adjudicated, regardless of whether full or partial restitution has been made);

* * * * *

(3) Only the following factors may be considered as mitigating and a basis for reducing the period of exclusion—

(i) The individual or entity was convicted of 3 or fewer offenses, and the entire amount of financial loss (both actual loss and reasonably expected loss) to a Government program or to other individuals or entities due to the acts that resulted in the conviction and similar acts is less than **$1,5000**;

* * * * *

5. Section 1001.951 is amended by revising paragraph (b)(1)(ii) to read as follows:

§ 1001.951 Fraud and kickbacks and other prohibited activities.

* * * * *

(b) * * *

(1) * * *

(ii) The nature and extent of any adverse physical, mental, financial or other impact the conduct had on program beneficiaries or other individuals or the Medicare, Medicaid and all other Federal health care programs;

* * * * *

6. Section 1001.952 is amended as follows:

a. By republishing the introductory text;

b. Republishing the introductory text to paragraph (b), revising paragraph (b)(5), removing the undesignated paragraph following paragraph (b)(6), and adding a sentence at the end of paragraph (b)(6);

c. Republishing the introductory text to paragraph (c), revising paragraph (c)(5), removing the undesignated paragraph following paragraph (c)(6), and adding a sentence at the end of paragraph (c)(6);

d. Republishing the introductory text to paragraph (d) and revising paragraph (d)(5);

e. Republishing introductory text to paragraph (e)(1) and revising paragraph (e)(1)(ii);

f. Republishing introductory text to paragraph (e)(2) and revising paragraph (e)(2)(ii);

g. Republishing introductory text to paragraph (f) and revising paragraph (f)(2);

h. Revising introductory text to paragraph (h); introductory text to paragraph (h)(1) and introductory text to paragraph (h)(1)(iii); introductory text to paragraph (h)(2); introductory text to paragraph (h)(3) and introductory text to paragraph (h)(3)(iii); and paragraph (h)(5)(iii);

i. Revising paragraph (i);

j. Republishing the introductory text to paragraph (j), adding a sentence at the end of paragraph (j)(2), and removing the undesignated paragraph following paragraph (j)(2);

k. Republishing introductory text to paragraph (n) and revising paragraph (n)(6);

l. Republishing introductory text to paragraph (o) and revising paragraph (o)(5); and

m. Revising introductory text for paragraph (s).

The revisions to § 1001.952 read as follows:

§ 1001.952 Exceptions.

The following payment practices shall not be treated as a criminal offense under section 1128B of the Act and shall not serve as the basis for an exclusion:

* * * * *

(b) *Space rental.* As used in section 1128B of the Act, "remuneration" does not include any payment made by a lessee to a lessor for the use of premises, as long as all of the following six standards are met—

* * * * *

(5) The aggregate rental charge is set in advance, is consistent with fair market value in arms-length transactions and is not determined in a manner that takes into account the volume or value of any referrals or business otherwise generated between the parties for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs.

(6) * * * Note that for purposes of paragraph (b) of this section, the term *fair market value* means the value of the rental property for general commercial purposes, but shall not be adjusted to reflect the additional value that one party (either the prospective lessee or lessor) would attribute to the property as a result of its proximity or convenience to sources of referrals or business otherwise generated for which payment may be made in whole or in part under Medicare, Medicaid and all other Federal health care programs.

* * * * *

(c) *Equipment rental.* As used in section 1128B of the Act, "remuneration" does not include any payment made by a lessee or equipment to the lessor of the equipment for the use of the equipment, as long as all of the following six standards are met—

* * * * *

(5) The aggregate rental charge is set in advance, is consistent with fair market value in arms-length transactions and is not determined in a manner that takes into account the volume or value of any referrals or business otherwise generated between the parties for which payment may be made in whole or in part under Medicare, Medicaid or all other Federal health care programs.

(6) * * * Note that for purposes of paragraph (c) of this section, the term *fair market value* means that the value of the equipment when obtained from a manufacturer or professional distributor, but shall not be adjusted to reflect the additional value one party (either the prospective lessee or lessor) would attribute to the equipment as a result of its proximity or convenience to sources of referrals or business otherwise generated for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs.

(d) *Personal services and management contracts.* A used in section 1128B of the Act, "remuneration" does not include any payment made by a principal to an agent as compensation for the services of the agent, as long as all of the following seven standards are met—

* * * * *

(5) The aggregate compensation paid to the agent over the term of the agreement is set in advance, is consistent with fair market value in arms-length transactions and is not determined in a manner that takes into account the volume or value of any referrals or business otherwise generated between the parties for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs.

* * * * *

(e) *Sale of practice.* (1) As used in section 1128B of the Act, "remuneration" does not include any payment made to a practitioner by another practitioner where the former practice is selling his or her practice to the latter practitioner, as long as the following two standards are met—

* * * * *

(ii) The practitioner who is selling his or her practice will not be in a professional position to make referrals to, or otherwise generate business for, the purchasing practitioner for which payment may be made in whole or in

VOL 67 ISS 52 MR 18 2002 UMI

part under Medicare, Medicaid or other Federal health care programs after 1 year from the date of the first agreement pertaining to the sale.

(2) As used in section 1128B of the Act, "remuneration" does not include any payment made to a practitioner by a hospital or other entity where the practitioner is selling his or her practice to the hospital or other entity, so long as the following four standards are met—

* * * * *

(ii) The practitioner who is selling his or her practice will not be in a professional position after completion of the sale to make or influence referrals to, or otherwise generate business for, the purchasing hospital or entity for which payment may be made under Medicare, Medicaid or other Federal health care programs.

* * * * *

(f) *Referral services.* As used in section 1128B of the Act, "remuneration" does not include any payment or exchange of anything of value between an individual or entity ("participant") and another entity serving as a referral service ("referral service"), as long as all of the following four standards are met—

* * * * *

(2) Any payment the participant makes to the referral service is assessed equally against and collected equally from all participants, and is only based on the cost of operating the referral service, and not on the volume or value of any referrals to or business otherwise generated by either party for the referral service for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs.

* * * * *

(h) *Discounts.* As used in section 1128B of the Act, "remuneration" does not include a discount, as defined in paragraph (h)(5) of this section, on an item or service for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs for a buyer as long as the buyer complies with the applicable standards of paragraph (h)(1) of this section; a seller as long as the seller complies with the applicable standards of paragraph (h)(2) of this section; and an offeror of a discount who is not a seller under paragraph (h)(2) of this section so long as such offeror complies with the applicable standards of paragraph (h)(3) of this section.

(1) With respect to the following three categories of buyers, the buyer must comply with all of the applicable standards within one of the three following categories—

* * * * *

(iii) If the buyer is an individual or entity in whose name a claim or request for payment is submitted for the discounted item or service and payment may be made, in whole or in part, under Medicare, Medicaid or other Federal health care programs (not including individuals or entities defined as buyers in paragraph (h)(1)(i) or (h)(1)(ii) of this section), the buyer must comply with both of the following standards—

* * * * *

(2) The seller is an individual or entity that supplies an item or service for which payment may be made, in whole or in part, under Medicare, Medicaid or other Federal health care programs to the buyer and who permits a discount to be taken off the buyer's purchase price. The seller must comply with all of the applicable standards within one of the following three categories—

* * * * *

(3) The offeror of a discount is an individual or entity who is not a seller under paragraph (h)(2) of this section, but promotes the purchase of an item or service by a buyer under paragraph (h)(1) of this section at a reduced price for which payment may be made, in whole or in part, under Medicare, Medicaid or other Federal health care programs. The offeror must comply with all of the applicable standards within the following three categories—

* * * * *

(iii) If the buyer is an individual or entity in whose name a request for payment is submitted for the discounted item or service and payment may be made, in whole or in part, under Medicare, Medicaid or other Federal health care programs (not including individuals or entities defined as buyers in paragraph (h)(1)(i) or (h)(1)(ii) of this section), the offeror must comply with the following two standards—

* * * * *

(5) * * *

(iii) A reduction in price applicable to one payer but not to Medicare, Medicaid or other Federal health care programs;

* * * * *

(i) *Employees.* As used in section 1128B of the Act, "remuneration" does not include any amount paid by an employer to an employee, who has a bona fide employment relationship with the employer, for employment in the furnishing of any item or service for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs. For purposes of paragraph (i) of this section, the term *employee* has the same meaning as it does for purposes of 26 U.S.C. 3121(d)(2).

(j) *Group purchasing organizations.* As used in section 1128B of the Act, "remuneration" does not include any payment by a vendor of goods or services to a group purchasing organization (GPO), as part of an agreement to furnish such goods or services to an individual or entity, as long as both of the following two standards are met—

* * * * *

(2) * * * Note that for purposes of paragraph (j) of this section, the term *group purchasing organization* (GPO) means an entity authorized to act as a purchasing agent for a group of individuals or entities who are furnishing services for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs, and who are neither wholly-owned by the GPO nor subsidiaries of a parent corporation that wholly owns the GPO (either directly or through another wholly-owned entity).

* * * * *

(n) *Practitioner recruitment.* As used in section 1128B of the Act, "remuneration" does not include any payment or exchange of anything of value by an entity in order to induce a practitioner who has been practicing within his or her current specialty for less than 1 year to locate, or to induce any other practitioner to relocate, his or her primary place of practice into a HPSA for his or her specialty area, as defined in Departmental regulations, that is served by the entity, as long as all of the following nine standards are met—

* * * * *

(6) The amount or value of the benefits provided by the entity may not vary (or be adjusted or renegotiated) in any manner based on the volume or value of any expected referrals to or business otherwise generated for the entity by the practitioner for which payment may be made in whole or in part under Medicare, Medicaid or any other Federal health care programs.

* * * * *

(o) *Obstetrical malpractice insurance subsidies.* As used in section 1128B of the Act, "remuneration" does not include any payment made by a hospital or other entity that is providing malpractice insurance (including a self-funded entity), where such payment is used to pay for some or all of the costs of malpractice insurance premiums for a practitioner (including a certified nurse-midwife as defined in section

1861(gg) of the Act) who engages in obstetrical practice as a routine part of his or her medical practice in a primary care HPSA, as long as all of the following seven standards are met—

* * * * *

(5) The amount of payment may not vary based on the volume or value of any previous or expected referrals to or business otherwise generated for the entity by the practitioner for which payment may be made in whole or in part under Medicare, Medicaid or any other Federal health care programs.

* * * * *

(s) *Referral arrangements for specialty services.* As used in section 1128B of the Act, "remuneration" does not include any exchange of value among individuals and entities where one party agrees to refer a patient to the other party for the provision of a specialty service payable in whole or in part under Medicare, Medicaid or any other Federal health care programs in return for an agreement on the part of the other party to refer that patient back at a mutually agreed upon time or circumstance as long as the following four standards are met—

* * * * *

7. Section 1001.1501 is amended by revising paragraph (b) to read as follows:

§ 1001.1501 Default of health education loan or scholarship obligations.

* * * * *

(b) *Length of exclusion.* The individual will be excluded until such time as PHS notifies the OIG that the default has been cured or that there is no longer an outstanding debt. Upon such notice, the OIG will inform the individual of his or her right to apply for reinstatement.

8. Section 1001.2007 is amended by revising paragraph (d) to read as follows:

§ 1001.2007 Appeal of exclusions.

* * * * *

(d) When the exclusion is based on the existence of a criminal conviction or a civil judgment imposing liability by Federal, State or local court, a determination by another Government agency, or any other prior determination where the facts were adjudicated and a final decision was made, the basis for the underlying conviction, civil judgment or determination is not reviewable and the individual or entity may not collaterally attack it either on substantive or procedural grounds in this appeal.

* * * * *

9. Section 1001.3005 is amended by revising paragraph (a) and by adding a new paragraph (e) to read as follows:

§ 1001.3005 Reversed or vacated decisions.

(a) An individual or entity will be reinstated into Medicare, Medicaid and other Federal health care programs retroactive to the effective date of the exclusion when such exclusion is based on—

(1) A conviction that is reversed or vacated on appeal;

(2) An action by another agency, such as a State agency or licensing board, that is reversed or vacated on appeal; or

(3) An OIG exclusion action that is reversed or vacated at any stage of an individual's or entity's administrative appeal process.

* * * * *

(e) If an action which results in the retroactive reinstatement of an individual or entity is subsequently overturned, the OIG may reimpose the exclusion for the initial period of time, less the period of time that was served prior to the reinstatement of the individual or entity.

PART 1003—[AMENDED]

1. The authority citation for part 1003 continues to read as follows:

Authority: 42 U.S.C. 1302, 1320a–7, 1320a–7a, 1320a–7e, 1320b–10, 1395u(j), 1395u(k), 1395cc(g),1395dd(d)(1), 1395mm, 1395nn(g), 1395ss(d), 1396b(m), 11131(c) and 11137(b)(2).

2. Section 1003.100 is amended by revising paragraphs (b)(1)(iv), (b)(1)(xii) and (b)(1)(xiii); and by adding paragraphs (b)(1)(xiv) and (b)(1)(xv) to read as follows:

§ 1003.100 Basis and purpose.

* * * * *

(b) * * *

(1) * * *

(iv)(A) Fail to report information concerning medical malpractice payments or who improperly disclose, use or permit access to information reported under part B of title IV of Public Law 99–660, and regulations specified in 45 CFR part 60, or

(B) Are health plans and fail to report information concerning sanctions or other adverse actions imposed on providers as required to be reported to the Healthcare Integrity and Protection Data Bank (HIPDB) in accordance with section 1128E of the Act;

* * * * *

(xii) Offer inducements that they know or should know are likely to influence Medicare or State health care program beneficiaries to order or receive particular items or services;

(xiii) Are physicians who knowingly misrepresent that a Medicare beneficiary requires home health services;

(xiv) Have submitted, or caused to be submitted, certain prohibited claims, including claims for services rendered by excluded individuals employed by or otherwise under contract with such person, under one or more Federal health care programs; or

(xv) Violate the Federal health care programs' anti-kickback statute as set forth in section 1128B of the Act.

* * * * *

3. Section 1003.101 is amended by republishing the introductory text and by revising the definition for the term *item or service* to read as follows:

§ 1003.101 Definitions.

For purposes of this part:

* * * * *

Item or service includes—

(a) any item, device, medical supply or service provided to a patient (i) which is listed in an itemized claim for program payment or a request for payment, or (ii) for which payment is included in other Federal or State health care reimbursement methods, such as a prospective payment system; and

(b) in the case of a claim based on costs, any entry or omission in a cost report, books of account or other documents supporting the claim.

* * * * *

4. Section 1003.106 is amended by republishing the introductory text for paragraphs (a) and (a)(4) and by revising paragraphs (a) and (a)(4)(iii) to read as follows:

§ 1003.106 Determinations regarding the amount of the penalty and assessment.

(a) *Amount of penalty.* * * *

(4) In determining the amount of any penalty in accordance with § 1003.102(c), the OIG takes into account—

(iii) Any other instances where the respondent failed to provide appropriate emergency medical screening, stabilization and treatment of individuals coming to a hospital's emergency department or to effect an appropriate transfer;

* * * * *

PART 1005—[AMENDED]

1. The authority citation for part 1005 continues to read as follows:

Authority: 42 U.S.C. 405(a), 405(b), 1302, 1320a–7, 1320a–7a and 1320c–5.

VOL
67
ISS
52
MR
18
2002
UMI

2. Section 1005.7 is amended by revising paragraph (e)(1) to read as follows:

§ 1005.7 Discovery.

* * * * *

(e)(1) When a request for production of documents has been received, within 30 days the party receiving that request will either fully respond to the request, or state that the request is being objected to and the reasons for that objection. If objection is made to part of an item or category, the part will be specified. Upon receiving any objections, the party seeking production may then, within 30 days or any other time frame set by the ALJ, file a motion for an order compelling discovery. (The party receiving a request for production may also file a motion for protective order any time prior to the date the production is due.)

* * * * *

3. Section 1005.16 is amended by revising paragraph (b) to read as follows:

§ 1005.16 Witnesses.

* * * * *

(b) At the discretion of the ALJ, testimony (other than expert testimony) may be admitted in the form of a written statement. The ALJ may, at his or her discretion, admit prior sworn testimony of experts which has been subject to adverse examination, such as a deposition or trial testimony. Any such written statement must be provided to all other parties along with the last known address of such witnesses, in a manner that allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing will be exchanged as provided in § 1005.8.

* * * * *

PART 1008—[AMENDED]

1. The authority citation for part 1008 continues to read as follows:

Authority: 42 U.S.C. 1320a–7d(b).

2. Section 1008.37 is revised to read as follows:

§ 1008.37 Disclosure of ownership and related information.

Each individual or entity requesting an advisory opinion must supply full and complete information as to the identity of each entity owned or controlled by the individual or entity, and of each person with an ownership or control interest in the entity, as defined in section 1124(a)(1) of the Social Security Act (42 U.S.C. 1320a–3(a)(1)) and part 420 of this chapter.

(Approved by the Office of Management and Budget under control number 0990–0213)

Dated: October 19, 2001.

Janet Rehnquist,

Inspector General.

Approved: November 23, 2001.

Tommy G. Thompson,

Secretary.

[FR Doc. 02–6350 Filed 3–15–02; 8:45 am]

BILLING CODE 4152–01–P

NATIONAL SCIENCE FOUNDATION

45 CFR Part 689

RIN 3145–AA39

Research Misconduct

AGENCY: National Science Foundation (NSF).

ACTION: Final rule.

SUMMARY: NSF is issuing a final rule that revises its existing misconduct in science and engineering regulations. These revisions implement the Federal Policy on Research Misconduct issued by the Executive Office of the President's Office of Science and Technology on December 6, 2000. They will enable NSF to continue to address allegations of research misconduct.

DATES: This rule is effective April 17, 2002.

FOR FURTHER INFORMATION CONTACT: Anita Eisenstadt, Office of the General Counsel, at 703–292–8060.

SUPPLEMENTARY INFORMATION: The Office of Science and Technology Policy issued a final Federal research misconduct policy on December 6, 2000 in 65 FR 76260–76264 ("the Federal policy"). The Federal policy consists of a definition of research misconduct and basic guidelines to help Federal agencies and Federally funded research institutions respond to allegations of research misconduct. The policy directs Federal agencies that support or conduct research to implement it within one year.

On January 25, 2002, NSF published a proposed rule to revise its existing misconduct regulations (45 CFR part 689) to make them fully consistent with the Federal policy. (67 FR 3666–3669). NSF invited public comment on the proposed rule. NSF received four comments that were supportive of the proposed rule.

Three of these commenters, however, expressed general concern for the protection of confidentiality of inquiries and investigations of alleged research misconduct. They suggested that NSF add language to the regulation that provides that to the extent permitted by law, NSF will protect research misconduct investigative and adjudicative files as exempt from mandatory disclosure under the Freedom of Information Act and the Privacy Act. The commenters noted that this language is consistent with the Federal policy.

NSF stated in the preamble to the proposed rule that, consistent with the Federal policy, we would continue to protect research misconduct investigative and adjudicative files as exempt from mandatory disclosure under the Freedom of Information Act and the Privacy Act, to the extent permitted by law. (67 FR 3666). In response to these comments, we will include this language in § 689.2 of the final rule.

One of the commenters also expressed concern over the preponderance of evidence standard of proof for a finding of research misconduct. The commenter expressed concern that this standard will increase the risk of a false finding of research misconduct, and recommended a higher standard of proof such as "clear and convincing evidence" or "beyond a reasonable doubt."

The Federal policy adopted the preponderance of evidence standard. In the preamble to the Federal policy, OSTP noted that this is the uniform standard of proof for most civil fraud cases and most Federal administrative proceedings, including debarment. (65 FR 76262). Awardee institutions have the discretion to apply a higher standard of proof in their internal misconduct proceedings. However, if a higher standard is used, and the awardee institution wishes for NSF to defer to its investigation, the awardee institution should also evaluate whether the allegation is proven by a preponderance of evidence.

Determinations

The Office of Management and Budget has reviewed this final rule under Executive Order 12866. The rule is not an economically significant rule or a major rule under the Congressional Review Act. The Congressional Review Act provides that agencies shall submit a report, including a copy of all final rules, to each House of Congress and the Comptroller General of the United States. The Foundation will submit this report, identifying this rule as non-major, prior to the publication of this rule in the **Federal Register**.

The Unfunded Mandate Reform Act of 1995, in sections 202 and 205, requires that agencies prepare several analytic statements before proposing a rule that

may result in annual expenditures of $100 million by State, local and Indian tribal governments, or by the private sector. As any final rule would not result in expenditures of this magnitude, such statements are not necessary. As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on a substantial number of small businesses.

The provisions of the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. 3501 *et seq.*, and its implementing regulations, 5 CFR Part 1320, do not apply to this rule because there are no new or revised recordkeeping or reporting requirements. Finally, NSF has reviewed this rule in light of Section 2 of Executive Order 12778 and certifies that this rule meets the applicable standards provided in sections 2(a) and 2(b) of that order.

List of Subjects in 45 CFR Part 689

Administrative practice and procedure, Fraud, Grant programs-science and technology, Investigations, Research, Science and technology.

Dated: March 7, 2002.

Lawrence Rudolph,

General Counsel, National Science Foundation.

For the reasons set forth in the preamble, the National Science Foundation is revising part 689 of Title 45, Chapter VI of the Code of Federal Regulations, to read as follows:

PART 689—RESEARCH MISCONDUCT

Sec.

689.1 Definitions.
689.2 General policies and responsibilities.
689.3 Actions.
689.4 Role of awardee institutions.
689.5 Initial NSF handling of misconduct matters.
689.6 Investigations.
689.7 Pending proposals and awards.
689.8 Interim administrative actions.
689.9 Dispositions.
689.10 Appeals.

Authority: 42 U.S.C. 1870(a).

§ 689.1 Definitions.

The following definitions apply to this part:

(a) *Research misconduct* means fabrication, falsification, or plagiarism in proposing or performing research funded by NSF, reviewing research proposals submitted to NSF, or in reporting research results funded by NSF.

(1) *Fabrication* means making up data or results and recording or reporting them.

(2) *Falsification* means manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.

(3) *Plagiarism* means the appropriation of another person's ideas, processes, results or words without giving appropriate credit.

(4) *Research*, for purposes of paragraph (a) of this section, includes proposals submitted to NSF in all fields of science, engineering, mathematics, and education and results from such proposals.

(b) *Research misconduct* does not include honest error or differences of opinion.

§ 689.2 General policies and responsibilities.

(a) NSF will take appropriate action against individuals or institutions upon a finding that research misconduct has occurred. Possible actions are described in § 689.3. NSF may also take interim action during an investigation, as described in § 689.8.

(b) NSF will find research misconduct only after careful inquiry and investigation by an awardee institution, by another Federal agency, or by NSF. An "inquiry" consists of preliminary information-gathering and preliminary fact-finding to determine whether an allegation or apparent instance of research misconduct has substance and if an investigation is warranted. An investigation must be undertaken if the inquiry determines the allegation or apparent instance of research misconduct has substance. An "investigation" is a formal development, examination and evaluation of a factual record to determine whether research misconduct has taken place, to assess its extent and consequences, and to evaluate appropriate action.

(c) A finding of research misconduct requires that—

(1) There be a significant departure from accepted practices of the relevant research community; and

(2) The research misconduct be committed intentionally, or knowingly, or recklessly; and

(3) The allegation be proven by a preponderance of evidence.

(d) Before NSF makes any final finding of research misconduct or takes any final action on such a finding, NSF will normally afford the accused individual or institution notice, a chance to provide comments and rebuttal, and a chance to appeal. In structuring procedures in individual cases, NSF may take into account procedures already followed by other entities investigating or adjudicating the same allegation of research misconduct.

(e) Debarment or suspension for research misconduct will be imposed only after further procedures described in applicable debarment and suspension regulations, as described in §§ 689.8 and 689.9, respectively. Severe research misconduct, as established under the regulations in this part, is an independent cause for debarment or suspension under the procedures established by the debarment and suspension regulations.

(f) The Office of Inspector General (OIG) oversees investigations of research misconduct and conducts any NSF inquiries and investigations into suspected or alleged research misconduct.

(g) The Deputy Director adjudicates research misconduct proceedings and the Director decides appeals.

(h) Investigative and adjudicative research misconduct records maintained by the agency are exempt from public disclosure under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a) to the extent permitted by law and regulation.

§ 689.3 Actions.

(a) Possible final actions listed in this paragraph (a) for guidance range from minimal restrictions (Group I) to the most severe and restrictive (Group III). They are not exhaustive and do not include possible criminal sanctions.

(1) *Group I actions.* (i) Send a letter of reprimand to the individual or institution.

(ii) Require as a condition of an award that for a specified period an individual or institution obtain special prior approval of particular activities from NSF.

(iii) Require for a specified period that an institutional official other than those guilty of misconduct certify the accuracy of reports generated under an award or provide assurance of compliance with particular policies, regulations, guidelines, or special terms and conditions.

(2) *Group II actions.* (i) Totally or partially suspend an active award, or restrict for a specified period designated activities or expenditures under an active award.

(ii) Require for a specified period special reviews of all requests for funding from an affected individual or institution to ensure that steps have been taken to prevent repetition of the misconduct.

(iii) Require a correction to the research record.

VOL 67 ISS 52 MR 18 2002 UMI

(3) *Group III actions.* (i) Terminate an active award.

(ii) Prohibit participation of an individual as an NSF reviewer, advisor, or consultant for a specified period.

(iii) Debar or suspend an individual or institution from participation in Federal programs for a specified period after further proceedings under applicable regulations.

(b) In deciding what final actions are appropriate when misconduct is found, NSF officials should consider:

(1) How serious the misconduct was;

(2) The degree to which the misconduct was knowing, intentional, or reckless;

(3) Whether it was an isolated event or part of a pattern;

(4) Whether it had a significant impact on the research record, research subjects, other researchers, institutions or the public welfare; and

(5) Other relevant circumstances.

(c) Interim actions may include, but are not limited to:

(1) Totally or partially suspending an existing award;

(2) Suspending eligibility for Federal awards in accordance with debarment-and-suspension regulations;

(3) Proscribing or restricting particular research activities, as, for example, to protect human or animal subjects;

(4) Requiring special certifications, assurances, or other, administrative arrangements to ensure compliance with applicable regulations or terms of the award;

(5) Requiring more prior approvals by NSF;

(6) Deferring funding action on continuing grant increments;

(7) Deferring a pending award;

(8) Restricting or suspending participation as an NSF reviewer, advisor, or consultant.

(d) For those cases governed by the debarment and suspension regulations, the standards of proof contained in the debarment and suspension regulations shall control. Otherwise, NSF will take no final action under this section without a finding of misconduct supported by a preponderance of the relevant evidence.

§ 689.4 Role of awardee institutions.

(a) Awardee institutions bear primary responsibility for prevention and detection of research misconduct and for the inquiry, investigation, and adjudication of alleged research misconduct. In most instances, NSF will rely on awardee institutions to promptly:

(1) Initiate an inquiry into any suspected or alleged research misconduct;

(2) Conduct a subsequent investigation, if warranted;

(3) Take action necessary to ensure the integrity of research, the rights and interests of research subjects and the public, and the observance of legal requirements or responsibilities; and

(4) Provide appropriate safeguards for subjects of allegations as well as informants.

(b) If an institution wishes NSF to defer independent inquiry or investigation, it should:

(1) Complete any inquiry and decide whether an investigation is warranted within 90 days. If completion of an inquiry is delayed, but the institution wishes NSF deferral to continue, NSF may require submission of periodic status reports.

(2) Inform OIG immediately if an initial inquiry supports a formal investigation.

(3) Keep OIG informed during such an investigation.

(4) Complete any investigation and reach a disposition within 180 days. If completion of an investigation is delayed, but the institution wishes NSF deferral to continue, NSF may require submission of periodic status reports.

(5) Provide OIG with the final report from any investigation.

(c) NSF expects institutions to promptly notify OIG should the institution become aware during an inquiry or investigation that:

(1) Public health or safety is at risk;

(2) NSF's resources, reputation, or other interests need protecting;

(3) There is reasonable indication of possible violations of civil or criminal law;

(4) Research activities should be suspended;

(5) Federal action may be needed to protect the interests of a subject of the investigation or of others potentially affected; or

(6) The scientific community or the public should be informed.

(d) Awardee institutions should maintain and effectively communicate to their staffs appropriate policies and procedures relating to research misconduct, which should indicate when NSF should be notified.

§ 689.5 Initial NSF handling of misconduct matters.

(a) NSF staff who learn of alleged misconduct will promptly and discreetly inform OIG or refer informants to OIG.

(b) The identity of informants who wish to remain anonymous will be kept confidential to the extent permitted by law or regulation.

(c) If OIG determines that alleged research misconduct involves potential civil or criminal violations, OIG may refer the matter to the Department of Justice.

(d) Otherwise OIG may:

(1) Inform the awardee institution of the alleged research misconduct and encourage it to undertake an inquiry;

(2) Defer to inquiries or investigations of the awardee institution or of another Federal agency; or

(3) At any time proceed with its own inquiry.

(e) If OIG proceeds with its own inquiry it will normally complete the inquiry no more than 90 days after initiating it.

(f) On the basis of what it learns from an inquiry and in consultation as appropriate with other NSF offices, OIG will decide whether a formal NSF investigation is warranted.

§ 689.6 Investigations.

(a) When an awardee institution or another Federal agency has promptly initiated its own investigation, OIG may defer an NSF inquiry or investigation until it receives the results of that external investigation. If it does not receive the results within 180 days, OIG may proceed with its own investigation.

(b) If OIG decides to initiate an NSF investigation, it must give prompt written notice to the individual or institutions to be investigated, unless notice would prejudice the investigation or unless a criminal investigation is underway or under active consideration. If notice is delayed, it must be given as soon as it will no longer prejudice the investigation or contravene requirements of law or Federal law-enforcement policies.

(c) If a criminal investigation by the Department of Justice, the Federal Bureau of Investigation, or another Federal agency is underway or under active consideration by these agencies or the NSF, OIG will determine what information, if any, may be disclosed to the subject of the investigation or to other NSF employees.

(d) An NSF investigation may include:

(1) Review of award files, reports, and other documents already readily available at NSF or in the public domain;

(2) Review of procedures or methods and inspection of laboratory materials, specimens, and records at awardee institutions;

(3) Interviews with subjects or witnesses;

(4) Review of any documents or other evidence provided by or properly obtainable from parties, witnesses, or other sources;

(5) Cooperation with other Federal agencies; and

(6) Opportunity for the subject of the investigation to be heard.

(e) OIG may invite outside consultants or experts to participate in an NSF investigation. They should be appointed in a manner that ensures the official nature of their involvement and provides them with legal protections available to federal employees.

(f) OIG will make every reasonable effort to complete an NSF investigation and to report its recommendations, if any, to the Deputy Director within 180 days after initiating it.

§ 689.7 Pending proposals and awards.

(a) Upon learning of alleged research misconduct OIG will identify potentially implicated awards or proposals and when appropriate, will ensure that program, grant, and contracting officers handling them are informed (subject to § 689.6(c)).

(b) Neither a suspicion or allegation of research misconduct nor a pending inquiry or investigation will normally delay review of proposals. To avoid influencing reviews, reviewers or panelists will not be informed of allegations or of ongoing inquiries or investigations. However, if allegations, inquiries, or investigations have been rumored or publicized, the responsible Program Director may consult with OIG and, after further consultation with the Office of General Counsel, either defer review, inform reviewers to disregard the matter, or inform reviewers of the status of the matter.

§ 689.8 Interim administrative actions.

(a) After an inquiry or during an external or NSF investigation the Deputy Director may order that interim actions (as described in § 689.3(c)) be taken to protect Federal resources or to guard against continuation of any suspected or alleged research misconduct. Such an order will normally be issued on recommendation from OIG and in consultation with the Division of Contracts, Policy, and Oversight or Division of Grants and Agreements, the Office of the General Counsel, the responsible Directorate, and other parts of the Foundation as appropriate.

(b) When suspension is determined to be appropriate, the case will be referred to the suspending official pursuant to 45 CFR part 620, and the suspension procedures of 45 CFR part 620 will be followed, but the suspending official will be either the Deputy Director or an official designated by the Deputy Director.

(c) Such interim actions may be taken whenever information developed during an investigation indicates a need to do so. Any interim action will be reviewed periodically during an investigation by NSF and modified as warranted. An interested party may request a review or modification by the Deputy Director of any interim action.

(d) The Deputy Director will make and OIG will retain a record of interim actions taken and the reasons for taking them.

(e) Interim administrative actions are not final agency actions subject to appeal.

§ 689.9 Dispositions.

(a) After receiving a report from an external investigation by an awardee institution or another Federal agency, OIG will assess the accuracy and completeness of the report and whether the investigating entity followed reasonable procedures. It will either recommend adoption of the findings in whole or in part or, normally within 30 days, initiate a new investigation.

(b) When any satisfactory external investigation or an NSF investigation fails to confirm alleged misconduct—

(1) OIG will notify the subject of the investigation and, if appropriate, those who reported the suspected or alleged misconduct. This notification may include the investigation report.

(2) Any interim administrative restrictions that were imposed will be lifted.

(c) When any satisfactory investigation confirms misconduct—

(1) In cases in which debarment is considered by OIG to be an appropriate disposition, the case will be referred to the debarring official pursuant to 45 CFR part 620 and the procedures of 45 CFR part 620 will be followed, but:

(i) The debarring official will be either the Deputy Director, or an official designated by the Deputy Director.

(ii) Except in unusual circumstances, the investigation report and recommended disposition will be included among the materials provided to the subject of the investigation as part of the notice of proposed debarment.

(iii) The notice of the debarring official's decision will include instructions on how to pursue an appeal to the Director.

(2) In all other cases—

(i) Except in unusual circumstances, the investigation report will be provided by OIG to the subject of the investigation, who will be invited to submit comments or rebuttal. Comments or rebuttal submitted within the period allowed, normally 30 days, will receive full consideration and may lead to revision of the report or of a recommended disposition.

(ii) Normally within 45 days after completing an NSF investigation or receiving the report from a satisfactory external investigation, OIG will submit to the Deputy Director the investigation report, any comments or rebuttal from the subject of the investigation, and a recommended disposition. The recommended disposition will propose any final actions to be taken by NSF. Section 689.3 lists possible final actions and considerations to be used in determining them.

(iii) The Deputy Director will review the investigation report and OIG's recommended disposition. Before issuing a disposition the Deputy Director may initiate further hearings or investigation. Normally within 120 days after receiving OIG's recommendations or after completion of any further proceedings, the Deputy Director will send the affected individual or institution a written disposition, specifying actions to be taken. The decision will include instructions on how to pursue an appeal to the Director.

§ 689.10 Appeals.

(a) An affected individual or institution may appeal to the Director in writing within 30 days after receiving the Deputy Director's written decision. The Deputy Director's decision becomes a final administrative action if it is not appealed within the 30 day period.

(b) The Director may appoint an uninvolved NSF officer or employee to review an appeal and make recommendations.

(c) The Director will normally inform the appellant of a final decision within 60 days after receiving the appeal. That decision will be the final administrative action of the Foundation.

RIN 2133–AB45

Eligibility of U.S.-Flag Vessels of 100 Feet or Greater in Registered Length To Obtain a Fishery Endorsement to the Vessel's Documentation

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: In an interim final rule published on August 31, 2001, the Maritime Administration ("MARAD," "we," "our," or "us") amended our

VOL
67
ISS
52
MR
18
2002
UMI

regulations implementing the new U.S. citizenship requirements set forth in the American Fisheries Act of 1998 ("AFA"). MARAD's regulation, at 46 CFR part 356, contains the substantive requirements mandated by the AFA and procedural requirements established by MARAD for administration of the AFA. We promulgated an amendment that provides us with the ability to waive any procedural requirement, if there is good cause to do so and the waiver would not be inconsistent with the AFA and the intent of part 356. The waiver provision was effective, as an interim final rule, upon publication, but we are now publishing this waiver provision as a final rule.

DATES: The effective date of this final rule is March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Murray A. Bloom, Citizenship Approval Officer, Maritime Administration, MAR–222 Room 7228, 400 7th Street, SW, Washington, DC 20590. Telephone: (202) 366–5320.

SUPPLEMENTARY INFORMATION: The AFA imposes new citizenship requirements for the owners of vessels of 100 feet or greater in registered length which hold a fishery endorsement or for which a fishery endorsement is sought and for entities holding a preferred ship mortgage on such vessels. We are required by the AFA to "rigorously" scrutinize any transfer of ownership and control over fishing vessels, fish processing vessels and fish tender vessels. In so doing, we must pay particular attention to leases, charters, financing arrangements, mortgages, and other documents to determine if they constitute an impermissible conveyance of control to persons not eligible to own a vessel with a fishery endorsement.

MARAD's detailed regulations, 46 CFR part 356, were published in the **Federal Register** on July 19, 2000 (65 FR 44859), following notice and opportunity for submission of comments. The new citizenship requirements became effective on October 1, 2001. Vessel owners were directed to submit citizenship affidavits and other documents to us by June 1, 2001. We have provided information on the new requirements on MARAD's web site, http:/marad.dot.gov/afa.html, mailed information to owners of fishing industry vessels and conducted briefings open to the public.

The new regulations applied for the first time to a population of individuals who had not communicated or worked with MARAD. Therefore, we were concerned about circumstances and issues that were not anticipated by us or the public and that could not be resolved in the short period of time before October 1, 2001. In addition, we were concerned that some confusion may have arisen for the public because the U.S. Coast Guard will administer the AFA's citizenship requirements with regard to vessels under 100 feet in registered length under its own procedures. Our concerns were based on actual contacts between MARAD staff and the public that brought to our attention the potential for certain inequitable results that could stem from the implementation of the regulations if MARAD did not have the ability to waive certain procedural requirements. At that time, we expected to review about 500 affidavits along with underlying articles of incorporation, bylaws, charters, management agreements, sales agreements and other documents.

In the course of reviewing this large number of complicated business arrangements, it became apparent that there were circumstances, often not the fault of the vessel owner, that prevented us in several instances from making a complete citizenship finding by October 1, 2001. Our regulations provide the opportunity for the applicant to work with us to resolve matters prior to issuing a determination whether the applicant qualifies as a U.S. citizen. However, the AFA rule would have caused the vessel owner's fishery endorsement to be deemed invalid on October 1, 2001 if we had not issued a citizenship determination. Thus, there were times when a waiver of our procedures would have been appropriate to avoid this result. Accordingly, MARAD promulgated this amendment to 46 CFR part 356, on August 31, 2001 at 66 FR 45945, which allows us to waive procedural provisions of the rule not mandated by the AFA. The waiver provision is not applicable to the substantive requirements set out in the AFA and the rule. In addition, any waiver must be supported by good cause shown.

The waiver provision became effective as an interim measure immediately upon publication on August 31, 2001 so that it was in place before October 1, 2001, the date when MARAD was required to determine the U.S. citizenship status of 500–700 vessel owners and operators. The need to fairly administer the new and intricate requirements of the AFA within the stringent time constraints fully supports a finding of good cause, under the Administrative Procedure Act, 5 U.S.C. 553(b) and (d), that the final rule should be effective upon publication.

Our practical experience with the waiver authority validated our original assumptions. More than a dozen waivers have been issued so far. Each waiver was well justified in that they allowed vessel owners some additional time to revise troublesome provisions of complicated vessel charters or corporate documents or provided needed time for us to resolve complex issues. Going forward, we expect the waiver provision to be used sparingly. However, there is still a need for the waiver provision, because vessel owners enter into new business arrangements constantly, and we need to ensure a thorough review of such arrangements.

We received no comments from the public either in favor or opposed to making the interim final rule a final rule.

Rulemaking Analyses and Notices

Executive Order 12866 (Regulatory Planning and Review)

After discussing compliance requirements with interested vessel owners, operators and mortgagees, we became aware of a need to have a waiver provision in the AFA regulations so that non-material discrepancies in a vessel's documentation would not arbitrarily cause a vessel owner to lose their fishery endorsement. The waiver provision will not entail any cost to vessel owners, mortgagees, charterers, or other parties regulated by 46 CFR part 356.

This final rule is not a significant regulatory action under section 3(f) of Executive Order 12866. Consequently, it was not reviewed by the Office of Management and Budget. The economic impact, if any, should be minimal; therefore, no further analysis is necessary. This final rule is not significant according to the Regulatory Policies and Procedures of the Department of Transportation, 44 FR 11034 (February 26, 1979) as it merely allows waiver of administrative and procedural requirements.

Federalism

We analyzed this rulemaking in accordance with the principles and criteria contained in E.O. 13132 ("Federalism") and have determined that it does not have sufficient federalism implications to warrant consultation with State and local officials. The regulations have no substantial effects on the States, or on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials.

Executive Order 13175

MARAD does not believe that this final rule will significantly or uniquely affect the communities of Indian tribal governments when analyzed under the principles and criteria contained in Executive Order 13175 ("Consultation and Coordination with Indian Tribal Governments"). Therefore, the funding and consultation requirements of this Executive Order would not apply.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires us to consider whether our proposals will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). This rulemaking may reasonably be expected to affect small businesses or entities that currently own documented fishing vessels, fish processing vessels, or fish tender vessels, that have financed such vessels, or that are engaging in the fisheries of the United States with such vessels. The Small Business Administration defines businesses within the fishing industry that have annual receipts of $3 million or less as small businesses, 13 CFR 121.201. We believe that any cost to small business entities to comply with this final rule will be minimal, if any, because this final rule allows waiver of procedural (i.e., administrative) requirements that may cause a vessel owner to lose its fishery endorsement. Therefore, MARAD certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Environmental Impact Statement

We have analyzed this rule for purposes of compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and have concluded that under the categorical exclusions provision in section 4.05 of Maritime Administrative Order 600–1, "Procedures for Considering Environmental Impacts," 50 FR 11606 (March 22, 1985), the preparation of an Environmental Assessment, and an Environmental Impact Statement, or a Finding of No Significant Impact for this rulemaking is not required. This rulemaking involves administrative and procedural regulations that clearly have no environmental impact.

Paperwork Reduction Act

This rulemaking does not establish any new requirement for the collection of information.

Unfunded Mandates Reform Act of 1995

This final rule will not impose an unfunded mandate under the Unfunded Mandates Reform Act of 1995. It will not result in costs of $100 million or more, in the aggregate, to any of the following: State, local, or Native American tribal governments, or the private sector. This final rule is the least burdensome alternative that achieves the objective of the rule.

Regulation Identifier Number

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 46 CFR Part 356

Citizenship and naturalization, Fishery endorsement, Fishing vessels, Mortgages, Mortgage trustee, Penalties, Preferred mortgages, Reporting and recordkeeping requirements, Vessels.

For the reasons discussed in the preamble, MARAD amends 46 CFR part 356 as follows:

PART 356—REQUIREMENTS FOR VESSELS OF 100 FEET OR GREATER IN REGISTERED LENGTH TO OBTAIN A FISHERY ENDORSEMENT TO THE VESSEL'S DOCUMENTATION

1. The authority citation for 46 CFR part 356 is revised to read as follows:

Authority: 46 App. U.S.C. 12102; Public Law 105–277, Division C, Title II, Subtitle I, section 203 (46 App. U.S.C. 12102 note), section 210(e), and section 213(g), 112 Stat. 2681; 49 CFR 1.66.

2. For the convenience of the reader, 3356.2 is republished to read as follows:

§ 356.2 Waivers.

In special circumstances and for good cause shown, we may waive the procedures prescribed in this part, provided the waiver is consistent with the requirements of the AFA and with the intent of this part.

Dated: March 11, 2002.

By Order of the Maritime Administrator.

Joel C. Richard,

Secretary, Maritime Administration.

Fisheries off West Coast States and in the Western Pacific; Precious Corals Fisheries; Harvest Quotas, Definitions, Size Limits, Gear Restrictions, and Bed Classification

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS has partially approved a regulatory amendment under the Fishery Management Plan for Precious Coral Fisheries of the Western Pacific Region (FMP) submitted by the Western Pacific Fishery Management Council (Council) and is issuing a final rule that will implement gear restrictions, size limits, and definitions governing the harvest of precious coral resources managed under the FMP. Precious coral management measures that were published in the proposed rule that apply only to the Northwestern Hawaiian Islands (NWHI) are not being implemented by NMFS because they were determined to be inconsistent with certain provisions of Executive Order 13178 and Executive Order 13196, which together establish the NWHI Coral Reef Ecosystem Reserve (Reserve).

DATES: Effective April 17, 2002.

ADDRESSES: Copies of the background documents, including an environmental assessment/initial regulatory flexibility analysis/regulatory impact review (EA/IRFA/RIR) (March 2001) and an RIR/final regulatory flexibility analysis (FRFA), (March 2002) are available from Dr. Charles Karnella, Administrator, NMFS, Pacific Islands Area Office (PIAO), 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814.

FOR FURTHER INFORMATION CONTACT: Alvin Katekaru, PIAO, 808–973–2937.

SUPPLEMENTARY INFORMATION: On September 5, 2000, NMFS published a proposed rule (65 FR 53692) on regulatory adjustments governing the harvest of precious coral resources managed under the FMP. The rule contained eight measures intended to conserve and reduce the risk of overfishing the precious coral resource; promote optimal utilization of the resource and minimize waste; and

VOL
67
ISS
52
MR
18
2002
UMI

protect the precious coral beds in the NWHI that provide foraging habitat for the endangered Hawaiian monk seal. In December 2000, and January 2001, President Clinton issued Executive Order 13178 and Executive Order 13196, respectively, which together established the Reserve. NMFS has determined that two of the proposed precious coral measures that apply only to precious coral beds around the NWHI are inconsistent with Executive Order 13178 and Executive Order 13196.

This final rule implements the following six measures: (1) Suspends the harvest of gold coral at Makapu'u Bed off the Island of Oahu; (2) redefines "dead precious coral" as coral that has no live coral polyps or tissue, and redefines "live precious coral" accordingly; (3) applies minimum size restrictions only to live precious corals; (4) prohibits the harvest of black coral unless it has attained a minimum stem diameter of 1 inch (2.54 cm) or a minimum height of 48 inches (122 cm), except in certain cases; (5) prohibits the use of non-selective fishing gear to harvest precious corals; and (6) applies the current minimum size restriction for pink coral to all permit areas.

Comment and Response

One letter was received commenting on the proposed rule.

Comment: The measures to define live coral as coral harboring living polyps and to apply size and quota restrictions to live coral only, mean that the harvest of dead gold coral will be unregulated. Unrestricted takes of dead gold coral may have negative impacts on live gold coral as there is some evidence from the NWHI that dead coral may be the preferred substrate for resettlement (i.e., seeding) of new gold coral colonies.

Response: NMFS shares this concern. The amount of information on the relationship between dead gold coral and the seeding of new colonies is limited at this time. NMFS however believes the concern is mitigated by restrictions imposed on commercial harvesting of precious corals, under Executive Order 13178 and Executive Order 13196 establishing the Reserve.

NMFS is not implementing two precious coral measures that would have (a) revised the boundaries of the Brooks Banks Bed, NWHI, reduced this bed's harvest quota for pink coral, and suspended the harvest quota (i.e., reduced to zero) for gold coral; and (b) established a NWHI precious coral permit area, French Frigate Shoals (FFS) Gold Pinnacles Bed, and classified this bed as a "conditional" bed with a zero harvest quota for all species of precious corals. The final rule is changed from the proposed rule because continued management of precious coral fisheries around the NWHI is inconsistent with Executive Order 13178 and Executive Order 13196. Specifically, the measures establishing pink and gold coral harvest quotas at NWHI Brooks Banks Bed are inconsistent with section 7(b)(5) of the Executive Order 13178 and Executive Order 13196. In this section, the Executive Order establishes zero harvest in the Reserve where the Brooks Banks Bed is located. Establishment of a quota for pink coral at Brooks Banks Bed also conflicts with the Executive Order 13178 and Executive Order 13196 since they generally prohibit the harvest of living and nonliving resources throughout the Reserve. Although creation of a new FFS Gold Pinnacles Bed and its classification as a "conditional" bed are not literally contrary to the E.O.s, a zero harvest quota duplicates restrictions in the E.O.s, and therefore is unnecessary.

Another change between the final rule and proposed rule is that § 660.86 (b)(2) has been revised to allow for expedient issuance of exemptions from black coral harvest size requirements. This change allows NMFS to streamline the exemption process by relying on a State of Hawaii precious corals database to determine eligible harvesters.

The final rule contains a technical correction to the location of the Wespac Bed, Permit Area R-1, by redefining the current position of 28°50.2′ N. lat. to 23°18′ N. lat.

Classification

This final rule has been determined to be not significant for purposes of Executive Order 12866.

NMFS prepared a FRFA describing the impact of the action on small entities. The IRFA was summarized in the proposed rule published on September 5, 2000(65 FR 53692). None of the comments received on the proposed rule directly or indirectly addressed the results of the IRFA, which also provided analysis on the proposed measures that are not included in the final rule. The following is a summary of the FRFA (March 1, 2002).

The Council considered eight adjustments to management measures in the FMP. Six of those management measures are discussed below. The remaining two management measures, that involve the Reserve, were not approved by NMFS for the reasons stated above. This partial disapproval is not expected to have any economic impact because no commercial precious coral harvest is currently occurring in the Reserve.

Under Management Objective 1, (reduce the potential for overfishing of gold coral at the Makapu'u Bed), four alternatives were considered including the preferred alternative. Under the preferred alternative, the harvest quota for gold coral at the Makapu'u Bed will be suspended until further information on the impact of harvesting on subsequent recruitment of gold coral is available. A gold coral quota of zero would likely have some adverse economic impact on potential harvesters. However, the density of gold coral at the Makapu'u Bed is already very low. It is likely that any harvest effort occurring at Makapu'u bed will be directed mainly toward pink coral because this coral is relatively abundant at the bed and has a higher market value than gold coral ($440/kg for pink coral (C. secundum) vs. $330/kg for gold coral according to Maui Divers of Hawaii, Ltd.). A suspension of the quota is not expected to have an adverse economic impact on processors of precious corals in Hawaii. The fishery in the EEZ around Hawaii for deep-water species of precious coral, including pink, gold and bamboo coral, has been nearly dormant for two decades. Consequently, the processors of these corals in Hawaii have relied almost exclusively on imported material.

Three alternatives were considered and rejected for the first management objective. The first rejected alternative would have maintained the biennial gold coral quota of 600 kg (132 lb) at Makapu'u Bed. Maintaining the current biennial harvest quota of 600 kg (132 lb) for gold coral at Makapu'u Bed would continue to make available to prospective harvesters a quantity of gold coral worth $198,000 every two years ($99,000 annually) if the actual stock is of sufficient size to support such a harvest. However, a recent survey of the bed revealed that the current standing stock of gold coral is low and may not yield the current harvest quota. In addition, the adverse economic impacts over the long term would be significant if further harvesting diminishes the number of colonies to the point that no recovery is possible.

The second rejected alternative would have suspended the harvest quota for gold coral at all established and conditional beds until additional information is available on the impact of harvesting on subsequent recruitment of gold coral. The total harvest quota for gold coral at all established and conditional beds is 1,080 kg (238 lb) every two years, with an estimated dockside value of $356,400. However, the gold coral quota at the Makapu'u Bed accounts for more than half of this total. As noted above, the current standing stock of gold coral at the Makapu'u Bed may not yield the current biennial harvest quota of 600 kg (132 lb). If no gold coral is harvested from the Makapu'u Bed the amount of potential gross revenues foregone by suspending the harvest quota at all established and conditional beds is estimated to be about $158,400 every two years.

The third rejected alternative would have implemented a minimum size limit for gold coral at the Makapu'u Bed. This alternative was rejected because the calculation of an appropriate minimum size requires estimates of growth rates, mortality rates and size at reproductive maturity. These data estimates are lacking for gold coral. Without this information the size limit established may be too low, thereby insufficiently protecting the coral from overfishing and eventually leading to reduced economic returns, or may be too high, thereby resulting in an overly conservative size limit that unnecessarily reduces potential economic returns.

Under Management Objective 2 (reduce the potential for harvest of coral which has live coral polyps or tissue), three alternatives were considered including the preferred alternative. Under the preferred alternative, dead precious coral will be defined as precious coral that no longer has any live coral polyps or tissue, and live precious coral will be defined as precious coral that has live polyps or tissue. Only live coral will be counted toward the quotas limiting the amount of precious coral that may be taken in any permit area during the fishing year. It is possible that some of the coral at a given bed that was regarded as dead under the current definition would be regarded as live under the alternative definition, and therefore be subject to the harvest quota for that bed. However, the amount of additional coral that would be subject to the quota is likely to be small, as coral colonies that contain holes from borers or are discolored or encrusted generally no longer have any living polyps or tissue. There is insufficient information on the amount of coral meeting this definition at different beds to quantify this economic impact.

Two alternatives were considered and rejected for the second management objective. The first rejected alternative would have maintained the current definition of dead precious coral as any precious coral that contains holes from borers or is discolored or encrusted at the time of removal from the seabed. This alternative was rejected because allowing the harvest of coral that is currently defined as dead and is believed to provide foraging habitat to the endangered Hawaiian monk seal may lead to emergency closures of specific sites or alterations of fishing operations. The economic impact of closures or other measures would depend on the length of time that these measures are in effect.

The second rejected alternative would have defined dead precious coral as precious coral that is no longer standing upright, and define live precious coral as precious coral that is standing upright. However, the amount of additional coral that would be subject to the quota is likely to be small, as coral colonies that contain holes from borers or are discolored or encrusted are often no longer standing upright. There is insufficient information on the amount of coral meeting this definition at different beds to quantify this economic impact.

Under Management Objective 3, (allow greater utilization of dead coral resources), two alternatives were considered including the preferred alternative. Under the preferred alternative, size limits will be applied only to live coral. This alternative will allow greater utilization of dead coral resources and thus increase potential income to harvesters. There is insufficient information on the quantity of dead coral at different beds to quantify this economic impact.

The rejected alternative would have maintained the application of minimum size limits to both live and dead coral. This alternative was rejected because it prohibits the harvest of dead coral that is below the minimum size limit despite the fact that the harvest of dead coral is not considered to be detrimental. There is insufficient information on the quantity of dead coral at different beds to quantify the economic impact.

Under Management Objective 4 (regulate the harvest of black coral), four alternatives were considered including the preferred alternative. Under the preferred alternative, the harvest of black coral will be prohibited unless it has attained either a minimum stem diameter of 1 inch (2.54 cm), measured no less than 1 inch (2.54 cm) from the top of the living holdfast, or a minimum height of 48 inches (122 cm), measured from the base to the greatest distal extremity of the colony. Persons who reported a landing of black coral to the State of Hawaii within 5 years before the effective date of the final rule may apply for an exemption which allows the hand harvest of black coral that has attained a 3/4 inch (1.905 cm) base diameter, measured on the widest portion of the skeleton at a location just above the holdfast.

Three alternatives were considered and rejected for this management objective. The first rejected alternative would have maintained the current situation of no restrictions on the harvest of black coral. This alternative was rejected because it would allow fishing pressure to increase in an uncontrolled manner and could lead to overfishing of black coral.

The second rejected alternative would have prohibited the harvest of black coral unless it has attained a minimum base diameter of 3/4 inch (1.905 cm), which is believed to inadequately protect black coral resources from overfishing.

The third rejected alternative would have established a weight quota for black coral and was rejected because a weight quota may not be as effective as a size limit in avoiding overfishing of the resource. Information on the standing stock and sustainable yield of managed species of black coral is limited. The use of minimum size limits based on knowledge of the reproductive biology of precious corals is the preferred basis for management of the fishery when selective harvesting is expected to be economically feasible as information on the standing stock and its sustainable yield in terms of weight is limited.

Under Management Objective 5 (protect precious coral resources and essential fish habitat (EFH) from the effects of ecologically destructive and wasteful harvest gear), three alternatives were considered including the preferred alternative. The preferred alternative will require that selective gear be used to harvest precious corals from all permit areas. The cost of purchasing an unmanned submersible (i.e., remotely operated vehicle) may be as low as $50,000, which is roughly equal to the capital investment in gear required to initiate a non-selective harvest operation using tangle nets. Although the capital and operating costs of manned submersibles may be high, they are not economically prohibitive, as is evidenced by the recent interest of two firms in using this type of selective gear to harvest precious corals in the waters around Hawaii. In addition, it is likely that some harvesters of precious coral will be able to defray the costs of using selective gear by finding other lucrative uses for the gear, such as salvage and research. The use of non-selective gear to harvest precious corals is an inefficient use of fishery resources. Non-selective gear tends to damage the precious coral trees as it harvests them, thereby greatly reducing the value of the

VOL
67
ISS
52
MR
18
2002
UMI

coral. In contrast, selective gear harvests coral so that it retains its highest value.

Two alternatives were considered and rejected for the fifth management objective to protect precious coral resources and EFH from the effects of ecologically destructive and wasteful harvest gear.

The first rejected alternative would have maintained the current regulations requiring selective gear only at the Makapu'u, Keahole Point, and Kaena Point Beds. This alternative was rejected because the use of non-selective gear to harvest precious corals is not an efficient use of fishery resources. The value of precious coral colonies is dependent on its size, color and condition. Large, completely intact trees of coral have the greatest value. Non-selective gear such as dredges harvest pieces of broken coral knocked down by the dredge stone and entangled in the nets as the dredge is pulled along the sea floor. Breakage may reduce a coral's value by as much as 80 percent.

Allowing the continued use of this relatively inexpensive gear in exploratory areas may encourage the discovery and exploration of new beds. However, the use of non-selective gear is unlikely to provide sufficient data to develop reliable estimates of the standing stock and maximum sustained yield (MSY) for newly discovered beds because this gear cannot discriminate or differentiate between types, size, quality or characteristics of living or dead corals. Further, the degradation of precious coral beds may reduce monk seal foraging habitat. The economic impact of such adverse modifications would be likely to include emergency closures of specific sites, including Brooks Bank, or alteration of fishing operations. The specific cost of closures or other measures would depend on the length of time that these measures are in effect.

The second rejected alternative would have required that selective gear be used to harvest precious corals from all established and conditional beds. This alternative was rejected as it would fail to protect those precious coral resources located outside of these beds.

Under Management Objective 6 (reduce the potential for overfishing of pink coral at conditional beds and exploratory areas), three alternatives were considered including the preferred alternative. Under the preferred alternative, the current 10 inch size limit for pink coral will be applied to all established beds, conditional beds, and exploratory areas. The feasibility of this alternative is contingent on a prohibition on the use of non-selective gear to harvest precious corals for commercial purposes in all permit areas. Applying the size limit for pink coral to all permit areas is unlikely to have a significant negative economic impact because the potential financial return from harvesting colonies of pink coral that are less than 10 inches (25.4 cm) in height is low. According to Maui Divers of Hawaii, Ltd., harvesting colonies less than 10 inches (25.4 cm) is not economically practical, because the return does not justify the time spent harvesting.

Two alternatives were considered and rejected for the sixth management objective. The first rejected alternative would have maintained the application of the 10-inch (25.4 cm) size limit for pink coral at the established Makapu'u, Keahole Point, and Kaena Point Beds only, and was rejected because long-term negative impacts on harvest levels and gross revenues could be potentially large if the resources are overfished. Given the life-history characteristics of pink coral, such as slow growth and long generation time, overfishing could degrade the productivity of affected precious coral beds for many years.

The second rejected alternative would have applied the current 10–inch (25.4 cm) size limit for pink coral only to established and conditional beds. This alternative would have had economic impacts similar to the preferred alternative. However, it was rejected because it would not provide protection for the minimum sizes to pink corals located in exploratory areas.

This final rule could affect five to seven small businesses. There are three to five small-boat fishermen who harvest black coral using scuba gear in beds overlapping State of Hawaii and Federal waters, as well as two historical or potential operations targeting other precious corals. Between 1990 and 1997, the total annual harvest of black coral in Hawaii varied from a low of 864 lbs (391 kg) to a high of 6,017 lbs (272 kg), with a yearly average of 3,084 lbs (139 kg). The 415 lbs (188 kg) of black coral sold in 1997 had a dockside value of about $10,394, assuming a price of $25/lb. NMFS cannot determine the proportions of the harvest of black coral made in State and Federal waters based on the available information. Details on the harvest of other precious corals cannot be released due to confidentiality requirements as there have been less than three operations active in the past decade.

Due to the low level of participation in the western Pacific precious coral fishery, aggregate economic impacts resulting from the final rule will be minimal. The analysis, however, shows that prohibiting the harvest of gold coral at Makapu'u Bed could result in the loss of potential revenues of approximately $100,000 annually in the short term, if the actual stock is of sufficient size to support the current harvest quota. Establishment of a universal minimum harvest size for all pink coral management unit species could result in a positive economic impact in the form of long-term maintenance of MSYs. On the other hand, imposing a minimum harvest size for black corals could have a negative economic impact on fishery revenues, except for five harvesters expected to be exempt from the minimum harvest size requirement. A prohibition on the use of non-selective gear to harvest precious corals could result in additional costs for future participants. Hand-harvesters for black corals would be unaffected by this prohibition. The exact costs of selective gear technologies are unknown, although a remotely operated submersible coral harvester can now be obtained for $50,000, which may be approximately equal to the cost of setting up a non-selective harvest operation using tangle nets. The effective yield is higher for selective harvesting of precious corals using submersibles compared to the wasteful practice of harvesting precious corals using non-selective gear.

Due to a lack of information on the long term effects of alternative management measures on coral stocks, harvest effort or catch rates, a detailed quantitative analysis of the costs and benefits of alternative management measures is not possible at this time.

Although long-term data are unavailable, analysis of this fishery is ongoing, and may lead to simulation models capable of predicting the biological (and economic) effects of each alternative. From a conceptual point of view, the precious corals fishery represents a difficult economic analysis. Although standard bioeconomic theory suggests that the harvest rate should be no more than the growth rate of the coral population at its MSY (accounting for economic production cost relationships and the discount rate), the growth rate of coral is so slow that a mining approach might be considered preferable, i.e., that the resource might be allowed to be over-fished in the short-term, and then harvesting prohibited for the many years which would be required for it to be fully restored. However, this approach was rejected because it would be inconsistent, with National Standard 1 of the Magnuson-Stevens Act which prohibits overfishing. It is anticipated by NMFS that by allowing the coral populations to maintain their long-term sustainability, there will be a larger standing stock of corals which will optimize harvest rates and reduce the relative costs of harvesting (due to increased density). By limiting the harvest rates to those allowed by MSY, the likelihood that long-term benefits will exceed costs is increased. In addition, these restrictions may preclude new entry into the fishery, therefore improving social benefits (i.e., avoiding over-capacity). To the extent that these initial explorations are successful in identifying additional coral resources for harvesting, and as new economic information is acquired, a re-evaluation of the relative benefits and costs of these management measures would be warranted.

None of the alternatives considered is expected to have significant social impacts on fishery participants or Hawaii fishing communities in terms of employment, enjoyment of the fishery, vessel and crew safety, social or cultural activity in the fishery, or other social factors.

To minimize impact, this final rule removes size limits for dead corals. However, this revision could cause some risk to certain corals, such as gold corals, that may use dead corals for resettlement of new colonies.

This final rule does not contain any reporting or record- keeping requirements.

An informal consultation under the Endangered Species Act was conducted to determine whether this regulatory amendment was likely to affect any endangered or threatened species, including Hawaiian monk seals. This consultation was completed on December 20, 2000, and concluded that this regulatory amendment is not likely to adversely affect any endangered or threatened resources. The disapproval of the two NWHI measures does not affect that determination.

This final rule is consistent with Executive Order 13089, which is intended to preserve and protect the biodiversity, health, heritage, and social and economic value of U.S. coral reef ecosystems and the marine environment.

List of Subjects in 50 CFR Part 660

Administrative practice and procedure, American Samoa, Fisheries, Fishing, Guam, Hawaiian Natives, Indians, Northern Mariana Islands, Reporting and recordkeeping requirements.

Dated: March 12, 2002.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES AND IN THE WESTERN PACIFIC

1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 660.12, the definitions of "Dead coral" and "Live coral" are revised, and under the definition of "Precious coral permit area", paragraph (3) is revised to read as follows:

§ 660.12 Definitions.

* * * * *

Dead coral means any precious coral that no longer has any live coral polyps or tissue.

* * * * *

Live coral means any precious coral that has live coral polyps or tissue.

* * * * *

Precious coral permit area * **

* * * * *

(3) *Refugia.* Westpac Bed, Permit Area R-1, includes the area within a radius of 2.0 nm of a point at 23°18′ N. lat., 162°35′ W. long.

* * * * *

3. In § 660.82, paragraph (c) introductory text is revised to read as follows:

§ 660.82 Prohibitions.

* * * * *

(c) Take and retain, possess, or land any live pink coral or live black coral from any precious coral permit area that is less than the minimum height specified in § 660.86 unless:

* * * * *

4. Section 660.86 is revised to read as follows:

§ 660.86 Size restrictions.

The height of a live coral specimen shall be determined by a straight line measurement taken from its base to its most distal extremity. The stem diameter of a living coral specimen shall be determined by measuring the greatest diameter of the stem at a point no less than 1 inch (2.54 cm) from the top surface of the living holdfast.

(a) Live pink coral harvested from any precious coral permit area must have attained a minimum height of 10 inches (25.4 cm).

(b) *Black coral.* (1) Except as provided in paragraph (b)(2) of this section, live black coral harvested from any precious coral permit area must have attained either a minimum stem diameter of 1 inch (2.54 cm), or a minimum height of 48 inches (122 cm).

(2) The NMFS Pacific Islands Area Office will issue an exemption permitting hand-harvesting of live black coral that has attained a minimum base diameter of 3/4 inches (1.91 cm), measured on the widest portion of the skeleton at a location just above the holdfast, to any person who reported a landing of black coral to the State of Hawaii within 5 years before April 17, 2002.

5. Section 660.88 is revised to read as follows:

§ 660.88 Gear restrictions.

Only selective gear may be used to harvest coral from any precious coral permit area.

6. Table 1 to Part 660 is revised to read as follows:

VOL
67
ISS
52
MR

Proposed Rules

Federal Register
Vol. 67, No. 52
Monday, March 18, 2002

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1205

[Doc. # CN–01–007]

Cotton Research and Promotion Program: Procedures for Conduct of Sign-up Period

AGENCY: Agricultural Marketing Service.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the rules and regulations regarding the procedures for the conduct of a sign-up period for eligible cotton producers and importers to request a continuance referendum on the 1991 amendments to the Cotton Research and Promotion Order (Order) provided for in the Cotton Research and Promotion Act (Act) amendments of 1990. The amendments would update various dates, name changes, addresses, and make other administrative changes.

DATES: Comments must be received on or before March 28, 2002.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule to Whitney Rick, Chief, Research and Promotion Staff, Cotton Program, Agricultural Marketing Service, USDA, PO Box 23278, Washington, DC 20026–3278. Comments should be submitted in triplicate. Comments may also be submitted electronically to: *cottoncomments@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register**. All comments received will be made available for public inspection at Cotton Program, AMS, USDA, Room 2641–S, 1400 Independence Ave., SW, Washington, DC 20250–0224 during regular business hours. A copy of this notice may be found at: *www.ams.usda.gov/cotton/rulemaking.htm*.

FOR FURTHER INFORMATION CONTACT: Whitney Rick, Chief, Research and Promotion Staff, Cotton Program, AMS, USDA, Stop 0224, 1400 Independence Ave., SW, Washington, DC 20250–0224, telephone (202) 720–2259, facsimile (202) 690–1718, or email at *whitney.rick@usda.gov*.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

The Office of Management and Budget has waived the review process required by Executive Order 12866 for this action.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. This rule would not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Cotton Research and Promotion Act (7 U.S.C. 2101–2118) provides that administrative proceedings must be exhausted before parties may file suit in court. Under Section 12 of the Act, any person subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such person is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the District Court of the United States in any district in which the person is an inhabitant, or has his or her principal place of business, has jurisdiction to review the USDA's ruling, provided a complaint is filed within 20 days from the date of the entry of ruling.

Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) [5 U.S.C. 601 et seq.], the Agricultural Marketing Service has considered the economic effect of this action on small entities and has determined that its implementation will not have a significant economic impact on a substantial number of small entities.

There are currently approximately 30,000 producers, and approximately 10,000 importers that are subject to the order. The majority of these producers and importers are small businesses under the criteria established by the Small Business Administration.

Only those eligible persons who are in favor of conducting a referendum would need to participate in the sign-up period. Of the 46,220 total valid ballots received in the 1991 referendum, 27,879, or 60 percent, favored the amendments to the Order, and 18,341, or 40 percent, opposed the amendments to the Order. This proposed rule would provide to those persons who are not in favor of the continuance of the Order amendments an opportunity to request a continuance referendum.

The eligibility and participation requirements for producers and importers are substantially the same as the rules that established the eligibility and participation requirements for the 1991 referendum, and for the 1997 sign-up period. The January 15 through April 14, 1997 sign-up period did not generate the required number of signatures to hold another referendum. The amendments proposed in this action would update various dates, name changes, addresses and make other miscellaneous changes. However, proxy or power of attorney participation would be prohibited.

The proposed sign-up procedures would not impose a substantial burden or have a significant impact on persons subject to the Order, because participation is not mandatory, not all persons subject to the Order are expected to participate, and USDA will determine producer and importer eligibility. The information collection requirements under the Paperwork Reduction Act are minimal.

Paperwork Reduction Act

The information collections proposed by this rule will be carried out under the Office of Management and Budget (OMB) Control Number 0581–0093. This rule will not add to the overall burden currently approved by OMB and assigned OMB Control Number 0581–0093 under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). This OMB Control Number is referenced in Section 1205.541 of the regulations.

Background

The 1991 amendments to the Cotton Research and Promotion Order (7 C.F.R 1205 *et seq.*) were implemented following the July 1991 referendum. The amendments were provided for in the

VOL 67 ISS 52 MR 18 2002 UMI

Cotton Research and Promotion Act (7 U.S.C. 2101–2118) amendments of 1990. These amendments provided for: (1) Importer representation on the Cotton Board by an appropriate number of persons, to be determined by USDA, who import cotton or cotton products into the U.S., and whom USDA selects from nominations submitted by importer organizations certified by USDA; (2) assessments levied on imported cotton and cotton products at a rate determined in the same manner as for U.S. cotton; (3) increasing the amount USDA can be reimbursed for the conduct of a referendum from $200,000 to $300,000; (4) reimbursing government agencies that assist in administering the collection of assessments on imported cotton and cotton products; and (5) terminating the right of producers to demand a refund of assessments.

On January 14, 2002, USDA issued a determination based on its review, (67 FR 1714), not to conduct a referendum regarding the 1991 amendments to the Order. However, the Act provides that USDA shall nevertheless conduct a referendum at the request of 10 percent or more of the total number of eligible producers and importers that voted in the most recent referendum. The Act provides for a sign-up period during which eligible cotton producers and importers may request that USDA conduct a referendum on continuation of the 1991 amendments to the Order. Accordingly, USDA will provide all eligible Upland cotton producers and importers an opportunity to request a continuance referendum regarding the 1991 amendments to the Order.

The sign-up period will be provided for all eligible producers and importers. Eligible cotton producers would be provided the opportunity to sign-up to request a continuance referendum in person at the county FSA office where their farm is located. If the producers land is in more than one county, the producer shall sign-up at the county office where FSA administratively maintains and processes the producer's farm records. Producers who choose not to visit the county FSA office in person may request a sign-up form in the mail from the same office.

USDA would mail sign-up information, including a written request form, to all known, eligible, cotton importers. Importers who favor the conduct of a continuance referendum would return their signed request forms to USDA, FSA, ORAS, Attention: William A. Brown, PO Box 23278, Washington, DC 20026–3278.

Importers who do not receive a request form in the mail by June 3, 2002, and who meet the eligibility requirements to participate in the sign-up, may submit a written, signed, request for a continuance referendum. Such request must be accompanied by a copy of the U.S. Customs form 7501 showing payment of a cotton assessment for calendar year 2001. Requests and supporting documentation should be mailed to USDA, FSA, ORAS, Attention: William A. Brown, PO Box 23278, Washington, DC 20026–3278.

The sign-up period will be from June 3, 2002 through August 30, 2002. Producer and importer forms shall only be counted if received by USDA during the stated sign-up period.

Section 8(c)2 of the Act provides that if USDA determines, based on the results of the sign-up, that 10 percent or more of the total number of eligible producers and importers that voted in the most recent 1991 referendum (*i.e.*, 4,622) request a continuance referendum on the 1991 amendments, a referendum will be held within 12 months after the end of the sign-up period. In counting such requests, however, not more than 20 percent may be from producers from any one state or from importers of cotton. For example, when counting the requests, the AMS Cotton Program would determine the total number of valid requests from all cotton-producing states and from importers. Not more than 20 percent of the total requests will be counted from any one state or from importers toward reaching the 10 percent for 4,622 total signatures required to call for a referendum. If USDA determines that 10 percent or more of the number of producers and importers who voted in the most recent referendum favor a continuance referendum. A referendum will be held.

This proposed rule would amend the procedures for the conduct of the current sign-up period. The current rules and regulations provide for sections on definitions, supervision of the sign-up period, eligibility, participation in the sign-up period, counting requests, reporting results and instructions and forms. The Administrator designated all divisions in AMS as programs on September 18, 1997. Hence, this proposal has name, position title, address changes as well as other miscellaneous changes.

The term "Cotton Division" would be changed to "Cotton Program." The term "Director" would be replaced by "Deputy Administrator." In section 1205.18 the term "Producer" is further defined to ensure that all producers that planted cotton during 2001 will be eligible to participate in the sign-up period. In sections 1205.12 and 1205.26 the words "*de minimis* assessment" have been replaced with similar meaning language. In sections 1205.20, 1205.26, and 1205.27 "calendar year 1995" would change to "calendar year 2001." In section 1205.26 the term "limited partnership" has been added. In sections 1205.27, 1205.28, and 1205.29 sign-up period conduct dates, FSA reporting dates, and mailing addresses have been updated. In section 1205.26 a new subsection (g) is added to prohibit proxy or power of attorney participation. Section 1205.27 (c) that addresses producer participation in the sign-up period, is revised to reflect current Farm Service Agency procedures.

A 10-day comment period is determined to be appropriate because these proposed eligibility and participation requirements are substantially the same as the eligibility and participation requirements that were used in previous referenda and a sign-up period; participation is voluntary; and this rule, if adopted, should be made effective as soon as possible in order to best reflect applicable time frames in the Act.

List of Subjects in 7 CFR Part 1205

Advertising, Agricultural research, Cotton, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 1205 is proposed to be amended as follows:

PART 1205—COTTON RESEARCH AND PROMOTION

1. The authority citation part 1205 continues to read as follows:

Authority: 7 U.S.C. 2101–2118.

2. In § 1205.12, the last sentence is revised to read as follows:

§ 1205.12 Cotton.

* * * The term *cotton* does not include imported cotton for which the assessment is less than the value of $2.00 per line item entry as established by regulations.

3. Section 1205.18 is revised to read as follows:

§ 1205.18 Producer.

The term *producer* means any person who shares in a cotton crop, or in the proceeds thereof, as an owner of the farm, cash tenant, landlord of a share tenant, share tenant, or sharecropper, that planted the cotton during the representative period.

4. Section 1205.20 is revised to read as follows:

§ 1205.20 Representative Period.

The term *representative period* means the 2001 calendar year.

5. In § 1205.26, paragraphs (a)(1), (a)(2), and (d) are revised and a new paragraph (g) is added to read as follows:

§ 1205.26 Eligibility.

* * * * *

(a) * * *

(1) any person who was engaged in the production of Upland cotton during calendar year 2001; and

(2) any person who was an importer of Upland cotton and imported Upland cotton in excess of the value of $2.00 per line item entry during calendar year 2001.

* * * * *

(d) An officer or authorized representative of a qualified corporation, association, or limited partnership may submit a request on behalf of that corporation, association, or limited partnership.

* * * * *

(g) Participation in the sign-up by proxy or power of attorney is not authorized.

6. Section 1205.27 is revised to read as follows:

§ 1205.27 Participation in the Sign-up Period.

The sign-up period will be from June 3, 2002, through August 30, 2002. Those persons who favor the conduct of a continuance referendum and who wish to request that USDA conduct such a referendum may do so by submitting such request in accordance with this section. All requests must be received by the appropriate USDA office by August 30, 2002.

(a) Before the sign-up period begins, FSA shall establish a list of known, eligible, Upland cotton producers in the county that it serves during the representative period, and shall also establish a list of known, eligible Upland cotton importers.

(b) Before the start of the sign-up period, USDA shall mail a request form to each known, eligible, cotton importer. Importers who wish to request a referendum and who do not receive a request form in the mail by June 3, 2002, may participate in the sign-up period by submitting a signed, written request for a continuance referendum, along with a copy of a U.S. Customs form 7501 showing payment of a cotton assessment for calendar year 2001. Importers must submit their requests and supporting documents to USDA, FSA, ORAS, Attention: William A. Brown, PO Box 23278, Washington, DC 20026–3278. All requests and supporting documents must be received by the appropriate FSA office by August 30, 2002.

(c) Each person on the county FSA office lists may participate in the sign-up period. Eligible producers must date and sign their name on the "County FSA Office Sign-up Sheet." A person whose name does not appear on the county FSA office list may participate in the sign-up period. Such person must be identified on FSA–578 during the representative period or provide documentation that demonstrates that the person was a cotton producer during the representative period. Cotton producers not listed on the FSA–578 shall submit at least one sales receipt for cotton they planted during the representative period. Cotton producers must make requests to the county FSA office where the producer's farm is located. If the producer's land is in more than one county, the producer shall make request at the county office where FSA administratively maintains and processes the producer's farm records. It is the responsibility of the person to provide the information needed by the county FSA office to determine eligibility. It is not the responsibility of the county FSA office to obtain this information. If any person whose name does not appear on the county FSA office list fails to provide at least one sales receipt for the cotton they produced during the representative period, the county FSA office shall determine that such person is ineligible to participate in the sign-up period, and shall note "ineligible" in the remarks section next to the person's name on the county FSA office sign-up sheet. In lieu of personally appearing at a county FSA office, eligible producers may request a sign-up form from the county FSA office where the producer's farm is located. If the producer's land is in more than one county, the producer shall make the request for the sign-up form at the county office where FSA administratively maintains and processes the producer's farm records. Such request must be accompanied by a copy of at least one sales receipt for cotton they produced during the representative period. The appropriate FSA office must receive all completed forms and supporting documentation by August 30, 2002.

7. In § 1205.28, the first sentence is revised to read as follows:

§ 1205.28 Counting.

County FSA offices and FSA, Deputy Administrator for Operations Review and Analysis Staff (ORAS), shall begin counting requests no later than September 3, 2002. * * *

8. Section 1205.29 is revised to read as follows:

§ 1205.29 Reporting Results.

(a) Each county FSA office shall prepare and transmit to the state FSA office, by September 10, 2002, a written report of the number of eligible producers who requested the conduct of a referendum, and the number of ineligible persons who made requests.

(b) ORAS shall prepare, by September 10, 2002, a written report of the number of eligible importers who requested the conduct of a referendum, and the number of ineligible persons who made requests.

(c) Each state FSA office shall, by September 10, 2002, forward all county reports to ORAS. By September 17, 2002, ORAS shall forward its report of the total number of eligible producers and importers that requested a continuance referendum, through the sign-up period, to the Deputy Administrator, Cotton Program, AMS, Stop 0224, 1400 Independence Ave., SW, Washington, DC 20250–0224.

(d) The Chief of the Research and Promotion Staff, Cotton Program, shall prepare a report of the requests received, including the number of eligible persons who requested the conduct of a referendum, and the number of ineligible persons who made requests, to the Deputy Administrator of the Cotton Program, and shall maintain one copy of the report where it will be available for public inspection for a period of 5 years following the end of the sign-up period.

(e) The Deputy Administrator of the Cotton Program shall prepare and submit to the Secretary a report of the results of the sign-up period. The Secretary will conduct a referendum if requested by 10 percent or more of the number of cotton producers and importers voting in the most recent (July 1991) referendum, but not more than 20 percent of the total requests counted toward the 10 percent figure may be from producers in any one state or from importers of cotton. The Secretary shall announce the results of the sign-up period in a separate notice in the **Federal Register**.

Dated: March 12, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NM–422–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 737–100, –200, –200C, –300, –400, and –500 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. This proposal would require replacing the existing pressure relief valve on the potable water tank with a new, improved pressure relief valve, which is made of stainless steel and is non-adjustable. For certain airplanes, this proposal would also require modification of certain piping to re-locate the pressure relief valve. This action is necessary to prevent rupture of the potable water tank during flight of the airplane, which could result in structural damage to the airplane and inability to sustain flight loads. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by May 2, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket Number 2000–NM–422–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2000–NM–422–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Don Eiford, Aerospace Engineer, ANM–130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2788; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NM–422–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket Number 2000–NM–422–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received reports indicating that there have been several occurrences of potable water tanks rupturing while the airplane was in flight. In one case the potable water tank relief valve was incorrectly located, so that the relief valve could not protect the tank from overpressurization. In other cases, the pressure relief valve on the water tank was correctly located, but malfunctioned, leading to rupture of the water tank with consequent structural damage to the airplane. Such malfunctioning has been found to be caused by corrosion or by inadvertent adjustment of the pressure relief valve. Malfunction of the pressure relief valve for the potable water tank or the incorrect location of that valve, if not corrected, could cause a rupture of the potable water tank during flight of the airplane, which could result in structural damage to the airplane and inability to sustain flight loads.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Service Bulletins 737–38A1038, Revision 2, dated September 25, 1997, and 737–38A1047, Revision 1, dated September 27, 2001, which describe procedures for replacing the existing pressure relief valve in the potable water tank with a new stainless steel, non-adjustable pressure relief valve. In addition, the FAA has reviewed and approved Boeing Service Bulletin 737–38–1029, Revision 1, dated August 19, 1993, which describes procedures for modification of piping to re-locate the pressure relief valve so that the relief valve can protect the potable water tank against over-pressurization. Accomplishment of the actions specified in those service bulletins is intended to adequately address the identified unsafe condition.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the service bulletins described previously, except as discussed below.

Differences Between Service Bulletins and Proposed AD

One difference concerns the compliance times recommended in the service bulletins and those in the proposed AD. Boeing Service Bulletins 737–38A1038 and 737–38A1047 recommend that the replacement of the pressure relief valve on the potable water tank be done as soon as manpower and materials are available. Boeing Service Bulletin 737–38–1029 describes procedures for modification of the system to relocate the check valve and pressure relief valve but does not recommend a compliance time for that action. The proposed AD specifies a compliance time of 18 months after the effective date of the AD for replacement of the existing pressure relief valve with a new valve, so that the required actions can be done during an operator's regularly-scheduled "C" check.

Another change concerns re-installation of the existing pressure relief valve after the modification of the system which is required for certain airplanes listed in Boeing Service Bulletin 737–38–1029. The proposed AD specifies replacement of the existing pressure relief valve with a new, improved valve for these certain airplanes as well as for all other affected airplanes.

Cost Impact

There are approximately 2,221 airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,208 airplanes of U.S. registry would be affected by this proposed AD.

The FAA estimates that of the 1,208 airplanes of U.S. registry, 2 would be affected by the proposed modification of piping to re-locate the pressure relief valve, that it would take approximately 6 work hours per airplane to accomplish the proposed modification, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the proposed modification of piping on U.S. operators is estimated to be $1,320, or $660 per airplane.

The FAA estimates that all of the 1,208 airplanes of U.S. registry would be affected by the proposed replacement of the pressure relief valve, that it would take approximately 2 work hours per airplane to accomplish the proposed replacement, and that the average labor rate is $60 per work hour. Required parts would cost approximately $300 per airplane. Based on these figures, the cost impact of the proposed replacement of the pressure relief valve on U.S. operators is estimated to be $507,360, or $420 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 2000–NM–422–AD.

Applicability: Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, line numbers 1 through 2696, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent rupture of the potable water tank during flight of the airplane, which could result in structural damage to the airplane and inability to sustain flight loads, accomplish the following:

Modification and Replacement

(a) Within 18 months after the effective date of this AD, perform the requirements of paragraph (a)(1) or (a)(2) of this AD, as applicable.

(1) For those airplanes listed in the effectivity section of Boeing Service Bulletin 737–38–1029, Revision 1, dated August 19, 1993: Modify the potable water pressurization system in accordance with the service bulletin, but do not reinstall the existing pressure relief valve having part number (P/N) 520A–6DB–50. Prior to further flight, perform the requirements of paragraph (a)(2) of this AD.

Note 2: Modification of the potable water pressurization system, done in accordance with Boeing Service Bulletin 737–38–1029, dated June 6, 1991, is acceptable for compliance with paragraph (a)(1) of this AD.

(2) For those airplanes having line numbers 1 through 2523: Remove the existing pressure relief valve from the potable water tank, and replace the valve with a new pressure relief valve having part number P/N RV05–362, in accordance with Boeing Service Bulletin 737–38A1047, Revision 1, dated September 27, 2001.

Note 3: For those airplanes having line numbers 1 through 2523, installation of a new pressure relief valve having P/N RV05–362, done in accordance with Boeing Service Bulletin 737–38A1047, dated November 9, 2000, is acceptable for compliance with paragraph (a)(2) of this AD.

(b) For those airplanes having line numbers 2524 through 2696: Within 18 months after the effective date of this AD, remove the existing pressure relief valve from the potable water tank, and replace the valve with a new pressure relief valve having P/N RV05–362, in accordance with Boeing Service Bulletin 737–38A1038, Revision 2, dated September 25, 1997.

Note 4: For those airplanes having line numbers 2524 through 2696, installation of a new pressure relief valve having P/N RV05–362, done in accordance with Boeing Service Bulletin 737–38A1038, dated December 1, 1994, or Revision 1, dated February 2, 1995, is acceptable for compliance with paragraph (b) of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that

VOL 67 ISS 52 MR 18 2002 UMI

provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 5: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 11, 2002.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 2002–NM–36–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–9–10, –30, and –40 Series Airplanes and C–9 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–9–10, –30, and –40 series airplanes and C–9 airplanes, that currently requires an inspection to detect chafing of the wiring of the attendants' work light of the aft cabin, and repair of chafed wiring. That AD also requires modification and reidentification of the attendants' work light assemblies of the aft cabin. This action would require revising the applicability of the existing AD to add certain airplanes and to remove certain other airplanes. The actions specified by the proposed AD are intended to prevent chafing of the ground wire against the positive contact of the lamp of the attendants' work light of the aft cabin, and consequent arcing or arcing damage to the wiring of the attendants' work light and transformer of the aft cabin. Such arcing or arcing damage could result in short circuits and consequent smoke and fire in the aft cabin area. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by May 2, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2002–NM–36–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2002–NM–36–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Aircraft Group, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Elvin Wheeler, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5344; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2002–NM–36–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2002–NM–36–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On November 28, 2001, the FAA issued AD 2001–24–15, amendment 39–12532 (66 FR 64133, December 12, 2001), applicable to certain McDonnell Douglas Model DC–9–10, –30, and –40 series airplanes and C–9 airplanes, to require an inspection to detect chafing of the wiring of the attendants' work light of the aft cabin, and repair of chafed wiring. That AD also requires modification and reidentification of the attendants' work light assemblies of the aft cabin. The requirements of that AD are intended to prevent chafing of the ground wire against the positive contact of the lamp of the attendants' work light of the aft cabin, and consequent arcing or arcing damage to the wiring of the attendants' work light and transformer of the aft cabin. Such arcing or arcing damage could result in short circuits and consequent smoke and fire in the aft cabin area.

Explanation of Relevant Service Information

Since the issuance of that AD, the FAA has reviewed and approved McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 03, dated November 21, 2001. Revision 03 revises the effectivity of the service bulletin by adding certain airplanes and removing certain other airplanes. No additional work is required by Revision 03 for airplanes previously modified by prior issues of the service bulletin.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 2001–24–15 to revise the applicability of the AD and to continue to require an inspection to detect chafing of the wiring of the attendants' work light of the aft cabin, and repair of chafed wiring. The proposed AD also would continue to require modification and reidentification of the attendants' work light assemblies of the aft cabin.

Cost Impact

There are approximately 176 Model DC–9–10, –30, and –40 series airplanes and C–9 airplanes of the affected design in the worldwide fleet. The FAA estimates that 278 airplanes of U.S. registry would be affected by this proposed AD.

The actions that are currently required by AD 2001–24–15 take approximately 1 work hour per airplane to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the currently required actions on U.S. operators is estimated to be $16,680, or $60 per airplane.

This proposed AD does not add any new actions or requirements, and only revises the applicability of the AD by adding certain airplanes and removing certain other airplanes. Therefore, the estimated cost impact for this proposed AD is unchanged from the existing AD.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–12532 (66 FR 64133, December 12, 2001), and by adding a new airworthiness directive (AD), to read as follows:

McDonnell Douglas: Docket 2002–NM–36–AD. Supersedes AD 2001–24–15, Amendment 39–12532.

Applicability: Model DC–9–10, –30, and –40 series airplanes and C–9 airplanes, equipped with an attendants'' work light in the aft cabin; certificated in any category; as listed in McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 03, dated November 21, 2001, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent arcing or arcing damage to the wiring of the attendants' work light of the aft cabin due to chafing of the ground wire against the positive contact of the lamp of the attendants' work light and transformer of the aft cabin, which could result in short circuits and consequent smoke and fire in the aft cabin area, accomplish the following:

Note 2: Paragraph (a) of this AD merely restates the requirements of paragraph (a) AD 2001–24–15, amendment 39–12532. As allowed by the phrase, "unless accomplished previously," if those requirements of AD 2001–24–15 have already been accomplished, this AD does not require that those actions be repeated.

Restatement of AD 2001–24–15

(a) For airplanes listed in McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 02, dated January 27, 2000: Within 1 year after January 16, 2002 (the effective date of AD 2001–24–15, amendment 39–12532), do the actions specified in paragraphs (a)(1) and (a)(2) of this AD, per McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 02, dated January 27, 2000.

(1) Do a general visual inspection to detect chafing of the wiring of the attendants' work light of the aft cabin. If any chafing is detected, before further flight, repair chafed wiring per the service bulletin.

Note 3: For the purposes of this AD, a general visual inspection is defined as "A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight, and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked."

(2) Modify and reidentify the attendants' work light assemblies of the aft cabin.

New Requirements of This AD

(b) For airplanes as listed in McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 03, dated November 21, 2001: Within 1 year after the effective date of this AD, do the actions specified in paragraphs (b)(1) and (b)(2) of this AD, per McDonnell Douglas Alert Service Bulletin DC9–33A058, Revision 03, dated November 21, 2002.

VOL
67
ISS
52
MR
18
2002
UMI

(1) Do a general visual inspection to detect chafing of the wiring of the attendants' work light of the aft cabin. If any chafing is detected, before further flight, repair chafed wiring per the service bulletin.

(2) Modify and reidentify the attendants' work light assemblies of the aft cabin.

Note 4: Inspections, repairs, modifications, and reidentifications done before the effective date of this AD per McDonnell Douglas Service Bulletin DC9–33–058, dated June 5, 1973; Revision 1, dated November 26, 1975; or Revision 02, dated January 27, 2000; are considered acceptable for compliance with the requirements of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 5: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 11, 2002.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Chapter I

[Docket No. RM02–7–000]

Accounting and Reporting of Asset Retirement Obligations

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Informal Technical Conference.

SUMMARY: The Federal Energy Regulatory Commission (Commission) intends to hold a staff technical conference on May 7 and 8, 2002, at 9:00 A.M. in the Commission's offices, 888 First Street, NE., Washington, DC, to address the financial accounting and reporting implications related to asset retirement obligations associated with the retirement of tangible long-lived assets.

DATES: The staff technical conference will be held at 9 a.m. on May 7 and May 8, 2002. Persons who wish to participate in the conference should, no later than March 25, 2002, notify Raymond Reid by telephone at (202) 219–2928, or by facsimile at (202) 219–2632, or by E-Mail: *raymond.reid@ferc.gov* or Mark Klose by telephone at (202) 219–2595, or by facsimile at (202) 219–2632, or by E-mail: *mark.klose@ferc.gov*.

ADDRESSES: The informal technical conference will be held at the Commission's offices, 888 First Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Mark Klose (Technical Issues), Office of Executive Director, Division of Regulatory Accounting Policy, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Phone (202) 219–2595; Fax: (202) 219–2632; E-Mail: *mark.klose@ferc.gov*.

Raymond Reid (Technical Issues), Office of Executive Director, Division of Regulatory Accounting Policy, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Phone (202) 219–2928; Fax: (202) 219–2632; E-Mail: *raymond.reid@ferc.gov*.

Julia Lake (Legal Issues), Office of General Counsel, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Phone (202) 208–2019; E-Mail: *julia.lake@ferc.gov*.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, it is available for inspection in the Commission's Public Reference Room at 888 First Street, NE., Room 2A, Washington, DC 20426, during regular business hours and is posted on both the Commission's Issuance Posting System (CIPS) and the Records and Information Management Systems (RIMS), and may be viewed and printed remotely via the Internet through Commission's Home Page (*http://www.ferc.gov*).

Notice of Informal Technical Conference

March 8, 2002.

Take notice the Commission staff will hold an informal technical conference to discuss the financial accounting and reporting implications related to asset retirement obligations associated with the retirement of tangible long-lived assets. The conference will be held on Tuesday, May 7, 2002, and Wednesday, May 8, 2002, at 9:00 A.M. in a room to be designated at the offices of the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC. The conference is being convened to enlist the participation of interested parties including among others, the Association of Oil Pipe Lines, Edison Electric Institute, Interstate Natural Gas Association of America, National Association of Regulatory Utility Commissioners, in the development of accounts and reporting requirements for tangible long-lived assets.

Participants may be assigned to a panel in order to establish a logical order of presentation and to facilitate an informal exchange of views. The informal technical conference is intended to be structured so that participants can discuss the financial accounting, and reporting implications related to obligations associated with the retirement of tangible long-lived assets and related matters. The goal of the conference is to identify how recognition of asset retirement obligations may affect the Commission's existing accounting and rate regulations.

Persons who wish to participate in the conference should, no later than March 25, 2002, notify Raymond Reid by telephone at (202) 219–2928, or by facsimile at (202) 219–2632, or by E-Mail: *raymond.reid@ferc.gov* or Mark Klose by telephone at (202) 219–2595, or by facsimile at (202) 219–2632, or by E-Mail: *mark.klose@ferc.gov*.

After reviewing the requests to participate, the Commission staff will issue a subsequent notice in the **Federal Register** specifying the time, and place and a proposed agenda. For additional information, interested persons may contact Raymond Reid by telephone at (202) 219–2928 (or by e-mail *raymond.reid@ferc.gov*) or Mark Klose by telephone at (202) 219–2595 (or by e-mail *mark.klose@ferc.gov*).

Magalie R. Salas,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 24 and 111

RIN 1515–AC81

User Fees

AGENCY: Customs Service, Department of the Treasury

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the Customs Regulations to reflect various legislative amendments to 19 U.S.C. 58c, the Customs user fee statute, including those made by the Miscellaneous Trade and Technical Corrections Act of 1999 and the Tariff Suspension and Trade Act of 2000. The proposed regulations set forth the new fee structure for passengers arriving in the United States aboard commercial vessels and aircraft, provide for application of a fee to ferries in limited circumstances, and clarify how Customs administers certain user fees. Also, minor conforming changes are proposed to the regulations pertaining to customs brokers.

DATES: Written comments must be received on or before May 17, 2002.

ADDRESSES: Written comments may be submitted to and inspected at the Regulations Branch, Office of Regulations and Rulings, U.S. Customs Service, 1300 Pennsylvania Avenue, NW., 3rd Floor, Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Concerning user fees applicable to commercial vessel and aircraft passengers under § 24.22(g): Edward Matthews at (202) 927–0552. Concerning the various fee payment and information submission procedures under § 24.22: Robert T. Reiley at (202) 927–1504.

SUPPLEMENTARY INFORMATION:

Background

This document proposes changes concerning user fees to parts 24 and 111 of the Customs Regulations (19 CFR Parts 24 and 111). The changes to Part 24 involve § 24.22 and have several bases: (1) Some changes derive from provisions of the Miscellaneous Trade and Technical Corrections Act of 1999 (Pub. L. 106–36, 113 Stat. 127), signed into law on June 25, 1999; (2) one change is based on a provision of the Tariff Suspension and Trade Act of 2000 (Pub. L. 106–476, 114 Stat. 2101), signed into law on November 9, 2000; (3) some changes are based on other statutory provisions that have not previously been reflected in the regulations; (4) some changes are proposed to bring the regulations up to date with current administrative practices; (5) and one change is a technical correction. The changes to part 111 are intended to clarify administration of the annual user fee and the permit fees for customs brokers.

Proposed Changes Based on the Miscellaneous Trade and Technical Corrections Act of 1999

Section 2418 of the Miscellaneous Trade and Technical Corrections Act of 1999 (the Act) amended section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985, codified at 19 U.S.C. 58c (section 58c), which established user fees for certain services performed by the Customs Service. These amendments to section 58c necessitate conforming amendments to the Customs Regulations.

On July 27, 1999, Customs issued a general notice in the **Federal Register** (64 FR 40648) that announced the statutory changes made by the Act and pointed out that these self-effectuating changes became effective on July 25, 1999. The notice also announced several other related changes affecting Customs administration of user fees. The notice indicated that appropriate amendments to the Customs Regulations would be published in due course. This document, issued as a notice of proposed rulemaking because the proposed changes include some that are not derived from self-effectuating statutory amendments, invites public comment on the proposed changes.

Prior Law

Under section 58c(a), Customs is authorized to collect specific fees charged for certain Customs inspectional services, including, in section 58c(a)(5), fees for passengers arriving in the United States aboard commercial vessels and aircraft. Under section 58c(d), the fees are collected from passengers by the companies that issue the ticket or travel document for transportation into the customs territory of the United States or that provide the actual transportation, and those companies remit the fees to Customs.

Immediately prior to enactment of the Act, section 58c(a)(5)(A) provided for a fee of $6.50 per passenger arriving in the United States aboard a commercial vessel or commercial aircraft from a place outside the customs territory of the United States. However, this fee provision applied only to fiscal years 1994 (effective on January 1, 1994) through 1997. Thus, after fiscal year 1997, the $6.50 fee was no longer in effect.

Immediately prior to enactment of the Act, section 58c(a)(5)(B), applicable to fiscal year 1998 and each following fiscal year, provided for a fee of $5 per passenger arriving in the United States aboard a commercial vessel or commercial aircraft from a place outside the United States other than a place referred to in section 58c(b)(1)(A)(i), that is, Canada, Mexico, a territory or a possession of the United States, or any adjacent island. (Section 24.22(g)(2)(i)(B) of the Customs Regulations (19 CFR 24.22(g)(2)(i)(B)) currently provides that the territories and possessions of the United States include American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands and that adjacent islands include all of the islands in the Caribbean Sea, the Bahamas, Bermuda, St. Pierre, Miquelon, and the Turks and Caicos Islands. However, this document includes discussion of a proposal to amend the provision concerning this list of adjacent islands.)

The effect of these provisions was to impose a fee structure as follows: (1) A fee of $6.50 on commercial vessel and aircraft passengers arriving from locations outside the customs territory of the United States through September 30, 1997, then, (2) commencing on October 1, 1997, a fee of $5 per commercial vessel and aircraft passenger arriving from a place outside the United States except for a passenger arriving from Canada, Mexico, a U.S. territory or possession, or an adjacent island. Thus, beginning with fiscal year 1998, there was no fee applicable under section 58c(a)(5) for commercial vessel or aircraft passengers arriving from Canada, Mexico, United States territories or possessions, or adjacent islands. (For Puerto Rico, this represented no change because Puerto Rico is part of the customs territory of the United States and thus no fee applied to Puerto Rico under section 58c(a)(5)(A).)

In addition, immediately prior to enactment of the Act, section 58c(b)(1)(A) provided that no fee may be charged under section 58c(a) in the case of the arrival of a passenger whose journey either originated in Canada, Mexico, a United States territory or possession, or an adjacent island or originated in the United States and was limited to Canada, Mexico, a United States territory or possession, or an adjacent island. (This prohibition was suspended during the period from January 1, 1994, through September 30, 1997 (under section 58c(b)(1)(C)).)

New Fee Structure

Paragraph (b)(1) of section 2418 of the Act amended sections 58c(a)(5)(A) and (B) to modify the above-discussed fee structure. The amendment accomplished two things: (1) It continued, in section 58c(a)(5)(A), the $5 fee per passenger arriving in the United States aboard a commercial

VOL 67 ISS 52 MR 18 2002 UMI

vessel or aircraft from a place outside the United States other than Canada, Mexico, a United States territory or possession, or an adjacent island; and (2) it imposed, under section 58c(a)(5)(B), a fee of $1.75 per passenger arriving aboard a commercial vessel (not commercial aircraft) from Canada, Mexico, a United States territory or possession, or an adjacent island. Thus, under the amended statute, no fee applies in the case of passengers arriving aboard commercial aircraft from Canada, Mexico, a United States territory or possession, or an adjacent island.

Customs notes that the amendment of section 58c(b)(1)(A) enables collection of the $1.75 per passenger fee of amended section 58c(a)(5)(B). The amendment excepted that fee from the fee exemption provided by section 58c(b)(1)(A) that otherwise precludes application of a fee under section 58c(a)(5) in connection with the arrival of any passenger whose journey originated in Canada, Mexico, a United States territory or possession, or an adjacent island or which originated in the United States and was limited to those named places.

Customs proposes in this document to amend the Customs Regulations to conform to the new fee structure.

Procedures for Payment of the New Fees

Prior to the Act, only one fee applied to covered passengers under section 58c(a)(5), that is, $5 prior to January 1, 1994, $6.50 beginning on January 1, 1994, and $5 beginning on October 1, 1997. With the Act's amendment of section 58c(a)(5), there are now two passenger fees, that is, the $5.00 fee of section 58c(a)(5)(A) where applicable and the $1.75 fee of section 58c(a)(5)(B) where applicable. Thus, since enactment of the Act, Customs must administer and account for two fees rather than one. This new fee structure requires amendment of the Customs Regulations to conform the regulatory procedures to the new fee structure.

Under the current Customs Regulations, it is the responsibility of the carriers, travel agents, tour wholesalers, or other parties issuing tickets or travel documents to collect the fee from all passengers who are subject to the fee (19 CFR 24.22(g)(3)). These parties must make payment of the collected fees to Customs no later than 31 days after the close of the calendar quarter in which the fees were required to be collected from the passengers (19 CFR 24.22(g)(4)). The regulation also provides (in § 24.22(g)(4)) that the quarterly fee payment must be accompanied by a statement that includes the name, address, and taxpayer identification number of the party remitting the payment and the calendar quarter covered by the payment.

This document proposes to amend § 24.22(g)(3) (redesignated in the proposed regulation as § 24.22(g)(4)) to make clear that the party responsible for collecting the fee must collect a fee when an infant travels without a ticket or travel document. This follows Customs consistent practice of treating infants as passengers for purposes of the passenger fees. In this regard, Customs proposes to clarify this by adding to § 24.22(g)(1) a definition of the term "passenger" making it clear that it includes infants even if the carrier does not charge for their transportation and even if the infant is carried by another passenger rather than occupying a seat.

The document also proposes to amend § 24.22(g)(4) (redesignated as § 24.22(g)(5)) to require the following additional information in the statement: The total number of tickets for which fees were required to be collected, including the total number of infants traveling without a ticket or travel document for which fees were required to be collected; the total amount of fees collected and remitted; with respect to vessel fees, the total number of tickets and non-ticketed infants for which fees were required to be collected and the total amount of fees collected; and a breakdown of vessel fees collected and remitted under section 58c(a)(5)(A) (the $5 per passenger fee) and section 58c(a)(5)(B) (the $1.75 per passenger fee). This additional information is necessary to enable Customs to properly account for the fees now provided for under section 58c(a)(5).

The Tariff Suspension and Trade Act of 2000

A recent amendment to section 58c was made by section 1457 of the Tariff Suspension and Trade Act of 2000. Under section 1457, section 58c(b)(1)(A)(iii) was amended to provide an exception to the fee limitation relative to ferries. Prior to this amendment, ferries were excepted from application of the fees under section 58c(a). With this self-effectuating amendment (effective on November 24, 2000), ferries whose operations began on or after August 1, 1999, and who operate south of 27 degrees latitude and east of 89 degrees longitude are now subject to the commercial vessel fee of section 58c(a)(1) (19 CFR 24.22(b)(1)) (provided the ferry is of 100 net tons or more) and the $1.75 commercial vessel passenger fee of section 58c(a)(5)(B) (proposed paragraph (g)(1)(ii) of 19 CFR 24.22). (Customs notes that the definition of "ferry" excludes vessels that provide transportation between places that are more than 300 miles apart. This requirement necessarily means that the $1.75 commercial vessel passenger fee would be applicable because a ferry operating within the specified coordinates will arrive in the United States from a place that qualifies as an adjacent island under paragraph (g)(1)(iii) of this section. See the definition of "ferry" in 19 U.S.C. 58c(c)(1) and 19 CFR 24.22(a)(4).) This amendment necessitates conforming amendments to §§ 24.22(b)(4)(iv) and 24.22(g)(1) of the Customs Regulations.

Proposed Changes Based on Other Statutory Provisions

This document also proposes to include provisions in § 24.22(g) to cover the fee exemption provision set forth in section 58c(b)(1)(A)(iv) and the "one-time only fee" set forth in section 58c(b)(4)(B). These two statutory provisions are not reflected in the current regulation.

The fee exemption provision under section 58c(b)(1)(A)(iv) provides that no fee under section 58c(a)(5) applies to passengers arriving aboard commercial vessels traveling only between ports that are within the customs territory of the United States. The one-time only fee provision of section 58c(b)(4)(B) applies where a fee under section 58c(a)(5) is applicable to passengers arriving aboard a commercial vessel and the voyage is a single voyage involving two or more United States ports (in other words, the vessel proceeds coastwise to one or more United States ports after its initial arrival from a place outside the United States). This provision ensures that in the described situation, the applicable fee is charged only once for each passenger.

Finally, under section 58c(b)(1)(A)(i)(I)(dd), the term "adjacent islands" is given meaning by reference to the definition of that term found at 8 U.S.C. 1101(b)(5). The adjacent islands are set forth under § 24.22(g)(2)(i)(B) of the current Customs Regulations. The document proposes to amend the regulation in order to bring it up to date with the language of 8 U.S.C. 1101(b)(5). (See proposed § 24.22(g)(1)(iii).) All islands found in the current regulation are covered in the proposed regulation (although not explicitly in every case).

Proposed Changes Regarding Administrative Practices

Section 24.22(b)(3) of the Customs Regulations concerns the procedure for prepayment of the fee for the arrival of commercial vessels (that is, vessels of

100 net tons or more as well as barges and other bulk carriers arriving from Canada or Mexico). Section 24.22(c)(3) concerns the procedure for prepayment of the fee for the arrival of commercial vehicles. Section 24.22(d) concerns the fee for the arrival of railroad cars and includes, in paragraph (d)(3), procedures for prepayment of the fee and, in paragraph (d)(4)(ii), procedures for monthly statement filing and fee remittance. In § 24.22(e), which concerns the fee for the arrival of private vessels and private aircraft, paragraph (e)(1) covers payment of the fee at the time of arrival and paragraph (e)(2) covers the procedure for prepayment of the fee. Section 22.24(g)(4) covers the procedure for payment of fees for the arrival of passengers aboard commercial vessels and commercial aircraft. Section 24.22(h) concerns the annual customs broker permit fee. Section 24.22(i) concerns procedures for remittance of, and for submitting information relative to, the fees provided for under § 24.22.

This document proposes to amend the above regulatory provisions to reflect current fee payment and other practices, including clarification of the proper addresses for the mailing of payments, requirements for the user fee decal, and use of electronic and credit card payment options.

Technical Correction

Upon routine review of the Part 24 texts, Customs discovered erroneous references to § 142.13(c) (19 CFR 142.13(c)) in paragraphs (a), (c)(2), and (d) of § 24.25, which pertains to statement processing and automated clearinghouse procedures. Section 142.13(c) is currently reserved, and the reference in the above paragraphs of § 24.25 should instead be to § 142.13(b), which pertains to special classes of merchandise.

This document proposes to correct these erroneous references.

Conforming Changes to Part 111

Part 111 of the Customs Regulations (19 CFR part 111) pertains to customs brokers and includes, in §§ 111.19 and 111.96, references to the payment of the annual customs broker permit user fee referred to in § 24.22(h). This document proposes amendments to §§ 111.19 and 111.96 to conform to the change to § 24.22(h) referred to above and to clarify the payment procedure in connection with a national permit application.

Comments

Before adopting these proposed amendments as a final rule, consideration will be given to any written comments timely submitted to Customs including comments on the clarity of the proposed rule and how it may be made easier to understand. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4 of the Treasury Department Regulations (31 CFR 1.4), and § 103.11(b) of the Customs Regulations (19 CFR 103.11(b)) on regular business days between the hours of 9 a.m. and 4:30 p.m. at the Regulations Branch, Office of Regulations and Rulings; U.S. Customs Service, 1300 Pennsylvania Avenue, NW, 3rd Floor, Washington, DC.

Executive Order 12866

This document does not meet the criteria for a "significant regulatory action" as specified in E.O. 12866.

Regulatory Flexibility Act

Based on the supplementary information set forth above and because the proposed amendments to the Customs Regulations concern collection of fees that are mandated by statute, it is certified, pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), that the proposed amendments, if adopted, will not have a significant economic impact on a substantial number of small entities. Accordingly, the proposed amendments are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Paperwork Reduction Act

The collections of information contained in § 24.22 have previously been approved by the Office of Management and Budget (OMB) under OMB control number 1515–0154 (User Fees). This notice of proposed rulemaking (NPRM) contains additional collections of information that have been submitted to OMB for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information that lacks a valid control number.

The additional collections of information in these proposed regulations are at § 24.22(g)(5)(iv) and (v), pertaining to information required in the statement that must accompany a quarterly fee payment relative to passenger fees. This information is necessary to allow Customs to track and account for the two passenger fees mandated in the Miscellaneous Trade and Technical Corrections Act of 1999. The estimated burden to the public resulting from the additional collections is as follows:

Estimated total annual reporting and/or recordkeeping burden: 100 hrs.

Estimated average annual burden per respondent/recordkeeper: 4 hrs.

Estimated number of respondents and/or recordkeepers: 25.

Estimated annual frequency of responses: 4.

Comments on the additional collections of information should be sent to the OMB, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503. A copy should also be sent to Customs at the address set forth in the "Address" section of this document.

Comments are invited on:

(a) Whether the additional collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) The accuracy of the agency's estimate of the additional information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the additional information to be collected;

(d) Ways to minimize the additional information collection burden on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operations, maintenance, and purchase of services to provide the additional information.

Drafting Information

The principal author of this document was Bill Conrad, Office of Regulations and Rulings, U.S. Customs Service. Other personnel contributed in its development.

List of Subjects

19 CFR Part 111

Administrative practice and procedure, Brokers, Customs duties and inspection, Imports, Licensing.

Proposed Amendments to the Regulations

For the reasons stated in the preamble, parts 24 and 111 of the Customs Regulations (19 CFR parts 24 and 111) are proposed to be amended as follows:

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The authority citation for part 24 continues to read in part as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 58a–58c, 66, 1202 (General Note 23, Harmonized Tariff Schedule of the United States), 1505, 1624; 26 U.S.C. 4461, 4462; 31 U.S.C. 9701.

* * * * *

2. It is proposed to amend § 24.22 by:

a. Revising paragraphs (b)(3). (b)(4)(iv), and (c)(3);

b. In paragraph (d), revising the second sentence of paragraph (d)(3), adding a new sentence at the end of paragraph (d)(4)(ii), and, in the last sentence of paragraph (d)(5), removing the words ", in accordance with the procedures set forth in paragraph (i)(2) of this section"

c. Revising paragraphs (e)(1) and (e)(2);

d. In paragraph (g), revising paragraph (g)(1), redesignating paragraphs (g)(2) through (g)(7) as (g)(3) through (g)(8), adding new paragraph (g)(2), revising newly redesignated paragraphs (g)(3), (g)(4), and (g)(5), and, at the end of the last sentence of newly redesignated paragraph (g)(7), removing the words ", in accordance with the procedures set forth in paragraph (i)(2) of this section" and

e. Revising paragraphs (h) and (i).

The revisions read as follows:

§ 24.22 Fees for certain services.

* * * * *

(b) * * *

(3) *Prepayment.* The vessel operator, owner, or agent may at any time prepay the maximum calendar year amount specified in paragraph (b)(1)(ii) or (b)(2)(ii) of this section, or any remaining portion of that amount if individual arrival fees have already been paid on the vessel for that calendar year. Prepayment must be made at a Customs port office. When prepayment is for the remaining portion of a maximum calendar year amount, certified copies of receipts (Customs Form 368 or 368A) issued for individual arrival fee payments during the calendar year must accompany the payment.

(4) *Exceptions.* * * *

(iv) A ferry except for a ferry that began operations on or after August 1, 1999, and operates south of 27 degrees latitude and east of 89 degrees longitude.

(c) * * *

(3) *Prepayment.* The owner, agent, or person in charge of a commercial vehicle may at any time prepay a fee of $100 to cover all arrivals of that vehicle during a calendar year or any remaining portion of a calendar year. Prepayment must be made in accordance with the procedures set forth in this paragraph and paragraph (i) of this section. Prepayment may be sent by mail, with a properly completed Customs Form 339, Annual User Fee Decal Request, to the following address: U.S. Customs Service, Decal Program Administrator, PO Box 382030, Pittsburgh, PA 15250–8030. Alternatively, the decal request and prepayment by credit card may be made via the Internet through the "Traveler Information" links at Customs website (*http://www.customs.gov*). A third option, prepayment at the port, is subject to the port director's discretion to maintain user fee decal inventories. Once the prepayment has been made under this paragraph, a decal will be issued to be permanently affixed by adhesive to the lower left hand corner of the vehicle windshield or on the left wing window, and otherwise in accordance with the accompanying instructions, to show that the vehicle is exempt from payment of the fee for individual arrivals during the applicable calendar year or any remaining portion of that year.

(d) * * *

(3) *Prepayment.* * * * The prepayment, accompanied by a letter setting forth the railroad car number(s) covered by the payment, the calendar year to which the payment applies, a return address, and any additional information required under paragraph (i) of this section, shall be mailed to: U.S. Customs Service, National Finance Center, Collections Section, PO Box 68907, Indianapolis, IN 46268 (or, if for overnight delivery, to: the same addressee at 6026 Lakeside Blvd., Indianapolis, IN 46278).

(4) *Statement filing and payment procedures.* * * *

(ii) * * * Payment must be made in accordance with this paragraph and paragraph (i) of this section and must be sent by mail to the following address: U.S. Customs Service, National Finance Center, Collections Section, PO Box 68907, Indianapolis, IN 46268 (or, if for overnight delivery, to: the same addressee at 6026 Lakeside Blvd., Indianapolis, IN 46278).

* * * * *

(e) *Fee for arrival of a private vessel or private aircraft.*

(1) *Fee.* Except as provided in paragraph (e)(3) of this section, the master or other person in charge of a private vessel or private aircraft must, upon first arrival in any calendar year, proceed to Customs and tender the sum of $25 to cover services provided in connection with all arrivals of that vessel or aircraft during that calendar year. A properly completed Customs Form 339, Annual User Fee Decal Request, must accompany the payment. Upon payment of the annual fee, a decal will be issued to be permanently affixed by adhesive to the vessel or aircraft, and otherwise in accordance with accompanying instructions, as evidence that the fee has been paid. Except in the case of private aircraft, and aircraft landing at user fee airports authorized under 19 U.S.C. 58b, all overtime charges provided for in this part remain payable notwithstanding payment of the fee specified in this paragraph.

(2) *Prepayment.* A private vessel or private aircraft owner or operator may, at any time during the calendar year, prepay the $25 annual fee specified in paragraph (e)(1) of this section. Prepayment must be made in accordance with the procedures set forth in this paragraph and paragraph (i) of this section. Prepayment may be sent by mail, along with a properly completed Customs Form 339, Annual User Fee Decal Request, to the following address: U.S. Customs Service, Decal Program Administrator, PO Box 382030, Pittsburgh, PA 15250–8030. Alternatively, the decal request and prepayment by credit card may be made via the Internet through the "Traveler Information" links at Customs website (*http://www.customs.gov*). A third option, prepayment at the port, is subject to the port director's discretion to maintain user fee decal inventories.

* * * * *

(g) *Fees for arrival of passengers aboard commercial vessels and commercial aircraft.*

(1) *Fees.* (i) Subject to paragraphs (g)(1)(ii) and (g)(3) of this section, a fee of $5 must be collected and remitted to Customs for services provided in connection with the arrival of each passenger aboard a commercial vessel or commercial aircraft from a place outside the United States, other than Canada, Mexico, one of the territories and possessions of the United States, or one of the adjacent islands, in either of the following circumstances:

(A) When the journey of the arriving passenger originates in a place outside the United States other than Canada, Mexico, one of the territories or possessions of the United States, or one of the adjacent islands; or

(B) When the journey of the arriving passenger originates in the United States and is not limited to Canada, Mexico, territories and possessions of the United States, and adjacent islands.

(ii) Subject to paragraph (g)(3) of this section, a fee of $1.75 must be collected and remitted to Customs for services provided in connection with the arrival of each passenger aboard a commercial vessel from Canada, Mexico, one of the territories and possessions of the United States, or one of the adjacent islands, regardless of whether the journey of the arriving passenger originates in a place outside the United States or in the United States.

(iii) For purposes of this paragraph (g), the term "territories and possessions of the United States" includes American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands, and the term "adjacent islands" includes Saint Pierre, Miquelon, Cuba, the Dominican Republic, Haiti, Bermuda, the Bahamas, Barbados, Jamaica, the Windward and Leeward Islands, Trinidad, Martinique, and other British, French, and Netherlands territory or possessions in or bordering on the Caribbean Sea.

(iv) For purposes of this paragraph (g), a journey, which may encompass multiple destinations and more than one mode of transportation, will be deemed to originate in the location where the person's travel begins under cover of a transaction which includes the issuance of a ticket or travel document for transportation into the customs territory of the United States.

(v) For purposes of this paragraph (g), the term *passenger* means a natural person for whom transportation is provided and includes an infant whether a separate ticket or travel document is issued for the infant or the infant occupies a seat or is held or carried by another passenger.

(vi) For purposes of paragraph (g)(1)(ii) of this section, the term "commercial vessel" includes any ferry that began operations on or after August 1, 1999, and operates south of 27 degrees latitude and east of 89 degrees longitude.

(vii) In the case of a commercial vessel making a single voyage involving two or more United States ports, the applicable fee prescribed under paragraph (g)(1)(i) or (g)(1)(ii) of this section is required to be charged only one time for each passenger.

(2) *Fee chart.* The chart set forth below outlines the application of the fees specified in paragraphs (g)(1)(i) and (ii) of this section with reference to the place where the passenger's journey originates and with reference to the place from which the passenger arrives in the United States (that is, the last stop on the journey prior to arrival in the United States). In the chart:

(i) SL stands for "Specified Location" and means Canada, Mexico, any territories and possessions of the United States, and any adjacent islands;

(ii) The single asterisk (*) means that the journey originating in the United States is limited to travel to one or more Specified Locations;

(iii) The double asterisk (**) means that the journey originating in the United States includes travel to at least one place other than a Specified Location; and

(iv) N/A indicates that the facts presented in the chart preclude application of the fee.

Place where journey originates (see (g)(1)(iv)):	Fee status for arrival from SL:		Fee status for arrival from other than SL:	
	Vessel	Aircraft	Vessel	Aircraft
SL	$1.75	(1)	(1)	(1)
Other than SL or U.S.	$1.75	(1)	$5	$5.
U.S.*	$1.75	(1)	N/A	N/A.
U.S.**	$1.75	(1)	$5	$5.

[1] No fee.

(3) *Exceptions.* The fees specified in paragraph (g)(1) of this section will not apply to the following categories of arriving passengers:

(i) Crew members and persons directly connected with the operation, navigation, ownership or business of the vessel or aircraft, provided that the crew member or other person is traveling for an official business purpose and not for pleasure;

(ii) Diplomats and other persons in possession of a visa issued by the United States Department of State in class A–1, A–2, C–2, C–3, G–1 through G–4, or NATO 1–6;

(iii) Persons arriving as passengers on any aircraft used exclusively in the governmental service of the United States or a foreign government, including any agency or political subdivision of the United States or foreign government, so long as the aircraft is not carrying persons or merchandise for commercial purposes. Passengers on commercial aircraft under contract to the U.S. Department of Defense are exempted if they have been precleared abroad under the joint DOD/Customs Military Inspection Program;

(iv) Persons arriving on an aircraft due to an emergency or forced landing when the original destination of the aircraft was a foreign airport;

(v) Persons who are in transit to a destination outside the United States and for whom Customs inspectional services are not provided;

(vi) Persons departing from and returning to the same United States port as passengers on board the same vessel without having touched a foreign port or place; and

(vii) Persons arriving as passengers on board a commercial vessel traveling only between ports that are within the customs territory of the United States.

(4) *Fee collection procedures.* (i) Each air or sea carrier, travel agent, tour wholesaler, or other party issuing a ticket or travel document for transportation into the customs territory of the United States is responsible for collecting from the passenger the applicable fee specified in paragraph (g)(1) of this section, including the fee applicable to any infant traveling without a separate ticket or travel document. The fee must be separately identified with a notation "Federal inspection fees" on the ticket or travel document issued to the passenger to indicate that the required fee has been collected. A fee relative to an infant traveling without a ticket or travel document may be identified instead with the notation on a receipt or other document issued for that purpose or to record the infant's travel. If the ticket or travel document, or a receipt or other document issued relative to an infant traveling without a ticket or travel document, is not so marked and was issued in a foreign country, the fee must be collected by the departing carrier upon departure of the passenger from the United States. If the fee is collected at the time of departure from the United States, the carrier making the collection must issue a receipt to the passenger. U.S.-based tour wholesalers who contract for passenger space and issue non-carrier tickets or travel documents must collect the fee in the same manner as a carrier.

VOL

UMI

(ii) Collection of the fee under paragraph (g)(1)(i) of this section will include the following circumstances:

(A) When a through ticket or travel document is issued covering (or a receipt or other document issued for an infant traveling without a ticket or travel document indicates that the infant's journey is covering) a journey into the customs territory of the United States which originates in and arrives from a place outside the United States other than Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island;

(B) When a return ticket or travel document is issued (or a receipt or other document that indicates an infant traveling without a return ticket or travel document is issued) in connection with a journey which originates in the United States, includes a stop in a place other than Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island, and the return arrival in the United States is from a place other than one of these specified places; and

(C) When a passenger on a journey in transit through the United States to a foreign destination arrives in the customs territory of the United States from a place other than Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island, is processed by Customs, and the journey does not originate in one of these specified places.

(iii) Collection of the fee under paragraph (g)(1)(ii) of this section will include the following circumstances:

(A) When a through ticket or travel document is issued covering (or a receipt or other document issued for an infant traveling without a ticket or travel document indicates that the infant's journey is covering) a journey into the customs territory of the United States from Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island;

(B) When a return ticket or travel document is issued (or a receipt or other document that indicates an infant traveling without a return ticket or travel document is issued) in connection with a journey which originates in the United States and the return arrival in the United States is from Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island; and

(C) When a passenger on a journey in transit through the United States to a foreign destination arrives in the customs territory of the United States from Canada, Mexico, one of the territories and possessions of the United States, or an adjacent island and is processed by Customs.

(5) *Quarterly payment and statement procedures.* Payment to Customs of the fees required to be collected under paragraph (g)(1) of this section must be made no later than 31 days after the close of the calendar quarter in which the fees were required to be collected from the passenger. Payment of the fees must be made, in accordance with the procedures set forth in this paragraph and paragraph (i) of this section, by the party required to collect the fee under paragraph (g)(4)(1) of this section. Each quarterly fee payment must be sent to the following address: U.S. Customs Service, National Finance Center, Collections Section, P.O. Box 68907, Indianapolis, IN 46268 (or, if for overnight delivery, to: the same addressee at 6026 Lakeside Blvd., Indianapolis, IN 46278). Overpayments and underpayments may be accounted for by an explanation with, and adjustment of, the next due quarterly payment to Customs. The quarterly payment must be accompanied by a statement that includes the following information:

(i) The name and address of the party remitting payment;

(ii) The taxpayer identification number of the party remitting payment;

(iii) The calendar quarter covered by the payment;

(iv) The total number of tickets for which fees were required to be collected, the total number of infants traveling without a ticket or travel document for which fees were required to be collected, and the total amount of fees collected and remitted; and

(v) For commercial vessel passengers, the total number of tickets for which fees were required to be collected, the total number of infants traveling without a ticket or travel document for which fees were required to be collected, the total amount of fees collected and remitted to Customs, and a separate breakdown of the foregoing information relative to the $5 vessel passenger fee collected and remitted under paragraph (g)(1)(i) of this section and the $1.75 vessel passenger fee collected and remitted under paragraph (g)(1)(ii) of this section.

* * * * *

(h) *Annual customs broker permit fee.* Customs brokers are subject to an annual fee for each district permit and for a national permit held by an individual, partnership, association, or corporation, as provided in § 111.96(c) of this chapter. The annual fee for each district permit must be submitted to the port through which the broker was granted the permit. The annual fee for a national permit must be submitted to the port through which the broker's license is delivered.

(i) *Information submission and fee remittance procedures.* In addition to any information specified elsewhere in this section, each payment made by mail must be accompanied by information identifying the person or organization remitting the fee, the type of fee being remitted (for example, railroad car, commercial truck, private vessel), and the time period to which the payment applies. All fee payments required under this section must be in the amounts prescribed and must be made in U.S. currency, or by check or money order payable to the United States Customs Service, in accordance with the provisions of § 24.1 of this part. Authorization for making payments electronically can be obtained by writing to the National Finance Center, Collections Section, 6026 Lakeside Blvd., Indianapolis, IN 46278. Where payment is made at a Customs port, credit cards will be accepted only where the port is equipped to accept credit cards for the type of payment being made. If payment is made by check or money order, the check or money order must be annotated with the appropriate class code. The applicable class codes and payment locations for each fee are as follows:

(1) Fee under paragraph (b)(1) of this section (commercial vessels of 100 net tons or more other than barges and other bulk carriers from Canada or Mexico): class code 491. Payment location: port of arrival for each individual arrival (fee to be collected by Customs at the time of arrival) or prepayment at the port in accordance with paragraph (b)(3) of this section;

(2) Fee under paragraph (b)(2) of this section (barges and other bulk carriers from Canada or Mexico): class code 498. Payment location: port of arrival for each individual arrival (fee to be collected by Customs at the time of arrival) or prepayment at the port in accordance with paragraph (b)(3) of this section;

(3) Fee under paragraph (c) of this section (commercial vehicles): for each individual arrival, class code 492; for prepayment of the maximum calendar year fee, class code 902. Payment location: port of arrival for each individual arrival (fee to be collected by Customs at the time of arrival) or prepayment in accordance with paragraph (c)(3) of this section;

(4) Fee under paragraph (d) of this section (railroad cars): for each individual arrival (under the monthly payment and statement filing procedure), class code 493; for prepayment of the maximum calendar year fee, class code 903. Payment location: for individual arrivals (monthly payment and statement filing), see paragraph (d)(4)(ii) of this section; for prepayment, see paragraph (d)(3) of this section;

(5) Fee under paragraph (e) of this section (private vessels and aircraft): for private vessels, class code 904; for private aircraft, class code 494. Payment location: port of arrival for each individual arrival (fee to be collected by Customs at the time of arrival) or prepayment in accordance with paragraph (e)(2) of this section;

(6) Fee under paragraph (f) of this section (dutiable mail): class code 496. Payment location: see paragraph (f) of this section;

(7) Fee under paragraph (g)(1)(i) of this section (the $5 fee for commercial vessel and commercial aircraft passengers): class code 495. Payment location: see paragraph (g)(5) of this section;

(8) Fee under paragraph (g)(1)(ii) of this section (the $1.75 fee for commercial vessel passengers): class code 484. Payment location: see paragraph (g)(5) of this section; and

(9) Fee under paragraph (h) of this section (customs broker permits): for district permits, class code 497; for national permits, class code 997. Payment location: see paragraph (h) of this section.

* * * * *

3. It is proposed to amend § 24.25 in paragraphs (a), (c)(2), and (d) by removing the reference "§ 142.13(c)" wherever it appears and adding, in its place, the reference "§ 142.13(b)".

PART 111—CUSTOMS BROKERS

1. The authority citation for Part 111 continues to read in part as follows:

Authority: 19 U.S.C. 66, 1202, (General Note 23, Harmonized Tariff Schedule of the United States), 1624, 1641.

* * * * *

Section 111.96 also issued under 19 U.S.C. 58c; 31 U.S.C. 9701.

2. It is proposed to amend § 111.19 by revising paragraphs (c) and (f)(4) to read as follows:

§ 111.19 Permits.

* * * * *

(c) *Fees.* Each application for a district permit under paragraph (b) of this section must be accompanied by the $100 and $125 fees specified in §§ 111.96(b) and (c). In the case of an application for a national permit under paragraph (f) of this section, the $100 fee specified in § 111.96(b) and the $125 fee specified in § 111.96(c) must be paid at the port through which the applicant's license was delivered (see § 111.15) prior to submission of the application. The $125 fee specified in § 111.96(c) also must be paid in connection with the issuance of an initial district permit concurrently with the issuance of a license under paragraph (a) of this section.

* * * * *

(f) National permit. * * *

(4) Attach a receipt or other evidence showing that the fees specified in § 111.96(b) and (c) have been paid in accordance with paragraph (c) of this section.

* * * * *

3. It is proposed to amend § 111.96 by revising paragraph (b); and in paragraph (c) by removing from the second sentence the words "or upon filing the application for the" and adding in their place the words "or in connection with the filing of an application for a"; and by removing from the same sentence the reference "§ 111.19(f)(4)" and adding in its place "§ 111.19(c)". The revision reads as follows:

§ 111.96 Fees.

* * * * *

(b) *Permit fee.* A fee of $100 must be paid in connection with each permit application under § 111.19 to defray the costs of processing the application, including an application for reinstatement of a permit that was revoked by operation of law or otherwise.

* * * * *

Charles W. Winwood,

Acting Commissioner of Customs.

Approved: March 13, 2002.

Timothy E. Skud,

Acting Deputy Assistant Secretary of the Treasury.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD13–02–002]

RIN 2115–AA97

Security Zone; Portland Rose Festival on Willamette River

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes a temporary security zone surrounding the City of Portland's Waterfront Park to include all waters of the Willamette River, from surface to bottom, between the Hawthorne and Steel bridges and underneath these bridges. Recent terrorist attacks against the United States necessitate this action to properly safeguard all vessels participating in the 2002 Portland Rose Festival from terrorism, sabotage, or other subversive acts. We anticipate the security zone will have limited effects on commercial traffic and significant effects on recreational boaters; ensuring timely escorts through this security zone is a high priority of the Captain of the Port.

DATES: Comments and related material must reach the Coast Guard no later than May 2, 2002.

ADDRESSES: You may mail comments and related material to U.S. Coast Guard Marine Safety Office/Group Portland, 6767 N. Basin Ave, Portland, Oregon 97217. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at U.S. Coast Guard Marine Safety Office/Group Portland between 7 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (CGD13–02–002), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know your submission reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to U.S. Coast Guard Marine Safety Office/Group Portland at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Background and Purpose

This security zone is necessary to provide for the safety and security of vessels participating in the 2002 Portland Rose Festival in the navigable waters of the United States.

Discussion of Proposed Rule

This rule, for safety and security concerns, would control vessel movements in a regulated area surrounding vessels participating in the 2002 Portland Rose Festival. U.S. Naval Vessels are covered under 33 CFR 165 subpart G—Protection of Naval Vessels; however, the Portland Rose Festival is a major maritime event that draws many different vessels including Navy, Coast Guard, Army Corps of Engineers, and Canadian. It is crucial that the same level of security be provided to all participating vessels. Entry into this zone would be prohibited unless authorized by the Captain of the Port, Portland or his designated representatives. Commercial vessels that typically transit this section of the Willamette River will be pre-designated and will suffer only minor inconveniences.

Recreational vessels may suffer from extended delays and can anticipate a vessel inspection. Recreational vessels are encouraged to avoid this area. Recreational vessels will be allowed into the zone on a case-by-case basis following extensive security measures, and as operations permit. Coast Guard personnel will enforce this security zone and the Captain of the Port may be assisted by other federal, state, or local agencies.

Good cause exists to shorten the notice and comment period of this notice of proposed rulemaking. The normal 90 day comment period has been shortened to 45 days to allow the Coast Guard to evaluate all comments received, make appropriate modifications to the proposed rule, and publish the final rule at least 30 days prior to the implementation of the security zone. Although this annual event was known to the Coast Guard well in advance, this notice was not published earlier due to extensive additional considerations that needed to be addressed following the increased security measures necessary to properly safeguard military assets following the September 11, 2001 terrorist attacks on the United States.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

This expectation is based on adequate resources allowing vessel approvals from the Captain of the Port or his designated representatives to transit through the regulated area. For the above reasons, the Coast Guard only anticipates minor economic impact.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would affect the following entities, some of which might be small entities: the owners or operators of vessels intending to transit or anchor in this portion of the Willamette River. The likely impacts to small entities would include minor time delays, potential inspections, and possibly non-entrance if the Captain of the Port or his designated representatives sense the vessels participating in the Rose Festival are threatened. The security zone will not have a significant economic impact because adequate resources will allow vessels timely approval from the Captain of the Port or his designated representatives to transit through the regulated area.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation because the temporary security zone would not last longer than one week in duration. The temporary security zone would be established on Wednesday, June 5, 2002, with the arrival of the first vessel to the City of Portland's Waterfront Park and extend until the last vessel departs the Waterfront Park on Monday, June 10, 2002. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. Add § 165.T13–002 to read as follows:

§ 165.T13–002 Security Zone; Portland Rose Festival on Willamette River.

(a) *Location.* The following area is a security zone: All waters of the Willamette River, from surface to bottom, between the Hawthorne and Steel bridges and underneath these bridges.

(b) *Regulations.* (1) In accordance with § 165.33, entry into this zone is prohibited unless authorized by the Coast Guard Captain of the Port, Portland or his designated representatives. Section 165.33 also contains other general requirements.

(2) Persons desiring to transit the area of the security zone may contact the Captain of the Port on VHF channel 16 (156.8 MHz) or VHF channel 22A (157.1 MHz) to seek permission to transit the area. If permission is granted, all persons and vessels shall comply with the instructions of the Captain of the Port or his or her designated representative.

(c) **Authority.** In addition to 33 U.S.C. 1231, the authority for this section includes 33 U.S.C. 1226.

(d) *Effective period.* This section is effective from Wednesday, June 5, 2002, through Monday, June 10, 2002.

Dated: March 1, 2002.

J. D. Spitzer,

Captain, U.S. Coast Guard, Captain of the Port, Portland.

Coast Guard

33 CFR Part 165

[COTP Pittsburgh–02–005]

RIN 2115–AA97

Security Zone; Ohio River Mile 34.6 to 35.1, Shippingport, Pennsylvania

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a security zone encompassing all waters extending 200 feet from the shoreline of the left descending bank on the Ohio River, beginning from mile marker 34.6 and ending at mile marker 35.1. This security zone is necessary to protect the First Energy Nuclear Power Plant in Shippingport, Pennsylvania, from any and all subversive actions from any groups or individuals whose objective it is to cause disruption to the daily operations of the First Energy Nuclear Power Plant; Entry of vessels into this security zone is prohibited unless authorized by the Coast Guard Captain of the Port St. Louis or his designated representative.

DATES: Comments and related material must reach the Coast Guard on or before April 17, 2002.

ADDRESSES: You may mail comments and related material to Marine Safety Office Pittsburgh, Suite 1150 Kossman Bldg., 100 Forbes Ave. Pittsburgh, PA 15222–1371. Marine Safety Office Pittsburgh maintains the public docket for this rulemaking. Comments and

VOL
67

material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at Marine Safety Office Pittsburgh, Suite 1150 Kossman Bldg., 100 Forbes Ave. Pittsburgh, PA between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chief Petty Officer Brian Smith, Marine Safety Office Pittsburgh at (412) 644–5808.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [COTP Pittsburgh 02–005], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know that your submission reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to Marine Safety Office Pittsburgh at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Background and Purpose

On September 11, 2001, both towers of the World Trade Center and the Pentagon were attacked by terrorists. In response to these terrorist acts, heightened awareness and security of our ports and harbors is necessary. To immediately enhance that security the Captain of the Port, Pittsburgh established a temporary security zone on the Ohio River in the vicinity of the First Energy Nuclear Power Plant, in Shippingport, PA. The temporary final rule was published March 4, 2002 in the **Federal Register** Volume 67, Number 42, page 9589 (67 FR 9589) and remains in effect until 8 a.m. on June 15, 2002.

Because the generalized high-level threat environment has persisted longer than expected, the Captain of the Port, Pittsburgh has determined that there is a need for this security zone to remain in effect indefinitely. This security zone will reduce the risk of a terrorist incident in this generalized high-level threat environment. It reduces the potential of a waterborne attack on the facility enhancing public health and safety, and common defense and security, at this location and surrounding areas.

The location of this security zone will limit access to only the waters immediately adjacent to the facility and will permit vessels to safely navigate around the facility. Navigation around the facility will not be hindered by the establishment of this security zone.

Discussion of Proposed Rule

A security zone is proposed for all water extending 200 feet from the shoreline of the left descending bank on the Ohio River from mile marker 34.6 to 35.1. This zone is designed to increase protection for the First Energy Nuclear Power Plant in Shippingport, PA. This security zone will reduce the risk of a terrorist incident in this generalized high-level threat environment. It reduces the potential of a waterborne attack on the facility enhancing public health and safety, and common defense and security, at this location and surrounding areas. All vessels are prohibited from entering the zone without the permission of the Captain of the Port Pittsburgh.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This rule will not obstruct the regular flow of vessel traffic and will allow vessel traffic to pass safely around the security zone and vessels may be permitted to enter the security zone on a case-by-case basis.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

This security zone will not have an impact on a substantial number of small entities because this proposed rule will not obstruct the regular flow of vessel traffic and will allow vessel traffic to pass safely around the security zone.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact Chief Petty Officer Brian Smith, Marine Safety Office Pittsburgh at (412) 644–5808.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this proposed rule is categorically excluded from further environmental documentation because this rule is not expected to result in any significant adverse environmental impact as described in the National Environmental Policy Act of 1969 (NEPA). A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. Add § 165.820 to read as follows:

§ 165.820 Security Zone; Ohio River Mile 34.6 to 35.1, Shippingport, Pennsylvania.

(a) *Location.* The following area is a security zone: The waters of the Ohio River, extending 200 feet from the shoreline of the left descending bank beginning from mile marker 34.6 and ending at mile marker 35.1.

(b) *Regulations.* (1) Entry into or remaining in this zone is prohibited unless authorized by the Coast Guard Captain of the Port, Pittsburgh.

(2) Persons desiring to transit the area of the security zone may contact the Captain of the Port Pittsburgh at telephone number 412–644–5808 or on VHF channel 16 to seek permission to transit the area. If permission is granted, all persons and vessels must comply with the instructions of the Captain of the Port Pittsburgh or his designated representative.

(c) **Authority.** In addition to 33 U.S.C. 1231, the authority for this section includes 33 U.S.C. 1226.

Dated: March 5, 2002.

S.L. Hudson,

Commander, U.S. Coast Guard, Captain of the Port, Pittsburgh.

Allethrin; Proposed Revocation of Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to revoke specific tolerances for residues of the insecticide allethrin because this pesticide is no longer registered on their associated food uses in the United States. EPA expects to determine whether any individuals or groups want to support these tolerances. The regulatory actions proposed in this document contribute toward the Agency's tolerance reassessment requirements of the Federal Food, Drug, and Cosmetic Act (FFDCA) section 408(q), as amended by the Food Quality Protection Act (FQPA) of 1996. By law, EPA is required by August 2002 to reassess 66% of the tolerances in existence on August 2, 1996, or about 6,400 tolerances. The regulatory actions proposed in this document pertain to the proposed revocation of 60 tolerances and exemptions which would be counted among tolerance/exemption reassessments made toward the August 2002 review deadline.

DATES: Comments, identified by docket control number OPP–301220, must be received on or before May 17, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–301220 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Joseph Nevola, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave, NW., Washington, DC 20460; telephone number: (703)

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS Codes	Examples of Potentially Affected Entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 180 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr180_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–301220. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–301220 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: opp-docket@epa.gov, or you can submit a computer disk as described in this unit. Do not submit any information electronically that you consider to be CBI. Electronic comments must be submitted as an ASCII file avoiding use of special characters and any form of encryption. Comments and data will also be accepted on standard disks in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPP–301220. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI that I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the proposed rule or collection activity.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

F. What Can I do if I Wish the Agency to Maintain a Tolerance that the Agency Proposes to Revoke?

This proposed rule provides a comment period of 60 days for any person to state an interest in retaining a tolerance proposed for revocation. If EPA receives a comment within the 60–day period to that effect, EPA will not proceed to revoke the tolerance immediately. However, EPA will take steps to ensure the submission of any

needed supporting data and will issue an order in the **Federal Register** under FFDCA section 408(f) if needed. The order would specify data needed and the time frames for its submission, and would require that within 90 days some person or persons notify EPA that they will submit the data. If the data are not submitted as required in the order, EPA will take appropriate action under FFDCA.

EPA issues a final rule after considering comments that are submitted in response to this proposed rule. In addition to submitting comments in response to this proposal, you may also submit an objection at the time of the final rule. If you fail to file an objection to the final rule within the time period specified, you will have waived the right to raise any issues resolved in the final rule. After the specified time, issues resolved in the final rule cannot be raised again in any subsequent proceedings.

II. Background

A. What Action is the Agency Taking?

EPA is proposing to revoke specific tolerances and exemptions for residues of allethrin in or on commodities listed in the regulatory text because allethrin is no longer registered under FIFRA for use on those commodities. Many food use registrations for allethrin were canceled in 1989 and 1991 due to non-payment of maintenance fees. (Only the following food uses remain: Barley, grain; corn; mushrooms; oats, grain; rye, grain; sorghum, grain; and wheat, grain). It is EPA's general practice to propose revocation of those tolerances for residues of pesticide active ingredients on crops for which there are no active registered uses under FIFRA, unless any person in comments on the proposal indicates a need for the tolerance to cover residues in or on imported commodities or domestic commodities legally treated. Therefore, EPA is proposing to revoke the tolerances in 40 CFR 180.113 for residues of allethrin in or on apples, blackberries, blueberries (huckleberries), boysenberries, cherries, crabapples, currants, dewberries, figs, gooseberries, grapes, guavas, loganberries, mangoes, muskmelons, oranges, peaches, pears, pineapples, plums (fresh prunes), raspberries, and tomatoes.

Also, EPA is proposing to revoke the exemption from the requirement of a tolerance in 40 CFR 180.1002 for residues of allethrin in or on apples, artichokes (Jerusalem), beans, beets, beets, sugar; broccoli, Brussels sprouts, cabbage, carrots, cauliflower, celery, chickory, Chinese cabbage, citrus, collards, endive, escarole, garlic, horseradish, kale, kohlrabi, leeks, lettuce, mustard greens, onions, parsley, parsnips, peaches, pears, peppers, potatoes, radishes, rutabagas, salsify, shallots, spinach, sweet potatoes, tomatoes, and turnips. In addition, the Agency is proposing to remove the exemption in 40 CFR 180.1002 for "sorghum (milo)" because that exemption is no longer needed since use of allethrin before harvest in the production of that commodity is covered by the existing exemption for "sorghum, grain."

For FQPA reassessment purposes, EPA counts "endive" and "escarole" in 180.1002 as one exemption "endive (escarole)" and expects in a final rule to count a total of 60 tolerances and exemptions as reassessed. EPA does not expect to count removal of the "sorghum (milo)" exemption as a reassessment in a final rule because the use will remain covered by the existing "sorghum, grain" exemption.

Moreover, in order to conform to current Agency practice, EPA is proposing to revise tolerance commodity terminology names in 40 CFR 180.113 as follows: for the grains "corn" to "corn, field, grain" and "corn, pop, grain;" "oats" to "oat, grain"; and "grain, sorghum, milo" to "sorghum, grain, grain." In addition, EPA is proposing to revise tolerance commodity terminology names in 40 CFR 180.1002 as follows: for "corn" to "corn, field" and "corn, pop;" and "mushrooms" to "mushroom."

B. What is the Agency's Authority for Taking this Action?

A "tolerance" represents the maximum level for residues of pesticide chemicals legally allowed in or on raw agricultural commodities and processed foods. Section 408 of FFDCA, 21 U.S.C. 301 *et seq.*, as amended by the FQPA of 1996, Public Law 104–170, authorizes the establishment of tolerances, exemptions from tolerance requirements, modifications in tolerances, and revocation of tolerances for residues of pesticide chemicals in or on raw agricultural commodities and processed foods (21 U.S.C. 346(a)). Without a tolerance or exemption, food containing pesticide residues is considered to be unsafe and therefore "adulterated" under section 402(a) of the FFDCA. If food containing pesticide residues is considered to be "adulterated," you may not distribute the product in interstate commerce (21 U.S.C. 331(a) and 342(a)). For a food-use pesticide to be sold and distributed, the pesticide must not only have appropriate tolerances under the FFDCA, but also must be registered under FIFRA (7 U.S.C. *et seq.*). Food-use pesticides not registered in the United States have tolerances for residues of pesticides in or on commodities imported into the United States.

EPA's general practice is to propose revocation of tolerances for residues of pesticide active ingredients on crops for which FIFRA registrations no longer exist and on which the pesticide may therefore no longer be used in the United States. EPA has historically been concerned that retention of tolerances that are not necessary to cover residues in or on legally treated foods may encourage misuse of pesticides within the United States. Nonetheless, EPA will establish and maintain tolerances even when corresponding domestic uses are canceled if the tolerances, which EPA refers to as "import tolerances," are necessary to allow importation into the United States of food containing such pesticide residues. However, where there are no imported commodities that require these import tolerances, the Agency believes it is appropriate to revoke tolerances for unregistered pesticides in order to prevent potential misuse.

Furthermore, as a general matter, the Agency believes that retention of import tolerances not needed to cover any imported food may result in unnecessary restriction on trade of pesticides and foods. Under section 408 of the FFDCA, a tolerance may only be established or maintained if EPA determines that the tolerance is safe based on a number of factors, including an assessment of the aggregate exposure to the pesticide and an assessment of the cumulative effects of such pesticide and other substances that have a common mechanism of toxicity. In doing so, EPA must consider potential contributions to such exposure from all tolerances. If the cumulative risk is such that the tolerances in aggregate are not safe, then every one of these tolerances is potentially vulnerable to revocation. Furthermore, if unneeded tolerances are included in the aggregate and cumulative risk assessments, the estimated exposure to the pesticide would be inflated. Consequently, it may be more difficult for others to obtain needed tolerances or to register needed new uses. To avoid potential trade restrictions, the Agency is proposing to revoke tolerances for residues on crops uses for which FIFRA registrations no longer exist, unless someone expresses a need for such tolerances. Through this proposed rule, the Agency is inviting individuals who need these import tolerances to identify themselves and

VOL
67
ISS
52
MR
18
2002
UMI

the tolerances that are needed to cover imported commodities.

Parties interested in retention of the tolerances should be aware that additional data may be needed to support retention. These parties should be aware that, under FFDCA section 408(f), if the Agency determines that additional information is reasonably required to support the continuation of a tolerance, EPA may require that parties interested in maintaining the tolerances provide the necessary information. If the requisite information is not submitted, EPA may issue an order revoking the tolerance at issue.

C. When do These Actions Become Effective?

EPA is proposing that revocation of the tolerances and exemptions for allethrin become effective 90 days following publication of a final rule in the **Federal Register**. EPA is proposing to delay the effectiveness of these revocations for 90 days following publication of a final rule to ensure that all affected parties receive notice of EPA's actions. If you have comments regarding these tolerance revocations or the effective date of the revocations, please submit comments as described under **SUPPLEMENTARY INFORMATION**.

Any commodities listed in this proposal treated with the pesticides subject to this proposal, and in the channels of trade following the tolerance revocations, shall be subject to FFDCA section 408(1)(5), as established by FQPA. Under this section, any residues of these pesticides in or on such food shall not render the food adulterated so long as it is shown to the satisfaction of the Food and Drug Administration that, (1) the residue is present as the result of an application or use of the pesticide at a time and in a manner that was lawful under FIFRA, and (2) the residue does not exceed the level that was authorized at the time of the application or use to be present on the food under a tolerance or exemption from tolerance. Evidence to show that food was lawfully treated may include records that verify the dates that the pesticide was applied to such food.

D. What is the Contribution to Tolerance Reassessment?

By law, EPA is required to reassess 66% or about 6,400 of the tolerances in existence on August 2, 1996, by August 2002. EPA is also required to assess the remaining tolerances by August 2006. As of March 7, 2002, EPA has reassessed over 3,910 tolerances. This document proposes to revoke 60 tolerances and exemptions which would be counted as reassessments in a final rule toward the August 2002 review deadline of FFDCA section 408(q), as amended by FQPA in 1996.

III. Are the Proposed Actions Consistent with International Obligations?

The tolerance revocations in this proposal are not discriminatory and are designed to ensure that both domestically produced and imported foods meet the food safety standards established by the FFDCA. The same food safety standards apply to domestically produced and imported foods.

EPA is working to ensure that the U.S. tolerance reassessment program under FQPA does not disrupt international trade. EPA considers Codex Maximum Residue Limits (MRLs) in setting U.S. tolerances and in reassessing them. MRLs are established by the Codex Committee on Pesticide Residues, a committee within the Codex Alimentarius Commission, an international organization formed to promote the coordination of international food standards. It is EPA's policy to harmonize U.S. tolerances with Codex MRLs to the extent possible, provided that the MRLs achieve the level of protection required under FFDCA. EPA's effort to harmonize with Codex MRLs is summarized in the tolerance reassessment section of individual Reregistration Eligibility Decision documents. EPA has developed guidance concerning submissions for import tolerance support (65 FR 35069, June 1, 2000) (FRL–6559–3). This guidance will be made available to interested persons. Electronic copies are available on the internet at http://www.epa.gov/. On the Home Page select "Laws and Regulations," then select "Regulations and Proposed Rules" and then look up the entry for this document under "**Federal Register**—Environmental Documents." You can also go directly to the "**Federal Register**" listings at http://www.epa.gov/fedrgstr/.

IV. Regulatory Assessment Requirements

In this proposed rule, EPA is proposing to revoke specific tolerances and exemptions established under FFDCA section 408. The Office of Management and Budget (OMB) has exempted this type of action (i.e., a tolerance revocation for which extraordinary circumstances do not exist) from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this proposed rule has been exempted from review under Executive Order 12866 due to its lack of significance, this proposed rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This proposed rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations as required by Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any other Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency previously assessed whether revocations of tolerances might significantly impact a substantial number of small entities and concluded that, as a general matter, these actions do not impose a significant economic impact on a substantial number of small entities. This analysis was published on December 17, 1997 (62 FR 66020), and was provided to the Chief Counsel for Advocacy of the Small Business Administration. Taking into account this analysis, and available information concerning the pesticides listed in this proposed rule, I certify that this action will not have a significant economic impact on a substantial number of small entities. Specifically, as per the 1997 notice, EPA has reviewed its available data on imports and foreign pesticide usage and concludes that there is a reasonable international supply of food not treated with canceled pesticides. Furthermore, for the pesticide named in this proposed rule, the Agency knows of no extraordinary circumstances that exist as to the present proposed revocations that would change EPA's previous analysis. Any comments about the Agency's determination should be submitted to EPA along with comments on the proposal, and will be addressed prior to EPA issuing a final rule.

In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." This proposed rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). For these same reasons, the Agency has determined that this proposed rule does not have any "tribal implications" as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes." This proposed rule will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this proposed rule.

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 8, 2002.

Marcia E. Mulkey,

Director, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346(a) and 371.

2. Section 180.113 is revised to read as follows:

§ 180.113 Allethrin (allyl homolog of cinerin I); tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide allethrin (allyl homolog of cinerin I) from post-harvest use in or on the following raw agricultural commodities:

Commodity	Parts per million
Barley, grain	2.0
Corn, field, grain	2.0
Corn, pop, grain	2.0
Oat, grain	2.0
Rye, grain	2.0
Sorghum, grain, grain	2.0
Wheat, grain	2.0

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

3. Section 180.1002 is revised to read as follows:

§ 180.1002 Allethrin (allyl homolog of cinerin I); exemption from the requirement of a tolerance.

The insecticide allethrin is exempted from the requirement of a tolerance for residues when used before harvest in the production of the following raw agricultural commodities: Corn, field; corn, pop; mushroom; and sorghum, grain.

Medicare Program; Town Hall Meeting on Payment for Certain Drugs, Biologicals, and Devices under the Hospital Outpatient Prospective Payment System for Calendar Year 2003

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces a town hall meeting to discuss the payment for drugs, biologicals, and devices that are eligible for transitional pass-through payments under the hospital outpatient prospective payment system (OPPS) for calendar year 2003. Specifically, the meeting will focus on how the cost of drugs, (including radiopharmaceuticals), biologicals, and devices should be recognized under the hospital OPPS. Providers, physicians, hospitals, coding specialists, and other interested parties are invited to this meeting to present their views on these issues. We will consider the opinions and advice provided during this meeting as we prepare our annual proposed rule that would update the OPPS. The meeting is open to the public, but attendance is limited to space available.

DATE: *Meeting Date:* The town hall meeting announced in this notice will be held on Friday, April 5, 2002, from 9:30 a.m. to 3:30 p.m. (eastern standard time).

ADDRESSES: The town hall meeting will be held in the multipurpose room at the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244.

FOR FURTHER INFORMATION CONTACT: Roechel Kujawa, (410) 786–9111. You may also send inquiries about this meeting via e-mail to *outpatientpps@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The Balanced Budget Act of 1997 (Pub. L. 105–33), enacted on August 5, 1997, amended the Social Security Act (the Act) by adding section 1833(t) to the Act. This section authorized the implementation of a hospital outpatient

2002
UMI

prospective payment system (OPPS) for hospital outpatient services.

The OPPS is comprised of ambulatory payment classification groups, relative weights, and payment rates. The Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), enacted on November 29, 1999, amended section 1833(t)(6) of the Act. This section authorized transitional pass-through payments for certain drugs, biologicals, and devices. These drugs, biologicals, and devices include those that were not being paid for as a hospital outpatient service as of December 31, 1996 and for which the cost is not insignificant in relation to the OPPS payment for the procedures associated with the drug, biological, or device. The Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act of 2000 (Pub. L. 106–554), enacted on December 21, 2000, amended this provision to permit transitional pass-through payment for some older devices as well. By statute, transitional pass-through payment status extends at least 2 years, but no more than 3 years. Beginning January 1, 2003, almost all of the items that are eligible for transitional pass-through payments will reach the end of their eligibility for pass-through payments. Therefore, their costs must be recognized through other means under the OPPS. Participants at the town hall meeting are invited to share their opinions about how these items should be treated under the OPPS for calendar year (CY) 2003.

II. Meeting Format

The meeting will begin with an introduction of the OPPS, focusing on the treatment of transitional passthrough payments for drugs, biologicals, and devices under the OPPS for CY 2003. The remainder of the meeting will be reserved for statements from interested parties on this issue.

We will limit the time for participants to make a statement according to the number of registered participants. Individuals who wish to make a statement must contact Roechel Kujawa as soon as possible. Those individuals must subsequently mail their written submission no later than 5 p.m., Monday, April 1, 2002. Send written submissions to: Roechel Kujawa, Division of Outpatient Care, Center for Medicare Management, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Mail Stop C4–05–25, Baltimore, Maryland 21244. All written submissions must be received no later than 5 p.m., Monday, April 1, 2002, at the above address. Comments from individuals not registered to speak will be heard after scheduled statements, if time permits.

III. Registration Instructions

The Division of Outpatient Care is coordinating meeting registration. While there is no registration fee, all individuals must register to attend. Because this meeting will be located on Federal property, for security reasons, any persons wishing to attend this meeting must call Roechel Kujawa to register at least 72 hours in advance. Attendees must show photographic identification to the Federal Protective Service or Guard Service personnel before they will be permitted to enter the building. Individuals who have not registered in advance will not be allowed to enter the building to attend the meeting. Seating capacity is limited to the first 250 registrants.

Individuals requiring sign language interpretation for the hearing impaired or other special accommodations should contact Roechel Kujawa at least 10 days before the meeting.

Authority: Section 1833(t) of the Social Security Act (42 U.S.C. 1395l(t))

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: March 12, 2002.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 02–486; MM Docket No. 01–137; RM–10156]

Radio Broadcasting Services; Altus, OK

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal.

SUMMARY: The Commission, at the request of Katherine Pyeatt, dismisses the petition proposing the allotment of Channel 295C2 at Altus, Oklahoma, as the community's third local FM transmission service. *See* 66 FR 35768, July 9, 2001. A showing of continuing interest is required before a channel will be allotted. It is the Commission's policy to refrain from making an allotment to a community absent an expression of interest.

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 01–137 adopted February 20, 2002 , and released March 1, 2002. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Information Center (Room CY–A257), 445 12th Street, SW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

BILLING CODE 6712–01–U

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 02–488; MM Docket No. 02–43, RM–10384]

Radio Broadcasting Services; Milan, NM

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Don Davis proposing the allotment of Channel 270A at Milan, New Mexico, as the community's second local FM transmission service. Channel 270A can be allotted to Milan in compliance with the Commission's minimum distance separation requirements at city reference coordinates. The coordinates for Channel 270A Milan are 35–10–11 North Latitude and 107–53–24 West Longitude.

DATES: Comments must be filed on or before April 22, 2002, reply comments on or before May 7, 2002.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Mr. Don Davis, 809 Wellesley NE., Albuquerque, New Mexico 87106 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 02–43, adopted February 20, 2002, released March 1, 2002. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Information Center (Room CY–A257), 445 12th Street, SW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

1.The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334 and 336.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under New Mexico, is amended by adding Channel 270A at Milan.

Federal Communications Commission.

John A. Karousos,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

National Oceanic and Atmospheric Administration

50 CFR Part 660

[I.D. 030702C]

RIN 0648–AM97

Fisheries of West Coast States and in the Western Pacific; Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of a fishery management plan; request for comments.

SUMMARY: NMFS announces that the Western Pacific Fishery Management Council (Council) has submitted a Coral Reef Ecosystems Fishery Management Plan for the Western Pacific Region (CREFMP) for Secretarial review under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The CREFMP, an ecosystem-based plan, is intended to conserve and manage the coral reef ecosystems and associated habitats in the U.S. exclusive economic zones (EEZ) around American Samoa, Guam, Hawaii, Commonwealth of the Northern Mariana Islands (CNMI), and the remote U.S. Pacific island areas (PRIAs) in the Pacific Ocean. Its goal is to maintain sustainable coral reef fisheries while protecting stocks, habitat, protected species, and coral reef ecosystems from adverse impacts.

DATES: Comments on the CREFMP must be received no later than 5 p.m., Hawaii Standard Time May 17, 2002.

ADDRESSES: Written comments should be sent to Dr. Charles Karnella, Administrator, Pacific Islands Area Office, NMFS, 1161 Kapiolani Blvd, Suite 110, Honolulu, HI 96815. Comments will not be accepted if submitted via e-mail or the Internet.

FOR FURTHER INFORMATION CONTACT: Ms. Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, at (808) 522–8220. The CREFMP is available at the Council's website, www.wpcouncil.org.

SUPPLEMENTARY INFORMATION: As authorized under the Magnuson-Stevens Act, the Council has developed and submitted for Secretarial review a CREFMP and associated amendments to the fishery management plans for western Pacific bottomfish and seamount groundfish fisheries (Amendment 7), crustacean fisheries (Amendment 11), precious coral fisheries (Amendment 5,) and pelagic fisheries (Amendment 10). The CREFMP is an ecosystem-based fishery management plan that covers the coral reef ecosystems and adjacent marine habitats in the EEZ around American Samoa, Guam, Hawaii (main and Northwestern Hawaiian Islands or NWHI), CNMI, and the mostly uninhabited PRIAs. The PRIAs consist of Johnston and Palmyra Atolls, Kingman Reef, Jarvis, Howland, Baker and Wake Islands, and Midway Atoll. The vast majority of the total area covered by coral reefs under U.S. jurisdiction is located in the western Pacific region and would be covered by this FMP.

Development of the CREFMP began in 1996. The Council held scoping hearings in June 1999 to obtain public input on a new fishery management plan. On January 10, 2001, NMFS published a Notice of Availability (66 FR 1945) of a draft CREFMP. Public meetings and hearings were held on the draft CREFMP between January 16 and February 5, 2001. At its 110th meeting (June 21, 2001), the Council took final action on the FMP and approved its submission to NMFS for Secretarial review.

The conservation and management measures would: (1) Establish no-take marine protected areas (MPAs) (where the harvest of any management unit species listed under any FMP is prohibited) within Federal waters from 0-50 fathoms (fm) (0–50 91.5 m) (around French Frigate Shoals and Laysan Island (NWHI), Rose Atoll (American Samoa), the north half of Midway Atoll, Jarvis, Howland, and Baker Islands, and Kingman Reef (PRIAs), and from 0-10 fm throughout the remaining NWHI, except around Midway Atoll; (2) establish low-use MPAs (where the harvest of CREFMP management unit species is allowed on a case-by-case basis only after a review and determination that proposed activities would not harm the ecosystem) within Federal waters from 10–50 fm (18.3 m–91.5 m) around all other NWHI, and from 0–50 fm (0–91.5 m) around Palmyra, Johnston, and Wake, and the south half of Midway Atoll; (3) require special permits for the harvesting of any CREFMP management unit species in low-use MPAs, and for the harvesting of Potentially Harvested Coral Reef Taxa throughout the EEZ, except for (a) Incidental harvests by other western Pacific fisheries management plan permit holders and, (b) any harvest within three nautical miles (nm) of the CNMI; (4) restrict the use of fishing gear

VOL
67
ISS
52
MR
18
2002
UMI

types to allow only the following gears for the directed harvest of any CREFMP management unit species throughout the EEZ: Hand harvest, spear, slurp gun, hand/dip net, hoop net for Kona crab, throw net, barrier net for aquarium fish, surround/purse net for targeted schools (e.g., akule, baitfish, weke) with a minimum of bycatch, hook-and-line (including powered and unpowered handlines, rod and reel, and trolling), traps (with conditions), and remote operating vehicles/submersibles; (5) prohibit nighttime spearfishing for CREFMP management unit species with SCUBA/hookah in the EEZ around the NWHI and PRIAs; (6) require that nets be attended at all times, except hoop nets for Kona crabs; (7) require that all traps on board a vessel must be permanently and legibly marked to identify the owner; (8) prohibit the take of live rock or live coral throughout the western Pacific EEZ, except for (a) incidental take by other fishery management plan permit holders, (b) take by indigenous people for traditional or ceremonial use, (c) use by aquaculture operations as seed stock, (d) science and management, and (e) bio-prospecting (note: takes of live coral or live coral under exceptions (b)-(e) require special permits); (9) require that all fishing vessels (including those permitted under fishery management plans for bottomfish/seamount ground fish, crustaceans, precious corals, pelagic) carry insurance as a condition for transiting or operating in all MPAs; (10) establish a no-anchoring zone on Guam's offshore Southern banks by fishing vessels greater than 50 ft (15.24 m) in length; (11) establish Federal reporting requirements (daily reports on catch, effort, discards, etc.) for special permit holders and transhipment permit holders, as well as notification requirements for vessel operators prior to entering any low-use MPA, or landing CREFMP management unit species harvested from these low-use MPAs; and (12) establish CREFMP framework procedures to facilitate implementation of future regulatory amendments.

The Council initially identified some measures for possible framework action: (a) Designating zones in the U.S. EEZ where mooring buoys will be installed to protect essential fish habitat (EFH) from anchor damage; (b) requiring fishing vessels to carry remote electronic vessel monitoring systems as part of an effective monitoring and enforcement system for State and Federal agencies; (c) requiring permits to fish for Currently Harvested Coral Reef Taxa throughout the EEZ, in the event that regional management is determined to be inadequate to protect the species and/or ecosystem; (d) transferring CREFMP management unit species from the Potentially Harvested Coral Reef Taxa list to the Currently Harvested Coral Reef Taxa list when sufficient information has been gathered; and (e) designating a percentage of low-use MPA waters for sole use by indigenous people.

The CREFMP also contains non-regulatory measures consistent with CREFMP objectives that would be undertaken by the Council outside of the regulatory regime. These include a process and criteria for EFH consultations; formal plan team coordination to identify and to address coral reef ecosystem impacts from existing fishery management plan fisheries; a system to facilitate consistent state and territorial level management; and research and education efforts.

[Note: Executive Order 13178 (December 4, 2000) and Executive Order 13196 (January 18, 2001) designated the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve) in those ocean waters that lie within 50 nm of the NWHI, excluding state waters and waters within the boundaries of the Hawaiian Islands National Wildlife Refuge and the Midway Atoll National Wildlife Refuge. In compliance with Executive Order 13178 and Executive Order 13196, within the Reserve, NOAA is implementing a comprehensive management regime to govern fishing and protect coral reef resources. Because the CREFMP contains management measures governing activity in, among other areas, the same geographic area as the Reserve and several of those measures conflict with the management regime already existing pursuant to the NWHI Reserve established by Executive Order 13178 and Executive Order 13196, the Secretary of Commerce is likely to partially disapprove those parts of the CREFMP that govern fishing in the NWHI.]

Public comments on CREFMP must be received by May 17, 2002, to be considered by NMFS in the decision whether to approve the CREFMP. A proposed rule to implement CREFMP has been submitted for Secretarial review and approval. NMFS expects to publish and request comments on the proposed regulations to implement CREFMP in the near future.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 12, 2002.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 01–025–1]

Monsanto Co.; Availability of Petition and Environmental Assessment for Determination of Nonregulated Status for Cotton Genetically Engineered for Insect Resistance

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has received a petition from Monsanto Company seeking a determination of nonregulated status for cotton designated as Event 15985, which has been genetically engineered for insect resistance. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, we are soliciting public comments on whether this cotton event presents a plant pest risk. We are also making available for public comment an environmental assessment for the proposed determination of nonregulated status.

DATES: We will consider all comments we receive that are postmarked, delivered, or e-mailed by May 17, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comments (an original and three copies) to Docket No. 01–025–1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 01–025–1. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–025–1" on the subject line.

You may read the petition, the environmental assessment, and any comments we receive on this notice of availability in our reading room. The reading room is located in room 1141, USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure that someone is available to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Dr. David Heron, Plant Protection and Quarantine, APHIS, Suite 5B05, 4700 River Road Unit 147, Riverdale, MD 20737–1236; (301) 734–5141. To obtain a copy of the petition or the environmental assessment, contact Ms. Kay Peterson at (301) 734–4885; e-mail: *Kay.Peterson@aphis.usda.gov*.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered "regulated articles."

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

On December 7, 2000, APHIS received a petition (APHIS Petition No. 00–342–01p) from Monsanto Company (Monsanto) of St. Louis, MO, requesting a determination of nonregulated status under 7 CFR part 340 for cotton (*Gossypium hirsutum* L.) designated as Bollgard II CottonEvent 15985 (event 15985), which has been genetically engineered for resistance to certain lepidopteran insect pests. The Monsanto petition states that the subject cotton event should not be regulated by APHIS because it does not present a plant pest risk.

As described in the petition, cotton event 15985 has been genetically engineered to express a Cry2Ab insecticidal protein derived from the common soil bacterium *Bacillus thuringiensis* subsp. *kurstaki* (*Btk*). The petitioner states that the Cry2Ab protein is effective in providing protection from the feeding of lepidopteran insect pests such as tobacco budworm, pink bollworm, and cotton bollworm. The subject cotton event also expresses the β-D-glucuronidase (GUS) protein used as a selectable marker. Expression of the added genes is controlled in part by gene sequences from the plant pathogens cauliflower mosaic virus and *Agrobacterium tumefaciens*. Particle acceleration technology was used to transfer the added genes into the recipient Delta and Pine Land Company variety 50B (DP50B). Cotton cultivar DP50B expresses a *Btk* Cry1Ac insecticidal protein and a NTPII selectable marker protein, and was developed from cotton event 531, which was deregulated by APHIS in 1995 (APHIS No. 94–308–01p).

Cotton event 15985 has been considered a regulated article under the regulations in 7 CFR part 340 because it contains gene sequences from plant pathogens. This cotton event has been field tested since 1998 in the United States under APHIS notifications. In the process of reviewing the notifications for field trials of the subject cotton, APHIS determined that the vectors and other elements were disarmed and that the trials, which were conducted under conditions of reproductive and physical containment or isolation, would not present a risk of plant pest introduction or dissemination.

VOL
67
ISS
52
MR
18
2002
UMI

In section 403 of the Plant Protection Act (7 U.S.C. 7701–7772), plant pest is defined as any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant or plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of the foregoing. APHIS views this definition very broadly. The definition covers direct or indirect injury, disease, or damage not just to agricultural crops, but also to plants in general, for example, native species, as well as to organisms that may be beneficial to plants, for example, honeybees, rhizobia, etc.

The U.S. Environmental Protection Agency (EPA) is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 *et seq.*). FIFRA requires that all pesticides, including herbicides, be registered prior to distribution or sale, unless exempt by EPA regulation. In cases in which genetically modified plants allow for a new use of a pesticide or involve a different use pattern for the pesticide, EPA must approve the new or different use. Accordingly, Monsanto has submitted a request to EPA for registration of Cry2Ab as a plant-incorporated protectant.

When the use of the pesticide on the genetically modified plant would result in an increase in the residues in a food or feed crop for which the pesticide is currently registered, or in new residues in a crop for which the pesticide is not currently registered, establishment of a new tolerance or a revision of the existing tolerance would be required. Residue tolerances for pesticides are established by EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. 301 *et seq.*), and the Food and Drug Administration (FDA) enforces tolerances set by EPA under the FFDCA. In response to the filing of Monsanto's pesticide petition, EPA has established a regulation for an exemption from the requirement of a tolerance for residues of *Btk* Cry2Ab and the genetic material necessary for its production in or on all raw agricultural commodities.

FDA published a statement of policy on foods derived from new plant varieties in the **Federal Register** on May 29, 1992 (57 FR 22984–23005). The FDA statement of policy includes a discussion of FDA's authority for ensuring food safety under the FFDCA, and provides guidance to industry on the scientific considerations associated with the development of foods derived from new plant varieties, including those plants developed through the techniques of genetic engineering. The petitioner has begun consultation with FDA on the subject cotton event.

To provide the public with documentation of APHIS' review and analysis of the environmental impacts and plant pest risk associated with a proposed determination of nonregulated status for Monsanto's cotton event 15985, an environmental assessment has been prepared. The EA was prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

In accordance with § 340.6(d) of the regulations, we are publishing this notice to inform the public that APHIS will accept written comments regarding the petition for determination of nonregulated status from interested persons for a period of 60 days from the date of this notice.

We are also soliciting written comments from interested persons on the environmental assessment prepared to examine any environmental impacts of the proposed determination for the subject cotton event 15985. The petition and the environmental assessment and any comments received are available for public review, and copies of the petition and the environmental assessment may be ordered (see the **FOR FURTHER INFORMATION CONTACT** section of this notice).

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. After reviewing and evaluating the comments on the petition and the environmental assessment and other data and information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Monsanto's insect-resistant cotton event 15985 and the availability of APHIS' written decision.

Authority: 7 U.S.C. 166, 1622n, 7756, and 7761–7772; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 12th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Brown Darby Fuel Reduction Project EIS—Stanislaus National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) for a proposal to manage forest resources within and adjacent to the Darby Fire affected area, which burned 14,000 acres in September of 2001 (approximately 10,000 acres burned on lands administrated by the Forest Service). The project area is on the Calaveras Ranger District, Stanislaus National Forest, within Calaveras and Tuolumne Counties, California. The project area is located in the lower watersheds of the North and Middle Forks of the Stanislaus River, east of State Highway 4. It is bounded by private property on the east, west and north, the Middle Fork of the Stanislaus River on the south and the Calaveras Big Trees State park on the northeast.

DATES: Comments concerning the scope of the analysis should be received in writing on or before 10 days after publication of this notice in the **Federal Register.** While public participation in this analysis is welcome at any time, comments received within 10 days of the publication of this notice will be especially useful in the preparation of the Draft EIS. The scoping process will include identifying: potential issues, significant issues to be analyzed in depth, alternatives to the proposed action, and potential environmental effects of the proposal and alternatives. The draft EIS is expected to be filed with the Environmental Protection Agency and made available for public review in April 2002.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register.** No date has yet been determined for filing the final EIS.

ADDRESSES: Send written comments to Rob Griffith, district Ranger, P.O. Box 500, Hathaway Pines, CA 95233 or call (209) 795–1381.

FOR FURTHER INFORMATION CONTACT: Kathy Aldrich, Planning Team Leader, (209) 795–1381; e-mail: *kaldrich@fs.fed.us.*

SUPPLEMENTARY INFORMATION: The Forest Service proposes to treat vegetative fuels on 3,620 acres within or adjacent to the Darby fire area. Treatments proposed include the removal of fire-damaged trees while they are merchantable and before they fall to the ground and accumulate to the point where the fuel loading is at an unacceptable level; thinning stands of live trees immediately adjacent to private property to remove undesirable fuels conditions such as fuel ladders; removal of brush that poses a fire hazard in areas adjacent to private property; removal of fire-killed trees and thinning of the remaining trees in 20 year old pine plantations; and prescribed burning to reduce fuel loading in areas with unacceptable fuel levels on the ground.

The purpose and need for the actions are to: (1) Reduce unacceptable vegetative fuel loading in the project area that current exists and remove sufficient vegetative material killed by the Darby Fire to prevent an unacceptable fuel buildup from fallen material; (2) provide for the rapid restoration of forest communities in areas that experienced a stand-replacing event by removing the fire-killed standing dead vegetation before it falls to the ground. Removal of this material while merchantable would allow for restoration activities to proceed quickly, meeting the goal of the Forest Plan to accelerate development of old forest characteristics; (3) contribute to a sustainable flow of products form these National Forest Lands; and (4) provide resource management in an economically efficient manner, i.e., minimize restoration costs in areas that experienced a stand-replacing event by minimizing the amount of fire-killed material that has deteriorated to the point that a service contract is necessary to have it removed to meet fuels objectives.

Preliminary issues and concerns include effects of treatments on water quality, wildlife habitat, soil quality, riparian areas, threatened/endangered species such as the red-legged frog, valley elderberry long-horn beetle and bald eagle, and Forest Service Sensitive species such as the California spotted owl and goshawk.

The EIS will tier to the Stanislaus National Forest Land and Resource Management Plan and EIS of 1991, as amended by the Sierra Nevada Forest Plan Amendment of 2001, which provide overall guidance for land management activities on the Stanislaus National Forest.

The Reviewers Obligation To Comment

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions (*Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts (*Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points).

Responsible Official

The Responsible Official is the Forest Supervisor of the Stanislaus National Forest, 19777 Greenley Road, Sonora, CA 95370. The Forest Supervisor will make a decision regarding this proposal considering the comments and response, environmental consequences discussed in the final EIS, and applicable laws, regulations, and policies. The decision and rationale for the decision will be documented in a Record of Decision. That decision will be subject to appeal under applicable Forest Service regulations.

Dated: March 12, 2002.

Daniel A. Young,

Acting Forest Supervisor—Stanislaus National Forest.

[FR Doc. 02–6379 Filed 3–15–02; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Tuolumne County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Tuolumne County Resource Advisory Committee will meet on April 15, 2002, at the City of Sonora Fire Department, in Sonora, California. The purpose of the meeting is to agree on evaluation criteria, review project proposals, and select first projects.

DATES: The meeting will be held April 15, 2002, from 12:30 p.m. to 3 p.m.

ADDRESSES: The meeting will be held at the City of Sonora Fire Department located at 201 South Shepherd Street, in Sonora, California (CA 95370).

FOR FURTHER INFORMATION CONTACT: Pat Kaunert, Committee Coordinator, USDA, Stanislaus National Forest, 19777 Greenley Road, Sonora, CA 95370 (209) 532–3671; e-mail *pkaunert@fs.fed.us.*

SUPPLEMENTARY INFORMATION: Agenda items to be covered include: (1) Old business: meeting norms and roles; Committee administrative costs; (2) new business: subcommittee report out on format for project proposals and proposed evaluation criteria; review project proposals; vote on and select some projects; determine future subcommittee needs; (3) public comment; and (4) next meeting purpose. The meeting is open to the public. Those in attendance will be provided the opportunity to address the Committee.

Dated: March 11, 2002.

Ben Del Villar,

Forest Supervisor.

Grain Inspection, Packers and Stockyards Administration

Deposting of Stockyards

Notice is hereby given, that the livestock markets named herein, originally posted on the dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), no longer come within the definition of a stockyard under the Act and are therefore, no longer subject to the provisions of the Act.

Facility No.	Name, and location of stockyard	Date of posting
FL–103	Gainesville Livestock Market, Inc. Gainesville, Florida	March 1, 1960.
FL–106	Kissimmee Livestock Market, Inc. Kissimmee, Florida	Feb. 26, 1960.
FL–124	Tampa Horse Sales, Thonotosassa, Florida	May 13, 1977.
FL–137	John's Auction, Jacksonville, Florida	July 25, 1996.
GA–140	West Georgia Livestock Market, La Grange, Georgia	June 16, 1959.
GA–144	Metter Livestock Market, Metter, Georgia	May 13, 1959.
GA–145	Milan Livestock Market, Milan, Georgia	Aug. 27, 1959.
GA–155	Hub Junction Livestock Market, Covington, Georgia	June 1, 1959.
GA–158	Bulloch Stockyard, Statesboro, Georgia	May 14, 1959.
GA–209	Cordele Livestock, Inc., Cordele, Georgia	Jan. 25, 1991.
GA–210	Sandy Point Horse & Tack Auction, Lizella, Georgia	July 26, 1991.
GA–211	Thomson Stock & Auction Barn, Inc., Thomson, Georgia	Sep. 10, 1991.
GA–0217	Rocking Horse Ranch Livestock Auction, Poulan, Georgia	Oct. 24, 1996.

This notice is in the nature of a change relieving a restriction and, thus, may be made effective in less than 30 days after publication in the **Federal Register** without prior notice or other public procedure. This notice is given pursuant to section 302 of the Packers and Stockyards Act (7 U.S.C. 202) and is effective upon publication in the **Federal Register**.

Done at Washington, DC, this 11th day of March 2002.

David R. Shipman,

Acting Administrator, Grain Inspection, Packers and Stockyards Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–580–815 and A–580–816]

Notice of Final Results of Antidumping Duty Administrative Reviews: Certain Cold-Rolled and Corrosion-Resistant Carbon Steel Flat Products From Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative reviews.

SUMMARY: On September 11, 2001, the Department of Commerce ("Department") published the preliminary results of the administrative reviews of the antidumping duty orders on certain cold-rolled and corrosion-resistant carbon steel flat products from Korea. The corrosion-resistant carbon steel flat products review covers four manufacturers and exporters of the subject merchandise, while the cold-rolled carbon steel flat products review covers three. The period of review for cold-rolled products is August 1, 1999 through December 31, 1999, and the period of review for corrosion-resistant products is August 1, 1999 through July 31, 2000.

Based on our analysis of the comments received, we have made changes in the margin calculations. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margins for the reviewed firms are listed below in the section entitled "Final Results of the Reviews."

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Robert Bolling (POSCO), Marlene Hewitt (Dongbu), Sara Ellerman (SeAH) and Mesbah Motamed (Union), or James Doyle, Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230, telephone 202–482–3434 (Bolling), 202–482–1385 (Hewitt), 202–482–6134 (Ellerman), 202–482–1382 (Motamed) or 202–482–0159 (Doyle), fax 202–482–1388.

SUPPLEMENTARY INFORMATION:

Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930 ("Act") are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR part 351 (2001).

Background

The Department published antidumping duty orders on certain cold-rolled and corrosion-resistant carbon steel flat products from Korea on August 19, 1993. *See Antidumping Duty Orders on Certain Cold-Rolled Carbon Steel Flat Products and Certain Corrosion-Resistant Carbon Steel Flat Products from Korea*, 58 FR 44159 (August 19, 1993). On August 16, 2000, the Department published a notice of "Opportunity to Request an Administrative Review" of the antidumping duty orders for the 1999–2000 review period. *See Notice of Opportunity to Request Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation*, 65 FR 49962 (August 16, 2000). On August 31, 2000, respondents Pohang Coated Steel Co., Ltd. ("POCOS"), and Pohang Steel Industries Co., Ltd. ("PSI")—(collectively, "the POSCO Group"), Dongbu Steel Co., Ltd ("Dongbu"), and Union Steel Manufacturing Co., Ltd. ("Union") requested that the Department conduct an administrative review of the antidumping duty orders on cold-rolled carbon steel flat products from Korea. In a separate letter on August 31, 2000, POSCO also requested partial revocation of the antidumping duty order of cold-rolled carbon steel flat products. On August 31, 2000, respondents Dongbu, Union, POSCO and SeAH Steel Corporation ("SeAH") requested that the Department conduct an administrative review of the antidumping duty orders on corrosion-resistant carbon steel flat products. On August 31, 2000, petitioners in the original less-than-fair-value ("LTFV") investigations (AK Steel Corporation; Bethlehem Steel Corporation; Inland Steel Industries, Inc.; LTV Steel Company; National Steel Corporation; and U.S. Steel Group, a Unit of USX Corporation) requested that the Department conduct administrative reviews of the antidumping duty orders on cold-rolled and corrosion-resistant carbon steel flat products from Korea: the cold-rolled respondents; Dongbu, POSCO, and Union; and the corrosion-resistant respondents; Dongbu, POSCO, SeAH, and Union. We initiated these reviews on September 26, 2000. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 65 FR 58733 (October 2, 2000).

The Department revoked the antidumping order on cold-rolled carbon steel flat products from Korea pursuant to section 751(d)(2) of the Act and 19 CFR 351.222(i) of the Department's regulations, effective January 1, 2000. *See Revocation of Antidumping and Countervailing Duty Orders on Certain Carbon Steel Products From Canada, Germany, Korea, the Netherlands, and Sweden*, 65 FR 78467 (December 15, 2000). The resulting POR for cold-rolled products is August 1, 1999 through December 31, 1999. The Department's revocation of the antidumping order for cold-rolled products renders POSCO's request for revocation moot.

On August 31, 2001, the Department issued the preliminary results of these administrative reviews. *See Certain Cold-Rolled and Corrosion-Resistant Carbon Steel Flat Products From the Republic of Korea; Preliminary Results of Antidumping Duty Administrative Review* 66 FR 47163, (September 11, 2001). The Department has completed these administrative reviews in accordance with section 751 of the Act.

On December 7, 2001 petitioners submitted case briefs for Union and Dongbu. Union, Dongbu, and SeAH also submitted case briefs on the same day. On December 14, 2001, petitioners submitted rebuttal briefs for Union and Dongbu, and Union and Dongbu submitted their own rebuttal briefs. On February 8, 2002, petitioners submitted comments for POSCO. POSCO submitted case briefs on the same day. On February 13, 2002, petitioners submitted rebuttal briefs for POSCO, and POSCO submitted its own rebuttal briefs.

Scope of the Reviews

The review of "certain cold-rolled carbon steel flat products" covers cold-rolled (cold-reduced) carbon steel flat-rolled products, of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished or coated with plastics or other nonmetallic substances, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness, or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the Harmonized Tariff Schedule ("HTS") under item numbers 7209.15.0000, 7209.16.0030, 7209.16.0060, 7209.16.0090, 7209.17.0030, 7209.17.0060, 7209.17.0090, 7209.18.1530, 7209.18.1560, 7209.18.2550, 7209.18.6000, 7209.25.0000, 7209.26.0000, 7209.27.0000, 7209.28.0000, 7209.90.0000, 7210.70.3000, 7210.90.9000, 7211.23.1500, 7211.23.2000, 7211.23.3000, 7211.23.4500, 7211.23.6030, 7211.23.6060, 7211.23.6085, 7211.29.2030, 7211.29.2090, 7211.29.4500, 7211.29.6030, 7211.29.6080, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7215.50.0015, 7215.50.0060, 7215.50.0090, 7215.90.5000, 7217.10.1000, 7217.10.2000, 7217.10.3000, 7217.10.7000, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090. Included in this review are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded from this review is certain shadow mask steel, i.e., aluminum-killed, cold-rolled steel coil that is open-coil annealed, has a carbon content of less than 0.002 percent, is of 0.003 to 0.012 inch in thickness, 15 to 30 inches in width, and has an ultra flat, isotropic surface.

The review of "certain corrosion-resistant carbon steel flat products" covers flat-rolled carbon steel products, of rectangular shape, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTS under item numbers 7210.30.0030, 7210.30.0060, 7210.41.0000, 7210.49.0030, 7210.49.0090, 7210.61.0000, 7210.69.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.1000, 7210.90.6000, 7210.90.9000, 7212.20.0000, 7212.30.1030, 7212.30.1090, 7212.30.3000, 7212.30.5000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7212.60.0000, 7215.90.1000, 7215.90.3000, 7215.90.5000, 7217.20.1500, 7217.30.1530, 7217.30.1560, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090. Included in this review are flat-rolled products of non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded from this review are flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead ("terne plate"), or both chromium and chromium oxides ("tin-free steel"), whether or not painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating. Also excluded from this review are clad products in straight lengths of 0.1875 inch or more in composite thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness. Also excluded from this review are certain clad stainless flat-rolled products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 millimeters in composite thickness that consist of a carbon steel flat-rolled product clad on both sides with stainless steel in a 20%–60%–20% ratio.

These HTS item numbers are provided for convenience and U.S.

Customs purposes. The written descriptions remain dispositive.

Verification

From January 23 through January 25, 2002, the Department conducted a verification at the offices of POSCO in Pohang, Korea. For a description of the Department's findings, *see Memorandum from Catherine Bertrand to James Doyle*, dated February 5, 2002.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to these administrative reviews are addressed in the "Issues and Decision Memorandum" ("Decision Memo") from Joseph A. Spetrini, Deputy Assistant Secretary for Import Administration to Faryar Shirzad, Assistant Secretary for Import Administration, dated March 11, 2002, which is hereby adopted by this notice. A list of the issues which parties have raised and to which we have responded, all of which are in the Decision Memo, is attached to this notice as an Appendix. Parties can find a complete discussion of all issues raised in these reviews and the corresponding recommendations in this public memorandum which is on file at the U.S. Department of Commerce, in the Central Records Unit, in room B–099. In addition, a complete version of the Decision Memo, accessible in B–099 and on the Web at *http://ia.ita.doc.gov*. The paper copy and electronic version of the Decision Memorandum are identical in content.

Sales Below Cost in the Home Market

As discussed in more detail in the Preliminary Results, the Department disregarded home market below-cost sales that failed the cost test for POSCO, Dongbu, and Union in these final results of review.

Changes Since the Preliminary Results

Based on our analysis of comments received, we have made certain changes in the margin calculations. We have also corrected certain programming and clerical errors in our preliminary results, where applicable. Any alleged programming or clerical errors with which we do not agree are discussed in the relevant sections of the Decision Memo, accessible in B–099 and on the Web at *http://ia.ita.doc.gov*. A summary of these adjustments is discussed below:

1. We adjusted respondents' indirect selling expense factors with respect to the deduction of imputed credit expense. *See* Comment 1 of the Decision Memo.

2. We additionally adjusted POSCO's indirect selling expense factor by disallowing its claimed long-term interest income offset. *See* Comment 2 of the Decision Memorandum.

3. We are excluding overruns from the calculation of Union's normal value. *See* Comment 7 of the Decision Memorandum.

Final Results of the Reviews

We determine that the following percentage weighted-average margins exist for the reviewed companies during the period August 1, 1999, through December 31, 1999 (for cold-rolled products) or August 1, 1999, through July 31, 2000 (for corrosion resistant products):

CERTAIN COLD-ROLLED CARBON STEEL FLAT PRODUCTS

Producer/Manufacturer/Exporter	Weighted-average margin
Dongbu	4.09
The POSCO Group	3.06
Union	1.05

CERTAIN CORROSION-RESISTANT CARBON STEEL FLAT PRODUCTS

Producer/Manufacturer/Exporter	Weighted-average margin
Dongbu	0.26
SeAH	0
The POSCO Group	0.64
Union	1.31

The Department shall determine, and the U.S. Customs Service ("Customs") shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b), we have calculated exporter/importer-specific assessment rates. With respect to both export price and constructed export price sales, we divided the total dumping margins for the reviewed sales by the total entered value of those reviewed sales for each importer. We will direct Customs to assess the resulting percentage margins against the entered Customs values for the subject merchandise on each of that importer's entries under the relevant order during the review period.

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of this notice of final results of administrative reviews for all shipments of cold-rolled and corrosion-resistant carbon steel flat products from Korea entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Act: (1) The cash deposit rates for the reviewed companies will be the rates shown above except that, for firms whose weighted-average margins are less than 0.5 percent and therefore *de minimis*, the Department shall require no deposit of estimated antidumping duties; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less than fair value ("LTFV") investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 17.70 percent (for certain corrosion-resistant carbon steel flat products). This rate is the "all others" rates from the LTFV investigation. *See Antidumping Duty Orders on Certain Cold-Rolled Carbon Steel Flat Products and Certain Corrosion-Resistant Carbon Steel Flat Products from Korea*, 58 FR 44159 (August 19, 1993). As the Department revoked the anti-dumping order on cold-rolled carbon steel flat products from Korea pursuant to section 751(d)(2) of the Act, effective January 1, 2000, there is no longer suspension of liquidation or cash deposit requirements for entries of that merchandise.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: March 11, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

Silicon Metal from Brazil: Amended Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Amended Final Results of Antidumping Duty Administrative Review.

SUMMARY: We are amending our final results of the 1999–2000 administrative review of the antidumping duty order on silicon metal from Brazil, published on February 12, 2002 (67 FR 6488), to reflect the correction of ministerial errors made in the final results. The period covered by these amended final results of review is July 1, 1999 through June 30, 2000.

EFFECTIVE DATE: March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Maisha Cryor, AD/CVD Enforcement, Office 4, Group II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., N.W., Washington, D.C. 20230; telephone: (202) 482–5831.

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR part 351 (2000).

Background:

On August 6, 2001, the Department of Commerce (the Department) published the preliminary results of the 1999–2000 administrative review of the antidumping duty order on silicon metal from Brazil. The Department published the final results of review on February 12, 2002. See Silicon Metal from Brazil; Final Results of Antidumping Duty Administrative Review, 67 FR 6488 (February 12, 2002) (Final Results).

On February 25, 2002, we received timely allegations from Companhia Brasileira Carbureto de Calcio (CBCC) (a respondent) that the Department made ministerial errors in the final results of review regarding CBCC. On February 25, 2002, we received timely allegations from American Silicon Technologies and Elkem Metals Company (collectively petitioners) that the Department made ministerial errors in the final results of review regarding the "all others" rate. On March 4, 2002, we received a timely reply from petitioners regarding CBCC's ministerial error comments.

Scope of Review

The merchandise covered by this administrative review is silicon metal from Brazil containing at least 96.00 percent but less than 99.99 percent silicon by weight. Also covered by this administrative review is silicon metal from Brazil containing between 89.00 and 96.00 percent silicon by weight but which contains more aluminum than the silicon metal containing at least 96.00 percent but less than 99.99 percent silicon by weight. Silicon metal is currently provided for under subheadings 2804.69.10 and 2804.69.50 of the Harmonized Tariff Schedule (HTS) as a chemical product, but is commonly referred to as a metal. Semiconductor grade silicon (silicon metal containing by weight not less than 99.99 percent silicon and provided for in subheading 2804.61.00 of the HTS) is not subject to the order. Although the HTS item numbers are provided for convenience and for U.S. Customs purposes, the written description remains dispositive.

Amendment of Final Results

Comment 1: CBCC states that the Department erroneously applied adverse facts available (AFA) to the shipment date of one of its U.S. sales. CBCC contends that although the Department intended to use the date of the invoice to calculate the imputed U.S. credit expense for this sale, the Department erroneously applied AFA to the shipment date. CBCC urges the Department to correct this ministerial error.

Department's Position: After a review of CBCC's allegation, we agree with CBCC and have corrected this matter in the margin calculation program. See Memorandum to The File through Thomas F. Futtner from Maisha Cryor: Companhia Brasileira Carbureto De Calcio: Calculations for the Amended Final Results of the 1999–2000 Antidumping Duty Administrative Review of Silicon Metal From Brazil, March 11, 2002. We note that correcting this error has no effect on the outcome of CBCC's margin.

Comment 2: CBCC contends that the Department mistakenly used a simple interest formula to calculate CBCC's imputed credit expense in the home market. CBCC notes that although it is making this allegation, the comment is also applicable to the margin calculations of Rima Industrial SA (Rima), Companhia Ferroligas Minas Gerais – Minasligas (Minasligas) and Ligas de Aluminia S.A. (LIASA), the other respondents in this review. CBCC contends that where interest is calculated on a daily basis, a compound, not simple, interest formula should be used. CBCC argues that where the interest rate is high, such as in Brazil, only the compound interest formula yields the true cost of money and is the only method used in day-to-day commercial transactions. CBCC urges the Department to correct this matter in CBCC's, as well as the other respondents, home market credit calculations.

Petitioners disagree with CBCC. Petitioners argue that because the Department had no intention of applying a compound interest formula, the Department's use of a simple interest formula was a deliberate choice of methodology and not a ministerial error.

Department's Position: After a careful review of CBCC's allegation, we have concluded that it does not merit treatment as a ministerial error under sections 19 CFR 351.224(f) and (g) of the

VOL
67
ISS
52
MR
18
2002
UMI

Department's regulations. Section 351.224(f) of the Department's regulations defines ministerial error as "* * * an error in addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication, or the like, and any other similar type of unintentional error which the Secretary considers ministerial." Because the formula used in the Department's calculation of home market credit expense in the Final Results was intentional, CBCC's allegation does not fall under sections 19 CFR 351.224(f) and (g) of the Department's regulations. See Memorandum to The File through Thomas F. Futtner from Maisha Cryor: Companhia Brasileira Carbureto De Calcio: Calculations for the Final Results of the 1999–2000 Antidumping Duty Administrative Review of Silicon Metal From Brazil, February 4, 2002. Therefore, we have not amended the interest formula that was used to calculate home market credit expense in the Final Results.

Comment 3:

Petitioners contend that the Department published the wrong "all others" rate in the Final Results. Petitioners state that in the Final Results, the "all others" rate is 8.10%, while the "all others" rate in the antidumping duty order on silicon metal from Brazil is 91.06%. Petitioners assert that, pursuant to Policy Bulletin 93.1, the Department's policy holds that the "all others rate shall be the all others rate contained in the order."

Department's Position: We agree with petitioners that we mistakenly referred to the "all others" rate as 8.10 percent in the Final Results. Therefore, we have corrected the "all others" rate to reflect 91.06 percent, which is the "all others" rate from the less than fair value investigation.

Amended Final Results

We are amending the final results of the antidumping duty administrative review of silicon metal from Brazil to reflect the corrections of the above-cited ministerial errors. These corrections are in accordance with section 751(h) of the Act and 19 CFR 351.224 of the Department's regulations. These corrections did not change any of the company-specific margins published in the Final Results. We are also correcting the stated "all others" rate which is 91.06 percent.

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) and 777(i) of the Act.

March 11, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

Structural Steel Beams From the Republic of Korea: Notice of Final Results of Changed Circumstances Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Changed Circumstances Antidumping Duty Administrative Review.

SUMMARY: On November 14, 2001, the Department of Commerce ("Department") published the notice of preliminary results of its changed circumstances review examining whether INI Steel Company ("INI") is the successor-in-interest to Inchon Iron & Steel Co., Ltd. ("Inchon") by virtue of its name change. *See Notice of Preliminary Results of Changed Circumstances Antidumping Duty Administrative Review: Structural Steel Beams from the Republic of Korea*, 66 FR 57035 (November 14, 2001) ("*Preliminary Results*"). We have now completed this changed circumstances review in accordance with 19 CFR 351.216 and 351.221(c)(3).

As a result of this review, the Department finds that INI is the successor-in-interest to Inchon, and INI should retain the deposit rate assigned to Inchon by the Department for all entries of the subject merchandise produced or exported by INI.

EFFECTIVE DATE: March 18, 2002.

FOR FURTHER INFORMATION CONTACT: Cheryl Werner or Laurel LaCivita, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–2667 and (202) 482–4243, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR part 351 (2001).

SUPPLEMENTARY INFORMATION:

Background

On October 1, 2001, the Department initiated this changed circumstances review. *See Structural Steel Beams from the Republic of Korea: Notice of Initiation of Changed Circumstances Antidumping Duty Administrative Review*, 66 FR 49929 (October 1, 2001) ("*Notice of Initiation*"). On November 14, 2001, the Department published the preliminary results of its changed circumstances review in the above-named case. *See Preliminary Results* (66 FR 57035). We gave interested parties 21 days to comment on our preliminary results. However, no interested parties have provided comments and no request for a hearing was received by the Department.

Scope of the Review

The products covered by this review include structural steel beams that are doubly-symmetric shapes, whether hot- or cold-rolled, drawn, extruded, formed or finished, having at least one dimension of at least 80 mm (3.2 inches or more), whether of carbon or alloy (other than stainless) steel, and whether or not drilled, punched, notched, painted, coated or clad. These products include, but are not limited to, wide-flange beams ("W" shapes), bearing piles ("HP" shapes), standard beams ("S" or "I" shapes), and M-shapes.

All products that meet the physical and metallurgical descriptions provided above are within the scope of this investigation unless otherwise excluded. The following products are outside and/or specifically excluded from the scope of this investigation: structural steel beams greater than 400 pounds per linear foot or with a web or section height (also known as depth) over 40 inches.

The merchandise subject to this investigation is classified in the Harmonized Tariff Schedule of the United States ("HTSUS") at subheadings: 7216.32.0000, 7216.33.0030, 7216.33.0060, 7216.33.0090, 7216.50.0000, 7216.61.0000, 7216.69.0000, 7216.91.0000, 7216.99.0000, 7228.70.3040, 7228.70.6000. Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise under investigation is dispositive.

Successorship and Final Results of Review

On the basis of the record developed in this proceeding of the changed circumstances review, we determine INI to be the successor-in-interest to Inchon for purposes of determining antidumping duty liability. For a complete discussion of the basis for this decision see the *Preliminary Results* (66 FR 57035). Therefore, INI shall retain the antidumping duty deposit rate assigned to Inchon by the Department in the most recent administrative review of the subject merchandise.

This notice also serves as a final reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Failure to timely notify the Department in writing of the return/destruction of APO material is a sanctionable violation.

We are issuing and publishing this finding and notice in accordance with sections 751(b)(1) and 777(i)(1) of the Act and 19 CFR 351.221(c)(3) and 19 CFR 351.216.

Dated: March 11, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration, Commerce.

Export Trade Certificate of Review

ACTION: Notice of issuance of an amended Export Trade Certificate of Review, Application No. 88–5A012.

SUMMARY: The Department of Commerce has issued an amended Export Trade Certificate of Review to the National Tooling & Machining Association ("NTMA") on March 7, 2002. The original Certificate was issued on October 18, 1988 (53 FR 43140, October 25, 1988) and previously amended on December 4, 1989 (54 FR 51914, December 19, 1989); September 2, 1993 (58 FR 47868, September 13, 1993); May 3, 2000 (65 FR 30073, May 10, 2000); and April 5, 2001 (66 FR 21335, April 30, 2001).

FOR FURTHER INFORMATION CONTACT: Vanessa M. Bachman, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, (202) 482–5131 (this is not a toll-free number), or by e-mail at *oetca@ita.doc.gov*.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR part 325 (2000).

The Office of Export Trading Company Affairs ("OETCA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of the Certification in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

NTMA's Export Trade Certificate of Review has been amended so that the attached list will constitute the "Members" of the Certificate within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2(1)).

The effective date of the amended certificate is December 12, 2001. A copy of the amended certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Dated: March 12, 2002.

Vanessa M. Bachman,

Acting Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 022602H]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of an application to modify an existing scientific research/enhancement permit (1048) and request for comment.

SUMMARY: Notice is hereby given that NMFS has received an application for permit modifications from the Sonoma County Water Agency (SCWA) in Santa Rosa, CA. The modified permit would affect three Evolutionarily Significant Units (ESUs) of threatened salmonids identified in the **SUPPLEMENTARY INFORMATION** section. This document serves to notify the public of the availability of the permit modification application for review and comment before a final approval or disapproval is made by NMFS.

DATES: Written comments on the permit application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific Standard Time on April 17, 2002.

ADDRESSES: Written comments on the modification request should be sent to the appropriate office as indicated below. Comments may also be sent via fax to the number indicated for the request. Comments will not be accepted if submitted via e-mail or the internet. The applications and related documents are available for review in the indicated office, by appointment: For permit 1048: Daniel Logan, Protected Species Division, NMFS, 777 Sonoma Avenue, Room 325, Santa Rosa, CA 95404–6528 (telephone, 707–575–6053, fax: 707–578–3435). Documents may also be reviewed by appointment in the Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910–3226 (telephone, 301–713–1401).

FOR FURTHER INFORMATION CONTACT: Daniel Logan at 707–575–6053, or e-mail: *dan.logan@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) (ESA), is based on a finding that such permits or modifications are: (1) applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222–226).

Those individuals requesting a hearing on an application listed in this document should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

This notice is relevant to the following three threatened salmonid ESUs: threatened California Coastal chinook salmon (*Oncorhynchus tshawytscha*), threatened Central California Coast coho salmon (*Oncorhynchus kisutch*), and threatened Central California Coast steelhead (*Oncorhynchus mykiss*).

Modification Request Received

SCWA requests a modification to permit 1048 for takes of adult and juvenile California Coastal chinook associated with population studies, carcass counts, redd surveys, genetic analyses, and habitat quality evaluation. SCWA proposed to develop and implement a monitoring program to identify long-term population trends and stock size estimates that can be used to assist in the restoration of salmonid populations in the Russian River basin. Presently, permit 1048 authorizes intentional takes of adult and juvenile Central California Coast coho salmon and Central California Coast steelhead for projects within the Russian River basin. This requested modification would add intentional takes of adult and juvenile California Coastal chinook salmon to the SCWA permit.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Announcement of the Initiation of Public Scoping for the Proposed Designation of the Northwestern Hawaiian Islands National Marine Sanctuary

AGENCY: National Marine Sanctuary Program (NMSP), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice.

SUMMARY: On December 4, 2000, Executive Order 13178 established the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, pursuant to the National Marine Sanctuaries Amendments Act of 2000. The Reserve extends approximately 1200 nautical miles long and 100 nautical miles wide. Pursuant to this Act and the Executive Order, NOAA initiated the process to designate the Reserve as a national marine sanctuary by issuing a notice of intent on January 19, 2001 (66 FR 5509). This notice announces the beginning of public scoping pursuant to the National Environmental Policy Act.

The public scoping process, including public scoping meetings, is intended to solicit information and comments on the range and significance of issues related to the designation and management of a Northwestern Hawaiian Islands National Marine Sanctuary. The results of this scoping process will assist NOAA in formulating alternatives for a draft management plan and draft environmental impact statement for the proposed designation. A separate notice containing times, dates, and locations for scoping meetings will be published in the **Federal Register** (and in various local media throughout Hawaii) at a later date, at least fifteen days before the first scoping meeting.

DATES AND ADDRESSES: The public scoping process will start on March 18, 2002, and end on Friday, May 3, 2002. Written comments may be sent to NWHI Coral Reef Ecosystem Reserve, 6700 Kalaniana'ole Highway, #215, Honolulu, Hawaii 96825; faxed to (808) 397–2662; or emailed to nwhi@noaa.gov. Comments will be available for public review at the office address above. Summaries of public comments from initial scoping meetings will be available at hawaiireef.noaa.gov. Scoping meetings are expected to be held in April.

FOR FURTHER INFORMATION CONTACT: 'Aulani Wilhelm, (808) 397–2657, nwhi@noaa.gov.

SUPPLEMENTARY INFORMATION: The National Marine Sanctuaries Act (NMSA), 16 U.S.C. 1431 *et seq.*, authorizes the Secretary of Commerce (Secretary) to designate discrete areas of the marine environment as national marine sanctuaries to protect their special conservation, recreational, ecological, historical, cultural, archaeological, scientific, educational, or esthetic qualities. The NMSA is administered by the National Oceanic and Atmospheric Administration (NOAA) through the National Marine Sanctuary Program (NMSP).

On May 26, 2000, the Secretaries of Commerce and the Interior were directed to develop recommendations, working cooperatively with the State of Hawaii and consulting with the Western Pacific Fishery Management Council, for a new, coordinated management regime to increase protection of the coral reef ecosystem of the Northwestern Hawaiian Islands and provide for sustainable use of the area.

Public visioning sessions were held in Hawaii and in Washington, DC in July and August 2000. Over 430 individuals attended the visioning sessions; over 1,000 written comments were received. The results of the visioning sessions revealed a universally high regard for the NWHI, for a variety of reasons including values of biology, wilderness, culture, commerce/economy, scientific, education, and recreation. Threats that were identified included at-risk species, human intrusions and abuses, future intrusion and abuse, atmospheric and oceanic changes, invasive species, and extractive or invasive research.

In November 2000, the National Marine Sanctuaries Amendments Act of 2000 (Act), Public Law 106–513 was signed into law. Section 6(g) of the Act authorized the President, after consultation with the Governor of the State of Hawaii, to designate any Northwestern Hawaiian Islands coral reef or coral reef ecosystem as a coral reef reserve to be managed by the Secretary of Commerce. On December 4, 2000, Executive Order 13178 was issued establishing the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve), pursuant to the Act. The purpose of the Reserve is to ensure the comprehensive, strong, and lasting protection of the coral reef ecosystem and related marine resource and species of the Northwestern Hawaiian Islands. The Reserve extends approximately 1200 nautical miles long and 100 nautical miles wide. The Reserve is adjacent to and seaward of the seaward boundaries of the State of Hawaii and the Midway Atoll National Wildlife Refuge, and overlays the Hawaiian Islands National Wildlife Refuge to the extent that the Refuge extends beyond the seaward boundaries of the State of Hawaii. The Executive Order contains a number of conservation measures that restrict certain activities throughout the Reserve. As part of the establishment of the Reserve, the Executive Order also created fifteen Reserve Preservation Areas (RPAs) in which all consumptive or extractive uses are prohibited, with limited exceptions.

Subsequent to issuance of Executive Order 13178, a thirty-day public comment period was held. During the comment period, seven public hearings were held throughout the main Hawaiian Islands and in Washington, DC to accept written and oral comments. Approximately 8,400 comments were received and included both original (about 500 letters) and form letter comments from around the country with a wide range of opinions.

After close of the comment period, Executive Order 13196 was issued on January 18, 2001, which revised certain conservation measures and RPAs, and finalized establishment of the Reserve. (Executive Orders 13178 and 13196 will hereafter be referred to as the Executive Order).

The Reserve provides immediate added protection and coordinated management for the NWHI coral reef ecosystem and marine environment pending designation of the Reserve as a national marine sanctuary. The Act directs the Secretary, until the reserve is designated as a National Marine Sanctuary, to manage the Reserve consistent with the purposes and policies of the National Marine Sanctuaries Act (NMSA). The Executive Order directs the Secretary to develop a Reserve Operations Plan (ROP) to govern the management of the Reserve to address priority issues (e.g., marine debris, research and monitoring, education, enforcement). The ROP will govern NOAA's management of the Reserve pending designation of a marine sanctuary and will be incorporated into a long-term sanctuary management plan upon successful completion of the designation process.

The Act and Executive Order require the Secretary to initiate the process to designate the Reserve as a National Marine Sanctuary under the applicable provisions of section 303 and 304 of the NMSA (16 U.S.C. 1433 and 1434). Sections 303 and 304 provide specific procedures and requirements for designating a sanctuary, including requiring the preparation of an environmental impact statement pursuant to the National Environmental Policy Act (NEPA). Designation is an open, public process with numerous opportunities for public input. In designating and managing the sanctuary, the Secretary shall also consider the advice and recommendations of the Reserve/Sanctuary Advisory Council established in March, 2001, pursuant to the Act and Executive Order. As part of the process, NOAA shall, in consultation with the Governor of the State of Hawaii, determine whether State waters should be included as part of the sanctuary.

By this notice, NOAA, on behalf of the Secretary, announces the initiation of scoping for the proposed NWHI sanctuary designation. Scoping is the initial process intended to solicit information and comments on the range and significance of issues related to the designation and management of a Northwestern Hawaiian Islands National Marine Sanctuary. The results of this scoping process will assist NOAA in formulating alternatives for a draft management plan and draft environmental impact statement for the proposed designation.

NOAA encourages the public and interested parties to submit (via mail, e-mail, or fax) comments and to attend public scoping meetings, which will be held in April. Specific dates and locations for scoping meetings will be provided in separate notices at least 15 days before the first scoping meeting.

Authority: 16 U.S.C. Section 1431 *et seq.*, Pub.L. 106–513.

Dated: March 12, 2002.

(Federal Domestic Assistance Catalog Number 11.429 Marine Sanctuary Program)

Jamison S. Hawkins,

Deputy Assistant Administrator for Ocean Services and Coastal Zone Management.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Availability of the Draft Reserve Operations Plan for the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve for Public Comment

AGENCY: National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice; request for public comment.

SUMMARY: On December 4, 2000, and January 18, 2001, Executive Orders 13178 and 13196 (hereinafter Executive Order) were issued, establishing the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve), pursuant to the National Marine Sanctuaries Amendments Act of 2000. The Reserve extends approximately 1200 nautical miles long and 100 nautical miles wide. Pursuant to the Executive Order, NOAA has prepared a draft Reserve Operations Plan, which provides a guide for management of the Reserve during a designation process that will consider the Northwestern Hawaiian Islands as a National Marine Sanctuary. This notice announces the availability of the draft Reserve Operations Plan for public review. After the close of the comment period, NOAA will consider the comments received and make necessary changes. A final Reserve Operations Plan is expected to be issued by Summer 2002.

DATES AND ADDRESSES: Comments on the draft Reserve Operations Plan must be received no later than May 17, 2002. Written comments may be sent to NWHI Coral Reef Ecosystem Reserve, 6700 Kalaniana'ole Highway, #215, Honolulu, Hawaii 96825; faxed to (808) 397–2662; or emailed to nwhi@noaa.gov. Comments will be available for public review at the office address above.

FOR FURTHER INFORMATION CONTACT: 'Aulani Wilhelm, (808) 397–2657, nwhi@noaa.gov.

SUPPLEMENTARY INFORMATION: The Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve) was established by Executive Orders 13178 and 13196 (herein after Executive Order). Pursuant to the Executive Order, NOAA has prepared a draft Reserve Operations Plan, which provides a guide for management of the Reserve during a process that will consider the Northwestern Hawaiian Islands for designation as a National Marine Sanctuary. This notice announces the availability of the draft Reserve Operations Plan for public review.

The Executive Order directs that the draft Reserve Operations Plan "shall be directed at priority issues and actions." The Executive Order also directs that the Reserve Operations Plan should address such issues as coordinated management among the agencies with relevant jurisdiction in the Northwestern Hawaiian Islands, clean up and prevention of marine debris, restoration of degraded or injured resources, research and education, enforcement and surveillance, identification and coordination with Native Hawaiian interests on cultural uses and locations, and designation of the Reserve as a National Marine Sanctuary.

In response to the Executive Order, NOS has prepared the draft Reserve Operations Plan, following templates used for the management plans of the National Marine Sanctuary Program. The document is composed of a set of function- and issue-oriented (as identified in the Executive Order) action plans, with supporting documentation. Each action plan focuses on strategies, and outlines what, who, why, when, and how different activities will be conducted. Following is a list of the action plans contained in the draft Reserve Operations Plan:

- Operations: includes interagency coordination, activity and area identification, Reserve/Sanctuary Advisory Council operations, development of fishing caps and permitting procedures, and infrastructure development;
- Education: encompasses all education, outreach, and interpretive projects;
- Cultural Resources: consists of all projects related to Native Hawaiian culture, uses, and locations;
- Research and Monitoring: contains all projects related to research and monitoring;
- Mapping: covers all projects related to developing charts and maps of the NWHI;
- Restoration: contains projects related to restoration;
- Emergency Response and Damage Assessment: covers projects related to contingency planning and response;
- Marine Debris: consists of projects related to the removal of marine debris from the NWHI;
- Enforcement: includes air and sea support for existing enforcement operations and expansion of a vessel monitoring system; and
- Designation: comprised of all projects related to the Sanctuary designation process.

The Reserve Operations Plan will provide a guide for management of the Reserve during a process that will consider the Northwestern Hawaiian Islands for designation as a National Marine Sanctuary. The designation process has been initiated (66 FR 5509). Information about the scoping process and its opportunities for public comment will be provided in a separate notice to the **Federal Register**.

Authority: Pub.L. 106–513; Executive Order 13178; and Executive Order 13196.

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Leader, Regulatory Information Management, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507 (j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by April 8, 2002.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Lauren Wittenberg, Desk Officer: Department of Education, Office of Management and Budget; 725 17th Street, NW, Room 10235, New Executive Office Building, Washington, DC 20503 or electronically mailed to

Internet address *Lauren.Wittenberg@omb.eop.gov* or faxed to (202) 395–6974.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, *e.g.*, new, revision, extension, existing or reinstatement; (2) title; (3) summary of the collection; (4) description of the need for, and proposed use of, the information; (5) respondents and frequency of collection; and (6) reporting and/or recordkeeping burden. ED invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on respondents, including through the use of information technology.

Dated: March 13, 2002.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of Elementary and Secondary Education

Type of Review: New.

Title: State Plan Application for the McKinney-Vento Homeless Assistance Act.

Abstract: State Education Agencies will submit information for a single State application to the Department to be able to receive formula grant funds under Title X Part C of the No Child Left Behind Act of 2001 (NCLB). The purpose of the Education for Homeless Children and Youth Program is to improve the educational outcomes for children and youth in homeless situations. The statues for this program are designed to ensure all homeless children and youth have equal access to public school education and for States and local educational agencies (LEAs) to review and revise policies and regulations to remove barriers to enrolling, attendance and academic achievement.

Additional Information: The Department of Education requests emergency clearance due to an unanticipated event in the signing of the law. This delay required the Office of Elementary and Secondary Education (OESE) to take time to review the statutes and determine what programs, as required by law, should be reviewed under a consolidated State application and what programs should be under a single State plan application. The McKinney-Vento Homeless Assistance Act was not required to be included in the consolidated plan application packet and OESE determined that it would be best to require States to submit a separate application plan. On March 6, 2002, the Department published in the **Federal Register** (Vol. 67, No. 44) a notice for the OESE consolidated applications with an anticipated date of May 28, 2002 for States to submit applications. This would necessitate mailing applications to States no later than mid-April, 2002. Without emergency processing, States will not have sufficient time to submit the requested single State application by the end of May and would face a hardship if they must wait to implement the required provisions of the NCLB legislation identified in this single State plan document.

Frequency: One time.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden: Responses: 54.
